could be adjusted to allow for signal strength, noise and variations in
output characteristics of different radios.

I suppose someone reasonably competent in electronic design, not me :(,
could "re-invent" such a thing without raising a sweat.

statements?

So lying Nursie, are you going to admit you are a liar and an
unmitigated blowhard?

> I say your nads are in the vise.

At least I have a set, Nursie.

//////////////////

Yeah, Rogie. You "have a set", alright.
Spit em' out.
Lloyd wants them back.

Says a moron who miscorrects the correct spelling of "its."

Hint: "it's" is a contraction of "it is," while "its" is the
possessive of "it."

Got it, Mr. Woger?

An LED would seem the ideal solution.

I also have a significant hearing disability. My hearing chart shows my
hearing drops off at about 1.5 kHz and is down 40 dB at 10 kHz. CW
solution is to use RIT shifted so I hear about a 500 Hz tone.

"Lloyd" <radioc...@lloydsradioclub.net> answered himself in:

> LOL, thats funny, but then Wogie always so funny.

Not half as funny as your pig-like face, Davies the 31 year old VIRGIN.

LARDASS LLOYD AUTISM DAVIES' ENGLISH DICTIONARY

breaddead" - LLoyd hasn't got anything upstairs in the oven
"defenseive" - Lardass is "defensive" of his ignorance
"counter-offenseive" - When LARDASS LLoyds attack
"nights" - Athens ASSHOLE was referring to last "night's" masturbation
session
"I forget to set the playlist in Winamp to repeat!" - Mongolloyd also
"forgets" the use of past tense, maybe he forgot!
"Techincal" - Lloyd just hates those "technical" things
"Dalkes" - Lloyd's granddad remembers when movies became "talkies" too
bad LARDASS learned to Dalk <sic>
"That it!" - When Mongolloyds get real mad, they talk like Tor Johnson
"Woger" - LARDASS closely identifies with Elmer Fudd with his lack of
hair and all
"decide on weather or not" - It's always "stormy weather" with Lloyd
deciding "whether" or not to use correct English
"can not" - Mongolloyd is wondering how he "cannot" seem to get ahead
in life
"is'nt" - "Isn't" LARDASS cute when he is mad?
"PAINFULL" - How LARDASS' bathroom scale feels when he steps on it in
the morning, real "painful"
"I wish for Roger Wisemand" - Lloyd liked thosed thingd ford Rogerd
"alot" - Davies dreams he can communicate in English a lot
"thier" - Lavender Lloyd sure does lisp after a night behind the
dumpster
"dont" - Lloyd says "dont", the rest of the world says "don't"
"Isreal" - Is FATASS Lloyd's retardation for real, or can he blame
Israel?
"juist jelous" "extermenate" - A three for one post Athens Asshole
axiom
"footting" - What LARDASS doesn't have, an equal "footing" anywhere
"Cant" - Emmanuel?
"th" - When Lloyd gets nervous, he stutte, er stutters
"enfighting" - Lloyd's two brain cells are infighting for control of
his stupidity
"YOU STUPID JEW!" - Wasn't Jesus Jewish, so called Christian LLoyd?

"Tonite" - There's nothing in Lloyd's brain "tonight" or any night
"segmant" - What Lloyd's communications are, only sentence "segments"
"I just listening" - Too bad he doesn't listen to his poor English
"buffon" - The Athens, Alabama "buffoon" strikes again!
"museium" - Where LARDASS LLoyd keeps his "muse"
"nastey" - How everybody describes LARDASS' body stench, especially in the ghetto
"loose" - Lloyd's description of his spinchter muscles...
"wont" - Lloyd refuses to learn English, it's Lloyd's "wont"
"awhile" - It will be "a while" before Davies gets a clue
"freinds" - Lloyd's conglomeration of "friends" and "fiends"
"thier" - "There" just isn't any hope for LARDASS Lloyd "ill-educated" Davies
"backstabers" - Lloyd's version of the OJays' hit
"becuase" - Home of the "Deliverance Extras" spelling by LARDASS Lloyd
"obselete" - What LARDASS thinking is to him, others see it as 'obsolete'.....
"belive" - What fools like LARDASS Lloyd "believes"
"thier" - Ill-educated Xtian LARDASS Lloyd shows off his language skills!
"marshalls" - Mongolloyd spell "marshals" real good!
Wisemand - LARDASSd fucksd upd againd
"compay" - Mongolloyd never gets any female "compay," while others do get "company"
" But when we are winning," DUMBFUCK, YOU have NEVER WON anything in your miserable life!
"and do the nasty!" You don't really know what that means, do you, 30 year old VIRGIN?
"It's does" - Mongolloyd use good English
"momnet" - LARDASS Lloyd Davies misses his dead "momnet" for a "moment"
"seriuosly" - Lavender Lad President Mongolloyd wants to be taken "seriously" instead of "seriuosly"
"annouced" - Mongolloyd "announces" his stupidity again
"tonite" - Davies never lets his lack of education stop him from announcing to the world he's a fucking imbecile!
"nite" - When LARDASS Lloyd molests those kids he makes them say "nite, nite" at "night"
"weldare" - Calling Dr. Weldare, LARDASS needs his head out of his FATASS....put it on his welfare bill
"so fuck of" - When Mongolloyds who have man tits talk tough......
"fukcing funney" - Alabama deliverance extra Davies speak
"pictrue" - "Picture" yourself as a Davies Mongolloyd
"isseus" - Davies has "issues" too many to list here
"resortjng" - Is Lloyd from Finland?
"attsxks" - When LARDASS Davies "attacks" he uses illiteracy
"basturds"- What mental illness patient LARDASS Lloyd calls his nurses
"shkt" - Mongolloyd Davies' "Skittles", he likes that "Hershey rainbow"
"law suit" - LARDASS never leaves his HUD apartment with out his law suit
"opinionn" - When LARDASSn postsn whiln drunkn

"intrenet harrasssmint" - Tries to make LARDASS Lloyd's rotting teeth feel fresh
"sneeky" - The teachers always "sneaked" Lloyd through the next grade
"that' wasnet" - LLoyd was out that year of school that they went over English grammar
idiout! - "Lloyid" <sic> strikes out again!
"speling" - Mongolloyd Davies the "spelling" bee champ of the retards!
"reas isseus instaed" - Davies talking out of that cheap beer again
"atttacking" - LARDASS Lloyd stutters when he gets upset.....ttttt.....
"challegne" - When Mongolloyds drink and post
"metnal" - Mongolloyd just doesn't have the "mental" ability to debate......
"debste" - What Lloyd's mommy did to him in the bathtub
"cahllenge" - Mongolloyd speak for "call" and "challenge"
"basturds" - LLoyd ,Amanda's illegitimate "bastard" sure does have a scat fetish
"morsd" - Whend Daviesd drinkd andd postd
"wont" - It is Mongolloyd's "wont" to be stupid, "won't " you let him?
"youd" - Oops, LARDASS did it again!
"poinion" - Must be an Athens Alabama "Deliverance" thing
"Woger Wiseman"- LARDASS Lloyd's got that cocksucker's lisp
"isnt" - "Isn't" LARDASS cute when he slobbers?
"worfh" - Davies' cocksucking lisp has returned
"waset of spaceda" - When Lloyd's only friend Colt 45 malt liquor kicks in
"Oppulant" - The only thing "opulent" in LARDASS is that he is rich in ignorance
"obly" - LARDASS lisp from cocksucking shows when he tries to say his favorite fag artist "Moby"
"wood" - LARDASS LLOYD'S head "would" be made of "wood"
"dserve" - LARDASS lives in that ghetto where they say he sure does "dserve" those pizzas
"frum" - LARDASS LLOYD DAVIES wonders where his real father is "from"
"DISCUST" - Mongolloyd Davies' command of the English language is "disgusting"
"You worthless coward are scared of debating me." - Mongolloyd make good sentence
"jellous" - Most of LARDASS Lloyd's cellulite body is "jealous" of skinny, in shape people
"It just didn't wok out" - When LARDASS tried to stir fry those nutsacks for pizza topping, Pappa John's terminated him saying he didn't "work out".
"entact" - LARDASS' single brain cell isn't "intact" either.
"empahis" - Notice how LARDASS Lloyd's "emphasis" is always on his fucking stupidity.
"Fuck all fo you" - Christian LARDASS Lloyd showing that Jesus spirit.....
"bllod" - How LARDASS Lloyd spells "blood"
"did'nt" - LARDASS "didn't" do very well in school
"PLEASE by a clue" - LARDASS Lloyd's parents couldn't even "buy" him an

education
"extrodinare!" - LARDASS is a moron "Extraordinaire"
"unsubsribe" - Mongolloyd Davies "subscribes" to the theory that
ignorance is bliss...he must be in heaven
"Must've struck a cord" - LARDASS confuses his favorite sex fetish of
tying his penis with a light cord and masturbating to the word "chord".
"dumass" - Dumbass Davies trips and falls in shit again.
"Them two bigtime losers!" - Mongolloyd mentally ill Davies makes good
sentence!
"straming" - Lardass usually has to wash his sheets from the "stream"
of piss when he wets the bed or not given his filthy HUD apartment
"surpassinf" - LARDASS is always "surpassing" his previous levels of
stupidity.
"pleanty" - <guffaw!> "Plenty" of stupidity coming from LARDASS Lloyd.
"Cause i'll have law lock you up and throw away the key!" - Mongolloyd
talk tough!
"pome" - When LARDASS WADSWORTHLESS Stubbyfellow writes a "poem"
"Once she here's my show" - Most people hears a show, LARDASS "here's"
them!
"forgotton" - LARDASS has "forgotten" what he was taught in special Ed
"I want your seriousness" - LARDASS does his take on "I want your sex"
"I did'nt ask for your fucking grammer checking!" - LARDASS Lloyd
revels in his ignorance!
"agrument" - When the voices in LARDASS Lloyd's mentally ill head
collide they have an "argument"
"craetive" - Mongolloyd Davies isn't very "creative" with his
stupidity, however.
"You could have posted it, for we know!" - LARDASS make good sentence!
"bottem" - Mongolloyd likes those little boys' "bottoms" from hanging
with Steve Holsten
"James Wickstrom talked about tonite that out threre, thier Sherriff's
department" - Mongolloyd
shows off those Pulitzer prize writing skills.
"bring yer cents" - Mongolloyd show how he flunked out of school
because he had no "sense"
"You peeks out" - LARDASS Lloyd and stupidity a symbiotic relationship.
"Be thier" - LARDASS Lloyd make good sentence!
"If you pussys have balls you confront me!!! Deep down you are scared
of me. You our jellous
because I am the great almighty Time Lord!!!!
The Time Lord always wins in the end." - Does it really need to be said
about Mongolloyd Davies?
"yerself", "hisself" - LARDASS picked up his language skills or lack
thereof from the
niggers his mommy Amanda serviced.
"I lost TEN POUNDS on my diet simce first of the year!" - Too bad
LARDASS didn't gain any language skills
"The best Amatuer Radio talk show ever!" - Chosen 5 to 1 over literacy
by other ill-educated morons and Mongolloyd
"All of my Daleks have been dispached!" - Too bad some extra brain

neurons haven't, Mongolloyd.
"satillite" - When LARDASS met the space between his ears
"Tuseday" - LARDASS' usual day to wear his pink tutu
"I am 210 punds now!" - LARDASS lies and fucks up again!
"jelous" - LARDASS Lloyd is "jealous" of those who can spell, read, and write.
"peoples" - LARDASS Lloyd the "people's" choice of the Biggest L-O-S-E-R!
"curtians" - LARDASS LLOYD DAVIES uses those "curtains" in his filthy apartment as a masturbation rag
"depsised" - Mongolloyd Davies, who the entire real ham community has "despised" for his lack of ability
to pass a simple 5 wpm code test or General theory
"sicker" - When Lloyd Davies has a mouth full of cum he can't say "sticker"
"liceneses" - Mongolloyd Davies has one of those exclusive "licenses" on stupidity
"isseus" - LARDASS has "issues" with people of intelligence.
"conquor" - Mentally ill LARDASS Lloyd has yet to "conquer" his obesity and mental illness
"crakheads" - Retard Davies make good sentence!
"servent" - Roger Wiseman's willing "servant" makes another gaffe.
"lesibens" - When Benjamins take the wild side...the "lesbians" don't care, though!
"Los Angles" - Mongolloyd has the wrong "angle" about "Los Angeles"
"busses" - Do they take the motored "buses" or do they take the
"thier" - You say "their," Lardass says "thier".... to-may-to, to-mah-to.....
"eductional" - LARDASS Lloyd's writing is "educational" on how severe illiteracy is in his family.
"She sounded like she really whappy to here from me." - Mongolloyd get rejected again!
"This is morning I weigh at 207 pounds. This should prove to you, that I can succeed if I put my
mind to it. I know some your stupid critics can't see that, but I'm not here to please you." -
- LARDASS makes the "huh?" factor rise.
"This looks much more like sexy Lloyd" - Porky Pig lookalike stubby tubby Davies dreams
he looks like a skinny, tall Billy Zane
"I figured you the thought of me owning..." - Lardass dreams the impossible dream of thought
"I took you a long hour and a several minutes..." - Too bad LARDASS Lloyd didn't take and pass English
"I get a laugh over you!" - Mongolloyd make good sentence!
"did'nt" - "Didn't" Lardass ever pass any school subject?
"Proves to show" - Lavender Lloyd proves he is an imbecile
"It' paid off" - Alcoholic LARDASS Lloyd's bar and utility bills never are though.
"I wear if with" - Davies wears his stupidity well

"You need to get al ife and a job." Mongolloyd retardo Davies needs to get English lessons and
not dream of an "Al ife" with "Al Queda"
"I've never fucking pretending attorneys!" - LARDASSclown Davies never had to pretend to be stupid, either!
"...what your life must me like..." - Mongolloyd's life of pizza delivery and trashcan robots is really something
to want, too, isn't it?
"manor" - Lardassclown Davies' "manners" are like those of a hog....
"Christien" - Poor LARDASS Davies, he's shows why ignorance is bliss in the eyes of the Lord.
"reely" - Mongolloyd Davies is "really" stupid, isn't he?
"please don't imposter me more" - Mongolloyd make good sentence!
"distastful" - A description of LARDASSCLOWN DAVIES' eating habits.
"commnet" - Most people make "comments," ill-educated Lloyd Davies makes "commnets".
"None of you refuse to tell me who you are." - Huh, Mongolloyd?
"Millinium" - Even after a "millennium" LARDASS couldn't be smart!
"afriad" - LARDASSclown Davies isn't too smart, I'm "afraid"
"powerfull" - Mongolloyd Davies sure has a "powerful" command of the English language.
"conquor" - Lardass Lloyd has yet to "conquer" his idiocy.
"I always new that your stupidity would trip you up, Mr. Wiseman."
- I just "knew" Llardass Lloyd couldn't pose as "Christy Davies" without fucking it up and outing himself.
"I have given it some though and decided to come back" - Mongolloyd has never given anything any "thought." (from another "I'm leaving" speech/lie)
"usaul" - As "usual" Lardass lloyd Davies fucks up!
"Secwet Woger " Llardass Llavender Llad Lloyd's been sucking so many cocks he's got a lisp!
"douters" - Even though he has his "doubters", it's "doubtful" Llardass Lloyd has an I.Q. over 70.
"bypolar" - Mongolloyd Davies is a "bipolar bisexual".
"desperite" - Lardass Lloyd is so "desperate" to win at something, anything.
"situtation" - Most people get in "situations, " but not our total fuck-up Lloyd.
"aholt" - Lardass Lloyd usually gets "a hold" of himself on a Saturday night, since he has no date!
"mysteriuos" - Mongolloyd Davies, "mysterious" survivor of a coat hanger abortion attempt.
"I've did" - Most people say " I did"
"Woger" - When cocksucking, lisping fags try to say " Roger."
"for sometime" - Lardass has been a mentally ill retard "for some time" now.
"mommie's" - When Mongolloyds say "Mommy's" as in "Mommy's house."
"drop out" - Lloyd was a High school and college " dropout."
"backpedalling" - "Backpedaling" is what Lardass does a lot of.
"Maybe two years back" - Mongolloyd speak.

"outted" - Lardass Lloyd's illteracy at work.
"I've riddled Woger for years as Arf! Arf!" - Mongolloyd is Arf!Arf!, and his stupidity is no riddle.
"self esteme" - One thng is for sure, Lardass has it..."low self esteem," that is.
"short comings" - Lardass has many, many "shortcomings."
"yahoo" - Lardass always goes into the "Yahoo!" gay chat rooms.
"The truth hurts you see" - So does reading your mangling of the English language, Lardass.
"His stupidity can not be disguised for long." - Lardass' stupidity "cannot" be disquised at all.
"entireity" - Lardass is the embodiment of stupidity in its' "entirety."
"bothe" - Lardass is "both" stupid and retarded.
"got hime" - Lardass has got "him" a case of the dumbass!
"evelope" - Mongolloyd pushes the stupidity "envelope" to the max.
"chiicken" - Lardass Lloyd should eat more "chicken" instead of leftover pizzas then he wouldn't be obese.
"dont" - "Don't" ever improve your English skills, Lardass!
"likign" - Huh? More Mongolloyd Ebonics.
"you ignorant spawn of satin" - Lardass ironically confesses his love of wearing lace!
"powerfull" - Mongolloyd's brain cell isn't "powerful" enough to light a christmas light.
"heresay" - Mongolloyd is a fucking idot, and that's no "hearsay."
"glas" - Lardass Lloyd never uses a "glass" to drink his sticky protein.
"freind" - Dicksucking Davies hasn't got a "friend" in the world.
"yu" - Lardass, "you" really should've gotten a better education!
"Got Brother Stair tuned in here to listen to while sleeping tonite!" - Mongolloyd fucks up again!
"I am not a retrard" - Oh, yes, you are, Lardass!
"Got you in another lie!" - We've "caught you" in another fuckup, Dumbass Davies!
"I am not mentally challenged! I have some pontential." - Mongolloyd is in denial about his imbecility and has the "potential" to become an even bigger jackass!
"did'nt" - Mongolloyd "didn't ever pass Spelling.
"soon all your asses are belong to sherrif" - Mongolloyd fantazises about having sex with his local "sheriff"...
"shure" - We are "sure" you are a fucking moron, Llardass Lloyd!!
"proxie servers" "conecting" - Mongolloyd used "proxy servers" when he "connected" to spam Josh's board.
"enfrocement" - Mongolloyd also fucked up when he spoofed caller ID's and spammed boards, and now law "enforcement" is watching him.
"apoligize" - Mongolloyd's parents should "apologize" for ever siring such a mentally ill retard.
"meagre" - Mongolloyd's "meager" brain can't comprehend English.
"goten" - If only Mongolloyd would've "gotten" an education!
"Prepositioned" - Mongolloyd always gets "propositioned" by nouns and

pronouns!
"temting" - Mongolloyd is as "tempting" as a root canal.
"accept" - Mongolloyd use the wrong word in the wrong place again!
"normaly" - "Normally" Lardass would be passed out from Two bud lites
by now
"red head" - Little Red is shoving his big ole black dickhead in
Lardass' fat piehole.
"Aflack" - Mongolloyd fucks up yet again..www.aflac.com
"Dickionary" - Mongolloyd is almost as bad as his queer lover Holsten
in obsessing about dicks.
"Pnig" - Mongolloyd can "ping" an anvil off of his thick malformed
skull
"pratice" - Lardass has lots of "practice" fucking up.
"dont" - Dicksucking Davies is too stupid to use an apostrophe, isn't
he?
Mongolloyd thinks "Lent" and "lint" are pronounced the same.
"ancinet" - Mongolloyd will be past "ancient" before he gets any pussy.
"harrasment" - Lardass just loves when his fat asshole gets
"harassment" from the drunk black winos!
"persecute" - Mongolloyd "Christy Davies" Attorney-at-Law makes quite
the lapsis calami in his "prosecution".
"fulest" - Little Lloydie is "fullest" when he's done sucking down wino
nutsack goo!
"i'll" "wether" - Mongolloyd, "I'll" just bet you can't decide
"whether" or not to clean your shitty underpants or keep wearing them.
"authroities" - Mongolloyd's familiar with the "authorities" since his
brother has been carted away to jail more times than he can count.
"Perhaps I can Hal on my show too!" - Perhaps you should consider
remedial English, FATASS!
"cannonized" - Mongolloyd thinks somebody will have to be shot out of a
cannon to be "canonized"
"This board is alot better than all them N54 Boards!" - Mongolloyd is
sure overwhelmed, "then", by "all those" words!
"I dont reconnise you opinions" - Mongolloyd "doesn't recognize" his
stupidity, either.
" I donlt care" - Obviously, Lardass, obviously.
"Thats" "benifit" - "That's" one of Lardass' many fuckups. He doesn't
have the "benefit" of having a dictionary.
"I already notice Woger seeing my everywhere" - Drunken fat bastard
Lardass never notices when he fucks up.
"Look, crackhead, I am NOT degenerates!" - Mongolloyd isn't very
literate, either.
"URASE" - Mongolloyd's empty skull never had to be "ERASED" it never
contained anything to begin with.
"I reading the board tonite" - Mongolloyd can only read comic books.
"REMIDER" - Lardass never has to leave a "reminder" of his many fuck
ups.
"jsut" - Mongolloyd is "just" a mentally ill retard.
"Im" - "I'm" sure Lardass isn't getting any pussy.
"theere" - Mongolloyd isn't all "there".

"Activatiuons" - Lardass Mongolloyd always has his stupidity
"activations" ready to show themselves.
"steganographic" - Mongolloyd takes his "stenographic" duties as a
pizza order taker seriously.
Woger" - Mongolloyd shows off his cocksucking lisp!
"dogy" - Mongolloyd likes it "doggy" style. Receiving, it, that is.
"Tonigjht" - Mongolloyd will be on here "tonight" because he can never
get a woman.
"1987 rqadio shack reciever" - Mongolloyd the cheapass makes good
spell!
"neber" - Mongolloyd will "NEVER" get laid!
"yourslelf" - Go fuck "yourself", Mongolloyd!
"You must really hate be because" - Lardassed Mongolloyd really hates
the English language, too!
"Woger" - Mongolloyd shows off his cocksucking lisp again!
"Roger Wiseman better know as the" - Mongolloyd, better "known" as the
eternal virgin and mentally ill retard.
"Secwet" - Mongolloyd is queer and proud.
"turd in the punch bowel." - Mongolloyd knows about bowels, not
"bowls". Mongolloyd eats on the floor and in bowel cavities.
"he was refused by the Air Force in 1978" - Mongolloyd, how does one
get "refused" by any military? Especially when he was honorably
discharged a year earlier?
"was sent for a 90 observation period " Dumbfucking fuckhead, what is a
90 observation period???? BWHAHAHAHAHA
"shoudl" - Mongolloyd "should" really shut the fuck up.
"Here is" - Here "are" some more examples why Lardass is a fucking
imbecile.
"Woger" - Lardass is here and QUEER!
"Goddman that Lloyd is sexy!" - But that Mongolloyd is so sexy he is
still a VIRGIN. BWHAHAHA!!!!!!!!!!
"laugheds" - Mongolloyd was always "laughed" at.
"I have off this newsgroup for over 2 years!" - Mongolloyd should "off"
himself, instead of "being off".
"I have my own internet Talk show, what can be said about your useless
self." - Mongolloyd has no listeners or anything useful to say. He's so
"useless,"
"that's what can be said" about him.
"You are very useless on here, jon" - While Mongolloyd Davies is
useless on and offline.
"Even used up toilet paper has a use, you sure dont!" - Most people
flush "used up toilet paper, " Mongolloyd eats used up toilet paper,
"don't" he?
"I'll shot to kill" - Lardass, you couldn't handle a cap gun.
"Re,omder" - Lardass always leaves us a "reminder" that he is as smart
as a rock.

"resuce" - Mongolloyd can't "rescue" himself from his own stupidity!

"maocked" - Mongolloyd fucks up again, no wonder he is "mocked" for his
stupidity!!!

"tipe" - If Mongolloyd the Lardass would pull his malformed head out of his ass, he could "type" correctly.

"pregant" - With his looks, Lardass Davies never has to worry about getting a girl "pregnant."
"when thet saw" - And when "they" saw Lardass' whimpering, they knew he was a big fucking PUSSY.
"Mayeb" - "Maybe" somebody will feel sorry for you and give you a charity fuck, but it's doubtful, Mongolloyd!
"tmorrow" - Mongolloyd will never get a woman, "tomorrow" or any other day.
"Palastine" - Mongolloyd couldn't find "Palestine" on a fucking map or anyplace else.
"Woger the notsowiseman" - Mongolloyd the eternal idiot fucks up and shows off his cocksucking lisp again.
"I hope kills himself" - Mongolloyd wishes he had killed himself.
"agruement." - Mongolloyd is a fucking imbecile, no "argument."
"You're posts" - BWHAHAHAHAHA.."your" fucking stupidity stands out as well, you fucking idiotic fat fuck.
"Globin Woger" - Mongolloyd the 5'6 280 pound garden gnome makes good spell and IKYABWAI.
"Go aheah" - Mongolloyd never can get "ahead" of his stupidity.
"ssomething" - Mongolloyd "ssure" (his spelling) did fuck up again!
"pictures show email them" - Lardass "should" know better then to "show" his stupidity.
"mor" - Mongolloyd gets "more" stupid by the minute.
"celbrating" - Mongolloyd is "celebrating" his stupidity.
"palgues" - Lardass Davies is a "plague" that needs exterminated.
"have the nerver" - Lardassed Mongolloyd "has the nerve" to criticize others.
"Golen" - Mongolloyd's fuckups are "golden" ammunition against the dumb fat fuck.
"posts my closet" - Lardass "by" default fucks up again.
"Froce" - Mongolloyd tires to spell "force", what his drunk daddy did with his dick on Mongolloyd's asshole.
"AUTHROIXATION" - Mongolloyd Davies never needs "auhorization" to be idiotic.
"morrse" - Lardass can't pass 5 wpm "Morse" code.
"netwerk" - Mongolloyd is part of the idiot "network."
"characture" - Mongolloyd is a "character"..a villiage idiot.
"Learn to spelll" - Lardass fucks up again!
"describes to the T" - Mongolloyd is an IDIOT, that "describes him to a T."
"a peace of me" - We take a "piece" out of Lardass' ample ass on a daily basis.
"bus fair" - Lardass can't pay his own bills on time , much less anybody's "bus fare."
"waht" - "What" do you know, Lardass fucks up again!
"to pay for you" - Lardass you can't "pay for your" own expenses.
"HELLUVA ALOT" - Lardass' English skills are not "a Hell of a Lot" of help to him.

"mentionm" - Lardass never wants us to "mention" or point out his numerous fuck ups.
"your are" - Mongolloyd, "you are" one of the stupidest assholes on the internet.
"alone may to much " - Lardass's sentence construction "alone MAY be too much" to his tiny brain to handle!

You can always tell when you are getting to Woger. He gets to flustered to type." - Mongolloyd must be getting flustered, "too," BWHAHAHAHAHAHA!!!!!!!

"Woger make false bad spell" - Lardass "makes" and ASS of himself, again.

""Mongolloyd". Isn't even word," - BWHAHAHAHA Mongolloyd is English-impaired.
"mentaly illed" - Mongolloyd knows all about being "mentally ill."

"Woger" "femine" - Mongolloyd shows his "feminine" side when he lusts for "Roger's" cock.
"Wheer" - Mongolloyd always wonders "where" his brain is.
"scooterr" - Mongolloyd never could have a "scooter" his fatass was too heavy for one, even if they had semi-truck shocks and springs.
"stal" - Mongolloyd's "brain" is permanently on "stall".
"aymore" - Mongolloyd never tries, he just whines "anymore".
"talkjing" - Lardass never has any women "talking" to him.
"cant" - Mongolloyd "can't" use correct punctuation.
"im" - Mongolloyd, "I'm" sure you will die a virgin, you dumbass!
"i" - Lardass, "I" know you are a fat whining cunt.
"may as wel" - Mongolloyd "may as well" kill himself.
"lefty alone" - Lardass masturbates with which hand, "his "left alone."
"NIM Busters has run its coarse" - Of "course," Mongolloyd fucks up his sentence!
"Wlardass" - "WMongolloyd" "wfucks" "wup" "Wagain"....

"Wheating" - Lardass has "cheated" on everyhting he's every tried to do, since he's so incompetent and inferior, and he still fucks up.

"Wabbi Woger" - Mongolloyd thinks any dick is a good dick to suck.
"Woger" - Mongolloyd's been sucking dicks again
"others" - Mongolloyd can't fathom "others'" hatred for his useless fat ass!

"You can always tell when you are getting to Woger. He gets to flustered to type." - Mongolloyd must be getting flustered, "too," BWHAHAHAHAHAHA!!!!!!!
"imput" - Mongolloyd's brain has no "input"! Mongolloyd one stupid fat faggot.
"Hundred's" - Mongolloyd couldn't count to one much less "hundreds"
"dopesnt" - Mongolloyd "doesn't" have a command of the English language!
"Wait till" - Mongolloyd we will "wait until" you compose a coherent

sentence, but it will be a long wait.
"We wn't" - Lardass Davies, you should fuck off with your stupidity so "we won't" see it ever again.
"Woger is now awoke" - Mongolloyd is never "awake."
"is too stupid to under awoke" - oh the irony, Mongolloyd!
"I shits my pants" - Mongoolloyd sure does and eats it, too!
"treasing" - Mongolloyd likes "teasing" nigger assholes with his syphilitic tongue.
"It's being TOS even" -Mongolloyd the only thing you TOS is your tiny dick!
"peoples" - Mongolloyd always steals other "people's" lines!
"I really wish Steve wasn't suck a pussy and would come back to this board" - Mongolloyd makes good fucked up sentence! Mongolloyd made a Freudian slip when he used "suck" instead of "such".
"I think it is long since past time when you closed this shitty board!" -Mongolloyd smoke bad weed!
"wraped" - Mongolloyd has frequently "wrapped" his syphilitic tongue around a nigger's asshole!

Mongolloyd make good spells!

I have a homebrew electronic keyer that uses TTL devices. Years ago I added a simple led fed by a chip to drive that LED. I run some fast CW and the little LED keeps up just fine.

A picnic in da park it wasn't. Big HUT on the bed of
a deuce and a half, towing a PE-95 motor generator on a
trailer. Enough poles and wire under the single operator
bench (a low cabinet with "cushions" on it) to make a
small wire rhombic antenna. Smelly Model 19 TTY
clattering away on the bench-desk and the venerable
BC-610 400 Watt transmitter near the door. A couple
fans to "cool" everything so it was miserable in the
heat of summer and uncomformtable in winter. "5-packs"
of canned/dry rations instead of hot dogs and soda.
Nobody "kept score" in any competition...other than the
competition of not being destroyed (literally) by any
enemy. Field Radio circa 1950s, USA.

>>
>> ...or what you think is morse. :-) There's very LITTLE
>> morse code on HF nowadays...EXCEPT inside the ham bands.

With the RF Gain on maximum and AGC disabled, BFO on,
one will eventually start "hearing morse code" on "the
bands." :-)

The discordant thrumming-whistling of old commercial muliti-
channel SSB is less now than it was a quarter century ago.
All kinds of OTHER weird sounds ARE there, but those are
various forms of data that very few hams use (or can use)
and ON HF but NOT in the ham bands. Once in a rare while
one might catch an ALE burst from one of the 2500 gubmint
radios of SHARES.

>> >>> There are many things you learn in life and may never use
>> >>> again, unless you plan to play on Jeopardy.
>>
>> Tell that to Ken Jennings! :-)
>
>That guy could probably copy psk31. He's a machine.

Nah. He's just an ordinary programmer, a regular
young guy, a Mormon. He just happens to have
gunfighter reflexes in his brain...and about $2.5
million extra now. :-)

Jeopardy is now coming up on the FINALS in a sort of mental championship on ABC-TV. Fun programming to watch...and try to match wits with the various contestants and their amazing memories. My wife and I are regular viewers after supper...with a bit of friendly competition between us and the contestants.

Meanwhile, the cardinals are gathering in Newington to elect a new poop to lead the morsemen into the righteous path of the true hamreligion...via the "history" of radio as only they have sterilized it.

Wow. I'm in the presence of Nobility. I am humbled.

FWIW, AFRTS headquarters used to be just about a mile from my
house on a little jog of La Tuna Canyon Road, just before it
gets changed to Penrose. In some "economy move" of about 7
(or was it 6?) years ago, it was emptied out in Sun Valley,
CA, and all staff moved east about 40 miles to a
decommissioned USAF base somewhat close to Ontario, CA. The
old AFRTS buildings haven't been leased to anyone yet after
all this time (one can still read the name in smudges on the
exterior wall where the raised lettering was).

> AFRTS >>> IS NOT <<< Amateur Radio

It's >>SHOW BIZ<< !!!

AFRTS >>>> IS NOT <<<< COMMUNICATIONS per se. <shrug>

Did AFRS or AFRTS ever do morse code? :-)

This was also posted to usenet newsgroups:

http://www.network54.com/Forum/message?forumid=324004&messageid=
1103856160

This was e-mailed to me this morning by Oris Grim an old friend.
_____

I happened to be traveling through Huntsville, Alabama early
this morning, I deceided to stop in Athens and see just how
tough Lloyd Davies was going to act when he saw me in person.

Many of you know that a few years ago, Lloyd got smart with
several people in the Deja Newsgroup (now Google) and I issued a
challenge to him. I told him I would be attending the Dalton,
Ga. Hamfest if he wanted to continue the conversation. He said
he would be there and he was going to kick my ass.

Well, Lloyd was a no-show and continued the verbal assault on
the newsgroups. He always talks tough behind his keyboard. And,
I understand he is now doing the same sort of thing on the NIM
Busters Board.

Well, about 8.35 this morning (December 23, 2004) I located his
apartment in a nasty looking section of town. I'm a pretty good
sized man, but I put my gun in my back waistband after exiting
the car. I located his apartment and knocked on the door. The
doorbell was missing and bare wires were sticking out of the
wall. I heard someone say I'm coming and shortly the door opened
with a safety chain lock still engaged. He asked what I wanted
and I introduced myself and asked if we could have a
conversation. He turned white as a sheet and attempted to slam
the door, but I already had a foot wedged in the opening. He
started shaking uncontrollably and was shouting leave me alone,
leave me alone! I told him he didn't seem so tough now face to
face and then noticed a putrid odor of urine and he was pissing
his pants and crying like a baby. Please leave me alone Oris he
said, I was just having fun and meant no harm, please leave,
please. I could see the filthy floor of this apartment and the
dirty floors and the stench of a grown man pissing on himself

were almost enough to make me want to vomit, and I don't have a queasy stomach. Upon telling him that this time he would escape a ass kicking and not to ever get a smart mouth with me again and a verbal yes from him, I departed. That apartment complex looked like a crackhouse, niggers everywhere, filthy grounds and stairwells. Junk cars everywhere and garbage overflowing the garbage cans.

This Lloyd is nothing more than white trash that delivers pizzas and could afford to take a trip out of town if the ticket cost $5.00.

I'm sending this to a friend who despises Lloyd Davies and he wanted to post it for everyone to see just what kind of chickenshit asshole this Davies really is.

Oris Grim

Check out the book "The Art and Skill of Radiotelegraphy." Basically anyone without a handicap can master 20wpm with the proper training tools if they are truly motivated to do so. Keep in mind that we all talk faster than that. We even talk faster than that when we spell out words phonetically!

>> Most anyone will tell you - it isn't good to do such. Besides, at
> that time,
>> I was chasing rug rats - so study time was premium.
>
> I've been told that is absolutely no excuse. Nothing in your personal
> or professional life can be more important than learning the code.
>

No one has ever said that. We each must choose our activities based on our personal priorities. But do not whine and cry to change the requirements simply because it's not high enough on your priority list to put some time into it. Besides if you haven't time to study code 15 minutes per day, you don't have time to study the theory either.

> Most recommendations are
>> 15 minutes to a half hour a day. That hardly makes it possible in a

>> used the words " "AT LEAST" 2 WEEKS". Some are faster learners than
> others,
>> that is a given. BUT my point was, you have to get started to learn
>> ANYTHING.

The book "Morse Code: The Essential Language" states that the AVERAGE person is going to need 30 hours of study and practice to get to 5wpm. Natural there are the "wunderkind" like my daughter who got it in a couple of weeks and there are others who need many months.

As you said, a person must get started to learn anything.

[snip]

>

Do you spend a lot of time home alone on Friday nights wondering why no one does anything? (5 points)

Do you look forward to posting in news groups as a chance to be part of the "gang?" (3 points)

Do you find that social outings often end with you being subjected to a savage beating or "wedgie?" (2 points)

Were you a member of the band in high school? (6 points)

Were you a mathlete? (4 points for RMS voltage)

Was your last date an invitation to the roller rink? (3 points)

Have you failed to be invited to parties held at your house? (7 points)

Have you begun to believe that "the freak is here" is a term of endearment? (4 points)

Does the stripper really like you? (4 points)

Does your "network" include Lloyd? (3 points)

Does a big Thursday night involve you and the cast of The Lavender Lads? (6 points)

(And will you bet five dollars that Roger plagiarizes this and claims it as his own?)

Now that you mention it, I have taken amazing amounts of guff because I am "stupid enough" to use my own name and callsign. I've only been doing that since, oh..... the early '90's.

And yet, there is no doubt that the more anonymous the poster, the more outrageous and profane the posts. Odd how the "smart" people seem to need to hide themselves. Big deal! Its sooo easy to be a big man when you hide who you are.

Hey, are you going to be at Dayton this year?

I think the operative word is "tale" (civilian "legend"). I don't go back that
far, but seems to me a draftee kid who drew Signal Corps billet would recognize
a cushy job when he saw it and such "motiviation" wouldn't be needed.

Wow, talk about prejudicing the audience! This assumes that those of us
who support Morse testing simply do it because we had to. With my
problems with it, that would make me the meanest SOB in the valley.

Perhaps, just perhaps, some of us believe that it is a good idea simply because it is a good idea, a mode that cant be performed by picking up a mic and talking, or typing on a keyboard, and needs to be learned?

Extended to all modes? Get rid of those darn satellite mode questions on the tests! I personally have no use for that! For a strict appliance operator who is going to buy everything they use and have someone else install it? No one should have to do anything they don't want to do! Ditch all those unneeded questions.

If you don't have room for good food then you don't have room for junk.
However I did not have to tell my children this because I never served
dessert unless there was company and sometimes not even then. I eat too
much junk during the day at work so try to avoid compounding the problem at
home.

>

I only object to those who wish to change the rules without having the experience to judge for themselves whether they should be changed. You and I do not agree on the code test but I respect your opinion as you have experience in the field (but do not agree with it). When and if the majority of experienced hams say it should go, then I have no problem with that. So far that doesn't happen to be the majority opinion among the experienced hams.

> "Actually, what is being discussed is freedom of choice of modes

Actually people who are not required to learn something at a basic level too often bypass the activity altogether because they perceive it to be harder than it is. Therein lies the loss. We will be left with only 25+wpm CW people on the bands in that mode and everyone else will be too intimidated to get on. Only the extremely motivated will even bother to try. We will lose the "casual" CW operator who ragchews at the 13wpm level or so.

I'd like to see people learn a much wider range of "basics" in life not just ham radio than they do now. For example, personally I believe that everyone should have a year of art class and a year of a musical instrument, among other things, to be well rounded. Yet we insist on eliminating more and more basics in all areas. How is a person to have any idea what they want to do with their life when they have not had an opportunity to gain some basic skill in a wide range of areas? Similarly how is a person to have any real idea as to whether they might like code and wish to pursue it if they do not have a minimal, basic skill level?

"Here" is all knowing.

Part 97 doesn't define Morse Code, but specifies that it is to be tested at 5WPM. Part 97 is silent on Farnsworth Code. Part 97 doesn't say that the VE's must accomodate variations in testing.

Why does a person have to ask RRAP when they should be able to read it in the governing regulations???

Good point, and I agree. If we are going to have incredibly difficult satellite
questions on the Extra written exam, like the following verbatim example.....

Q: Which of the following types of communications may space stations transmit?

A. Automatic retransmission of signals from Earth stations and other space
stations
B. One-way communications
C. Telemetry consisting of specially coded messages
D. All of these choices are correct

.....then there ought to be similarly incredibly difficult CW questions on the
Extra written exam, like:

Q: Which of the following alphanumeric characters corresponds to the Morse sound
"di-dah"

A. A
B. B
C. C
D. All of these choices are correct

After all, fair is fair, and the CW mode ought to have test questions just like
all other modes. Thanks for pointing that out.

I don't buy that line of reasoning at all.

I was never "required" to learn to set up a "Lindy Rig", but saw other fishermen doing it and it looked like fun, so decided it must not be too difficult, so I learned how.

I was never "required" to learn to swim, but saw other kids doing it and it looked like fun, so decided it must not be too difficult, so I learned how.

I was never "required" to learn how to kiss a girl, but saw Clark Gable doing it, and it looked like great fun, so I decided it must not be too difficult, so I learned how.

I was never "required" to learn Morse Code, but heard it on the Zenith and was curious about those beeps and boops, so I learned how (a decade before I decided to be a ham).

I was never "required" to learn RTTY, but saw other hams doing it, and it looked interesting, so I decided it must not be too difficula, so I learned how.

You probably get the drift.

I'll bet you like those schools where the students determine the
curriculum!

Especially important is that those who do not know the material MUST determine what the material is that they must learn. That is always the smartest way to do things. The students must educate the teachers.

Not at all Mike. You've persuaded me that there ought to be test questions for
Morse just like there are test questions for each other mode. We seem to be in

complete agreement on the matter.

The Miccolis argument goes farther. He's advocated dropping all
requirements testing. Why don't you go over the deep end, too?

> > Sunuvagun!
>
> Huzzanga!
>
> - Mike KB3EIA -

You can add all the CW quesstions, within reason, that you want. Let
CW stand with the other modes in the written test. And drop the code
test.

Ahh, appearing to agree with me to discount my point!

I could ace the entire test if asked is dih-dah meant "A". But that
isn't the point.

You did of course leave out my point that you can argue yourself out of
any testing via your argument......

such as....

> Extended to all modes? Get rid of those darn satellite mode questions on the tests!
>I personally have no use for that! For a strict appliance operator who is going
>to buy everything they use and have someone else install it? No one should have
>to do anything they don't want to do! Ditch all those unneeded questions.

0 question test.

Try reading Part 97.509 Section (h). It covers "administering the exam". I
think you'll find it DOES cover the fact that VEs must accommodate
handicapped applicants.

But you left out all the things you chose not to do because it "didn't look
interesting" or because "it looked too hard."

Have you tried everything that you have seen others do? And on what basis
did you choose to try some things and not others? Simply because in your,
as yet inexperienced eyes in that arena, it looked interesting? Have you

never tried something because some one else with experience said you should give it a try? Have you never had the experience of finding something to be fun and interesting upon being required to do or coaxed to do something that you thought you wouldn't like?

The real question is not so much the Morse code test per se but what is the set of basics that all hams should be familiar with whether or not they personally use that knowledge? Those things should be required whether or not they are interesting or difficult.

By the way I happen to think that all should be required to learn to swim whether or not they think they may use it. I happen to consider it a basic skill in life that all should know.

Ah, it is section (k) now........

(k) The administering VEs must accommodate an examinee whose physical disabilities require a special examination procedure. The administering VEs may require a physician's certification indicating the nature of the disability before determining which, if any, special procedures must be used.

Nahhhhh...some REALLY believe in their conditioning,
that morse code testing must ALWAYS be required as
"necessary" to operate transmitters below 30 MHz!

U.S. hams have always had code testing to get a
license...and they MUST always have such a test.
It's engraved on their synapses or something...

>> Besides if you haven't time to study code 15 minutes
>> per day, you don't have time to study the theory either.

Bless Cecil Moore's heart! :-)

However, according to some of the Deep Conditioned in
here, amateur radio is a SERVICE! "Nowhere in the FCC
regulations do they [FCC] say it is a 'hobby'!" and
other Righteous Wrath of the True Believers (making
like they are the subject of 'Bokonon's' observation).

>Sunuvagun!

Right! :-)

Of course! Especially that part about "didn't look interesting".

> Have you tried everything that you have seen others do?

Nope. For instance, I never jumped out of a perfectly good airplane, and I've never tried to jump a motorcycle over 13 burning school buses, and I've never entered a pie eating contest, and I've never done a whole lot of other hobby things that didn't appeal to me. Lifes to short to dance with hobbies I don't like.

The use of Morse in amataur radio is entirely optional. All licensees, even those not tested, are free to chose to use it (or not). While I'd be perfectly happy to see written test questions about Morse, just as there are written test questions about other modes, there is no longer any legitimite argument for a skill demonstration, other than your "try it, you'll like it" argument.

> The real question is not so much the Morse code test per se but what is the
> set of basics that all hams should be familiar with whether or not they
> personally use that knowledge? Those things should be required whether or not
> they are interesting or difficult.

I agree entirely! Yes, I really do.

But "be familiar" and "demonstrate a skill" are not the same thing.

I am required (as I should be), for example, to "be familiar" with a wide variety of subject matter to obtain an Extra class license, but only in the case of Morse am I required to "demonstrate a skill". What's wrong with that picture? Why shouldn't we be required to "demonstrate the skill of safely measuring high voltage" or "demonstrate the skill of planning a good ground system" or "demonstrate the skill of tracking down the source of a TVI problem". All of those basic skills seem much more part of the "basic skill set" that all hams should possess, more so than requiring a demonstration of skill in only ONE of a growing list of communications methods and modes.

No you can't.

I fully support a Morse familiarity test. Cross my heart and hope to die!

I just don't support a "skill demonstration", unless you want to require a "skill demonstration" of every knowledge area on the test, and deny licenses to everyone who cannot demonstrate all required skills.

Mama Dee would simply say "It's GOOD for you..." and
withold dessert. :-)

>Why does a person have to ask RRAP when they should be able to read it
>in the governing regulations???

I'm curious about the same thing. I've gotten all
these "interpretations" on it...which are simply
RATIONALIZATIONS anywhere else.

Part 97 is one of the shortest Parts in Title 47 C.F.R.

But, above all, MORSE must SHINE as the A-number-1
thing to DO!

Strange. 52 years ago the Army didn't require me
to know any morsemanship to operate and maintain
high-power HF transmitters (a mere 3 dozen). No
license, either. A year ago, nobody required me
to possess any license to operate a privately-
owned HF SSB transceiver on a boat. NO morse
needed to operate legally below 30 MHz then.

But, the ARS (Archaic RadioTELEGRAPHY Society)
stoutly maintains that *ALL* MUST test for morse
in order to have the "qualifications" to operate

below 30 MHz! FEDERAL Test! It's the LAW!!!

It's always been done that way...CANNOT be
changed. [been told that]

That's interesting. I tend to be more libertarian (small "l"), leaving such decisions up to the individual rather than a societal (government?) "all should be required" mandate. While it's easy to make the argument that swimming is a useful skill beyond it's recreational value (just as you might make a slightly weaker argument that Morse is a useful beyond it's recreational value), society really has no vested interest strong enough to dictate "all should be required" to develop the skill of swimming. If they did, then the next layer of busy-bodies would busy themselves deciding which swimming strokes ought to be required, which section of the beach we'd be allowed to use (depending on our tested swimming speed), and requiring that all non-swimmers live only in arid locations like Arizona and New Mexico.

No other part of the testing is a skill. You can buy a Yeacomwood rig,
have other people set up your antenna and setup. You can talk into a
microphone, (assuming that people know to mash the PTT or adaptive
device that performs the same function) and it will "work". I can buy or
download and install the software that I use for PSK31. It's a major
stretch to consider that a skill. More like knowledge.

But CW is a different matter. You aren't going to read a book and sit
down at the key and start sending or receiving Morse. *Thst's* a skill.

Even with computer generated Morse and Receiving programs such as CWGet
(all which do s so-so job of the mode) it is a valuable skill which can
work with minimal equipment.

My point EXACTLY, Mike.

While there are many skills associated with our hobby, only one of those skills is singled out for a required demonstration.

Interestingly, if that skill is so vital as to need a skill demonstration, it would seem that no-one who had not been tested would be allowed to use it on the air. Yet a basic Technician licensee is perfectly free to use Morse on the air without having passed a Morse test. So much for the need for a demonstration before a license grant!

One of my wife's avocations is specialty dessert and cake catering
(she's taught that for years and at times has even made money doing
it commercially).

Her specialty is diabetic-safe products (I'm a diabetic) - low fat
and no refined (or unrefined) sugar. She duplicates about 95% of
what one can find on a fancy "sweet table" (marshmellow requires the
crystalline structure of "real" sugar) and I most certainly do not
suffer from a lack of "goodies" all year round.

Dessert is one of the basic food groups..... <ggg>

Every war is "popular" to a certain extent among those who aren't required to
attend.

It becomes markedly less popular among those whose attendance is involuntary.

Hello Alun,

I'm not sure what you mean by "being a Jonah".

Does it have anything to do with the bible story of Jonah and the whale - aka "You Can't Keep A Good Man Down"?

> the announcement guesstimates all done
> within a year, i.e. by spring '06.

So they meant *next* summer (2006), not *this* summer (2005).

> Sounds about right to me. Granted that
> the comments about what the FCC might do (and the title of the post) were
> all the poster's own, and not Hamwave's.

Exactly.

My time estimates are based on what FCC has done in the past on a number of issues. FCC doesn't seem to be in any big hurry to change the rules - heck, it's been over 5 years since the last restructure, over 21 months since WRC 2003 ended, and yet there's no NPRM on the street yet.

> My own crystal ball guess is that the FCC will just delete the code test
> and rearrange some subbands around this time next year. That's still much
> longer than I originally thought.

My guess is there will be some more-substantive changes, and that the code test deletion isn't a done deal - yet.

I base the above on the fact that FCC could have simply dumped Element 1 back in summer 2003, without an NPRM, comments, or any of the rest. They received at least two proposals to do just that. All it would take is for FCC to say, in effect: "This subject was discussed thoroughly back in 1998-1999, and we kept Element 1 only because of the treaty. Now the treaty's gone, so we're dropping Element 1." Or some such verbiage - the basic idea is still the same. There's a procedure for such changes.

Yet there have been no changes yet, just proposals *to* FCC, and comments.

Last time FCC did a restructure, the comment period was what - six-seven months or more? Then it took about 11 months for the Report

and Order, and another four months or so before the rules changed.
That's over 20 months from NPRM to new rules in effect. 21 months from
summer 2005 is spring 2007.

Maybe FCC will say something at Dayton. Maybe not.

Well I've yet to find a "low fat" or "low/no sugar" food that tastes like
the real thing. It always tastes a little different. So my choice is
simply to bypass the desserts as much as I can discipline myself to do so
(sometimes I fail miserably).

It's self preservation actually. I have a real weakness for sweets and
can't stand the artificial stuff so my best bet is to bypass the stuff.
That's why I never keep this stuff at home.

As the old Ross Bagdasarian/Rosemary Cloony song of the late '40s
went: "C'mon a' my house, my house, I'm gonna' give you candy...."

That's why she's a specialist......the "store-bought" stuff can't
make it, and the sweetener used in most of those products (Sorbitol
or Manitol) is colloquialy known as "Laxitol".

Since the commercial sweetener Sucralose went "retail" under the
name of "Splenda" it's a lot easier to get the right taste.

Sounds awfully yummy, Phil. I'm not anti-sweet, just anti-sugar.

> Dessert is one of the basic food groups..... <ggg>

In my family, desserts were not really all that big a thing. Some sweets around the holidays, but otherwise we were (are) big meat eaters. Kinda like leftover hunter gatherers... 8^)

Splenda isn't too bad at all. In fact, I've used the artificial
sweeteners for so long that I dislike the taste of "real" sugar. Leaves
a unpleasnt after taste.

In the Army chow halls, you're actually allowed to tell them to "hold the gravy." Otherwise...

LOL!!! I liked the one when uncle Jed bought himself a new
"fishin boat" He came down to the docks dressed as an admiral
and went on board a Destroyer.....

I wonder how VE Dee would accomodate the disabled in the Tower Climbing
pass/fail skill exam?

Not that Tower climbing will likely ever become an issue with the exam, but
if it were, then I'd suggest there would be questions relating to the proper
safety techniques of doing such a job, wherein "actual" "physical"
demonstration is not needed nor required. Given that - a wheel chair bound
person "could" pass those parts of an exam. I can't fathom tower climbing
becoming a major issue. There is a question or so relating to wearing a
"hard hat" when working "near" a tower in case someone drops a tool or other
item. So, there ya go. Perhaps you can consider that as a step in the
"tower" safety process. It would be only "questions" relating to such
things, what's the big deal about pass/fail? You either answer the question
correctly as you would be expected to with any other - or you don't!

We have to count the number of correct answers given and see it they add up
to a passing grade, if not - too bad! It won't matter if they're handicapped

or not. We can accommodate them as to taking the exam, we don't accommodate them as to giving them the "answers".

Well, I wasn't trying to do that!

But the way FCC has worked in the past, I wouldn't count on
fast changes. That's the reality of how the process works.

I see it as a license progression thing. The Morse code is the skill
demonstration, and HF access is the carrot.

I know someone who is going to bust my chops now!!! 8^)

But the skill demonstration should bear relationship to the privilege granted as a RESULT of that demonstration. In other words, USE of Morse should be restricted only to those who have successfully demonstrated their skill. Or to use your example, the USE of Morse should be the carrot offered as a result of passing a Morse test.

But by FCC regulation, a code-free Technician is allowed to use Morse on the air WITHOUT a successful Morse demonstration, and the "demonstrate BEFORE privilege" model is disconnected; ergo the demonstration is not vital to the successful use of the mode and serves no rational regulatory purpose.

Tower climbing is not a basic skill so there is no need to test for it. One
can put up a wide variety of antennas without a tower. On the other hand,
I've often thought that a person (unless handicapped) should demonstrate
putting a simple PL-256 on coax.

Can anyone think of why the control head of a mobile dual band (Yaesu 7800R) should not be mounted near (actually slightly overlapping) airconditioning vents?

Thanks,
Everett KG6YEB

exam,

I'm going to advocate it during the next NPRM.

but
> if it were, then I'd suggest there would be questions relating to the
proper
> safety techniques of doing such a job,

No questions. They need to climb a 60 foot tower, haul up the coax and an HF-tribander, fasten it, point it north, and make the connections.

wherein "actual" "physical"
> demonstration is not needed nor required.

But it is. Otherwise, how would we know they could do it?

Given that - a wheel chair bound
> person "could" pass those parts of an exam. I can't fathom tower climbing
> becoming a major issue.

Yet Morse Code has become a major issue. Just because not everyone is going to have a tower is no excuse for not being able to demonstrate the ability.

The Somolian judges gave this a 9.8 on the Olympic Troll-O-Meter,
but they were over-ruled by the umpires in instant replay, who
award it a 2.6

The Somolian judges lodged a formal protest!

It was sufficiently trollish, of course, but way too obvious.
It was poorly written, poorly executed, and was so incredibly
lame as to lack the true drawing power of a really masterful
troll. Maybe as high as a 3.3 for the intense stupidity of the
premise, but a 9.8? Never! The Somolian judges tear their
hair out, throw their balalaikas down in dismay, and perform
the traditional Somolian Dismay Chant! They demand a recount!

Recount denied.

Extra credit if they can do it without melting the
dielectric insulation of the coax. More points if they
can get the solder to actually flow onto the connector body
where the shield solder holes are located (helps if you
use a small file to remove the plating first).
And more points if they remember to put the shell on the
cable in the correct direction before doing any soldering ;-)

Or they could demonstrate extra skills and just use crimp on PL259's like I
do. These are much easier and more reliable. They are more expensive but
their construction is superior.

My original comment was directed at Dee offering points for something called
a "PL256".

I used to tin the braid then use a small tubing cutter to trim the shield to the right length. I used a drill to remove the plating from the holes and file all the chrome off between the holes. I tinned the center conductor and put a drop of liquid RMA flux on the center conductor and the braid before I put the coax into the plug, then soldered all four holes and the center pin. I didn't melt the dielectric, and you couldn't pull the coax out of the plug. I also used my Sprague TO-6 to put a couple hundred volts across the cable to make sure there were no loose strands waiting to short out. I had Hams and CBers tell me my cables were too expensive but they kept coming back to buy more to replace other bad cables, and they started sending other people to me, as well.

I had someone bring me a cable he bought somewhere else. He said it was "Kind of lossy" No wonder. It was a dead short at one end. He didn't want two new plugs so i walked out the door to my truck and raised the hood. I touched the center pin of one plug and the sleeve of the other plug across the battery. Smoke and flames came out of one plug. A true "Quick & Dirty" test that never fails to find the shorted plug.

That's a hell of a lot of messing about and time consuming too. A crimp on PL259 for RG58 series or RG213 series cables would take about 2 minutes to install, no soldering, no chance of heat damage, no shorts and they can be fitted in the field.

I have a Yaesu 7800R -- really don't know why the head should not be mounted near or overlapping A/C ducts, unless there is a problem with cold air blowing directly on the rig. However, mine worked just fine in very cold weather so temp does not seem to be a problem.

You may be interested in how I mounted mine -- I went to an auto junk yard and found a junked vehicle like mine (89 Nissan pickup). I got the ashtray from the wrecked truck. Pulled out my ashtray, wrapped it in plastic, and stuck it under the seat. Then, I took the junkyard ashtray -- mounted the mount for the control head onto the ashtray by drilling a couple of holes in the face of the ashtray to secure the mount -- drilled a large hole in the back end of the ashtray through which to route the cables.

The mobile control head is slightly wider than the ashtray but the difference really does not show. By routing the cables out the rear of the ashtray, the cables drop down with the rest of the vehicle wiring and are readilly accessible. By keeping my original ashtray intact, I can restore the vehicle to original condition by simply removing the rig.

Solderless connectors for RF applications? A quick fix for sure but not a lasting one! The only crimped connector I've ever seen work is the cable TV connectors and the center conductor us used directly.

Hey Mike, Don't rule all Hams. I will agree that most look down their noses and anyone with a lesser class of ticket and none at all is even worse but there are some that are helpful and knowledgeable in their field. I would guess that most hams don't know sqat anymore. Store bought radios and cables and antennas really are the problem here. Everyone operates and yaks about the weather and their latest hemmroid attack but no one know how to fix a broken radio. Heck, I even saw a post from a Canadian Ham that wanted some one to align his Heath stuff, How easy can you get and yet he can't do it or won't even learn how to do it.

My mentor in the 60's in Ham radio is now long dead but when that man taught you something it stuck and we built some of the most God awful

transmitters and regen receivers but they worked and the knowledge stuck.
His motto was "Why buy it when you can build it" and he built everything he used on the air too. People looked down on him too as he held a Conditional class back then.

2192. MAHA MH-C777PlusII MAHA MH-C777 battery reconditioner recommendation?

Newsgroup: rec.radio.amateur.misc
Date: 2005-04-23 14:57:55 UTC
From: tunesandballoons@yahoo.com
Message-ID: <1270ed33.0504230657.63cc8106@posting.google.com>
Source record: 52163

Just two questions..
1) Has Maha fixed the alleged bugs in these users' reports/review posted on other boards? (snipped below)
2) Any recommendations on a universal battery analyzer/conditioner for NiMH and Li-On, if cost is not an issue? (One that doesn't have any safety concerns, and works unattended. Purpose is to recondition weak/bad/dead cells.)

Thanks for all replies. If this is not the correct forum, sorry, please point me in the right direction (URL/link.)

http://www.eham.net/reviews/detail/2515

bought a MH-C777PLUS-II. The batteries being charged with it seemed to me to be getting way too hot... About 50 to 70 degrees F above ambient.
I called Maha and spoke to the engineer. (Lucky for me the engineer answered the phone that evening, because later, when I spoke with anyone else they had no technical understanding of how this model is supposed to work, not even tech support.)
During our phone conversation the engineer and I determined that my MH-C777PLUS-II was overcharging. Maha arranged to send me a replacement unit. I received the replacement a week later. I tested the replacement unit, and it had the identical problem.
The problem is that these units overcharge the cells. The unit is supposed to stop rapid charging and switch to a float charge when the Negative Delta Voltage is at about .007 volts per cell. My tests have determined that the units do not switch to a float charge until the Negative Delta Voltage (NDV) is .065 volts per cell. (almost 10 times greater than spec.) I'm sure you'll agree this is an unacceptable amount of overcharging and is harmful.
I have charged and recharged seven different battery packs many times. I have tested with five different brands of batteries. I have tried NiCd and NiMH. Sizes range from 1000 mAh to 2200 mAh. I have plotted Current, Voltage, and Temperature. The amount of overcharge is about the same on any battery pack, any brand, and either NiCd or NiMH chemistry. In total, I plotted about 50 charge cycles.
When charging SHOULD BE considered complete, (that is... the Negative Delta Voltage is at about .007 volts per cell) the temperature of a battery pack was typically at 85 to 95 degrees. Very reasonable temperatures for rapid charging at 800mA. In my tests, the ambient temperature was always around 70 degrees F.
HOWEVER... THE MH-C777PLUS-II KEEPS CHARGING ANYHOW ! By the time the MH-C777PLUS-II units stop overcharging and switch to a float charge,

the battery case temperature has often risen to 140 degrees F.
Certainly not healthy for the cells.
Just to clarify: The NDV is not erratic. It is always wrong about the same amount. Funny thing... the NDV is off by an amount very close to one decimal point! I wonder if that could be caused by a programming error of exactly one decimal point somewhere in the algorithm!! Could that be??
It seems unrealistic to assume that I have received two bad units, especially since they have serial numbers that are numerically far apart, different looking boxes, and reprinted manuals etc.
Five times I requested Maha to agree to test my units and confirm my findings. They never responded.
Please learn from my mistake. Do not buy one of these.

After sending back several defective MH-C777PLUS chargers to MAHA, they sent me a MH-C777PLUS-II.
It didn't take long to realize that this thing is no better than the original. I tested using some of my older packs, since the original liked to cook them. The results are the same. It charged a 1200mAh pack up to over 2000mAh before I decided to disconnect it before it melted. The temperature sensor obviously doesn't work. I tried to discharge a good pack, and it just froze up after a few minutes. Maybe by the time MAHA releases the C777PLUS-IV, they will get it right.

I've had this unit for about 6 months now. It seems to work OK on NiCads but be careful with Lithium Ion. My unit nevers completes a charge. Instead, it goes into a non-stop beeping mode after a couple of hours. Removing the battery doesn't help, you have to unplug it. I talked to the Maha people at Pacificon. They acknowledged there was a problem with all of the MH-C777 Plus chargers. Their recommended fix was to buy a MH-C777 Plus II and scrap my "old" unit. No trade in of course. Not exactly what I would call good customer support. I'm considering going after it with an ice pick to break the speaker so at least I don't have to listen to it. Another issue with this charger is that unless you are right on top of it when it finishes the battery condiditoning cycle, you will not know how your battery is doing. There should either be a "start charge" button or some way to recall the battery capacity at a later time. All in all, I wish I hadn't bought this charger and am quite disappointed.

http://user.fundy.net/cyclist/reviews/Maha-C777PLUS-II.txt

From: Per Elmsï¿½ter per.elmsater@telia.com Subject: BC Maha C777PLUS-II review Date: Tue, 25 Nov 2003 00:39:22 +0100 Message-ID: 1475457389-1463792382-1069717076@boing.topica.com

This message has been edited and resubmitted by Per Elmsï¿½ter.

Due to input from the bikecurrent mailing list I bought a Maha MH-C777PLUS-II charger recently. One of the reasons I chose it was because it was capable of charging up to 12 cells which is something I wanted due to the simple fact that I have 12 cells in my battery-

pack. I am primarily using it to charge these 12 NiMH cells to 4500 mAh according to their specs. Thanks to the digital readout I can see that this is what I'm getting. I can do a discharge cycle where it will automatically continue by charging at 800 mA. This shows that I receive between 5100 - 5200 mAh. This of course is a higher number than I receive at discharge, 10-15 according to Maha, and seems quite normal. When full I can also do an analyze cycle which then discharges the full battery at a rate of 300 mA. I have not done this yet on my bicyclepack, since discarging at this rate takes a very long time. Charging is usually 420 minutes from empty. Another feature apart from the digital readout is of course several diffferent means of detecting a full charge.

- Negative Delta V - Zero Delta V - Delta Temperature - Timer. (It always cuts off after 13 hours) If you have more than 13800 mAh = 10.4 Ah you can start a new cycle after 13 hours and it will then detect a full charge by one of the other three methods, according to the manual.

So far only the Negative Delta V has terminated my charge.

It will also charge all NiMH, NiCd and Lithium-Ion, Lithium Polymer chemistrys. 1-12 cells of Ni and 1-4 cells of Li. It will however not discharge a single cell. You must have a minimum of two or three cells. I forgot which.

My simple Sigma Mirage lighting system is now the brightest system in our forest. My 20 overvolted 20W beam definitely feels bigger and brighter than for instance a Niterider Blowtorch. The 5W beam is plenty enough except when going fast. I get a max of 9 hours and a min of 2.25 hours. Having a button by my thumb makes it easy to switch down to 5W as soon as I hit a long climb for instance. So I figure I can easily stay out 4-5 hours and have all the light I need, or commute for 9 hours. Thankyou all on the bikecurrent mailing list that guided me to this solution. I am as of now not using a LVR but it will come as I refine this setup ;) What I am doing now is running two packs of six cells each in parallell. This gives me 9Ah and 7.2V. Ie 20 overvoltage. Of course it's way over 8V when I start out but the bulbs haven't blown yet. When charging I connect all the cells in a series to avoid problems. This is of course done automatically by how the connectors to the batterypacks are bridged. When I connect the lights to the four pole connector coming out I get a parallell connection and when I connect the charger to the same four pole connector I get a serial connection. Very simple actually. The bridging is done on the incoming connectors. Out of the batterypack I just have two plus and two minus on a four pole connector that know nothing of each other.

Now to the criticism. Well it wasn't the cheapest charger around but I believe it is worth it's money. Especially since I can use it for many other appliances also. The temp sensor is on a very short cable, about 15 cm to be precise. This makes it awkward sometimes when charging

something except cellphone batterys and other small stuff. I think this is what they had in mind when designing it since there are plenty of small springy contacts on top, makin it easy to connect all sorts of small batterypacks. Plus a short cable with alligator clips on it.

However : Here comes my biggest cause of concern. The charger does not easily detect what kind of batteryconfiguration you are hooking up unless you connect it to the naked minus and plus poles. Then all you need to do is tell the charger if it is a Li or Ni cell you are conecting. The manual states that when using the charger directly on a charge connection that is protected with a diode, rather than a discharge connection, then the charger cannot detect polarity. They continue by saying that all you need to do then is figure that out manually and switch it over if needed. There is a polarity switch on the charger. Well I thought, no problem I have a Voltmeter. So I connected straight into my Cateye Ellipsoid bikelight where the original charger goes in. It is 5 NimH cells and they supply a 9V charger with a 300 mA current. Well the Maha charger started out reading something around 6 V but after only a few seconds it went straight back up to 22 V. It was no time before my bike light was smoking ;(Well you win some and you lose some so I figured there was just too much electronics inbetween and decided that the next time I'd see if I could get a voltage reading first, before I started. This time I tried an electric screwdriver and measured 3.55 V. I connected the Maha charger. It showed 3.55V for a few seconds, then it went straight up to 14V. This time I was a little quicker and I think I saved it. Anyways it is still functioning even though it smelled quite a bit of plastic. This is actually too bad since many times it is quite a hazzle getting hold of the naked poles without any electronics inbetween. I could really appreciate a manual override where you could tell the charger how many cells are there when needed.

But, for the batterypacks that I build myself it is absolutely super and I can surely recommend it. Also for cellphones, digital cameras and such of course. I analysed my wife's cellphone battery when she complained about it going dead as soon as she talked a minute. The digital readout told me it would only hold a 25 mAh charge so we didn't have to wonder any more. I must say I really appreciate this simple digital display.

Crimp on RF connectors have been used for decades, BNC, TNC and N
connectors, good to 1.5GHz, UHF connectors to 500MHz. Used in most avionic
and military applications. (many of the connectors have a mil p/n) The crimp
forms a cold weld which is better than solder and more reliable considering
that the crimp tools are calibrated.

http://www.radiall.com/vdocportal/portal/template/application/app/radiallWebSite?pageId=03
0-00000q-002&categoryId=382831

Download the BNC catalog, go to Page 12 for a sample of BNC crimp on
connectors. The UHF's are similar.

Brad.

Yup, some days I can't type. The crimp on would also be an option since I
did (purposely) phrase it as install it. In either case, the pass/fail
criteria would be continuity with no shorts.

As with anything else, there are both advantages and disadvantages. The
crimp on ones seem to be more prone to having a shorter life. Why, I don't
know.

Unfortunately too many of the installations are sub par. When I have
purchased antennas that came with crimp on connectors, such as many mobile
antennas, I've had to replace the connector in under a year.

Dee, I have worked in broadcast and manufacturing. 95% of the failed
RF connectors I've seen were crimped. I've never had a soldered PL259
come off after I started using the described method. The assemblers at
Microdyne were required to put completed crimped cables into a fixture
that applied the manufacturer's specified tension on each crimped
connector. Most of the SMA we used were still soldered, either on flex
or semi-rigid cable. In 30 years I have only seen a few cracked solder
joints on semirigid, and that was on N" connectors in Collins 4 GHz
Satellite TV receivers. Over half of the units I repaired for United
Video Cablevision had bad solder work on the RF input connectors.

I was at a hamfest a few years ago and bought a box full of PL259
connectors that were cut off bad cables. I used needle nose to pull the

insulation out and held the shell over a propane torch a few seconds and dropped it on the bench to remove the loose stands and old solder. After they had cooled I did the center pins that way. No damage to any of them and all were nicely tinned for re-use.

I didn't make the cables one at a time. I would make dozens and it
went very fast because I did it like a small assembly line. Not only
that but people paid about $3 per connector I installed than anyone else
in the area wanted. I could make about a dozen cables in an hour, back
when I was in the RF business. I didn't make, or use RG58 cables. Only
RG-8 or 213. I have to find the right connectors for the teflon coax I
have in the shop. I think its two spools of RG-179 and a spool of
RG-400

Who says you can't get a shorted cable with crimp connectors? I've
seen plenty of shorted cables with crimped connectors.

"Just because YOU don't know how anonymous remailers work, doesn't mean everybody else does, imbecile." Roger Wiseman

"pompousity" Oops! Darn that keyboard, anyway!

"suergery" That is Devry for ya.

"aditting" Darn those typos!

"abckpedals" His greasy hair got in his eyes again

"shreeched" Wasn't he the guy in a sit com? Screech?

"stuid" Pot calling the kettle black?

"heared" That's West Virginia for heard.

"assuslted" Rog just makes em' up as he goes along.

"experieince" Oh, DUH!

"abouve" Is this a French word?

"Cosast" Some place by a body of water?

"mebership", Just a typo, right?

"retqards" Regards or Retards? Who can tell?

"coordinbator" Huh?

"Realy" Really?

"Nitoiced" Keyboard error or stupidity?

"Becasue" Well...

"Licence" Roger had to test twice for his license.

"Convienince"

"Myabe" Or then again, maybe not.

"occurance" Say what?

"srtuggling"

"definatrely"

"delapidated" What a dufus.

"picutre"

"permenatly" Ebonics again?

"Arest" You need a rest, Wogie.

"Sentenceing" No comment.

"Narcotices" What?

"Undre" Is this a city in Germany?

"Surgeoun" And this would be?

"Commuications" Who is laughing at who?

"Ovre" Ovre and out!

"Wondreful" It's a "wondreful" day in the neighborhood?

"Derivitave" Still no spell-checker, eh?

"You lose, shit for brians." Woger showing who real loser is.

"Deisowned" Deis what?

"Deeppest" Roger strikes again.

"Dodgeing". Is he talking about a car?

"Staedy" Steady?

"Linme" Transmission line?

"Getr" Nobody knows.

"Experieince" Wogie is good, ain't he?

"Appropiate" What kind of opiate?

"Laywer" Lay what?

"Visitpors" You never have any, ergo you don't know how to spell it.

"It's "complaintant," you sniveling weasel." (Roger Wiseman on spelling complainant.)

"Irreevant" Good going, Wogie.

"Forwared" Forward HO!

"Glady" Glad Bags?

"Neighborhod" It's a wonderful day in Wogie's neighborhood.

"Mena" Mean? What you mean, Wogie?

"Notr" Not?

"Sassifyed" ALA Rolling Stones.No Sassifaction..

"Fantasises" That is "fantasizes", Wussman.

"Illarate" West BY GOD Virginny!

"Reveresed" Must be one of those off-brand keyboards.

"Soem".as in Some? What a loser.

"VIRIN".What Wogie was before he met the Lavender Lads.

"Minisule".he mussa meant miniscule. Like his IQ.

"Champoin".Whassup, Wiseman? No dictionaries in the mental ward?

"Anoinymous"...a cross between anonymous and annoying?

"Acident" Roger's mom got preggers by accident.

"Alreaedy" Alright, already!

"Amouints" Roger amounts to nothing.

"Aposterphe" This guy is a hoot, ain't he?

"Basios"...word Woger uses when he gets neeeerrrrvous.
"Behing"...a cross between being and behind?

"Coiward" As in peeking from behind his mommy's curtains.
"Feamle"...I think he meant female.
"Losser"...only loser Roger can do it better.
"Ignroant"...typical, considering the source.
"Sluprs"...only Rogie knows what this means.
"Travelled"...a Rogerism, replete with ignorance.
"Postss"...pssst...Roger..that should be Posts.
"Defgenerate"...well, it's Roger's word...
"Faity"...he meant to say Fairy, but you know Roger.

"Ghet" Get a load of Curtain Boy!
"Distribiution"...Roger likes using phonics.
"Biotch"...he meant Bitch, but his phonics took over again.
"Methjadone"...a West Virginia substitute for Heroin.
"Sumbliminal"...one of Roger's favorites.
"Recepticle"...either of Roger's moist cavaties.
"Cociane"...a West Virginia drug of choice?
"Tiome"...Roger meant to say Time...but his fingers were numb.
"Beraking"...no definition. Could mean 'beraking' the leaves,
"Amny"...he meant 'any',
"Nlay"...a town in Maylaysia? Vermont?
"Al;ong"...only Wussman knows what this means.
"Becasu"...well, becasu Roger is not the brightest bulb on the tree.
"Seperation". Why? Because Roger cannot "seperate" from his mommie!
"Sisnce" He meant Since, but his pudgy little fingers slipped off the keys.
"gnetically" What?
"provce" (prove?)
"Piuzza" (West Virginia Pizza)
"Schol" (school?)

"strill" (still?)
"shoitgun" 12 ga or 20 ga?
"Snoip" (How they spell "snip" in Glen Dale)
"Maturbater". Wiseman does it all the time, he just can't spell it.(leaves a sticky residue on his right hand)
"Coskscuking". It's a Roger thing, as in Lavender Lads.
"Waddleing". Only in Glen Dale, eh?
"Spaeaking". Curtain Boy did this after his second retest.

" Stgop" Roger's version of Stop.

"Fahter's" He meant Father's Day.

"fserting"..would that be festering?

"poists". Roger meant "posts".

"snadwich" As in peanut butter and jelly?

"regualr" Glen Dale rendition of "regular".

"aftrer" After? Aftrer what?

"soory". Sorry Roger fucks up again.

"didnb't" He didn't?

"whoile". He ate the whoile thing?

"Woamn" He's hooked on West Virginia phonics, all right.

"prrof" And he kin prove it, too.

"beforfe" Was that before he lurned to spell?

"yoiuy" Roger's version of "y'all".

"illerate" Only illiterate Roger can spell like this.

"haeart" Aw, how heartless of me to laugh!

"valule" Roger has no values. No wonder he can't spell it.

"proch" Doesn't everyone have one on their house?

"inmstitution" Where Roger's mom put him in June 1999.

"timne" It's Howdy Doody time?

"whgo" What? Who dat?

"gnetically" Only Roger knows what this one means.

"crfy" Like, cry, Roger, cry.

"stutrtering" Some stutter, Wiseman stutrters.

"Whjere" Where is Curtain Boy?

"Webiste" That's Website to the rest of us.

"Youire" Your? You're? Who knows.

"fiored" As in fired?

"Parety" Roger gave a party once. Nobody came.

"Bouynce" Bounce?

"Varification" Verifiable mental case.

"Probelms" Poor Rogie.has many problems of the mental sort.

"Partricipate" Oh, DUH!!!!

"Cryed" Gee, Wogie..cry me a river.you dolt!

"Stoick" What a dork. His old 386 has no spell check program.

"Partiall" More WV Phonics, I see.

"Obsucred" Either obscured or Rogie has "sucre" on his mind.

"Infinate" Stupid. Think finite, Rogie.

"Sustinance" As in Sustenance?

"Juvinile". This is the way Roger likes his boys.

"Piut" Put it where, Rogie?

"Toyus". "Toyus R Us?

"Diminuative". Roger's height.

"Definitely" Definitely

"Percriptions" Say what?

"Credibiliy" More Glen Dale intellect.

"Thsoe" Yet another Glen Dale gaffe.

How? By making fun of persons who insist on lying in
public...such as yourself, Brian?

> > They're populated by people who don't have the intestinal
> > fortitude to sign their names to their posts and they make up
> > allegations to try and hide behind.

> And people who sign their names to every made up, false allegation.

Such as?

> > Ask Brain where the Techs went. He insists that they were
> "chased
> > away", yet refuses to say who chased them away or where they went.
> > I've asked him repeatedly after he unequivocally stated they had.
>
> Steve, it's old news. You're welcome to research it in the archives
> unless you're just too lazy and/or inept.

Oh no, Brain! This was YOUR assertion! YOU stated all the Techs
have allegedly been "chased" somewhere..

Let's see you pony-up that proof, Lying One.

> > Ask Brain where the "unlicensed devices" are. He insists that
> > "unlicensed devices" play a "major roll" in emergency
communications.
> > He WON'T provide any evidence of it, but he insists it's true.
>
> It's true.

If it was, where's your proof?

It was your assertion.

I say Brian P. Burke is was jsut caught up in the moment, tried to
bluff his way through, but got caught on a techniccality...The truth...

> > Brain has also recently asserted that ARES is "overblown", and
> > that it won't respond to "real disasters" due to the age of it's

You keep saying that but it's still not true.

Again, you are lying, Brian P Burke. Why do you insist on doing
that in the face of evidence to the contrary...?!?!

> > Those are just the recents ones...The Somalia horse is pretty
> > dead...He could never make that horse trot no matter how colorful a
> > jockey he put on it.
>
> I'd like to see the documentation that you were the IMD on Okinawa.

You've got the dates, callsigns and places, Brian.

It's more than enough to substantiate MY claims...Now...About
those techs and ARES claims...???

> > His "I've worked DXCC several times over" stories are cute,
> too...
>
> Please retell those stories, Steve.

They weren't my stories, Brian. They were yours.

> > Now his most current diversion is adding up non-existant
"lies".

Nope. Still at zero, Brain.

But you keep trying.

> > Keeps me warm too....from laughing so hard!
>
> Oh, yeh, the "bwhahaha" laugh that you claimed to not make.

I never made that claim, Brian.

I >>DID<< claim that I >>DON'T<< use your "Hi" in written
communication as alleged "laughter".

You are welcome to re-post the item wherein you think I said I
never use that "Bwwwhahahahahahaha...."

And if we stack up the lies, Brian P., we'll have quite an archive
to leave for your heirs...Faaaaaaaaaaaaaaaar in excess of the "27" you
alledge that I have authored.

Steve, K4YZ

"poinion" - Must be an Athens Alabama "Deliverance" thing
"Woger Wiseman"- LARDASS Lloyd's got that cocksucker's lisp
"isnt" - "Isn't" LARDASS cute when he slobbers?
"worfh" - Davies' cocksucking lisp has returned
"waset of spaceda" - When Lloyd's only friend Colt 45 malt liquor kicks
in
"Oppulant" - The only thing "opulent" in LARDASS is that he is rich in
ignorance
"obly" - LARDASS lisp from cocksucking shows when he tries to say his
favorite fag artist "Moby"
"wood" - LARDASS LLOYD'S head "would" be made of "wood"
"dserve" - LARDASS lives in that ghetto where they say he sure does
"dserve" those pizzas
"frum" - LARDASS LLOYD DAVIES wonders where his real father is "from"
"DISCUST" - Mongolloyd Davies' command of the English language is
"disgusting"
"You worthless coward are scared of debating me." - Mongolloyd make
good sentence
"jellous" - Most of LARDASS Lloyd's cellulite body is "jealous" of
skinny, in shape people
"It just didn't wok out" - When LARDASS tried to stir fry those
nutsacks for pizza topping, Pappa John's terminated him saying he
didn't "work out".
"entact" - LARDASS' single brain cell isn't "intact" either.
"empahis" - Notice how LARDASS Lloyd's "emphasis" is always on his
fucking stupidity.
"Fuck all fo you" - Christian LARDASS Lloyd showing that Jesus
spirit.....
"bllod" - How LARDASS Lloyd spells "blood"
"did'nt" - LARDASS "didn't" do very well in school
"PLEASE by a clue" - LARDASS Lloyd's parents couldn't even "buy" him an
education
"extrodinare!" - LARDASS is a moron "Extraordinaire"
"unsubsribe" - Mongolloyd Davies "subscribes" to the theory that
ignorance is bliss...he must be in heaven
"Must've struck a cord" - LARDASS confuses his favorite sex fetish of

tying his penis with a light cord and masturbating to the word "chord".
"dumass" - Dumbass Davies trips and falls in shit again.
"Them two bigtime losers!" - Mongolloyd mentally ill Davies makes good sentence!
"straming" - Lardass usually has to wash his sheets from the "stream" of piss when he wets the bed or not given his filthy HUD apartment
"surpassinf" - LARDASS is always "surpassing" his previous levels of stupidity.
"pleanty" - <guffaw!> "Plenty" of stupidity coming from LARDASS Lloyd.
"Cause i'll have law lock you up and throw away the key!" - Mongolloyd talk tough!
"pome" - When LARDASS WADSWORTHLESS Stubbyfellow writes a "poem"
"Once she here's my show" - Most people hears a show, LARDASS "here's" them!
"forgotton" - LARDASS has "forgotten" what he was taught in special Ed
"I want your seriousness" - LARDASS does his take on "I want your sex"
"I did'nt ask for your fucking grammer checking!" - LARDASS Lloyd revels in his ignorance!
"agrument" - When the voices in LARDASS Lloyd's mentally ill head collide they have an "argument"
"craetive" - Mongolloyd Davies isn't very "creative" with his stupidity, however.
"You could have posted it, for we know!" - LARDASS make good sentence!
"bottem" - Mongolloyd likes those little boys' "bottoms" from hanging with Steve Holsten
"James Wickstrom talked about tonite that out threre, thier Sherriff's department" - Mongolloyd
shows off those Pulitzer prize writing skills.
"bring yer cents" - Mongolloyd show how he flunked out of school because he had no "sense"
"You peeks out" - LARDASS Lloyd and stupidity a symbiotic relationship.
"Be thier" - LARDASS Lloyd make good sentence!
"If you pussys have balls you confront me!!! Deep down you are scared of me. You our jellous
because I am the great almighty Time Lord!!!!
The Time Lord always wins in the end." - Does it really need to be said about Mongolloyd Davies?
"yerself", "hisself" - LARDASS picked up his language skills or lack thereof from the
niggers his mommy Amanda serviced.
"I lost TEN POUNDS on my diet simce first of the year!" - Too bad LARDASS didn't gain any language skills
"The best Amatuer Radio talk show ever!" - Chosen 5 to 1 over literacy by other ill-educated morons and Mongolloyd
"All of my Daleks have been dispached!" - Too bad some extra brain neurons haven't, Mongolloyd.
"satillite" - When LARDASS met the space between his ears
"Tuseday" - LARDASS' usual day to wear his pink tutu
"I am 210 punds now!" - LARDASS lies and fucks up again!
"jelous" - LARDASS Lloyd is "jealous" of those who can spell, read, and

write.
"peoples" - LARDASS Lloyd the "people's" choice of the Biggest
L-O-S-E-R!
"curtians" - LARDASS LLOYD DAVIES uses those "curtains" in his filthy
apartment as a masturbation rag
"depsised" - Mongolloyd Davies, who the entire real ham community has
"despised" for his lack of ability
to pass a simple 5 wpm code test or General theory
"sicker" - When Lloyd Davies has a mouth full of cum he can't say
"sticker"
"liceneses" - Mongolloyd Davies has one of those exclusive "licenses"
on stupidity
"isseus" - LARDASS has "issues" with people of intelligence.
"conquor" - Mentally ill LARDASS Lloyd has yet to "conquer" his obesity
and mental illness
"crakheads" - Retard Davies make good sentence!
"servent" - Roger Wiseman's willing "servant" makes another gaffe.
"lesibens" - When Benjamins take the wild side...the "lesbians" don't
care, though!
"Los Angles" - Mongolloyd has the wrong "angle" about "Los Angeles"
"busses" - Do they take the motored "buses" or do they take the
"thier" - You say "their," Lardass says "thier".... to-may-to,
to-mah-to.....
"eductional" - LARDASS Lloyd's writing is "educational" on how severe
illiteracy is in his family.
"She sounded like she really whappy to here from me." - Mongolloyd get
rejected again!
"This is morning I weigh at 207 pounds. This should prove to you, that
I can succeed if I put my
mind to it. I know some your stupid critics can't see that, but I'm not
here to please you." -
- LARDASS makes the "huh?" factor rise.
"This looks much more like sexy Lloyd" - Porky Pig lookalike stubby
tubby Davies dreams
he looks like a skinny, tall Billy Zane
"I figured you the thought of me owning..." - Lardass dreams the
impossible dream of thought
"I took you a long hour and a several minutes..." - Too bad LARDASS
Lloyd didn't take and pass English
"I get a laugh over you!" - Mongolloyd make good sentence!
"did'nt" - "Didn't" Lardass ever pass any school subject?
"Proves to show" - Lavender Lloyd proves he is an imbecile
"It' paid off" - Alcoholic LARDASS Lloyd's bar and utility bills never
are though.
"I wear if with" - Davies wears his stupidity well
"You need to get al ife and a job." Mongolloyd retardo Davies needs to
get English lessons and
not dream of an "Al ife" with "Al Queda"
"I've never fucking pretending attorneys!" - LARDASSclown Davies never
had to pretend to be stupid, either!

"...what your life must me like..." - Mongolloyd's life of pizza
delivery and trashcan robots is really something
to want, too, isn't it?
"manor" - Lardassclown Davies' "manners" are like those of a hog....
"Christien" - Poor LARDASS Davies, he's shows why ignorance is bliss in
the eyes of the Lord.
"reely" - Mongolloyd Davies is "really" stupid, isn't he?
"please don't imposter me more" - Mongolloyd make good sentence!
"distastful" - A description of LARDASSCLOWN DAVIES' eating habits.
"commnet" - Most people make "comments," ill-educated Lloyd Davies
makes "commnets".
"None of you refuse to tell me who you are." - Huh, Mongolloyd?
"Millinium" - Even after a "millennium" LARDASS couldn't be smart!
"afriad" - LARDASSclown Davies isn't too smart, I'm "afraid"
"powerfull" - Mongolloyd Davies sure has a "powerful" command of the
English language.
"conquor" - Lardass Lloyd has yet to "conquer" his idiocy.
"I always new that your stupidity would trip you up, Mr. Wiseman."
- I just "knew" Llardass Lloyd couldn't pose as "Christy
Davies" without fucking it up and outing himself.
"I have given it some though and decided to come back" - Mongolloyd
has never given anything any "thought." (from another "I'm
leaving" speech/lie)
"usaul" - As "usual" Lardass lloyd Davies fucks up!
"Secwet Woger " Llardass Llavender Llad Lloyd's been sucking so
many cocks he's got a lisp!
"douters" - Even though he has his "doubters", it's
"doubtful" Llardass Lloyd has an I.Q. over 70.
"bypolar" - Mongolloyd Davies is a "bipolar bisexual".
"desperite" - Lardass Lloyd is so "desperate" to win at something,
anything.
"situtation" - Most people get in "situations, " but not our total
fuck-up Lloyd.
"aholt" - Lardass Lloyd usually gets "a hold" of himself on a
Saturday night, since he has no date!
"mysteriuos" - Mongolloyd Davies, "mysterious" survivor of a coat
hanger abortion attempt.
"I've did" - Most people say " I did"
"Woger" - When cocksucking, lisping fags try to say " Roger."
"for sometime" - Lardass has been a mentally ill retard "for some time"
now.
"mommie's" - When Mongolloyds say "Mommy's" as in "Mommy's house."
"drop out" - Lloyd was a High school and college " dropout."
"backpedalling" - "Backpedaling" is what Lardass does a lot of.
"Maybe two years back" - Mongolloyd speak.
"outted" - Lardass Lloyd's illteracy at work.
"I've riddled Woger for years as Arf! Arf!" - Mongolloyd is Arf!Arf!,
and his stupidity is no riddle.
"self esteme" - One thng is for sure, Lardass has it..."low self
esteem," that is.

"short comings" - Lardass has many, many "shortcomings."
"yahoo" - Lardass always goes into the "Yahoo!" gay chat rooms.
"The truth hurts you see" - So does reading your mangling of the English language, Lardass.
"His stupidity can not be disguised for long." - Lardass' stupidity "cannot" be disquised at all.
"entireity" - Lardass is the embodiment of stupidity in its' "entirety."
"bothe" - Lardass is "both" stupid and retarded.
"got hime" - Lardass has got "him" a case of the dumbass!
"evelope" - Mongolloyd pushes the stupidity "envelope" to the max.
"chiicken" - Lardass Lloyd should eat more "chicken" instead of leftover pizzas then he wouldn't be obese.
"dont" - "Don't" ever improve your English skills, Lardass!
"likign" - Huh? More Mongolloyd Ebonics.
"you ignorant spawn of satin" - Lardass ironically confesses his love of wearing lace!
"powerfull" - Mongolloyd's brain cell isn't "powerful" enough to light a christmas light.
"heresay" - Mongolloyd is a fucking idot, and that's no "hearsay."
"glas" - Lardass Lloyd never uses a "glass" to drink his sticky protein.
"freind" - Dicksucking Davies hasn't got a "friend" in the world.
"yu" - Lardass, "you" really should've gotten a better education!
"Got Brother Stair tuned in here to listen to while sleeping tonite!" - Mongolloyd fucks up again!
"I am not a retrard" - Oh, yes, you are, Lardass!
"Got you in another lie!" - We've "caught you" in another fuckup, Dumbass Davies!
"I am not mentally challenged! I have some pontential." - Mongolloyd is in denial about his imbecility and has the "potential" to become an even bigger jackass!
"did'nt" - Mongolloyd "didn't ever pass Spelling.
"soon all your asses are belong to sherrif" - Mongolloyd fantazises about having sex with his local "sheriff"...
"shure" - We are "sure" you are a fucking moron, Llardass Lloyd!!
"proxie servers" "conecting" - Mongolloyd used "proxy servers" when he "connected" to spam Josh's board.
"enfrocement" - Mongolloyd also fucked up when he spoofed caller ID's and spammed boards, and now law "enforcement" is watching him.
"apoligize" - Mongolloyd's parents should "apologize" for ever siring such a mentally ill retard.
"meagre" - Mongolloyd's "meager" brain can't comprehend English.
"goten" - If only Mongolloyd would've "gotten" an education!
"Prepositioned" - Mongolloyd always gets "propositioned" by nouns and pronouns!
"temting" - Mongolloyd is as "tempting" as a root canal.
"accept" - Mongolloyd use the wrong word in the wrong place again!
"normaly" - "Normally" Lardass would be passed out from Two bud lites by now

"red head" - Little Red is shoving his big ole black dickhead in
Lardass' fat piehole.
"Aflack" - Mongolloyd fucks up yet again..www.aflac.com
"Dickionary" - Mongolloyd is almost as bad as his queer lover Holsten
in obsessing about dicks.
"Pnig" - Mongolloyd can "ping" an anvil off of his thick malformed
skull
"pratice" - Lardass has lots of "practice" fucking up.
"dont" - Dicksucking Davies is too stupid to use an apostrophe, isn't
he?
Mongolloyd thinks "Lent" and "lint" are pronounced the same.
"ancinet" - Mongolloyd will be past "ancient" before he gets any pussy.
"harrasment" - Lardass just loves when his fat asshole gets
"harassment" from the drunk black winos!
"persecute" - Mongolloyd "Christy Davies" Attorney-at-Law makes quite
the lapsis calami in his "prosecution".
"fulest" - Little Lloydie is "fullest" when he's done sucking down wino
nutsack goo!
"i'll" "wether" - Mongolloyd, "I'll" just bet you can't decide
"whether" or not to clean your shitty underpants or keep wearing them.
"authroities" - Mongolloyd's familiar with the "authorities" since his
brother has been carted away to jail more times than he can count.
"Perhaps I can Hal on my show too!" - Perhaps you should consider
remedial English, FATASS!
"cannonized" - Mongolloyd thinks somebody will have to be shot out of a
cannon to be "canonized"
"This board is alot better than all them N54 Boards!" - Mongolloyd is
sure overwhelmed, "then", by "all those" words!
"I dont reconnise you opinions" - Mongolloyd "doesn't recognize" his
stupidity, either.
" I donlt care" - Obviously, Lardass, obviously.
"Thats" "benifit" - "That's" one of Lardass' many fuckups. He doesn't
have the "benefit" of having a dictionary.
"I already notice Woger seeing my everywhere" - Drunken fat bastard
Lardass never notices when he fucks up.
"Look, crackhead, I am NOT degenerates!" - Mongolloyd isn't very
literate, either.
"URASE" - Mongolloyd's empty skull never had to be "ERASED" it never
contained anything to begin with.
"I reading the board tonite" - Mongolloyd can only read comic books.
"REMIDER" - Lardass never has to leave a "reminder" of his many fuck
ups.
"jsut" - Mongolloyd is "just" a mentally ill retard.
"Im" - "I'm" sure Lardass isn't getting any pussy.
"theere" - Mongolloyd isn't all "there".
"Activatiuons" - Lardass Mongolloyd always has his stupidity
"activations" ready to show themselves.
"steganographic" - Mongolloyd takes his "stenographic" duties as a
pizza order taker seriously.
Woger" - Mongolloyd shows off his cocksucking lisp!

"dogy" - Mongolloyd likes it "doggy" style. Receiving, it, that is.
"Tonigjht" - Mongolloyd will be on here "tonight" because he can never get a woman.
"1987 rqadio shack reciever" - Mongolloyd the cheapass makes good spell!
"neber" - Mongolloyd will "NEVER" get laid!
"yourslelf" - Go fuck "yourself", Mongolloyd!
"You must really hate be because" - Lardassed Mongolloyd really hates the English language, too!
"Woger" - Mongolloyd shows off his cocksucking lisp again!
"Roger Wiseman better know as the" - Mongolloyd, better "known" as the eternal virgin and mentally ill retard.
"Secwet" - Mongolloyd is queer and proud.
"turd in the punch bowel." - Mongolloyd knows about bowels, not "bowls". Mongolloyd eats on the floor and in bowel cavities.
"he was refused by the Air Force in 1978" - Mongolloyd, how does one get "refused" by any military? Especially when he was honorably discharged a year earlier?
"was sent for a 90 observation period " Dumbfucking fuckhead, what is a 90 observation period???? BWHAHAHAHAHA
"shoudl" - Mongolloyd "should" really shut the fuck up.
"Here is" - Here "are" some more examples why Lardass is a fucking imbecile.
"Woger" - Lardass is here and QUEER!
"Goddman that Lloyd is sexy!" - But that Mongolloyd is so sexy he is still a VIRGIN. BWHAHAHA!!!!!!!!!!
"laugheds" - Mongolloyd was always "laughed" at.
"I have off this newsgroup for over 2 years!" - Mongolloyd should "off" himself, instead of "being off".
"I have my own internet Talk show, what can be said about your useless self." - Mongolloyd has no listeners or anything useful to say. He's so "useless,"
"that's what can be said" about him.
"You are very useless on here, jon" - While Mongolloyd Davies is useless on and offline.
"Even used up toilet paper has a use, you sure dont!" - Most people flush "used up toilet paper, " Mongolloyd eats used up toilet paper, "don't" he?
"I'll shot to kill" - Lardass, you couldn't handle a cap gun.
"Re,omder" - Lardass always leaves us a "reminder" that he is as smart as a rock.

"resuce" - Mongolloyd can't "rescue" himself from his own stupidity!

"maocked" - Mongolloyd fucks up again, no wonder he is "mocked" for his stupidity!!!

"tipe" - If Mongolloyd the Lardass would pull his malformed head out of his ass, he could "type" correctly.

"pregant" - With his looks, Lardass Davies never has to worry about getting a girl "pregnant."
"when thet saw" - And when "they" saw Lardass' whimpering, they knew he was a big fucking PUSSY.
"Mayeb" - "Maybe" somebody will feel sorry for you and give you a charity fuck, but it's doubtful, Mongolloyd!
"tmorrow" - Mongolloyd will never get a woman, "tomorrow" or any other day.
"Palastine" - Mongolloyd couldn't find "Palestine" on a fucking map or anyplace else.
"Woger the notsowiseman" - Mongolloyd the eternal idiot fucks up and shows off his cocksucking lisp again.
"I hope kills himself" - Mongolloyd wishes he had killed himself.
"agruement." - Mongolloyd is a fucking imbecile, no "argument."
"You're posts" - BWHAHAHAHAHA.."your" fucking stupidity stands out as well, you fucking idiotic fat fuck.
"Globin Woger" - Mongolloyd the 5'6 280 pound garden gnome makes good spell and IKYABWAI.
"Go aheah" - Mongolloyd never can get "ahead" of his stupidity.
"ssomething" - Mongolloyd "ssure" (his spelling) did fuck up again!
"pictures show email them" - Lardass "should" know better then to "show" his stupidity.
"mor" - Mongolloyd gets "more" stupid by the minute.
"celbrating" - Mongolloyd is "celebrating" his stupidity.
"palgues" - Lardass Davies is a "plague" that needs exterminated.
"have the nerver" - Lardassed Mongolloyd "has the nerve" to criticize others.
"Golen" - Mongolloyd's fuckups are "golden" ammunition against the dumb fat fuck.
"posts my closet" - Lardass "by" default fucks up again.
"Froce" - Mongolloyd tires to spell "force", what his drunk daddy did with his dick on Mongolloyd's asshole.
"AUTHROIXATION" - Mongolloyd Davies never needs "auhorization" to be idiotic.
"morrse" - Lardass can't pass 5 wpm "Morse" code.
"netwerk" - Mongolloyd is part of the idiot "network."
"characture" - Mongolloyd is a "character"..a villiage idiot.
"Learn to spelll" - Lardass fucks up again!
"describes to the T" - Mongolloyd is an IDIOT, that "describes him to a T."
"a peace of me" - We take a "piece" out of Lardass' ample ass on a daily basis.
"bus fair" - Lardass can't pay his own bills on time , much less anybody's "bus fare."
"waht" - "What" do you know, Lardass fucks up again!
"to pay for you" - Lardass you can't "pay for your" own expenses.
"HELLUVA ALOT" - Lardass' English skills are not "a Hell of a Lot" of help to him.
"mentionm" - Lardass never wants us to "mention" or point out his numerous fuck ups.
"your are" - Mongolloyd, "you are" one of the stupidest assholes on the

internet.
"alone may to much " - Lardass's sentence construction "alone MAY be too much" to his tiny brain to handle!

You can always tell when you are getting to Woger. He gets to flustered to type." - Mongolloyd must be getting flustered, "too," BWHAHAHAHAHAHA!!!!!!!

"Woger make false bad spell" - Lardass "makes" and ASS of himself, again.

""Mongolloyd". Isn't even word," - BWHAHAHAHA Mongolloyd is English-impaired.
"mentaly illed" - Mongolloyd knows all about being "mentally ill."

"Woger" "femine" - Mongolloyd shows his "feminine" side when he lusts for "Roger's" cock.
"Wheer" - Mongolloyd always wonders "where" his brain is.
"scooterr" - Mongolloyd never could have a "scooter" his fatass was too heavy for one, even if they had semi-truck shocks and springs.
"stal" - Mongolloyd's "brain" is permanently on "stall".
"aymore" - Mongolloyd never tries, he just whines "anymore".
"talkjing" - Lardass never has any women "talking" to him.
"cant" - Mongolloyd "can't" use correct punctuation.
"im" - Mongolloyd, "I'm" sure you will die a virgin, you dumbass!
"i" - Lardass, "I" know you are a fat whining cunt.
"may as wel" - Mongolloyd "may as well" kill himself.
"lefty alone" - Lardass masturbates with which hand, "his "left alone."
"NIM Busters has run its coarse" - Of "course," Mongolloyd fucks up his sentence!
"Wlardass" - "WMongolloyd" "wfucks" "wup" "Wagain"....

"Wheating" - Lardass has "cheated" on everyhting he's every tried to do, since he's so incompetent and inferior, and he still fucks up.

"Wabbi Woger" - Mongolloyd thinks any dick is a good dick to suck.
"Woger" - Mongolloyd's been sucking dicks again
"others" - Mongolloyd can't fathom "others'" hatred for his useless fat ass!

"You can always tell when you are getting to Woger. He gets to flustered to type." - Mongolloyd must be getting flustered, "too," BWHAHAHAHAHAHA!!!!!!!
"imput" - Mongolloyd's brain has no "input"! Mongolloyd one stupid fat faggot.
"Hundred's" - Mongolloyd couldn't count to one much less "hundreds"
"dopesnt" - Mongolloyd "doesn't" have a command of the English language!
"Wait till" - Mongolloyd we will "wait until" you compose a coherent sentence, but it will be a long wait.
"We wn't" - Lardass Davies, you should fuck off with your stupidity so "we won't" see it ever again.

"Woger is now awoke" - Mongolloyd is never "awake."
"is too stupid to under awoke" - oh the irony, Mongolloyd!
"I shits my pants" - Mongoolloyd sure does and eats it, too!
"treasing" - Mongolloyd likes "teasing" nigger assholes with his syphilitic tongue.
"It's being TOS even" -Mongolloyd the only thing you TOS is your tiny dick!
"peoples" - Mongolloyd always steals other "people's" lines!
"I really wish Steve wasn't suck a pussy and would come back to this board" - Mongolloyd makes good fucked up sentence! Mongolloyd made a Freudian slip when he used "suck" instead of "such".
"I think it is long since past time when you closed this shitty board!" -Mongolloyd smoke bad weed!
"wraped" - Mongolloyd has frequently "wrapped" his syphilitic tongue around a nigger's asshole!
"hig" Who knows what the Athens Asshole means?????
"teir" - Mongolloyd is Belle Plaine's "Forrest Gump," As to his retarded peers, he's "their" Camp-We-Can-Do's star pupil.
"tribes" - Mongolloyd's "tribe's" name is Retardos!
"abou" - "About" this time, Lardass the alcoholic fucks up!
"till" - "Until" Mongolloyd learns English, he'll always be ridiculed.
"din't" - Mongolloyd "didn't" ever finish high school!
"stuipd" - Lardass Davies is really "stupid," isn't he?
"are we know" - Mongolloyd has a hard time posting in English. Being more stupid, "are we now," Lardass?

Mongolloyd make good spells!

Nazi Davey's Dictionary:

"Nbot" - Nazi Davey's "not" all there!

2209. Foot in mouth operation

Newsgroup: rec.radio.amateur.misc
Date: 2005-04-24 04:08:42 UTC

Roger had ankle surgery two weeks ago as a result of his "foot in mouth"
disease.

The doctor said he will recover and is expected to be back on his knees in
no time.

I, Roger Leo Wiseman, AB8MQ, being of unsound mind have an offer to make to others who are like me.

I live at 610 Glen Haven Avenue in Glendale, West Virginia.

I have a two bedroom house that is situated in a quiet and quaint part of West Virginia. My house has 800 square feet of floor space, has one bathroom with hot and cold running water and a toilet that works most of the time.

I am looking for a like-minded roommate who can use the second bedroom, which measures eight by ten feet.

The kitchen has a gas stove and a microwave, both of which worked at the time of this writing.

If you are interested in sharing my humble home and can afford $400 per month rent, let me know. I require only that you pay cash up front at the first of each month.

I will not ask for, nor will I look into your criminal background since I have one of my own.

Also, don't worry about the local Police. They all know me so if you see a squad car parked down the block during the day, ignore them. The Chief often stops by just to see how I am doing.

If you are interested, submit your questions to AB8MQ@arrl.net.

Gosh, Toddie. It is past your bed time. Doesn't your Mommie cut the phone
line off at midnight?

You really should get some sleep. I hope my posts are not keeping you awake.

Oh, by the way. What, Toddie, is "you coding" ? And while I am asking, what
is "ther" supposed to mean?

Yes, Todd, "it would be wise not to pretend to be someone" but again, I have
no idea of what you tried to say.

At the risk of sounding 'snooty', Todd, may I suggest that you first learn
to use a spell checker?
May I secondly suggest, Todd, that you remove your bean head from the rectal
area it is apparently esconced in? While there is nothing condemnable about
having one's head implanted in a rectal cavity, it does inhibit one's
ability to see and hear..., at least for you.
There is at least one redeeming aspect of having your head firmly planted in
your rectum. You keep your ears warm and frostbite is out of the question.

Like you said, anyone, so show one post that I have lied in or where I faked a name? You have blamed four people of making that one post and by your own words, it could have been you.
You lie, as a matter of fact you are a pathological liar, you fake post on your blog. When is it going to end you idiot?

Just you gayboy. You keep posting about peoples butts! You're 37, live
with mommy and daddy, look like you're gay, dress like you're gay and
talk like a 10 year old that was raised in a whore house! I say that
makes you gay.

Provided by BARF80.ORG (Cleveland, Ohio)

Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, AB5K & the AR TelNet Clusters Network, K1XN & GoList, W2VU, N3SL, NG3K, W3UR & The Daily DX, K4ZLE, N4AA & QRZ DX, NA5U, K8IW, K8YSE, NE8Z, DL1EK & The DX News Letter, F5CWU & La Gazette du DX, F5NQL & UFT, I1HYW, I1JQJ/IK1ADH & 425 DX News, IK7JWX, IK0DWN, IZ8BRI, IZ8CCW, JI6KVR & JA-IOTA Islands News, ON5NT, PA7FM, ST2BF, UN5PR and VA3RJ & ICPO for the following DX information.

DXCC COUNTRY/ENTITY REPORT: According to the AR-Cluster Network for the week of Sunday, 17th/April, through Sunday, 24th/April there were 216 countries active. Countries available: 3A, 3B8, 3B9, 3D2, 3DA, 3V, 3W, 3X, 4J, 4L, 4S, 4X, 5B, 5H, 5N, 5R, 5T, 5U, 5V, 5Z, 6W, 6Y, 7P, 7Q, 7X, 8P, 8Q, 8R, 9A, 9G, 9H, 9J, 9K, 9L, 9M2, 9M6, 9N, 9V, 9Y, A2, A4, A6, A7, A9, AP, BV, BY, C2, C3, C6, C9, CE, CE9, CM, CN, CP, CT, CT3, CU, CX, D2, DL, DU, EA, EA6, EA8, EA9, EI, EK, EL, EP, ER, ES, ET, EU, EX, EY, EZ, F, FG, FK, FM, FO, FP, FR, FY, G, GD, GI, GJ, GM, GU, GW, HA, HB, HB0, HC, HI, HK, HL, HP, HR, HS, HV, HZ, I, IS, J3, J6, JA, JT, JW, JY, K, KG4, KH0, KH2, KH6, KH8, KL, KP2, KP4, LA, LU, LX, LY, LZ, OA, OD, OE, OH, OH0, OK, OM, ON, OX, OY, OZ, P2, P4, PA, PJ2, PJ7, PY, PZ, R1FJ, S5, S7, S9, SM, SP, ST, SU, SV, SV9, T7, T9, TA, TF, TG, TI, TK, TL, TN, TR, TT, TU, TY, TZ, UA, UA2, UA9, UK, UN, UR, V3, V4, V5, V7, V8, VE, VK, VK9L, VK9N, VP5, VP8, VP8/h, VP9, VQ9, VR, VU, XE, YA, YB, YI, YK, YL, YN, YO, YS, YU, YV, Z2, Z3, ZA, ZB, ZC4, ZD7, ZD8, ZF, ZK1/s, ZK2, ZL, ZL7, ZP, ZS

* PLEASE NOTE: The report "could" contain "Pirate/SLIM" operations or more likely a "BUSTED CALLSIGN". As always, you never know - "Work First Worry Later" (WFWL).

8Q, MALDIVES (ZD8 Op Cancelled!). The four Spain operators who were planning a DXpedition to Ascension Island as ZD8C (see OPDX.703) have announced that they aborted their travel plans due to their work and schedules. However, the team will be active from Maldivas Islands next October to participate in 2005 CQ WW DX Contest with activity prior

to the contest. The operators for this activity are:
* EA1DGZ Carlos Garcia Esquivias
* EC1KW Oscar Luis Fernandez Lanza
* EA1DBC Roberto Lucas Munoz
* EA1AAW Joaquin Diego Alonso
* EA1CNF Fernando Gavela Saiz

Activity will be on 80-10 meters, including the WARC bands. Their callsign has not been assigned yet, but possibly 8Q7C. More details are forthcoming. QSL Manager is EC1KW. QSL will be confirmed via direct (QRZ.com), or by the bureau.

A6, UNITED ARAB EMIRATES. Ghis, ON5NT, who has been in UAE since March 2005, is using his own callsign/license A6/ON5NT. He informs OPDX that he will be here until the end of June 2005 (time permitting), with an interruption during the last 2 weeks of May (holidays at home). He was heard this past week on 12 and 17 meters SSB. Watch 18145 kHz and 24945 kHz possibly between 1200-1430z. There has also been some CW/SSB/RTTY activity on 20/15/10 meters during the same time (20 meters, possibly later). QSL via ON5NT: Ghis Penny, P.O.Box 93, BE-9700 Oudenaarde, Belgium. Ghis states, "Multi-color picture cards for A6/ON5NT will be ready in August. Incoming direct cards for 5U7JB, A61AV/p (AS-124) and A61Q/p (AS-021) are being answered during my absence. Former callsigns I manage are being taken care of when I am on leave from home."

ANTARCTIC NEWS.....
Victor "Vic" Karassev, RD1AL, who was active last year from the North Pole 32 drifting station (NP-32) as R0PA, is currently active as RD1AL/0, but not from the new North Pole 33 drifting station as first announced. The NP-2005 drifting station he is currently on is a multi-national expedition camp consisting of two tents very close to one another. The other camp is where tourists are currently trying to reach the North Pole by ski. The 7 member team of NP-2005 consists of a Russian, Ukrainian and Belorussian oceanographers, biologists and glaciologists. The actual temperature is about -21&#65533;C at a windspeed of 11 mtrs/sec. Vic's activity was expected to last until April 22nd, but now has been extended 2-3 more days due to a delay with their flight. His favorite frequency on CW is 14010 kHz. QSL via his homecall either via the bureau or via direct to: Victor Karassev, P.O.Box 73, St. Petersburg, 191126 RUSSIA.

For WAP information and the current WAP bulletin, visit the following Web page at: http://www.ddxc.net

CQ ANNOUNCES ANNUAL "DX MARATHON". Richard Moseson, W2VU, Editor, CQ Amateur Radio, provides the following press release: (Visalia, California, 4/16/05) - CQ magazine today announced the revival of the long-dormant CQ DX Marathon last run in 1948. The new CQ DX Marathon will essentially be a year-long DX contest with stations competing to contact as many different countries ("entities") and CQ Zones of the World as possible over a full-year period, then starting again at zero at the beginning of

the next year. The new CQ DX Marathon is part of CQ's broader "Waking Up DXing" program whose goal is to reinvigorate DXing, or contacting hams in faraway places. The program was outlined for the first time at the International DX Convention in Visalia, California, on April 16.
"DXing has always been the heart of ham radio," says CQ Editor Rich Moseson, W2VU, "and it continues to be the biggest thing that sets us apart from other forms of electronic communication. Healthy DXing activity is vital to the long-term health of amateur radio."
Bob Locher, W9KNI, of Idiom Press, provided the inspiration for the new activity and joined in the announcement at Visalia. "Many active DXers have noticed a drop-off in general DXing activity outside of contests and DXpeditions," notes Locher. "I suggested that CQ start up an event that would promote activity all year long, would minimize geographic advantages and provide for simple scoring. It turns out that the CQ DX Marathon, which evolved after 1948 into the CQ World Wide DX Contest, was already based on the same concepts."
Scoring will be very simple, consisting of the total number of DX entities and CQ zones contacted over the course of a year. There will be no multipliers and each country and zone will count only once. In the case of a tie, the station whose last qualifying contact came earliest in the year will be the winner.
Complete details and rules for the new CQ DX Marathon will be published in the May issue of CQ magazine and will be posted on the CQ website (www.cq-amateur-radio.com) after the issue is in subscribers' hands. The first running of the event will be in 2006.

D4, CAPE VERDE. Alex, 4L5A, will be active as D4B in the CQ WW WPX CW Contest (May 28-29th) as a Single-Op/All-Band/High-Power entry. QSL via K1BV. Visit the following Web page at: http://www.qsl.net/d44tt

DAYTON HAMVENTION (DX Forum). Jay Slough, K4ZLE, announced this past week the programs for the 2005 HamVention(r) DX Forum have been set as follows:

VU4RBI - probably by VU2RBI
KP1-KP5 - Video of a past KP5 activation by AC8G
- Status on new operations by W8OI
3Y0X - Not this year, but next?
K9LA - propagation for the low bands and low sunspots
N7NG - DXCC program updates from the ARRL
Q&A - all presenters

Jay, states, "The DX Forum for the HamVention(r) is sponsored by the SW OHio DX Association. Every year we attempt to inform, entertain and educate the DX community through the DX Forum. We think the program this year will have something of interest for all DXers. The speakers certainly are qualified for their areas of discussion. Those who attended the forum last year will remember that we were crowded into a much smaller room than we were used to in previous years. It appears we may be in the same room this year. If you attended last year and felt the room size to be inadaquate, you may consider contacting HamVention's decision makers to

let them know how you feel. I have. The DX Forum is currently scheduled for Room 4 at HARA Arena on Saturday, 21 May, 2005, from 9:30 AM until 12:15 PM. I hope to see you there."

HC, ECUADOR (Update to OPDX.706). Dr. Rick, NE8Z, who will be here between April 25th and May 11th, states that he in addition to his HC1MD operation from Tumbaco, will also be operating from various portable QTHs as follows:
HC1MD/HC1 - Mt. Pichincha (Santa Maria family hacienda at 13,000 feet ASL): http://www.summitpost.org/show/mountain_link.pl/mountain_id/131

HC1MD/HC6 - Banos or Mt. Cotopaxi
http://www.summitpost.org/show/mountain_link.pl/mountain_id/131

HC1MD/HC7 - Sierrazul near Baeza (Amazon jungle)

His rig will be a Yaesu Ft-857 w/Outbacker vertical (12 vdc battery). QSL via K8LJG.

HZ, SAUDI ARABIA (Update to OPDX.706). Thomas, HZ1EX, continues to be active on 40/17 meters CW with some 20 meters activity. His QSL Manager, SM0BYD, wants people to hold the cards for HZ1EX and send them in May as he will be away from home until then. NO IRCs, only 2 USDs. See details on QRZ.com.

IOTA NEWS.....
AF-NEW. Just a reminder that Hossam/SU1HM, Said/SU1SK, Tarek/SU2TA and Sayed/SU1SA were expected to activate SU8IOTA from Disuqi Island (aka Nelson) in the Nile Delta and Sinai Region Group this past weekend. As this was being typed early Sunday morning, no QSNs were reported. Activity is to last until May 1st. QSL direct to SU1SK: Said Kamel, P.O. Box 190, New Ramsis Center, Cairo 11794, Egypt.

AS-017. Operator JR2RKK plans to be active from Izena Island (JIIA AS-017-016, Okinawa prefecture) as homecall/6, May 28-29th. QSL via his home callsign, direct or via the bureau.

AS-076. Operators JR5DPB and JE5HXL plan to be active from Teshima Island (Kagawa prefecture) as homecall/5 on May 8th. After their operation a new reference number will be assigned for the JIIA Award: http://www3.ocn.ne.jp/~iota/newpage61.htm QSL via their home callsign. You can go direct or via the bureau.

AS-105. Members of the Pyongtaek DX Club (D90HE) will be active from Kukhwa Island (KDN C027), May 20-22nd. Operators mentioned are: Han/DS2GOO, Lee/6K2CEW, Chae/DS5BSX and Young/6K2ABX. Operators will be active as D90HE/2, and their homecall/p on 80-10 meters SSB and RTTY. QSL D90HE/2 via DS2GOO and operator's homecall/p via their home callsign, by the bureau or direct. Visit the Web page at: http://myhome.naver.com/dxer2han/as105

EU-NEW. Everything is reportedly a go for this rare, expensive and high risk operation (See Web below). Operators Jim/MM0CWJ and David/MM0ALM will activate Rockall from around June 14th to about June 21st. Hopefully more details will be forthcoming. The Rockall Island Web site: http://www.rockallisland.co.uk/

EU-052. Operators IK7JWX, IZ8EZP, IZ7AVU and IZ7ATN will be active as SV8/homecall/p from Corfu Island and several Lighthouses (GRE-117, GRE-156, GRE-159, GRE-170 and GRE-179), between May 6-9th. Activity will be on HF, the WARC bands on modes SSB/RTTY/PSK31. They will also particate in the ARI Contest (May 7-8th). QSL via the operator's instructions.

NA-062. Dave, N2NL, will be active as NK4AA from Key West (USI FL-040S, Monroe County), Florida, May 24-31st. He will also participate in the CQ WPX CW Contest (May 28-29th). QSL via N2NL (QRZ.com).

KP1-5 PROJECT NEWS (Update from Mike, NA5U). DX Organization Leadership: "I am writing to ask for your assistance in an important matter affecting the pastime of DXing. It has been over ten years since Navassa Island (KP1) and Desecheo Island (KP5) have been on the air. This is because the islands are national wildlife refuges under the control of the U.S. Fish and Wildlife Service (FWS), which banned Amateur Radio from the islands in the early 1990s.
Despite many requests for permits to visit the islands for Amateur Radio operations, the FWS has stated unequivocally that Amateur Radio is permanently banned from the islands. The FWS asserts that Desecheo is closed for safety reasons because of unexploded bombs, illegal aliens and drug smugglers on the island; Navassa is closed to protect sensitive habitat. Yet the review of over a thousand pages of internal FWS records and reports conducted by Brad Farrell, K4RT reveals that these claims are baseless. FWS records reveal that it considers Navassa a healthy and highly pristine habitat. Yet the agency turns a blind eye to the many Haitian fishermen who live there and start fires -- while refusing to issue permits to American Amateur Radio operators and other U.S. citizens for lawful use of the islands. In fact, the FWS recently considered encouraging more illegal alien fishermen to go to Navassa under a federal permit program!
Since 1994 the FWS has relied on this charade to deny applications for special use permits for Amateur Radio on Desecheo or Navassa no fewer than sixteen times. To top it off, the FWS has wholly misrepresented the facts to several Congressmen who have inquired on behalf of Amateur Radio operators whose requests for permits for Desecheo and Navassa were turned down, and certainly did not disclose to these Congressmen the information they have kept hidden in their internal reports and records.
This is alarming and just plain wrong, and it is why I am asking for your help. The KP1-5 Project, www.kp1-5.com, was launched to right these wrongs and we need your help. As a result of the efforts of hams across the nation, H.R. 1183 has been introduced in Congress. H.R. 1183 would require the FWS to open Desecheo and Navassa to limited public use. It is not Ham-Radio specific. It is critical that legislators hear from their constituents telling them to support and cosponsor H.R. 1183.
The KP1-5 Team met in Washington, DC on April 8th to present information

to Congressional staff and other interested parties. The presentation was successful. We learned while we were there that this must be a 'grass-roots' effort. So, if the bill is going to pass, it is up to the DX community to make this happen.
Here is how your organization can help:
1. At your next meeting, or as appropriate for your group, please share the content of this letter.
2. Encourage your membership to individually contact their Congressman asking them to support and cosponsor H.R. 1183. The details on how to do this can be found at www.kp1-5.com. Urge them to follow up with phone calls!
3. Utilize your e-mail reflectors to get the word out to your members and other DXers.
4. As the leadership of your organization, write each Congressman whose constituents are members of your club urging them to support H.R. 1183.
5. Please consider a donation of any amount to the KP1-5 Project. The Lone Star DX Association has agreed to oversee this fund. Details on donations can be found on the website <http://www.kp1-5.com/> . Any donation will offset direct costs associated with moving this effort forward. None of the considerable personal expenses of the KP1-5 Team will be reimburse by these donations. Please do not hesitate to contact me if you have any questions."
73 es DX,
Michael L. Thomas, NA5U
KP1-5 Project Director

MU, GUERNSEY. Johannes, DF5AU, will be active as MU/DF5AU from May 14-15th. Activity will be on 160-10 meters (no WARC) on CW/SSB. QSL via his home callsign, by the bureau or direct.

QSL INFO AND NEWS.....
As of April 19th, Kim Larson, daughter of N3SL, is the QSL Manager for Stephen Clark, V73CS. Cards already are on hand, and logs are in route. Standard QSLing practices: direct with postage/green-stamps, or bureau. Details can be found at: http://www.qsl.net/n3sl/manager.htm The logs will also be posted (when received) on the same Web page. Stephen also will be using LoTW.

To celebrate the election of the new Pope Benedict XVI, there was activity this past week by Francesco, IK0FVC, from the Vatican as HV0A. QSL via IK0FVC.

SPECIAL EVENT (Enigma Machine To Be Reactivated After 60 Yrs)......
In September 1939, the radio receivers of all radio amateurs were ordered to be confiscated, but many amateurs volunteered to become "Voluntary Interceptors" (V.I.'s) in their own homes. These V.I.'s intercepted encrypted Enigma messages transmitted in Morse Code which were passed to the code breakers at Bletchley Park. Accuracy was crucial in order to assist decoding of the message, but many of the intercepted signals were weak or fading and atmospheric conditions were often poor with QRM

from loud local stations. Searching through the bands was very painstaking, but it was a task that was carried out with great skill and dedication, providing a most valuable service to the Allies. As a tribute to the work of the V.I.'s sixty years ago, the Scarborough Special Events Group (SSEG) will be on the air as GB2HQ from GCHQ Scarborough over the weekend of May 7-8th. A souvenir QSL card showing an Enigma cipher machine and an HRO receiver will be issued to commemorate the occasion. GCHQ have provided a working Enigma machine for use by the SSEG and Ofcom and have given permission for transmission of an enciphered Enigma message to be sent in Morse Code on the amateur radio bands for this event only. The group will be active on SSB, PSK and CW. The CW station will operate around 7015 or 3515 KHz and the Enigma message will be transmitted in Morse Code at 1100z on Saturday, May 7th, at a speed of 15 wpm. The message will consist of a few five letter groups which will be repeated at 1300 and 1900z. GCHQ invites all licenced amateurs and listeners to submit a copy of this Enigma message and will award a certificate for a 100% accurate intercept. A copy of this message should be sent via club call G0OOO (Scarborough Special Events Group, 9 Green Island, Irton, Scarborough YO12 4RN) and can be enclosed with a QSL card. The cost of the certificate is =C2=A33.00 sterling, 5 Euro's, 5 USD, or 6 IRCs. (UK cheques should be made out to "SSEG"). All profits will be donated to GCHQ Scarborough Charities Fund. Full details will be published on their Web site at: http://www.sseg.co.uk
Depending on your location, conditions may not be favorable for reception on the day. However, in this respect, listeners will be experiencing the same problems faced by the V.I.'s some sixty years ago. FISTS members are invited to take part in a practical demonstration of history brought to life through amateur radio. For more information about the Enigma machine, please visit the following Web pages:
http://www.codesandciphers.org.uk/enigma/
http://www.enigmahistory.org/enigma.html

SPECIAL EVENT. The European Space Research Institute's Radio Club will be operating until May 15th, using the special callsign II0ESA to celebrate mission ENEIDE. The operations are linked to a certificate autographed by the Italian astronaut Roberto Vittori, IZ6ERU, who is participating in the ESA mission and is onboard the International Space Station. QSL is via the bureau, and details about the certificate are available on the following Web page: http://www.qsl.net/i0wtd/ii0esa.html

SPECIAL EVENT. A group of hams from Temirtau, Kazakhstan (UN6P, UN5PR, UN7PBY, UN4PG, UN8PO, UN8PIM, UN7PYL and UN9P), will be active as UP60P between May 5-12th to commemorate the 60th anniversary of the end of World War II. Activity will be on all bands and modes. QSL via UN5PR: Romeo Y. Loparev, P.O. Box 73, Temirtau, 472300, Rep. of Kazakhstan.

ST, SUDAN. Fernando, ST2BF, informs OPDX readers he is finally settled in his QTH in Sudan, and is "enjoying excellent propagation, low noise and a pile up now and then, HI." He has setup his Kenwood TS50, a modem for the digital modes and a 3 element tribander yagi, which is not very high up but is working quite well. Fernando also mentions, "I have not

put up yet antennas for anything other than 10, 15 and 20m. I have been told by some amateurs that they worked ST2BF on 40m CW. That is certainly someone just having fun with my callsign, but not me. I wish I could put up an antenna for 40. Maybe some of these days, but I will keep you timely posted." Fernando was heard this past week mainly on 20/15 meters CW, and some 20 meters SSB. Watch 15/20 meters between 1300-1400z (maybe after 0530z on 20m). QSL is via Joe, W3HNK.

TT8, CHAD. QSL Manager Dennis, PA7FM, informs OPDX that there is good news for those who need Chad on a few bands. The working DXpedition to Chad has been extended to at least 2 more months. Originally, the operation was going to end around the 12th of May. The new final date has not been set, but it will be sometime in August, maybe even later. This will effect the whole operation off course. So far activity was mainly on 160-10 meters. As announced before, the 160 and 80 meters operations have been finished, and the very limited 6 meters operation will improve after the holidays. On May 12th, Michael, TT8M, will be off work for a period of about one month. Pierre, TT8AMO, will remain in Chad during that time. His operation will probably be even more limited due too the work load. After about a month (possibly mid-June), Michael will return to Chad bringing a 6 meter yagi, sponsored by the UKSMG (http://www.uksmg.org). This will be just in the middle of the Sporadic E season, and it should be a good time to work into Europe easily. At that moment, Pierre is expected to be off work for about one month (mid-June to mid-July). Michael will also try to change his licence to be able to work some digital modes (now only CW and SSB on the licence). Currently, TT8AMO will only do CW, and TT8M will be on all modes plus 6 meters. According to PA7M, so far TT8M and TT8AMO made about 9000 QSOs on all bands (including 228 on 160m and 1171 on 80m). The QSL cards will be printed as soon as possible now, and not as originally planned after the operation. QSLs for both TT8M and TT8AMO should go to PA7FM. Remember, 1 USD does NOT cover postage outside EU.

ZA2, ALBANIA. Alfredo, IK7JWX, will be active as ZA2/IK7JWX/p from Fier and Cape Durres Lighthouse (ALB-002), May 1-4th. Activity will be on HF, the WARC bands on modes SSB/RTTY/PSK31. QSL via his home callsign, by the bureau or direct (QRZ.com).

ZK2, NIUE. Aki, JA1KAJ, is now active as ZK2QQ until May 8th. Activity will be on 80-10 meters CW/SSB/RTTY/SSTV. He was heard this past weekend on 17/15 meters SSB, 20 meters RTTY and 40/30 meters CW. QSL via JA1KAJ.

Hought while i am home w/the flu , i'd connect my 'ol brassracer ek1
keyer.
Maybee I
am a little dazed from allthe robotussn but.....

Normally iv'e been using it with my ft102 works great i've wired it as
i would
a plain
straight key, red to the tip .. naturally the 102 works w/a mono plug

looking in my field manual , i've bought a stereo plug and hooked the 2
wires
up as i
would a straight key but that gives me a steady tone soon as plugged in

i can't guess how i'd plug it in as a iambic keyer as that would take
3wires
(dot dash
common)

the brassracer to me seems to just emulate a straight key or so i though
perhaps the
switching levels or something i am missing here??

any help as to how this would get wired is appreciated

2263. 20db/decade = 6db/octave

Newsgroup: rec.radio.amateur.misc
Date: 2005-04-25 13:45:30 UTC

Hi Group,

I'm self-reading this RF book (practical rf circuit design for modern
wireless systems, artech house), and up to chapter 2, but stuck on this:

in the book, it says 20db/decade = 6db/octave

now, I understand that 1 decade = 10 fold increase, and 1 octave = 2 fold
increase, but I can't for the life of me get why 20db/decade = 6db/octave

There is an example where he takes the ratio of the two (10/2 = 5) and then
justifies it by saying 20dB - 6dB = 14dB, with a table of other values,
which make me more confused)

So, if anyone can answer my question, which is
1. why is 20db/decade = 6db/octave and
2. what's the significance? (a short pointer would be good, motivate me to
keep reading :-P),
I'd be eternally grateful (and have more hairs left on my head...)

Thanks,

Kelv

My heavens. An actual TECHNICAL question in this ng. What is this world coming to?

This is a common way to specify filters. With a single "pole" (reactive element) the slope of the curve in the attenuation range is 6 dB/octave or 20 dB/decade. Here is what it means.

6 dB = 2:1 in voltage and 1 octave = 2:1 in frequency.

20 dB = 10:1 in voltage and 1 decade - 10:1 in frequency.

Thus, a single pole falls just as fast in voltage as you increase the frequency. If you double (or triple, or quadruple) the number of reactive elements, the "fall" is that multiple times the dB fall for a single element. A three-pole filter will fall 18 dB/octave or 60 dB/decade.

This is a relatively simple-minded explanation; I could post Lesson G in my freshman electronics class which takes a little over an hour and a half to explain the same phenomenon, with charts and graphs all a-writing.

{;-)

Assuming that the given dB versus log frequency relation is always linear, imagine you start off at some arbitrary point on the frequency scale, say 1 Hz. If you increase frequency by 3 octaves, you go in the sequence 1 Hz -> 2 Hz -> 4 Hz -> 8 Hz.

At 8 Hz, you've changed the gain / attenuation by 3 x 6 = 18 dB. The next octave step would take you to 16 Hz, and that overshoots the decade step of 10 Hz. If you only want to go as far as 10 Hz, then an interpolation says you need to add 2 dB of gain / attenuation to go from 8 Hz to 10 Hz. That is, you've changed the gain / attenuation from 18 dB to 20 dB, and you therefore have 20 dB of change per decade.

To do the interpolation from 8 Hz to 10 Hz properly, you have to recall that you're really interpolating a straight line relationship on a log-log scale. Mathematically, you'd write 6 dB x (log(10/8)/log(16/8)), which is 1.93 dB instead of 2 dB. Apparently the author has rounded the result of 19.93 dB per decade up to 20 dB - a more easily remembered figure.

Searching through the bands was very painstaking, but it was a task that was carried out with great skill and dedication, providing a most valuable service to the Allies. As a tribute to the work of the V.I.'s sixty years ago, the Scarborough Special Events Group (SSEG) will be on the air as GB2HQ from GCHQ Scarborough over the weekend of May 7-8th. A souvenir QSL card showing an Enigma cipher machine and an HRO receiver will be issued to commemorate the occasion. GCHQ have provided a working Enigma machine for use by the SSEG and Ofcom and have given permission for transmission of an enciphered Enigma message to be sent in Morse Code on the amateur radio bands for this event only. The group will be active on SSB, PSK and CW. The CW station will operate around 7015 or 3515 KHz and the Enigma message will be transmitted in Morse Code at 1100z on Saturday, May 7th, at a speed of 15 wpm. The message will consist of a few five letter groups which will be repeated at 1300 and 1900z. GCHQ invites all licenced amateurs and listeners to submit a copy of this Enigma message and will award a certificate for a 100% accurate intercept. A copy of this message should be sent via club call G0OOO (Scarborough Special Events Group, 9 Green Island, Irton, Scarborough YO12 4RN) and can be enclosed with a QSL card. The cost of the certificate is =C2=A33.00 sterling, 5 Euro's, 5 USD, or 6 IRCs. (UK cheques should be made out to "SSEG"). All profits will be donated to GCHQ Scarborough Charities Fund. Full details will be published on their Web site at:

http://www.sseg.co.uk

Depending on your location, conditions may not be favorable for reception on the day. However, in this respect, listeners will be experiencing the same problems faced by the V.I.'s some sixty years ago. FISTS members are invited to take part in a practical demonstration of history brought to life through amateur radio. For more information about the Enigma machine, please visit the following Web pages:

http://www.codesandciphers.org.uk/enigma/
http://www.enigmahistory.org/enigma.html

The 2005 Oregon QSO Party will take place on Saturday, May 7 from 1400 to 0200 UTC. Sponsored by the Central Oregon DX Club, the object is (of course) to work stations in Oregon, and for Oregon stations to work the world.

For full information select the Oregon QSO Party link on the CODXC web page http://www.codxc.org.

We plan to have all 36 Oregon counties on the air. Oregon hams planning to be active are encouraged to register their operation through the website.

AWARD: "POPE JEAN PAUL II - DXSPEDITIONER OF PEACE"

RULES

The section ARI of Sala Consilina (SA), ITALY, desiring to honor and to remember Karol Wojtyla , Pope Jean Paul II has founded the award "JEAN PAUL II - DXSPEDITIONER OF PEACE".

General requirements: Awards are available to all amateurs and SWLs for worked or heard at least 40 countries for BASE award of the 131 countries visited by Jean Paul II during his pontificate; 80 countries worked or heard for SILVER award and 131 countries worked or heard for GOLD award.

All the bands assigned to the Radio Amateur Service and all the modes are allowed, satellites included.

There are 4 versions of the award:
1) MIXED
2) PHONE
3) CW
4) DIGITAL MODES

To claim the Award the QSL cards are not required but they must be in possession of the applicant and could be requested anytime for checks.

To receive the forms for the award application and the list of the 131 countries visited by Pope Jean Paul II you can write to the award manager IZ8AJQ Erminio iz8ajq@amsat.org to receive them on your email address.

The fee is 10 Euro or 12 Dollars. To receive the Award as registered mail please add 3 Euro or 4 Dollars.

Application forms must be sent to this address:

ARI SEZIONE SALA CONSILINA
CASELLA POSTALE N.11
CAP 84036 SALA CONSILINA (SA)
ITALY

Source record: 52113

I'm fooling around, trying to measure the S params of an HXTR-6101, Low noise npn uWave transistor. The transistor breaks into low freq oscillations as I increae the base current. I've got it in a stripline fixture, I made. I'm feeding the base from a supply,thru a 50KOhm, to a .1uF & 22 uF cap to ground and 47uH coil to the base stripline run. Same with the collector. How can I stop the low freq oscillations? You can see a drawing of the stripline here:

http://sdeyoreo.tripod.com/id18.html

Thanks.

Jews out there can not participate (for example, me) because
it's during the Sabbath. Seems like WWII got rid of the NAZI's but
Brittish antisematism still lives on as strong as ever.

Geoff.

What is the basis of the restriction, Geoffrey? It's not considered
work is it? That would put a crimp in a lot of contests!

2296. Icom SM-5 and SM-6 Question

Newsgroup: rec.radio.amateur.misc
Date: 2005-04-28 02:10:09 UTC
From: Hamguy <hamguy@arrl.net>
Message-ID: <5CXbe.8710$XF3.1690@twister.nyroc.rr.com>
Source record: 52118

What is the difference between these two Icom desk microphones? Will the SM-5 work with a 746?

You've made more dodges than the Chrysler Corporation!

And you've claimed that you were appointed to a MARS position on
Okinawa. That seems impossible to me because you know little to
nothing about MARS. Now back up your assertion with real
documentation.

Post your letter of appointment.

2298. Just what is a kook anyway? (kook'ology 101)

Just a refresher course for all of you!
Seemed like a timely time for it.

ps: I also not that many of the ham radio op's I know
seem to fall into one or more of the below categories! (grin)

Enjoy!

---- cut ----

http://www.kook-watch.net/mdavï¿½is/kooks/kooks.html

What is a kook?

First and foremost, kooks believe -really weird- stuff. But
simply holding weird beliefs isn't enough to make someone a kook.
It's the tactics they use to spread their beliefs that separates
kooks from the merely eccentric. Below is a list of common kook
distinguishing characteristics. The average Usenet kook will
possess at least several of these traits. ï¿½ber Kooks will possess
most or all of them.

a. Kooks make lists of their enemies. Anyone who maintains a list
of enemies is almost certainly a kook. Anyone who appears on one
or more kook enemy lists probably isn't a kook.

b. Kooks are control freaks. Kooks try to moderate the NG and try
to force people to only talk about certain subjects and/or
conduct themselves only in what the kooky wannabe moderator sees
as the correct manner. Kooks will even complain to the ISPs of
other NG posters whose views they don't agree with in an attempt
to have them removed from Usenet.

c. Kooks are paranoid. Most kooks are big believers in
conspiracies large and small. They seem to think everyone is out
to harm them or at least silence them (because they alone know
the truth, (see d). From the mighty New World Order, to various
three letter agencies of the Federal Government to anyone on the
NG who disagrees with them, kooks see enemies everywhere and make
lists of them (see a).

d. Kooks are always right. They have had the absolute "TRUTH"
bestowed upon them by god or the aliens or by the voices in their
heads or whatever. They are utterly convinced that they, and only

they, know the "TRUTH." No matter how many times their beliefs are proven wrong, they continue to cling to them like grim death and will never, EVER admit to being wrong about ANYTHING.

e. KOOKS LIKE TO SHOUT IN ALL CAPS. THEY SEE THEIR MESSAGES AS BEING SO IMPORTANT THAT THEY NEED TO SHOUT THEM OUT. THEY WANT TO MAKE SURE *EVERYONE* NOTICES WHAT THEY HAVE TO SAY.

f. Kooks are obsessed. They are obsessed with certain subjects and certain other users of the NG, even to the point of stalking them. But above all, they are obsessed with spreading their message and keeping it in discussion at all times on their favorite NGs. Kooks rarely let anyone else get in the last word in any discussion that touches even remotely on one of their obsessions.

g. Kooks will create sock puppets and use them to attack their enemies and/or post positive responses to the kook's own posts (since no one else will).

h. Kooks are incapable of intellectual debate. Kooks believe they are in possession of the absolute TRUTH on a given subject or subjects and they are here to share that truth, not debate it. Since kooks are always right and will never ever admit to being wrong (see d), they refuse to debate their beliefs and tolerate no skepticism toward them. To a kook, anyone who disagrees with them MUST be either ignorant, insane or a paid disinformation agent out to discredit them (see c).

i. Kooks don't have a sense of humor, especially in regards to the subjects they are obsessed with. They are always deadly serious about their pet issues and often berate other NG users for not taking them seriously enough. Kooks are perpetual straight men. Their lack of humor is ironically one of the kook's most amusing characteristics.

j. Kooks lie. Kooks lie about their backgrounds, their qualifications, their achievements, their level of education, their experiences, etc., etc. Kooks see their message as being so important that they are willing to do whatever it takes (especially lying) to get that message out and make it look like it came from a credible source, rather than from a mere kooky nobody who can be safely ignored. Kooks however aren't generally smart enough to lie well or be consistent in their lying, so they are easily caught and their lies are often exposed. However, even when presented with absolute proof of lying, a true kook will never admit to it (see 4) and usually either ignore the evidence or claim it was manufactured by some "conspiracy" that is out to discredit them (see c).

k. Kooks tend to be hypocrites. For example, they will rage against others for posting off topic material but still do it

themselves regularly, and they take great offense when someone else points out that they are off topic. When this is pointed out, they will go to great lengths to try to justify *their* off topic posts as being so important that topical considerations are irrelevant. Another example of kook hypocrisy is name calling. A kook will rage against others for name calling but be completely oblivious to their own continual name calling and ad hominem attacks on others. Kooks tend to live by the motto of "Do as I say, not as I do."

l. Kooks don't play well with others. Since kooks are paranoid, always think they are right on every issue, tolerate no skepticism or differing views and always want to be the one in control, kooks just don't get along with other people, not even other kooks. Every kook is an island unto itself of strange beliefs and weird psychoses. Kooks are very lonely people, and it shows.

Post the information I ahve been asking for you for YEARS, Brain.

And feel free to inquire of CG, 1st MAW, as to my duty assignment
on my 1981 tour on Oki...No matter what I post here you'd simply "diss"
as "doctored".

I'm going to be running a single op, qrp cw hf battery/solar station
for field day.

If you're planning on going qrp single op, and want to work from a
common site, we can help each other with set up, telling tales, etc.

Call or email.

Source record: 52128

Since my old rice box, the Yaesu FT-101E died, I have searched in vain for a new HF transceiver. The general consensus amongst the Amateur Radio fraternity is that the latest state of the art transceivers are overpriced, unreliable junk. I have looked at the latest offerings from Yaesu and Kenwood and although the specs look quite good, the performance and reliability of these technological marvels is less than ideal. I want a minimum of 100 Watts on HF and correspondingly less on 6M and 2M. I would like to run the transceiver from my computer desktop and have about 2K Canadian funds to spend. No Kenwood or Yaesu gear for this boy. Find me a transceiver.

Lardass, you can't afford that program. You have those
cheapassed Radio Shack radios. And, you can never pay your bills
or rent on time.

The Ten-Tec Model 538 "Jupiter" at about $1,290 USD would be hard to beat in your price range. Bear in mind it doesn't carry 6M or 2M "baggage", so you get a radio specifically engineered for HF without any tacked-on VHF bands to compromise the design.

Some Jewish hams will not operate the radio on the Sabbath or other
holy days. Others will. It's up to the individual to make the
determination of what one will or will not do on those days. We
don't have a Pope or equivalent to make that determination for us.

I am an educated and practicing Jew (Conservative/Masorti Movement)
and I have no problem working ham radio during those hours where I
am not conducting or attending services in the synagogue or doing
other family-oriented things. It is, after all, the rest and
relaxation which is the object of the Sabbath. It's not "business".
Others may feel differently and that's OK for them as long as they
do not try to impose their interpretation on me.

As far as the British --- no argument from me !!

Also keep in mind that if a sponsor tries to avoid all the holy days of all
the faiths they might have to forego the event completely.

Looks like you need to make a run to the next Hamfest and keep a lookout for Swans, Hallicrafters and Collins radios - or do like my dad - make one yourself.

No Swan, Hallicrafter, or Collins ham rig ever sold will compare in features or performance to any current $1,000 or higher-priced HF rig from Yaesu, Icom, Ten-Tec, or Kenwood.

Coverage from HF to VHF? (I assume that you also want 160 meter MF
too) Computer control means you will have to buy a rig that qualifies as
"modern"

> No Kenwood or Yaesu gear for this boy. Find me a
> transceiver.

I can agree with that part! I'm partial to Icoms myself.

If you can do without the WARC bands, the Kenwood TS-520 is one reliable
and solid transceiver, and can be had for a *lot* less then any of the
newer junk.

We had this very subject come up not too long ago, and it caused such
acrimony that the item finally worked its way up to the ruling General
San Hedrin Council, of which I am the Chief Scribe. Being uneducated
and from a liberal blue state, I decided that ham radio operation was to
be permitted only by uncircumcised Jews on even days of the month and
then only if family-owned business had first been tended to. Now, if they
work for national corporations, then they were to follow the odd day
schedule, which was first promulgated by Jewish members of the ARRL
in 1934. The thrust of my ruling, which rode in on earlier rulings first
made during The Six Day War in 1967 was for most Hasdic Jews to
not feel as though they were under any particular pressure to operate
their ham radios, if the 31st day of the month fell on a Saturday. As for
me, I prefer freeband operation, where they accept my Jewish
persuasion. Anyway, like I told them at temple last Saturday, y'all just
have a good time. That's the whole point. Oh, and I just elmered
Moshe into ham radio and already he has dxcc. These extra lite hams

just don't appreciate the old days.

73,

Rabbi Phil
Chief, Ruling General San Hedrin Council
Lower Chicago, but sometimes upper right Manhattan

Poor Lardass, his fucking whore sister is actually almost as fat
as he is at 290 pounhds, same height though, 5'6", isn't that
right, Porky Davies?

Dear Doctor Phil:

I have been experiencing muscle twitching and spasms all over my body for a few years now. It started in my left eye and then my right. At first, I would notice it after I sent anonymous email, jammed 20 meters or thought about Lloyd Davies.

Then it started to do it on a more frequent basis. Then I began noticing small twitches in my arms, then my back, then in my face. By the end of the week I felt them going off every few seconds, randomly, from head to toe. I have gone to Doctor Stagger Lee, had EMG, and they found nothing! They said my head is empty.

I admit I suffer from anxiety over Lloyd Davies, so I decided to try Zoloft to see if this would stop the spasms.

So far it hasn't helped. I don't sleep well, and have other mental problems and ill feelings.

I am wondering if anyone else has had this mania or could give me the name of someone who can help me. I need help, and I need it now.

Roger Wiseman

AB8MQ, Twice Tested

Glendale, West Virginnie

Wrong crackhead.

I won't be drinking tonight because I am low on money this week plus
battle star gallactica will be on soon right after scooby doo.

BWHAHAHAHAHA..He watches "Battlestar Galactica" and "scooby doo
cartoons!" No wonder he can't get laid! BWHAHAHAHAHAHAHAHAHA!!!!!!!!

Roger should be looking into that since he is on a perpetual "rag".
AB8MQ is, after all, a "qualified fool".

The Ohio/Penn DX PacketCluster
DX Bulletin No. 708
BID: $OPDX.708
May 2, 2005
Editor Tedd Mirgliotta, KB8NW
Provided by BARF80.ORG (Cleveland, Ohio)

Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, AB5K & the AR TelNet Clusters Network, K1DG, K1XN & GoList, KF2TI, NG3K, W3UR & The Daily DX, K4ZLE, N4AA & QRZ DX, WW5L, KI6T, K8YSE, CX6VM, DL1EK & The DX News Letter, DL6KAC, DL5EBE, EA7JX, EC8AUA, F5CWU & La Gazette du DX, F5NQL & UFT, F5SLD, I1HYW, I1JQJ/IK1ADH & 425 DX News, IZ8BRI, IZ8CCW, JI6KVR & JA-IOTA Islands News, LA5YJ, UA3FDX, UR5WCW, VA3RJ & ICPO and VE3ZIK & www.contesting.info for the following DX information.

DXCC COUNTRY/ENTITY REPORT: According to the AR-Cluster Network for the week of Sunday, 24th/April, through Sunday, 1st/May there were 224 countries active. Countries available: 3A, 3B8, 3B9, 3D2, 3DA, 3V, 3W, 4J, 4L, 4S, 4U1I, 4X, 5B, 5N, 5R, 5T, 5U, 5V, 5Z, 6W, 6Y, 7Q, 7X, 8P, 8Q, 8R, 9A, 9G, 9H, 9J, 9K, 9L, 9M2, 9M6, 9N, 9Q, 9V, 9Y, A2, A3, A4, A6, A7, A9, AP, BV, BY, C3, C6, CE, CE9, CM, CN, CP, CT, CT3, CU, CX, D2, DL, DU, EA, EA6, EA8, EA9, EI, EK, EP, ER, ES, ET, EU, EX, EY, EZ, F, FG, FH, FK, FM, FO, FP, FR, FW, FY, G, GD, GI, GJ, GM, GU, GW, HA, HB, HB0, HC, HH, HI, HK, HL, HP, HR, HS, HV, HZ, I, IS, J3, J7, JA, JT, JW, JY, K, KG4, KH0, KH2, KH4, KH6, KH8, KL, KP2, KP4, LA, LU, LX, LY, LZ, OA, OD, OE, OH, OJ0, OK, OM, ON, OX, OY, OZ, P2, P4, PA, PJ2, PY, PZ, R1FJ, S0, S5, S7, S9, SM, SP, ST, SU, SV, SV/a, SV5, SV9, T7, T8, T9, TA, TF, TG, TI, TJ, TK, TR, TT, TU, TY, TZ, UA, UA2, UA9, UK, UN, UR, V3, V4, V5, V6, V7, V8, VE, VK, VK0M, VK9N, VP2E, VP5, VP8, VP8/h, VP9, VQ9, VR, VU, XE, XT, XW, XX9, YA, YB, YI, YK, YL, YN, YO, YS, YU, YV, Z2, Z3, ZA, ZB, ZC4, ZD7, ZD8, ZD9, ZK1/s, ZK2, ZL, ZL7, ZP, ZS

* PLEASE NOTE: The report "could" contain "Pirate/SLIM" operations or more likely a "BUSTED CALLSIGN". As always, you never know - "Work First Worry Later" (WFWL).

3V,TUNISIA (IOTA Op). Some members of The Canary Islands DX Society have announced that they will be active from Tunez on Djerba Island (AF-083) as 3V8SM (callsign of the Tunisian Scout Radio Club in the Houmt Souk City). Activity will be on the WARC bands and on SSB/PSK31/RTTY between July 26-29th. They will also be active on SSB during the IOTA Contest

July 30-31st. The team icludes: Dunia/EC8ADU, Javi/EC4DX, Edu/EC8AUA and some Tunisian operators. QSL via the Bureau to Javi, EC4DX; with more infomation on QRZ.com. The team would like to send out a special thanks to Mr. Mustapha, DL1BDF, for his great help with them. The team also recommends that DXers pay special atention to their pilot station Oscar, EA4TD, and his Web page for up-to-date news from the team at: http://www.ea4td.com
More informations is forthcoming very soon.

5Z, KENYA. It has been announced that Enrico, IV3SBE, will be returning to here and plans to be active as 5Z4ES. He will stay here through 2007. His activity will be during the weekends. QSL via the Kenyan QSL Bureau.

9A, CROATIA. Zik, VE3ZIK (aka 4N1DX and also one of the news adminintrators at www.contesting.info), will be active from Bilice, on the Croatian coast, between May 7-17th. Look for him on all HF bands, CW and SSB. Also, he will make a special effort on 10m FM (check 29610 kHz). QSL via DL3PS; the DARC Bureau is OK. Do not send QSL cards via the VE3 Bureau because he said it is too complicated to reach them. Visit the following Web page for updates and the online log at: http://www.qslnet.de/ve3zik

ANTARCTICA NEWS.............
The WAP (Worldwide Antarctic Program) is in regular contact with Bhagwati, VU3BPZ, the Communication Officer at the India's Maitri Base (WAP IND-03) in Antarctica. Actually, a team of 8 people will be there at the base during their winter. Bhagwati, VU3BPZ, is very active on HF bands, particularly on 15/20 meters SSB. Check on 21250 or 14150 kHz at any time. It was mentioned that if a DXer needs a particular sked, they can send an E-mail to Bhagwati, VU3BPZ, and he will be more than happy to answer you. His E-maill address is: maitri@ncaor.amosconnect.com

The WAP Antarctic Gallery is available at the following two Web sites. You will find one of the most complete Antarctic Galleries with more than 680 photos and QSL cards available and divided by the following segments: Ancient QSL, Antarctic QSL, Maritime Mobile Photos, Polar Ship Gallery etc.... Also, regular information about activities from the Antarctica are available at WAP and Dynamic DX Charterhouse Web sites at: http://www.ddxc.net/wap
http://www.ddxc.net

CW5R WEB PHOTOS. Visit the CW5R Lobos Island (SA-039) DXpedition 2005 Photo Gallery at: http://www17.ocn.ne.jp/~iota-ja/newpage3cw5r.html

CX, URUGUAY. Jorge, CX6VM, informs OPDX that he will be active on 12, 17 and 30 meters for the next 2 weeks. He suggests to please look for him on 24911, 18081 and 10111 khz (+/- QRM). He will be using a R7000 with 100 watts. QSL via W3HNK.

D2, ANGOLA. Janne, OH5NKD (OH3DD), active as D2DX, is expected to be here 2007. This past week he has be very active on PSK especially on 20/15 meters. His activity also includes 20/15/10 meters SSB. Watch

for his activity between 1100-1330z and again after 1700z.

DAYTON HAMVENTION ANNOUNCEMENTS.....
Jay, K4ZLE, provides the following SWODXA press release: "The program has been set for the 20th Annual SWODXA DX dinner held during the HamVention® at Dayton. The program title is: "FT5XO - Not Your Regular DXpedition" and it will be presented by Wes, W3WL, and other members of the FT5XO operation. In addition, CQ Magazine's 2005 DX Hall of Fame presentation is on the agenda. We plan to have our usual array of door prizes, with two of them worth 1000.00 USDs or more! There are a few seats available, and if you want to join us for the evening's activities, tickets are on a first come, first served basis. The dinner will be Friday evening, May 20th, at the Crowne Plaza Hotel. Seats are 32.00 USD per meal, payable in U.S. funds to SWODXA, and may be ordered from Jay Slough, K4ZLE, at his CBA. SASE would be appreciated. Prior to ordering, it is suggested that you contact Jay at k4zle <at> arrl <dot> net to be sure there will be a seat reserved for you."

Announced by Doug Grant, K1DG: Two of the Dayton Hamvention Forums will be changing location this year. The Antenna Technology Forum, originally scheduled for Friday, May 20th, in Room 1 of the Hara Arena and the Contesting Forum, originally scheduled for Saturday, May 21st, in Room 4 of the Hara Arena, will now be held Saturday afternoon in the Van Cleve Ballroom of the Crowne Plaza Hotel in downtown Dayton. The Antenna Technology Forum, chaired by Tim Duffy, K3LR, will be held from 12 noon to 2:30 PM, and the Contesting Forum, chaired by Doug Grant, K1DG, will begin at 2:30, running until 5:00 PM.

DX HOSPITALITY SUITE. Members of the North Jersey DX Association invite DXers to visit one of the oldest, continously run hospitality suites, on Friday and Saturday, May 20-21st, at the Jimmy Doolittle Suite, 12th Floor, Crowne Plaza (7pm-??).

DXCC EU POLL. Egidio, IZ8BRI, informs OPDX that European stations are invited to visit the Dynamic DX CharterHouse Web page and participate in the European DXCC Poll for the most wanted countries. Please vote, just connect to the Web site at: http://www.ddxc.net

EA6, BALEARIC ISLANDS. Christain, DL6KAC, will once again visit Mallorca Island (IOTA: EU-004 and DIE: E-021) between May 4-24th. Activity will be on 40-10 meters, mainly SSB, but a CW Key is available. Antennas will be dipoles using about 350 watts of power. This will be a holiday style operation! QSL via the DARC Bureau or direct (QRZ.com). He has a Web page at: http://www.dl6kac.de

EO60, UKRAINE (Special Event). Operators Igor/UR3GM and Andy/UR5GAR will activate special event station EO60G from May 5-15th. Activity is to commemorate the 60th anniversary of the Victory in World War II. QSL via UR3GM, by the Ukraine QSL Bureau or direct to: Pulin, Box 23, Kherson 73022, UKRAINE. QSLs can be requested by sending an E-mail to: ur3gm@tlc.kherson.ua
ADDED NOTE: A special "Victory-60 Award" is available by the Ukrainian

Amateur Radio League in honor of the 60th anniversary for making QSOs/SWLs with the following memorial stations and veterans of the Second World War from the different countries of the world during the period May 1-31st (2005). To earn the award it is necessary to achieve the following:
1. For the CIS stations - 60 QSOs/SWLs (for UA0 30 QSOs/SWLs)
2. For Europeans - 40 QSOs/SWLs
3. For the rest of the world - 20 QSOs/SWLs
All modes and bands are allowed. No duplicate contacts. Applications (GCR list) should be sent not later than July 1st, 2005, to the following address: Vlad Ageyev (UR5WCW), P.O.BOX 1856, Lviv 79040, Ukraine. The award is free-of-charge. Applicants from the C.I.S. awards will be sent centralized through branches of UARL and/or the national organizations. Applicants from other countries of the world should enclose 3 IRCs for the postage. The following memorial ARS dedicated to the event will be on the air from the Ukraine, May 5-15th:
EO60AN EO60AB EO60AS EO60AX EO60AR EO60AW EO60AKU EO60AK EM60C EO60CC EO60CK EO60CL EO60CT EN60FA EM60F EM60FT EN60FY EN60FHY EO60G EN60G EM60GX EO60I EM60IG EM60II EO60IM EO60IS EO60JM EO60JF EO60JK EO60JP EO60JS EO60LC EO60M EO60MF EM60N EO60NK EO60NA EO60QF EO60QQ EO60QWW EM60R EO60R EO60RPL EO60TA EO60UD EO60UWC EO60UW EO60UAP EO60UZ EO60W EO60Z
For the QSL info, just follow the operator's instructions. Also contacts with the Russians, and from other ex-USSR contries, special event ARS are valid for the award. Russians will be using RP... prefixes.

HAM COM 2005. Tom Anderson, WW5L, announced that the DX programs and DX Luncheon is now set for Ham Com 2005, June 3-5th, in Arlington, TX, sponsored by the Lone Star DX Association. The DX Luncheon speaker will be Charles Harpole, K4VUD, who is the spark that made the VU4 operation possible. Come hear a fascinating story of DX and emergency operations coming together. This year's DX programs will bring you up-to-date on many things going on in the world of DX. After each day's activities, join everyone at the Wingate Hotel for a hospitality suite sponsored by the North Texas Contest Club. For a complete schedule and a PDF Ham Com Flyer that lists all the DX activities and Ham Com events, visit the following Web sites at: http:www.hamcom.org
http://www.dxer.org/lsdxa

IOTA NEWS.....
AF-097. The 7V2SI DXpedition from Sandja Island in the Bay of Algiers, Algeria, is now active until May 5th. This is a new IOTA. QSL via OM3CGN.

AS-117. Operators JG2TZL, JK2EBB, JK2NWU and JN2TZB plan to be active from Saku Island (JIIA AS-117-007), Aichi prefecture from May 3rd. QSL via their home callsign, direct or by the bureau.

AS-117. Operators JE4YAR, JJ4VQU and JN4BBM plan to be active as homecall/4 from Miya Island (JIIA AS-117-021) Hiroshima prefecture, May 4-5th. QSL via their home callsign, direct or by the bureau.

EU-054. Michele, IF9ZWA, will be active as IF9ZWA/p from some of the Egadi Islands and Lighthouses, May 12-18th. These operations will count for several awards. Here are the reference numbers and list:
Levanzo Island - IIA: TP-009, MIA: MI-050 and ARLHS: ITA208.
Il Faraglione - IIA: TP-013 and MIA: MI-277.
Isola Galeotta - IIA: TP-005 and MIA: MI-031.
Isolotto Prevedo - IIA: TP-007 and MIA: MI-079.
Favignana Island - IIA: TP-011, MIA: MI-025, ARLHS: ITA135 & ITA145, and WLOTA: 1545.
Galera Island - TP-014 and MIA: MI-032.
QSL via his home callsign.

EU-059. Just a reminder that members of the Grantham ARC will be active as GB0SK from St. Kilda (IOSA OL-02 and SCOTIA DI-23), May 2-6th (See OPDX.703). All contacts will be confirmed from St. Kilda; only send a QSL if you want one returned direct. QSL via G0RCI.

EU-105. Jean-Marc, F5SGI, will be active from Batz Island (DIFM MA-018) now through May 6th. Look for activity on 80-10 meters, mainly on CW. QSL via his home callsign, direct or by the bureau.

J3, GRENADA. Harry/AC8G and others will be active as J3A during the CQ WW DX SSB Contest (October 29-30th) as a Multi-(?) entry. QSL route is to be announced (TBA). ADDED NOTES: Harry states, "Hurricane Ivan did only nominal damage to the normal J3A operating site. However, due to temporary use of the site for certain government offices, we may have limited space both interior and outside for the antenna farm. Before and after the contest (and perhaps during depending on circumstances) effort will be made to operate on various modes and bands other than used in the contest. A full team has not yet been assembled so anyone with interest should contact AC8G at: hflasher@dayton.net

JD1, OGASAWARA. Remember to look for Nob/JH1WCD and Joe/JR1AGC as JD1BLW and JD1BLZ, respectively, later this week from May 5-8th. Activity will be on 80-6 meters, mainly SSB. QSL via their home callsigns, direct or by the bureau.

OJ0, MARKET REEF. Operators Pertti/OH2PM, Lasse/OH0RJ and Risto/OH3UU are active as OJ0J for a few more days. With two stations on the air, the team has been very active on 160/80/40/30/17 meters. QSL via OH0RJ.

QSL INFO AND NEWS.....
NEW ADDRESS. Hugo, LA5YJ, informs OPDX that effective as of May 1st, 2005, the QSL address for LA5YJ, is permanently changed to:
Hugo B. Ark, Rute 509, N-1766 Halden, NORWAY. This will also apply to XU7ACW, 9N7YJ, MI0YJR and ST2YJ.

NEW QSL MANAGER. Dom, DL5EBE, who recently met with Nikolaj, RW6ACS, and was formerly R1ANL on the Antarctica Novolazarevskaya Base, has announced he will be the new QSL Manager for R1ANL.

NEW QSL MANAGER. Rod, EA7JX, informs OPDX that he is glad to announce he is the new QSL Manager for Osvaldo/ZP8VAO, Osmel/CO6MAB and Milagro/ CM6MAM. All QSL cards are OK direct or by the bureau.

QSL JA5BEX/5 via the home callsign, direct or by the bureau. Activity was from Honjima Island (IOTA AS-076) Kagawa prefecture. Honjima Island was expected to receive a new JIIA number. Visit the following Web page for details at: http://www3.ocn.ne.jp/~iota/newpage61.htm

QSL JN2TZB via the home callsign, direct or by the bureau. Activity was from Take Island (IOTA AS-117 and JIIA AS-117-021).

QSL TM380 via F5GNY, by the bureau or direct to: Michel Valette, 1 rue des Mimosas, F- 31850, Beaupuy, France.

VISALIA DX CONVENTION. Gary, KI6T, reports that the DXCC card checkers processed 88 DXCC applications covering 7,043 QSOs at the recent Visalia DX Convention.

SPECIAL EVENT. To celebrate "Shikoku Information Telecommunication Month", look for special event station 8N5SAIT between May 1st and July 31st. QSL via the JARL QSL Bureau. Each letter in the callsign's suffix represents the old names of Shikoku's four prefecture.
S = Sanuki (kagawa Pre) I = Iyo (Ehime Pre)
A = Awa (Tokushima Pre) T =Tosa (Kouchi Pre)

SPECIAL EVENT. To commemorate the 60th anniversary of the end of World War II, look for special event stations, EV6ZK (from Orsha), EV7DP (from Mogilev), EV8DP (from Gomel) and EV60BR (from Baranovichi) in the Republic of Belarus, to be active from May 1-15th. QSL via UA3FDX (see the Web page at: http://www.qrz.com/callsign.phtml?callsign=ua3fdx).

SPECIAL SWEDISH PREFIXES. To commemorate the 100th anniversary of the separation of Norway and Sweden, look for Swedish stations to use the following special prefixes between May 17th and June 7th:
SE - SM stations SJ - SK (club) stations
SF - SA stations SG - SL (milatary) ham stations

SV9, CRETE. Wolfgang, OE1WWL, will be active as SV9/OE1WWL/p from May 8-13th. Activity will be on all bands, SSB only, with 10 watts and a longwire antenna. QSL via his home callsign by the bureau.

TM5, FRANCE (Special Event). To celebrate 40th anniversary of the Radio-club de Sevran (F5KKD) near Paris, members will be active as TM5KD from May 27th to June 11th. Activity will be on all modes and bands. A special QSL card will be available. QSL via F5KKD. The radio club will also be active as TM5KD during the "VHF and Above Contest" the first weekend of July.

V2, ANTIGUA AND BARBUDA. Operators Jurgis/LY2CY and Andrius/LY2TA will be active as V25O in the CQ WW WPX CW Contest (May 28-29th) as a Multi-(?) entry. Activity will be from the V26B QTH. QSL via LY2TA.

YI, IRAQ. Korey, YI9VCQ/KA5VCQ, will be active in the CQ WW WPX CW Contest (May 28-29th) as a Single-Op/All-Band/Low-Power entry. QSL via N3ST. ADDED

NOTE: Korey, YI9VCQ/KA5VCQ, reports: "We are trying to organize a club effort under the auspices of the Iraqi Amateur Radio Society in Baghdad. The contest may include both Iraqi and American radio operators." Details will be finalized and posted on the Hamurabi Hams group page at: http://groups.yahoo.com/groups/hamruabihams

YI, IRAQ. Hal, WB4E, active as YI9B4E (yes callsign is correct) was heard this past week very active on 17 meters. Watch this band after 1700z. QSL via WB4E.

YJ, VANUATU (Also, A3). Remember YL operators Elizabeth/VE7YL and Gwen/VK3DYL will be active this week from Port Vila and Aore Island (IOTA OC-035) between May 2-19th. They will receive their callsigns upon their arrival. Their expected activity will be on 40-10 meters CW/SSB. QSL via VK3DYL, by the bureau or direct with 2 USDs or 1 new IRC. ADDED NOTE: They will visit Tonga (A3 - May 24th to June 8th) after this operation. They will activate Nuku'alofa (OC-049) and Vava'u (OC-064).

ZP0, PARAGUAY. Tomas, ZP5AZL, will be active as ZP0R during the CQ WW DX SSB Contest (October 29-30th) as a Single-Op/All-Band entry. QSL via W3HNK.

I picked this nearly 100 pound boatanchor, whatever up at the Joplin Hamfest. Several pics posted to alt.binaries.schematics.electronic. I wonder if anyone can identify the Model No. and what it is, have a maual? I think it might be an early attempt at a phase lock sig gen 2 to 30 Mcs using tubes.
tnx

2351. A perfect description of the genetically defective Porky Davies.....

Newsgroup: rec.radio.amateur.misc
Date: 2005-05-02 19:02:23 UTC
From: No Wun You Know <nowunyouknow@aol.com>

The mentally unstable, ghastly pale, genetically defective porker, who thinks he controls an army of trash can robots, and fancies he is the king of knob jobs in Athens, Alabama. (The home of Deliverance extras.)

There are no Daleks under your command 'tard boy. They are fictional robots used in a television show! You need to get mental help again failure boy.

You have been a failure in everything you have ever done, PERIOD!

You are indeed "pale" you never venture forth outside except for your minimum wage "job," and to buy more of that pussy Bud Lite beer. A real man's beer like Guinness or Newcastle Ale would probably kill a big fat pussy like yourself.

You need to seriously take a long hard look at yourself in a properly lit mirror in that roach infested hovel you call home and then take action. Call Orkin and get that filthy place fumigated, lose weight, get mental help, stay off the computer for hours on end and face reality.

You are 31 years of age, you deliver pizzas, you play with dolls, spew your filth and delusions on here and usenet, while you jack off and get drunk. Nobody, I repeat, nobody except for a couple of geeks like yourself can stand you.

The best thing you could do is to slit your wrists while in that shitty vehicle of yours this summer, then if the police didn't find you right away, the Alabama summer heat would do it without you having to be cremated. You are a blathering asshole that is a boil in the crack of America's ass. You irritate us, end it now Porky, do it! Summer is almost upon you, use Mother Nature to help.

You need to either kill yourself or get help, that's it, do it!

And, to the idiots who think they are helping Lloyd, forget it, he is beyond help, except for the lobotomy kind.

Most have never seen this misfit of nature up close. I have and it makes me sick to my stomach. He should find the same fate the niggers did in the 30's and 40's, a lynching! That would solve our and his employers problems.

Roger has been devastated ever since he learned last week that Lloyd
was promoted to Asst. District Manager, a promotion which includes
unlimited use of a company vehicle, a large pay raise, & several other
perks associated with Lloyd's new position.
Congratulations Lloyd!

2356. Slightly OT, Radio for use in School?

Newsgroup: rec.radio.amateur.misc
Date: 2005-05-03 00:11:24 UTC
From: Dave Santoro <NOdavebuy@SPAMsantoro.com>
Message-ID: <Mkzde.5004$c86.2118@trndny09>
Source record: 52078

I have volunteered to help my local elementary school upgrade to a decent radio system from the off-the-shelf consumer GMRS units they are currently using. I have done a little research, and I think they want to use a UHF-based PMRS system. They need UHF to penetrate the concrete and steel school, and PMRS seems to be the only service on the FCC website that matches the requirement. Have I missed anything?

As far as the licensing goes, If they have six staffers with radios, would they need to use six licenses/callsigns? Or is the entity licensed as one?

I like the price point of the Motorola CLS1410 Radios. Anyone used them?

Any other pointers, URLs, etc would be greatly appreciated.

Thanks!
Dave

Where I work, all the buildings are concrete/steel and we use Motorola HT 1000s in the 158Mhz range. They peneterate very well and overall sound great. Not sure about your specific license requirements, but VHF should work fine and could be a little cheaper. Hope this helps.

2367. Does anyone have any information on the 8950 Vacuum Tube?

Newsgroup: rec.radio.amateur.misc
Date: 2005-05-03 20:49:28 UTC
From: Mike Speed <mike8s2@yahoo.com>
Message-ID: <1115153368.308256.28040@o13g2000cwo.googlegroups.com>
Source record: 51939

I am looking first, for the plate dissipation ratings, but if anyone can point me to a datasheet, it would be very helpful. Also, does anyone know the approximate year in which this tube was first manufactured?

Thanks.

2368. What is this BPL Workaround everyone has been talking about

Newsgroup: rec.radio.amateur.misc
Date: 2005-05-03 22:21:06 UTC
From: "Dr. Who" <nospam@nospam.com>
Message-ID: <mPSde.694436$w62.624492@bgtnsc05-news.ops.worldnet.att.net>
Source record: 51940

We heard some guys taling about some sort of BPL workaround and doing some sort of test on 20 M HF today but missed their calls. They may have been using Echoling. maybe that's what they mean by workaround. Not sure.

But I remember reading some post here a couple months ago about some sort of BPL work around that would send the entire spectrum of a band over the net in realtime.

Does anyone have any idea what this BPL workaround is other then maybe echolink?

Thansk

2369. 6 Meter Propagation

Newsgroup: rec.radio.amateur.misc
Date: 2005-05-03 22:49:22 UTC
From: Fudge <fudge@nrtco.net>
Message-ID: <9dTde.5058$VL3.343842@news20.bellglobal.com>
Source record: 51941

I have never been on 6 meters. Now that I am about to put up a 2 M antenna and the rig I have will operate on both 6 and 2 M, I might just want to try a 6 M antenna. I have no idea what sort of distance I will be able to operate. I would like to try a 6 M V beam as an antenna with 50 W input power. Any idea what sort of results I will be able to expect? I live in Eastern Ontario and the nearest concentrsation of radio amateurs is in Ottawa, about 200 Km distance.

I say it does. Prove me wrong. Post your papers.

> You have the information.

I see no papers.

> Either act on it or admit you're a coward.

No Documentation = Didn't Happen = LIAR

Is Steve Robeson/K4YZ/K4CAP/K4MARS a liar?

According to his own words, his own rules, and his own logic, the
answer is an emphatic yes.

Apology for what? I said I was wrong for the "Q" signal error.

I was.

And I am RIGHT that Lennie is a liar, a miscreat, and a Putz. (I
didn't call him a penis...You should get your attributes right, Brain.

Because YOU made all these claims that you could not/would not substantiate. You make excuses as to why you won't, Brain, but the ANSWER is that you CAN'T!

Kind of like the "ARES" claims and the "Chased Techs" ones you have out there now.

Stupid claims with no reasonable expectation of corroborating evidence, documentation or rationale.

> > And I've never said "Let me see your papers"...That's Lennie's
> > schtick...
>
> You've asked for documentation, and if documentation is not

I've asked you for proof. Proof doesn't have to be in the form of a document, and you've been TOLD that before.

What was the name of the USAF officer that allegedly gave you "authorization" to operate Amateur Radio while in Somalia...?!?!

> So I ask again, Where are your MARS documents? Post them!

And I told you they're not forthcoming. I've given you far more information to verify this ONE claim than you've ever provided for ALL of the questions before you!

The bottom line is you're too cowardly to ask the appropriate agencies if it's true.

The answers would leave you defenseless.

> > My error via "Q" signals does not negate teh rest of my

MARS letters of appointment. Prove your claims with authentic
documents.

Remember, Steve, you claimed that without documentation, the activity
never happened and the person is a liar, a miscreant, and a homosexual.

Are you a liar, a miscreant, and a homosexual?

Show your documents.

But Steve, wasn't it you who demanded documentation for everyone else's
activities?

Ayup!

And if the documentation didn't flow it meant that the event didn't
happen and the person was lying?

Yep, that was you. Your words, your rules, your logic. That is the
basis that you use for calling other people liars. It's too bad that
your heavy handed tactics have to be used on you, that's the way it
works. You are not exempt from your own rules, though you are
desperately trying to avoid them.

So again I ask you to post documentation of your MARS claims. An
authentic letter of appointment to your alledged claim of "ANCOIC
Okinawa" would be satisfactory. Got Papers? Sucks to be Robeson.

Your accusation is based upon your "mistake."

(I
> didn't call him a penis...You should get your attributes right,
Brain.

You can begin telling the truth about the terms you use at any time.

Penis is the translation of "putz."

Testicles is the translation of "cajones."

Homosexual is the translation for two guys sleeping together as "bunk
buddies."

Homosexual is the translation for two men marrying.

> Steve, K4YZ

Why would I want your reservations?

I've merely asked you to post your MARS documentation. Just as you've asked others to post documentation and subsequently called them liars, miscreants, and homosexuals for not providing you what you've demanded.

Why do you have such a problem coming up with the documentation? Could it be that your claimed MARS service never happened? That would certainly explain why you have no documentation.

I don't have the article, but word is that they are going to have a
transmission in mid-June from Armstrong's old tower to mark
the 70th anniversary of his first public demonstration of wide-band
FM. This will be in the original FM broadcast band, which is below
six meters. So one can hope that band will open up at that time,
so more than locals can hear it.

Oh, I did bookmark the page, it's at

Think "AM broadcast band modulator". Find a copy of the old "RCA
Transmitting Tube Handbook" for some examples.

AWARD: "POPE JEAN PAUL II - DXSPEDITIONER OF PEACE"

RULES

The section ARI of Sala Consilina (SA), ITALY, desiring to honor and to remember Karol Wojtyla , Pope Jean Paul II has founded the award "JEAN PAUL II - DXSPEDITIONER OF PEACE".

General requirements: Awards are available to all amateurs and SWLs for worked or heard at least 40 countries for BASE award of the 131 countries visited by Jean Paul II during his pontificate; 80 countries worked or heard for SILVER award and 131 countries worked or heard for GOLD award.

All the bands assigned to the Radio Amateur Service and all the modes are allowed, satellites included.

There are 4 versions of the award:
1) MIXED
2) PHONE
3) CW
4) DIGITAL MODES

To claim the Award the QSL cards are not required but they must be in possession of the applicant and could be requested anytime for checks.

To receive the forms for the award application and the list of the 131 countries visited by Pope Jean Paul II you can write to the award manager IZ8AJQ Erminio iz8ajq@amsat.org to receive them on your email address.

The fee is 10 Euro or 12 Dollars. To receive the Award as registered mail please add 3 Euro or 4 Dollars.

Application forms must be sent to this address:

ARI SEZIONE SALA CONSILINA
CASELLA POSTALE N.11
CAP 84036 SALA CONSILINA (SA)
ITALY

2389. ham radio repeater locator

Newsgroup: rec.radio.amateur.misc
Date: 2005-05-05 21:55:45 UTC
From: glen worstell <worstell@copper.net>
Message-ID: <427959a7_4@newsfeed.slurp.net>
Source record: 51952

The Ham Radio Repeater Locater is a microprocessor-controlled box that automatically tunes your 2-meter transceiver scanner to the nearest 8 repeaters as you drive along the highway. See the August, 2004 issue of Circuit Cellar Magazine, or look for the article in the "digital library" at www.circuitcellar.com

A new version is being developed and will be ready soon (all design information and software is free). If you would like to be added to the mailing list, or if you might be able to contribute to the few small tasks remaining, see www.worstell.com

To reply to this note, fix the anti-spam return address.

I could beleive that Robeson signed up to be a MARS member and got a
callsign, but I cannot beleive that he underwent any MARS training
whatsovever. Nor can I beleive that he held a position of authority in
Okinawa MARS.

Why do I think that?

Because he has shown no knowledge whatsoever of MARS, that's why.

He suffers from Excrementia.

With a small beam, and less the 100 watts, he should be able to work
almost any were in the continent.

When the band is open of course, you spend more time listening to
static then working.

Oh, ya, we are talking SSB. It takes a better opening to work FM, but
I've done it. In that case hang around 52.525

If anyone reading this runs into Fred KE4AMQ of Port St. Lucie, Fl,
please encourage him to contact me at jcamp2@cox.net. He needs to fix a
bad deal he made with me on a dx-70 and accessories. Apparently his
email is not working because I've been trying to get a response from him
for 4 weeks. I would hate to have to start calling him about it at work
since he's in law enforcement, but that may be the next step.

Thanks and 73,
Jeff N0WJP

Maybe, or maybe *you* are the one who screwed him, and this is your
cheap way of smearing his name. Either way, if you believe you were
wronged, your whining on Usenet accomplishes nothing. Take your
dispute to the legal system half wit.

Thanks for the reply, but at this point I'm just trying to contact Fred.
Since he works in law enforcement I don't want to take it to the legal
system as you suggest unless all other options have been exhausted. It
wouldn't look too good for a police officer to get dragged into court
for scamming someone on the internet.

Well if he scammed you, then it doesn't matter if he's a police officer
or a garbage collector, he did wrong. BUT you should contact him at work
and take other avenues to trash his name, don't stand on the corner and
badmouth him to bring him out of hiding. All you had to do was say you
were looking for him, the rest about the deal and his profession are
redundant!

2399. FOR SALE not e-Bay

Newsgroup: rec.radio.amateur.misc
Date: 2005-05-07 16:54:48 UTC

Dary, K8FP is selling some of his excess equipment.

Contact him at k8fp@woh.rr.com

Prices are firm and do not include shipping.

QRP Stuff:

Yaesu FT-817 in excellent condition. Comes with the original box, manual and all standard accessories including the MH-31 microphone. No mods have been performed. No batteries. This radio is guaranteed to work flawlessly on all bands. I am the original owner. $385.

Ten Tec 1320 20M QRP CW transceiver. Like new, works great and includes users manual. $60.

Elecraft K-1 QRP transceiver. This one is in like new condition and built well. Covers 30 and 40 meters. I'm the original owner. Comes with users manual. $140.

Super Antenna MP-1 portable antenna. Like new and in original box. Includes the 80M coil. $60.

QRO Stuff:

Kenwood TS-450 SAT. This radio is in excellent condition and no mods have been performed. All functions work like new. This radio has the built in auto tuner which also works flawlessly. Comes with the original box, manual, and hand microphone. $430. (I have run this rig and it's damn near mint de N8IE)

Kenwood TR-2500 2M FM HT. It's in great shape and works flawlessly. Comes with the ST-2 base stand (quick charger and power supply), SMC-25 speaker mic, SP-40 mobile speaker, 2 PB-25 batteries, leather case, manual and the Kenwood VB 2530 25 watt FM amplifier. All for $75.

MAHA MH-A103 2M amplifier. Drives at 2.5 to 5 watts in with 50 watts out. Covers 144 thru 148MHz and works great. Includes user manual. $50.

Please contact Daryl directly.

72, 73

It's the safest way for all involved. I'm sure that you'd want me
thoroughly convinced that you really did participate in MARS and was
not just a spectator as indicated by your breadth and depth of MARS
knowledge. Got papers?

> K4CAP is not an active callsign.

Probably never was. Just some Bozo thinking he'd swoop up a cool call
sign.

Hi all, I have a kenwood TR-7950. It does not have the factory PL unit.
I want to put a Com Spec board in it.
Does anyone know where the deviation pot is on this radio??
I understand I hook up the PL output to the center pin on the deviation
control.
Also, the "center tuning" LED works on some stations / repeaters but
not on all.
Is there a pot inside the radio to center this???

73

May 9, 2005
Editor Tedd Mirgliotta, KB8NW
Provided by BARF80.ORG (Cleveland, Ohio)

Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, AB5K & the AR TelNet Clusters Network, K1BV, K1XN & GoList, W2CE, K3LR, NG3K, W3UR & The Daily DX, N4AA & QRZ DX, W4VQ, K5LBU, KM6HB, KL7JR, K8CX, K8YSE, CS1CRE, DL1EK & The DX News Letter, DL8YR, EA8CAC, EC8ADU, ER1DA, F5CWU & La Gazette du DX, F5NQL & UFT, F6AJA & Les Nouvelles DX, HA0HW, I1HYW, I1JQJ/IK1ADH & 425 DX News, IZ8AJQ, IZ8BRI, IZ8CCW, JI6KVR & JA-IOTA Islands News, NL12339, SM3CXS, UR5WCW, VA3RJ & ICPO, VK3EW, VK4AAR, VK4FW and VK8AN for the following DX information.

DXCC COUNTRY/ENTITY REPORT: According to the AR-Cluster Network for the week of Sunday, 1st/May, through Sunday, 8th/May there were 225 countries active. Countries available: 3A, 3B8, 3B9, 3D2, 3DA, 3V, 3W, 4J, 4L, 4S, 4X, 5B, 5H, 5N, 5R, 5T, 5U, 5V, 5Z, 6W, 6Y, 7Q, 7X, 8P, 8R, 9A, 9G, 9H, 9J, 9K, 9M2, 9M6, 9N, 9Q, 9V, 9Y, A2, A3, A4, A5, A6, A7, A9, AP, BV, BY, C6, C9, CE, CE0A, CE9, CM, CN, CP, CT, CT3, CU, CX, D2, DL, DU, EA, EA6, EA8, EA9, EI, EK, EL, EP, ER, ES, ET, EU, EX, EY, EZ, F, FG, FK, FM, FO, FR, FW, FY, G, GD, GI, GJ, GM, GU, GW, HA, HB, HB0, HC, HI, HK, HL, HP, HR, HS, HV, HZ, I, IS, J3, J6, JA, JD/o, JT, JW, JY, K, KG4, KH0, KH2, KH6, KH8, KL, KP2, KP4, LA, LU, LX, LY, LZ, OA, OD, OE, OH, OH0, OJ0, OK, OM, ON, OX, OY, OZ, P2, P4, PA, PJ2, PJ7, PY, PZ, S0, S5, S7, S9, SM, SP, ST, SU, SV, SV5, SV9, T2, T5, T7, T8, T9, TA, TF, TG, TI, TK, TN, TR, TT, TU, TY, TZ, UA, UA2, UA9, UK, UN, UR, V3, V4, V5, V6, V7, V8, VE, VK, VK0M, VK9N, VP2E, VP2M, VP2V, VP5, VP8, VP8/h, VP9, VQ9, VR, VU, XE, XW, YA, YB, YI, YJ, YK, YL, YN, YO, YS, YU, YV, Z2, Z3, ZA, ZB, ZC4, ZD7, ZD8, ZF, ZK1/s, ZK2, ZL, ZL7, ZP, ZS

* PLEASE NOTE: The report "could" contain "Pirate/SLIM" operations or more likely a "BUSTED CALLSIGN". As always, you never know - "Work First Worry Later" (WFWL).

2004 RARE DX SOUND CLIPS. Tom, K8CX, informs OPDX: "My DX sound clips for 2004 are now complete. There are 154 streaming Real Audio DX clips at:
http://hamgallery.com/dx2004/
This covers all the major DXpeditions, several long path openings, rare

and semi-rare DX!"

3DA, SWAZILAND (Update). Frosty, K5LBU, reports that he has one ham signed up and has his ticket for the trip to 3DA-land in July. However, he is still looking for more operators for this trip. He states there is a special fare available for a round trip ticket on South African Airlines flying from Washington DC. If interested, contact him at: frosty1@pdq.net Frosty states that operators will have their own 3DA callsign, but he hopes to have the callsign 3DA5HQ for the IARU Contest. Activity will be on all bands including 6 meters and all modes.

3V, TUNISIA. Three Hungarian operators have reportedly received written permission (on May 3rd) to operate from Djerba Island (AF-083). Activity will be from the 3V8SM Tunisian Scout Radio Club station between now and May 10th, on the HF bands. The operators are Jeno/HA5FA (mostly on CW), Miklos/HA5VZ (mostly on SSB) and Miklos/HA5GO (mostly on BPSK and sometimes on CW and SSB too). QSL via HA5FA, direct or via the HA QSL Bureau (Only for this operation!!!).

60TH ANNIVERSARY (End of WWII - Special Operations and Awards)..... Ted Melinosky, K1BV, from the K1BV DX Awards Directory, reports to OPDX that right now, there are 7 different awards from England, Russia and the Ukraine available for contacting special event stations commemorating the 60th Anniversary of the end of WWII. Most of the activity centers around May 5-15th. Complete details of these awards are available on his awards oriented Web site at: http://www.dxawards.com/REALSHORT.htm

7Q, MALAWI. Bill, KC4D, is expected to be here and be active for about four weeks as 7Q7WW starting on May 13th. Activity will be limited to his spare time, and mostly during his evenings on 40/80 meters and possibly 160 meters. Bill is expected to be active during the CQ WPX CW Contest. QSL via KC4D.

9M8, EAST MALAYSIA (Operators Needed For Mountain DXpedition)..... Alan, VK4AAR, informs OPDX that operators are being sought to join a DXpedition to a Dayak village in Sarawak (9M8) located at 1,000 meters ASL. The proposed operation will take place from June 3-5th June 2005, and Australians and DX operators are being encouraged to join this group. A callsign has been requested (TBA), and interested parties should contact Sengchai Chan, 9M8SC, for more details via E-mail at: chansc44@yahoo.com A brief outline of the plans are to follow. QSL (direct only) to VK4AAR: Alan Roocroft, 376 Old Toowoomba Rd, Placid Hills 4343, Australia (with a SAE + postage). The following was also sent by Alan with the announcement: "Briefly, Gunong Jagi is a Bau Jagoi village, the only village that cannot be reached by vehicle, so you've to walk up but on a jungle foothpath, in some parts cement steps, under the canopy of Borneo trees. The altitude of the village is about 1000 metres, which is quite pleasant and cool in the evening. It has about 20 simple houses but most of them are not occupied, as the elderly people prefer to stay in their farms on the slopes or at the foot of the mountain below. Only the village chief called Ketua Kaum and three other families remain in the village most of the time. They will be very happy to welcome visitors, even if just for

an overnight stay and will provide accommodation, help with cooking, etc. It is felt this is an ideal place for a DX.
I am proposing a 3Days/two nights visit, leaving Kuching for Jagoi Gunung on Friday, June 3, 2005 and coming back to Kuching/Airport on Sunday, June 5, 2005. For those intending to fly out of Kuching on Sunday evening, there will be more than enough time to leave the village and catch the flight at Kuching International Airport. So anyone intending to take part should at least arrive in Kuching the latest by Thursday, June 2. In other words, this is a long weekend trip on a ham expedition in a Dayak mountain village. As to details of cost, I have given the rough estimates, but to be on the safe side, if there is say a dozen or so people, it will be safer to say the cost from Kuching to the village for a 3D/2N stay inclusive of accommodation, food, ground transport, etc is approximately RM200 (52-55 USD) per person. Anyone coming in from overseas and needing help to book hotel accommodation in Kuching can also get in touch with Sengchai Chan (9M8SC). He will obtain the hotel package rates from a comfortable hotel in the city centre, but hams would have to indicate the number of nights they are staying and the dates so that bookings can be made, with advance payment. He will do the booking through an officially appointed travel agent in the city who can also organise city tours, if desired."

ANTARCTICA NEWS.....
Gianni, IZ8CGS, Antarctica Award Manager, announced that Cezar-Ioan Trifu, VE3LYC, has been appointed as Antarctica Award Checkpoint for Canada. Those who are interested in participating in the Antarctica Award program may contact him at: ve3lyc@hotmail.com

AX3, AUSTRALIA (Special Event). A team of 16 radio amateurs will activate the special event callsign AX3ITU to celebrate the 140th birthday of the International Telecommunications Union. "Amateur Radio Victoria" aims to have the AX3ITU on air virtually the entire 24 hours on Tuesday, May 17th. It will be available on CW, Phone, PSK31 and an amateur satellite on that day. Three members of the team, VK3QI, VK3ANJ and VK3YR, will concentrate on CW on the 40, 30 and 20 meters bands. Phone operation will be on the 80, 40, 20 and 2 meters bands, while PSK31 is to target 80 and 40 meters. A commemorative QSL card will be available for contacts. QSL information is direct to VK3WI QTHR or via the bureau. Visit Amateur Radio Victoria's Web site at: http://amateurradio.com.au

CASTLE ACTIVITY. Members of the Clube Radioamadores do Entroncamento, will use the special callsign CS7MA to activate Castelo de Marvao (DCFP reference C-067, DMHP reference PG-036 and DMP reference 1210 for the Portuguese Castle Award) on June 4th. Castelo de Marvao is located in the Province of Alto Alentejo. The Clube Radioamadores do Entroncamento Web site: http://www.geocities.com/cs1cre/

DAYTON HAMVENTION ANNOUNCEMENTS.....
DX HOSPITALITY SUITE. The Northern Ohio DX Association (along with Janeen Hire, W8ZET) will once again sponsor a Hospitality Suite at this year's Dayton Hamvention. It will be in Suite 1011 on the 10th

Club Floor of the Crowne Plaza Hotel (old Stouffers) on Thursday, Friday and Saturday evenings (Look for signs!). All DXers/Contesters are welcome. Munchies and refreshments will be avaialble. Come and meet the members and friends of NODXA.

CONTEST SUPER SUITE. Tim, K3LR, announced that this will be their 18th year, and it is getting better every year! This is an open invitation for Contesters and DXers to enjoy 3 great evenings of outstanding conversation. Located in the Miami Room (2nd Floor) at the Crowne Plaza Hotel (downtown) Dayton, Ohio. Join them for the FUN, every night from 7:00 PM to 2:00 AM, on Thursday, May 19th, Friday, May 20th and Saturday, May 21st. There will be a cash bar with lots of room and sit down tables. The 2005 CONTEST SUPER SUITE is sponsored by Array Solutions, Optibeam, AN Wireless, Prosistel, Bushcomm and AY Technologies. The Super Suite is hosted by North Coast Contesters, The Frankford Radio Club and The Mad River Radio Club. Three nights of Midnight Pizza Parties (don't miss one!):
Thursday, midnight - In Memory of Rush Drake, W7RM sponsered by K3LR and K8CC
Friday, midnight - Sponsored by "Members of The Yankee Clipper Contest Club"
Saturday, midnight - OPEN - We are looking for a sponser! Contact K3LR for more information! E-mail is: K3LR@k3lr.com

DXPEDITIONER OF PEACE AWARD. The ARI section of Sala Consilina (SA), ITALY, desiring to honor and to remember Karol Wojtyla, Pope John Paul II has founded the award "JOHN PAUL II - DXPEDITIONER OF PEACE". Three awards are available to all amateurs and SWLs:
BASE Award - For worked or heard at least 40 countries of the 131 countries visited by John Paul II during his pontificate.
SILVER Award - 80 countries worked or heard.
GOLD Award - 131 countries worked or heard.
All the bands assigned to the Radio Amateur Service and all the modes are allowed, satellites included. There are 4 versions of the award: MIXED, PHONE, CW and DIGITAL MODES. To claim the Award, the QSL cards are not required, but they must be in possession of the applicant and could be requested anytime for checks. To receive the forms for the award application and the list of the 131 countries visited by Pope John Paul II you can write to the Award Manager Erminio, IZ8AJQ, via E-mail at: iz8ajq@amsat.org
The award fee is 10 Euro or 12 USDs. To receive the Award as registered mail please add 3 Euro or 4 USDs. Application forms must be sent to this address: ARI SEZIONE SALA CONSILINA, CASELLA POSTALE N.11, CAP 84036 SALA CONSILINA (SA), ITALY.

EA6, BALEARIC ISLANDS. Peter, DL8YR, will be active as EA6/DL8YR/p from Mallorca Island (IOTA EU-004 and DIE E-21) now through May 18th. He was expected to be active during the ARI Contest this past weekend. Look for him to be active mostly on CW (and possibly RTTY) this week. QSL via his home callsign.

ED8, CANARY ISLANDS (Special Event). Members of the Union of Radio Hams of Las Palmas (URL), will travel from Gran Canaria Island (AF-004) to Fuerteventura Island (AF-004) to be active as ED8MPJ from Morro Jable, the municipality of Pajara, in a special and cultural event between May 23-29th. This activity will provide a demonstration of the hobby to the students who are visiting from several colleges. References numbers are: DME - 35.015, DIE - S 06 and IOTA - AF 004. The QSL Manager for this activity is EA8BYG, Manuel Santos Moran. The team of operators are: EA8GL, EA8BYG, EA8AAG, EA8AMY, EB8CTK, EC8ADU and some operators from Fuerteventura Island. For more information visit the following Web pages: http://www.ea8url.com -or- http://www.qrz.com

EO60, UKRAINE (Special Event). A group of operators from the Lviv Shortwave Club will operate special event station EO60W between now and May 15th to commemorate the 60th anniversary of the Victory in WWII. QSL via UT7WZ, by the bureau or direct to: Miroslav Lupiy, P.O. Box 94, Lviv 79000, Ukraine.

ER60, MOLDOVA (Special Event). Operators from Moldova will activate the special event station ER60V from May 5-15th. Activity is to commemorate the 60th anniversary of the Victory in World War II. QSL via ER1DA, to: Valery Metaxa, p.o.Box 3000,Chisinau, MD- 2071, Moldova, Europe.

EUROPEAN DXPEDITION (via Mobile Home). Look for Patrick, F5MQW, to travel throughout Northern Europe with motor-home starting May 15th and ending June 20th. He is expected to travel through Belgium, the Netherlands, Germany, Danemark and Sweden. Patrick will sign using either his xx/homecall (ex. ON/F5MQW, PA/F5MQW...etc.) or xx/F8UFT/p (ex. DL/F8UFT/P, SM5/F8UFT/p .....etc.). F8UFT is the callsign of the French EUCW Society, "The Union Francaise des Telegraphistes". His main goal and radio activity will be to activate several IOTAs in Germany, Danemark and Sweden. As of today, the following stops are scheduled:
EU-128 DL/F8UFT/P Fehmarn Island
EU-084 SM5/F8UFT/P Graso Island
NO-IOTA SM5/F8UFT/P Norr Finno Island
EU-037 SM7/F8UFT/P Oland Island
EU-138 SM7/F8UFT/P Sturko or Aspo or Hasslo Island
The IOTA stops in Danemark will be according to the ferries time tables, and will be announced later; look at the DXclusters. Patrick will be active on the HF bands (except the lower bands 160/80m), CW and SSB. QSL xx/F5MQW via the French Ref-Union Bureau or direct. QSL xx/F8UFT, to F6ICG, via the French Ref-Union Bureau or direct.

FK, NEW CALEDONIA. Tibo, F5CCF/VK3FJH, will be returning here sometime this week to live and work after completing his studies in France. He will again get very active as FK8HW on SSB and on the usual frequencies. QSL via VK4FW.

HB0, LIECHTENSTEIN. Operators Diethelm/DJ2YE and Wolfgang/DK3KD will be active as HB0/HB9AON during the CQ WW WPX CW Contest (May 28-29th) as a Multi-2 entry. QSL via eQSL or direct.

IOTA NEWS.....
AF-004. Juan, EA8CAC, will be active as EA8CAC/p from several different lighthouses on El Hierro Island (DIE 015 - Spanish Island Award Reference Number) between May 17-23rd. Activity will be on 80-10 meters SSB and possibly CW. The following are a list of lighthouses to be activated:
Orchilla Lighthouse: CAI-066 and D-2836
La Restinga Lighthouse: CAI-009 and D-2837
Punta Salmo Lighthouse: CAI-052 and D-2840
Punta Dehesa Lighthouse: CAI-031 and D-2841
Punta Caleta Lighthouse: CAI-028 and D-2839
Punta Bonanza Lighthouse: CAI-026 and D-2837.5
Equipment to be used: TMd700 (APRS), TS2000, IC706MKIIG and vertical antennas. QSL via the Bureau. Daily updated info will be posted during his trip on: http://www.grupodxgc.com To real time positioning throughout the trip (APRS) will be available at: http://www.canaprsnet/locate.php?stn=3DEA8CAC-9 El Hierro Island information is available via the following Web page at: http://www.ecoturismocanarias.com/hierro/uk/index.htm Juan, EA8CAC, Web page is: http://www.qsl.net/ea8cac

AS-043. Operators JI1PLF, JA1UNS, 7N1GMK and 7L4PVR plan to be active from Hachijo Island (JIIA AS-043-003), May 27-30th. Look for them to sign homecall/1 on 160-6 meters CW/SSB/PSK31. QSL to their home callsigns, direct or by the bureau.

EU-038. SWL Jeroen/NL12339 and Will/PE1OPM will travel to the northern part of the Netherlands to activate Wadden Islands from now through May 14th. They will use the special callsign PA6WAD. Activity will be on 80-10 meters and VHF. Their equipment will be two Yaesu FT-897 and an open wire 2x 20 meter wire. QSL Manager is NL12339, direct or via the Dutch QQSL Bureau. Visit their Web page for pictures and suggested frequencies at: http://qsy.to/eu-038

EU-056. Operators LA6IMA, LA3LJ, LA8PV, LA2FKA, LA9SN, LB2DF and LA6LDA will be active as LA9M/p from Sandoy Island, May 13-16th. Activity will be on 160-10 meters CW, SSB and the digital modes. Possible activity on 6/2 meters. QSL via LA9M (QRZ.com).

EU-176. Look for SG3ZZR to be active from Grimskar Island between May 20-22nd. Activity will be on 80-10 meters CW/SSB. Operators will be Anders/SM3XGV, Hans/SM3TLG, Staffan/SM3JGG, Classe/SM3GSK & SM3S, Tord/SM3EVR, Gunnar/SM3DVN and Jorgen/SM3CXS. QSL via SM3CXS. All QSOs will be confirmed automatically via the bureau. If you prefer direct QSLing be sure to include sufficient return postage 1 IRC is OK, but not 1 USD, as mail outside of Sweden is about 1.45 USD (10 smkronor). The team will return to Grimskar Island in July for the IOTA Contest. More info later.

OC-206. Operators Wally/VK6YS, Dan/VK8AN, Nigel/VK6KDH and possibly one other operator will be active as VK6DHI from Dirk Hartog Island,

Western Australia in August, 2005. More details are forthcoming.

KG4, GUANTANAMO BAY. Operators Dennis/N4BBA and Bill/KG4WW will be active before, after and during the CQ WW DX SSB Contest (October 29-30th). The contest callsign will be KG4SB OR KG4WW. Operation class has not been decided yet. QSLs KG4SB via N4BAA and KG4WW via KG4WW.

MU, GUERNSEY. Remember to look for Johannes, DF5AU, this weekend (May 14-15th) from EU-114 as MU/DF5AU. Activity will be on 160-10 meters (no WARC), using CW and SSB. QSL via his home callsign, by the bureau or direct.

P4, ARUBA. John, W2GD, will be active as P40W in the CQ WW WPX CW Contest (May 28-29th) as a Single-Op/All-Band entry. QSL via N2MM. Look for activity before the contest on some of the WARC bands and 160 meters.

PI25, THE NETHERLANDS (Special Event). Look for members of the Netherlands Amateur Radio League (VRZA) to activate the special event stations PI25BEA and PI25TRIX through the end of May. Their activity is to celebrate the Silver Jubilee of Queen Beatrix. Activity seems to be mainly on 80/40/20 meters. QSL via PA3FTX. For more details, visit the Web page at: http://www.vrza.nl (in Dutch)

QSL INFO AND NEWS.....
NEW QSL ADDRESS. QSLs for FK/F6DLN/p and FK8HZ can now be sent to the following address: BUNEL Maurice Francois, Ctre Ville 6 rue de Barleux, 98800 NOUMEA, Nouvelle Caledonie. Maurice is ex-F6DLN and is now FK8HZ.

QSL JA5BEX/5 via the home callsign, direct or by the bureau. Activity on May 4th was from Ote Shima Island (IOTA AS-076) Kagawa prefecture. Activity on May 5th was from Hiro Shima Island (IOTA AS-076). The Japanese IOTA Island Award reference number is JIIA AS-076 (New!!). JIIA Web page: http://www3.ocn.ne.jp/~iota/newpage61.htm

QSL JN2TZB/2 via the home callsign, direct or by the Bureau. Activity was from Oki Island (IOTA AS-117 and JIIA AS-117-006), Aichi prefecture.

Mark, KM6HB, informs OPDX that all the logs for his following operations below can be viewed at: http://dx.qsl.net/logs/
His operations include: KM6HB (1991-PRESENT), ZK1AHB (2000 and 2001), 3D2HB (2004), K6B (12/2004 ONLY), K6I (FEB. and MARCH 2005 ONLY) and K6O (4/2005 ONLY). A QSL card gallery is available at: http://home.pacbell.net/km6hb/.NET.doc

TT8 QSLS. Bob, W4VQ, informs OPDX that he received a note from Dennis, PA7FM, in which he said the QSLs for TT8AMO and TT8M have not yet been printed and should be ready in about a month. He is waiting for a photo from Pierre for the TT8AMO cards.

PLEASE TAKE NOTE (VK4AAR's address). Alan, VK4AAR, has asked OPDX to advise our readers that his mailing address has changed at the end of March, but many people are still sending their QSL requests to the old address. Alan states, "The post office will not redirect my mail forever

so they must use this address in future .....": Alan Roocroft, 376 Old Toowoomba Road, Placid Hills 4343, Australia. Alan is the QSL Manager for the following: 9V0A, 9V1DX, C21RH, KH2VM, P29RH, V63PD, VI0ANARE, VK0MM (Macquarie), VK6AN (OC-266), VK6BM (OC-234), VK6BSI (OC-243), VK6LI (OC-071), VK8AN/6 (OC-154), VK8AN/8 (OC-229), VK8AV/3 (OC-136), VK8DP, VK8MI (OC-173), VU3RSB and VP2V/W3HQ. (YJ8AA, ZK2JJ and ZK2PJ logs are now closed).

PLEASE TAKE NOTE. Dan, VK8AN (aka VK6AN, K6KMD and 4W3AN), informs OPDX that for (inspite of advising ALL stations) contacts with his previous IOTA DXpeditions, to please QSL Alan, VK4AAR, DIRECT ONLY. They are still getting many QSLs via the bureau - most with "via VK4AAR" noted on them. Unfortunately, these arrived without an IRC or "green stamp" and will NOT be answered. Dan states that with the high cost of getting to most islands these days, they feel that they should not have to also bear the costs of thousands of QSLs ("is simply too much for most of our already tightly-stretched budgets"). In all cases, all QSOs were (and will be) advised to QSL Alan directly and NOT via the bureau. Dan says, "To my knowledge, this (or a similar instruction) is standard practice today."

SILENT KEY. OPDX has received a report that QSL Manager Bob Keenan, KD8IW, has passed away. OPDX and its readers would like to send out our deepest sympathy to his family and friends.

SPECIAL EVENT. Using "No special callsign nor prefix or suffix", but only a special "Souvenir QSL card", will be sent to those who contact the Jean Bart ARC, F6KMB of Dunkirk, in Northern France, between May 1st and June 30th. This activity is to commemorate, both the liberation of Dunkirk (the last French City, liberated after the June 1944 landing) and the 65th anniversary of the Evacuation from Dunkirk (the Dynamo Operation of 1940 - which was conducted by the British Navy). QSL via: RC J.Bart Maison Sciences, 62 Rue du 110 EME Regiment D Infanterie, F59140 Dunkerque, France. For more information on the Dynamo operation, visit the following Web page at: http://www.answers.com/topic/operation-dynamo

W6, UNITED STATES (Special Event). The Anaheim Police Amateur Radio Club (W6APD) will operate from May 15-21st to commemorate National Police Week. Suggested operating frequencies will be: 28450, 24950, 21350, 18150, 14253 and 7250 kHz -/+ QRM. For a picture QSL card only, no certificate, send a S.A.S.E. via KM6HB: Mark McMullin, P.O. Box 27271, Santa Ana, California 92799.

VE8 & VY1, CANADA (Non-IOTA Islands). Yukon John, KL7JR, informs OPDX that he will be active from the roving Icemobile (see bio on QRZ.com for K7ICE) on Vale Island and Latham Island (VE8), and Dickson and Scully Island (VY1, and maybe two new ones) starting around May 15th through late June. His activity will be on SSB and PSK-31. Look for KL7JR and K7ICE to concentrate on 17, 20, 40 and 75 meters. Watch DXCluster spots. QSL via KL7JR CBA.

XU7, CAMBODIA. Jaak, ES1FB, will be active again as XU7ACE starting around May 14th for 10 days. QSL is OK via CBA, and Jaak plans to upload his log to LoTW later.

XU7, CAMBODIA. Yuki, JH1NBN, is expected to be active as XU7ADJ between now and May 13th. Reports indicate that this is a business trip, and his activity will be limited to his evening hours. QSL via JH1NBN.

YO, ROMANIA. Jean Michel, F6AJA, French DX Editor of the Les Nouvelles DX, will be again signing YO/F6AJA from Suceava in Romania from the YO8FZ's station. He will be active from May 16-21st during his free time. QSL via his home callsign.

ZL1, NEW ZEALAND. Chris, ZL1CT, will be active as ZL1V in the CQ WW WPX CW Contest as a Single-Op/All-Band/High-Power entry. QSL via N3SL. Visit the ZL1V Web page at: http://www.qsl.net/zl1v

Hi, thanks for the info. I knew the Piexx unit was available.
I have a Com Spec PL unit here and wanted to use it instead of
spending the $60. I know the Piexx unit is the exact replacement
that allows the radio the 3 PL's. It would be nice but not needed in my
situation.
THANKS for taking the time for the answer!!!!

Please don't twist and turn anything without the manual if you are not a
bona fide (zat two werds) tech, EE or close to OM. Just passing on
experience me and my brother had 40 years ago. Now days, with
everything so small and tight, I only turn, push, or rotate things if
they are on ;the outside. : :-\

Hello,

I'm trying to decide whether or not to repair the subject unit so I'd like to know what they've been selling for.

Mine has 1 watt output on UHF. (Final trans out?) The RX is fine and the VHF side also works well (45 watts)

I have the original box, with manual and the power cord and mounting bracket are brand new!

I would sell it like it is if I got a good offer.

Any input helpful.

Please reply by email.

Thanks, Gene (W5VAT)

2417. TS-450S mods - *NOT* the common ones!!!

Does anyone know of any mods for the 450 which will allow it to
transmit below 1710 KHZ? The well-known diode mod does not cut it.

What the heck is a college 'digree"? And what is a chip 'fapricators'?
And sure, we really do need 'buletins' to keep us up with the experts.
If these 'experts' can't spell any better than you, then I doubt we need
their advise.

AWARD: "POPE JEAN PAUL II - DXSPEDITIONER OF PEACE"

RULES

The section ARI of Sala Consilina (SA), ITALY, desiring to honor and to remember Karol Wojtyla , Pope Jean Paul II has founded the award "JEAN PAUL II - DXSPEDITIONER OF PEACE".

General requirements: Awards are available to all amateurs and SWLs for worked or heard at least 40 countries for BASE award of the 131 countries visited by Jean Paul II during his pontificate; 80 countries worked or heard for SILVER award and 131 countries worked or heard for GOLD award.

All the bands assigned to the Radio Amateur Service and all the modes are allowed, satellites included.

There are 4 versions of the award:
1) MIXED
2) PHONE
3) CW
4) DIGITAL MODES

To claim the Award the QSL cards are not required but they must be in possession of the applicant and could be requested anytime for checks.

To receive the forms for the award application and the list of the 131 countries visited by Pope Jean Paul II you can write to the award manager IZ8AJQ Erminio iz8ajq@amsat.org to receive them on your email address.

The fee is 10 Euro or 12 Dollars. To receive the Award as registered mail please add 3 Euro or 4 Dollars.

Application forms must be sent to this address:

ARI SEZIONE SALA CONSILINA
CASELLA POSTALE N.11
CAP 84036 SALA CONSILINA (SA)
ITALY

Typing in all caps is considered shouting.

I used to work in a chip fabrication plant and I didn't have a degree.

> OR RADIO TELESCOPES AND SO ALL HAMS

I take extreme exception to that. We may not have 100 foot dishes,
but I routinely measured 1.5 db noise (at 432) on the crab nebula to
test
my array - sounds a little like radio astronomy to me. Amateurs
have also produced "detailed" all-sky maps at certain frequencies
and have had them published in technical journals.

> IS ARE CONSUMERS NOT LEDERS OF THINGS. THAT IS WHY THEY NEED
BULETINS
> WHAT REGULAR KEEP THEM UP TO WHAT THE REAL EXPERTS DOING.

"Real Experts?" How many radio innovations used today are as
a direct result of technical interest and furthering of the radio art
produced by these "amateurs".

they are very hard to find and as great as they are, I think they usually go
for more than they are worth
I have seen some AOR 7030's go for less. and R8B's occasionally go for just
a bit more.
I have a 225E and as much as I love it, I might trade it for a 7030 plus in
an impulsive moment.

I don't know how the 7030 sounds but the 225E is the best sounding receiver
of the over 100 receivers I have owned.

That's because hamfests have been taken over by computer folks; almost no radios to be found these days.

Loudmouth dumbo Mr. Nescio doesn't seem to know that radio astronomy was
invented by a ham.
IIRC hams were also involved in the development of SSB and FM too.

The Microcephalic Dwarf and Etiquette During an Amateur Radio and Newsgroup etiquette class, Riley Hollingsworth says to his students: "If you were QSO'ing with a well educated Ham such as David Heil and during the QSO you needed to go to the toilet, what would you say to him?"Mike replies "Be right back, I gotta go pee."Riley says: "That would be very rude and improper on your part."Lloyd replies: "I'm sorry I need to go to the toilet, I'll be back in a minute."Riley says: "That's much better, but to mention the word ''toilet'' during a QSO is still unpleasant." And little Rogie says: "My friend Dave, please excuse me for a moment. I must go shake hands with a personal friend, whom, I hope, to be able to introduce to you after dinner." Riley made Roger retest.

Toad wasn't it just a week ago you said that Steve got your ISP to boot
you off the news group? Why are you still here if that's true? Was that
just another of your lies?
You know something, if you didn't come here calling just about
everybody names, such as MF AHOLE, moron, dumba## appliance operators,
the list goes on, stop acting like you're smarter then everybody else,
well toad, you just might have been accepted. Why makeup lies? Where
does it get you ? Some people have made some good suggestions to you,
and all you do is put them down and call them names.
One thought toad, look at your blog, if you had children that might be
interested in amateur radio and they did a search, would you truly want
them to stumble across a page so full of hate and vulgar language? I
know I doni¿½t want my children or grand children to see that! The garbage
you spew on your blog is an embarrassment to American ham radio operators!

Hello,

I was wondering if anyone would like to try a QSO on 60 meters:

Channel Center	Tuning Frequency
5332 Khz	5330.5 Khz
5348 Khz	5346.5 Khz
5368 Khz	5366.5 Khz
5373 Khz	5371.5 Khz
5405 Khz	5403.5 Khz

Later in the evening would probably work (say 0200Z), or, in the
morning
around 1100Z. I am in Idaho, so we would have to work that in.

If we use these "channelized" frequencies, maybe the FCC will see we
are using them and give us a whole 60 meter segment.

Very doubtful amateur will ever be assigned entire 60 metre range.
Unfortunately, the FRAC (Frequency Realignment Commission)
committee of the ITU will eventually recommend amateurs lose
over half the spectrum they now have.

And interestingly, in recent decades there has been an increase in
ham frequencies in the HF segment of the radio spectrum. The WARC
bands, this new allocation.

Obviously, it's not the same as when hams had "200 metres and down",
and I'm not sure what the bands were like right before WWII. But
there is more space for hams on HF now than 60 years ago (or more
precisely when the bands were returned after WWII.

Also obviously, there have been losses, but those have been at
VHF and higher.

Coinciding with the FRAC action reducing amateur frequencies
by half, will be the creation of an International Amateur Radio
Permit (IARP). Individual countries will no longer issue amateur
licenses. There will be only one amateur license, the IARP, and it
will be code-free and administered by the ITU and the UN. These
actions reflect the moving of the world's individual countries to a
global telecommunications community.

2458. Anyone see Jay Leno last night?

Is there a way of showing the history without being connected all the time?
How do you stop it timing out and disconnecting you, or is it just me
that happens to?
The room on my web site is VERY quiet.

Under IARP, I find references to reciprocal operating only: "...has begun issuing the International Amateur Radio Permit (IARP) that allows US amateurs to operate from Argentina, Brazil, Peru, Uruguay, and Venezuela without having to obtain a special license..." All search engines results for IARP say nothing about, "There will be only one amateur license, the IARP..."

As for: "Frequency Realignment Commission" and "FRAC," the search engines come up with *absolutely nothing* about this.

It's easy to do away with such rubbish.

Says Les as he (1) misuses taxpayer-furnished computing equipment at
Keesler AFB, and (2) fails to mention that he doesn't hold a ham
license and therefore isn't qualified to comment on someone's "fist."

The really odd part of this whole thread is that anyone at all thinks
the subject is important. If a code operator can send faster than
someone at an itty-bitty keyboard can, does a fish need a bicycle?

I was sent this and thought it would fit in whit this post.

First, the message consisted of 39 characters sent in approx. 22
seconds, which using the FCC rule of 5 characters per word comes out to
about 22 WPM, not 41. SMS is limited to 160 characters per message,
which the kid said he's entered in 57 seconds, and that would come out
to 32 WPM using the same rule. There is some latency in SMS, the telcos
say it's less than 10 sec. But the point is, the CW ops won with a
comfortable margin of error even though they used a slower rate than
they could have. Here are a few comments from K6CTW, who was on the
receiving end:

Well to answer some of the questions I have received:

1. Ben was just getting ready to start entering the last 2 words when I
was done.

2. None of us had any idea of the text we would be sending, not only for
the "show" but also for the 3 rehersals (in which we smoked em every time)
3. Chip, K7JA was sending and I, Ken, K6CTW was receiving.
4. The radios were FT-817's provided by Chip's company Yaesu and HRO.
Reason for that choice was that we needed the most frequency agile
radios we could get. When I talked to the technical folks, they
recommended we START at 2 meters and go up because of all of the lower
frequency noise and RFI from the other TV equipment. When I got there,
we took out a spectrum analyzer and studied all of the interference
possibilities. I ended up choosing 432.200 MHz because that guaranteed
no RFI from their equipment and we were high enough not to overload
their front ends either. This was then verified and it was what we were
using at the FT-817's lowest setting.

5. I already knew that 28-30 wpm would easily keep us in front of even
the current world record holder, and also it is the fastest speed that I
can make nice readable copy on paper with a "stick".

6. The telegrapher "costumes" were the producer's idea but it was fun for both Chip and I.

7. In rehersal I, K6CTW had a number of lines which would have really done a nice job of plugging ham radio and telegraphy however at our last dress rehersal, they decided to cut them out to make the segment "fit". (maybe next time).

8. I decided that I would be the receiver because I'm not bothered by crowd noise etc.

If you enjoyed the segment, PLEASE email, write, etc. to let "The Tonight Show" know about it. That way we may have a chance for a bigger segment next time.
Thanks for the kind comments from all and let's keep on having fun! (It is a hobby after all).

73,
Ken, K6CTW

How do you figure that the CW throughput will beat phone - at least for clear text. I know that good CW ops can sail along at 50 wpm (like my Dad, unfortunately not me). But I thought speech was more like 200-300 wpm. So if you do not need to spell out unusual words, phone should beat CW easily. The results could differ if we factor in odd ball words or code groups and QRM/QRN but I thought this was simply clear text.
John

Top posting to save some scrolling.

All of this comes down to one thing, CW beat the TEXT guys. Whatever is
faster or slower, the rabbit or the hare, it's all redundant. There has
been three such test that I've heard of and in all three CW won. Maybe
the text lagged by 10 seconds, maybe K6CTW filled in the last 2 words.
The bottom line is that it was a race and CW won!

Roger,

I asked if you are stupid, not a dick wad. But since you mention it, what is
a dick wad anyway?

SB DX @ WW < KB8NW $OPDX.710
Ohio/Penn DX Bulletin No. 710

The Ohio/Penn DX PacketCluster
DX Bulletin No. 710
BID: $OPDX.710
May 16, 2005
Editor Tedd Mirgliotta, KB8NW
Provided by BARF80.ORG (Cleveland, Ohio)

Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, AB5K & the AR TelNet Clusters Network, K1XN & GoList, N1WON, NG3K, W3UR & The Daily DX, N4AA & QRZ DX, W4WX, K5LBU, K5OLE, K8YSE, NJ9K, CT1END, DL1EK & The DX News Letter, EA5KY, EC8ADU, F5CWU & La Gazette du DX, F5NQL & UFT, F8DQZ, HA0HW, I1JQJ/IK1ADH & 425 DX News, IZ8CCW, JI6KVR & JA-IOTA Islands News, OK1DOT, PA7FM, UT2UZ, UT3UZ, VA3RJ & ICPO, VA7DP, ZS6WLC and ARRL Web page for the following DX information.

*** NOTE FROM EDITOR, TEDD, KB8NW: Because I will be attending the Dayton HamVention, I can not guarantee that there will be a bulletin next week. If it does happen, it will probably be late Monday. Please,
continue to send your information (you never know!). Hope to see you at the NODXA Hospitality Suite (see below).

DXCC COUNTRY/ENTITY REPORT: According to the AR-Cluster Network for the week of Sunday, 8th/May, through Sunday, 15th/May there were 217 countries
active. Countries available: 3A, 3B8, 3B9, 3D2, 3DA, 3V, 3W, 4J, 4L, 4S, 4U1I, 4U1U, 4X, 5A, 5B, 5H, 5R, 5T, 5U, 5V, 5X, 5Z, 6W, 6Y, 7Q, 7X, 8P, 8R, 9A, 9G, 9H, 9J, 9K, 9L, 9M2, 9M6, 9N, 9Q, 9V, 9Y, A2, A3, A4, A6, A7, A9, AP, BV, BY, C6, CE, CE9, CM, CN, CP, CT, CT3, CU, CX, DL, DU, EA, EA6, EA8, EA9, EI, EK, EL, EP, ER, ES, ET, EU, EX, EY, EZ, F, FG, FK, FM, FO, FR, FY, G, GD, GI, GJ, GM, GU, GW, HA, HB, HB0, HC, HH, HI, HK, HL, HP, HR, HS, HZ, I, IS, J6, J8, JA, JT, JW, JY, K, KG4, KH2, KH6, KL, KP2, KP4, LA, LU, LX, LY, LZ, OA, OD, OE, OH, OH0, OJ0, OK, OM, ON, OX, OY, OZ, P2, P4, PA, PJ2, PJ7, PY, PY0F, PZ, S0, S5, S7, S9, SM, SP, ST, SU, SV, SV5, SV9, T2, T7, T8, T9, TA, TF, TG, TI, TJ, TK, TN, TT, TU, TY, TZ, UA, UA2, UA9, UK, UN, UR, V3, V4, V5, V7, V8, VE, VK, VK9N, VP2E, VP2V, VP5, VP8, VP8/h, VP9, VQ9, VR, VU, XE, XT, XU, XW, YA, YB, YI, YJ, YK, YL, YN, YO, YS, YU, YV, Z2, Z3, ZA, ZB, ZC4, ZD7, ZF, ZK1/s, ZL, ZP, ZS

* PLEASE NOTE: The report "could" contain "Pirate/SLIM" operations or more likely a "BUSTED CALLSIGN". As always, you never know - "Work First Worry Later" (WFWL).

3DA, SWAZILAND (Update/More!). Frosty, K5LBU, reports that he has received
word they have been issued their callsigns in Swaziland for July 8-18th. Callsigns are as follows: Wayne/W5KDJ will be 3DA0KDJ, Frosty/K5LBU will still be 3DA0CF and Daniel/ZS6JR will be 3DA0JR. They will be on all the bands that are open from 160-6 meters. They will also try to do RTTY and PSK. Frosty states, "Will have a A4S with 40 meter kit at about 50 feet a 2 element 12-17 meter beam above that along with a very good vertical for 160-80-40 meters along with some beverages for receiving. Will have a 6 element m2 6 meter beam up at 50 feet also." He is still hoping that there will be at least 2 other operators to join them so they can do a better job covering the bands. They will be on for the IARU Contest which is July 9-10th and is still hoping to get 3DA5HQ for the contest. There is still time to join the group. Contact Frosty at: frosty1@pdq.net

50TH EUROVISION SONG CONTEST. The following amateur stations will be active from Kiev during 50th EUROVISION SONG CONTEST (May 19-23rd): EM50KIEV, EN50KIEV, EN50UN, EM50UKY, EO50UA. A special award may be issued to those who make three or more QSOs with those special event stations.

C6, BAHAMAS. Operators Frederick/K9VV, Calvin/K6CT and C6RUM will be active as C6AKU during the CQ WW WPX CW Contest (May 28-29th) as a Multi-2 entry. QSL via K9VV.

DAYTON HAMVENTION ANNOUNCEMENT.....
Excerpts From The ARRL Web Page: Card Checking for Japan Amateur Radio League (JARL) Awards at Dayton (May 10, 2005): For the first time at the Dayton Hamvention you will be able to have your QSL cards checked for several awards sponsored by the Japan Amateur Radio League! World-renowned DXer Masa Ebisawa, JA1DM, will be present at the ARRL booth to represent JARL and check cards for most of the awards sponsored
by JARL. Ebisawa, who will also be inducted into CQ Magazine's DX Hall of Fame at Dayton, is the DXCC program's lead Card Checker for Japan and a past Director of the JARL. The awards that can be applied for at Dayton include: The Asian DX Award (ADXA), The ADXA-Half Award, the famous All Japan Districts Award (AJD), the Worked All Japan Prefectures
Award (WAJA), the Japan Century Cities (JCC) Award and the Satellite Fuji Award. Please see the JARL Award Rules site for complete information
on these and other JARL awards. The fee for each award is 14 USD, or 12 IRCs. Masa will have the certificates with him at Dayton and will issue them directly to the applicant. For complete announcement, see the ARRL Web page.

DX HOSPITALITY SUITE. The Northern Ohio DX Association (along with Janeen Hire, W8ZET) will once again sponsor a Hospitality Suite at

this year's Dayton Hamvention. It will be in Suite 1011 on the 10th Club Floor of the Crowne Plaza Hotel (old Stouffers) on Thursday, Friday
and Saturday evenings (Look for signs!). All DXers/Contesters are welcome. Munchies and refreshments will be avaialble. Come and meet the members and friends of NODXA.

EF8, CANARY ISLANDS (Lighthouse Activity). Several members of the Canary Islands DX Ham Society, Edu/EC8AUA, Dunia/EC8ADU and others, will take part in the International Lighthouse Weekend 2005, August 20-21st, from the Old Arinaga Lighthouse and New Arinaga Lighthouse in Gran Canaria Island (AF-004). Look for the following to be active (References numbers are provided):
EF8OAL - Old Arinaga LH, ARLS CAI 062, FEA D2812, and DME 35.002
EF8NAL - New Arinaga LH, ARLS CAI 024, FEA D2812, and DME 35.002
QSL via EC8AUA (address on QRZ.com). It is not necessary to send your QSL via the Bureau (for confirmation). Direct QSLs can be sent via the normal way. Look for more info very soon on the following Web pages:
http://www.cidxs.com
http://www.qrz.com

HB0, LIECHTENSTEIN (Update). Members of the Radio Club Tivadar Puskas (HA5KHC) are now active from here until May 21st (See OPDX.705). Their activity will be on 160-10 meters, including the WARC bands, and now they have received permission to operate on 6 meters. Remember, they will also try to do something on 2 meters. Look for Laci/HA5MA, Pisti/HA5OJ, Ed/HA5BWW and Karl/HA7PC to sign HB0/homecall. QSL via operators' home address or via the HA QSL Bureau.

IOTA NEWS.....
AS-105. Members of the Pyongtaek DX Club (D90HE) will be active from the Korean Island of Kukhwa, May 20-22nd. Operators Han/DS2GOO,
Lee/6K2CEW, Chae/DS5BSX and Young/6K2ABX will be active from Hwaseong City signing as homecall/p and D90HE/2. Activity will be on 80-10 meters SSB and RTTY. QSL D90HE/2 via DS2GOO, and all others via their home callsigns (direct or by the bureau).

AS-117. Look for JN2TZB/2 to be active from Kaji Island (JIIA AS-117-003)
Aichi prefecture, May 22nd. Bands and modes were not provided. QSL to the home callsign, direct or by the bureau.

EU-016. Operators Fredy/DE0MST, Sven/DF9MV, Mathias/DL5MFL, Boro/9A3KB,
Daki/9A2WJ and Emir/9A6AA will be active as 9A0CI from Lastovo Island (IOCA CI-051 and MIA MC-196), now through May 21st. Their
activity will be from Struga Lighthouse (TWLH 9A-065, ARLHS CRO-148, WLOTA L-0815, ADLL E3544). Look for them on all bands.
QSL via DE0MST, direct or by the bureau. ADDED NOTES: During

this expedition there is a possibility for an operation from
other islands near Lastovo: Prezba (CI-092, MC-317), Bratin
(CI-158, MC-043) and Zaklopatica (CI-new, MC-new). Activity,
only SSB under operators' personal callsigns. All are counted
as EU-016. For more info, go to:
http://www.hamradio.hr/9a6aa/Struga/LastovoStruga.htm

EU-043. Operators Thomas/SM6XMY, Rolf/SM6IQD, Tony/SM7YLT and Rick/
SM6YOU will be active as 8S6KOS from Sydkoster Island, May
20-22nd. QSL via SM6YOU (QRZ.com).

EU-071. Martin/G3ZAY, Dominic/M0BLF, Tim/M0TDG and Tom/M0TJH will be
active from the Westman Islands during the RSGB IOTA Contest,
July 30-31st. Callsigns were not provided. However, more info
is forthcoming.

EU-129. Helmut, DL7VOX, will be active as DL7VOX/p from Usedom Island
(GIA O-013), May 16-25th. Activity will be on 80-10 meters,
mainly CW. QSL via his home callsign, direct or by the bureau.

EU-129. Operators Jens/DD0VD, Falk/DF3UFW, Klaus/DL8DZL and
Joerg/DL2DSL
will be active from Usedom Island (GIA O-013), May 20-27th.
Activity will be on 160-10 meters CW/SSB. QSL to the
operators'
home callsign, via the bureau.

NA-092. Members of the South Texas DX and Contest Club (STDXCC, W5RTA)
will be active from Mustang Island from July 28-30th. STDXCC
will operate as K5M from Mustang Island during the 2005
Islands
On The Air HF Contest, July 30th and 31st. The callsign W5RTA
will active on SSB, CW, and RTTY, on 80-10 meters (the WARC
bands included), according to Obie Weathers, N5VYS, the K5M
Station Manager. During the contest, K5M operations will be
on SSB and CW on 80, 40, 20, 15, and 10 meters. QSL via W6WF,
Lyle Meek, the K5M QSL Manager. The pilot station and network
support is Don Hinte, KA5EYH. The K5M operators include K5OLE,
KS5V, KC5YKX, W5DK, W5QZT, AC5YK, KB5WT, and N5VYS. Questions
regarding K5M during the IOTA Contest should be directed to
N5VYS at k5mustang(at)swbell(dot)net. Information about the
South Texas DX and Contest Club may found at:
http://stdxcc.org/
Details of the K5M operation may be found at:
http://stdxcc.org/mustang_.htm

KG4, GUANTANAMO BAY (Correction). Operators Jose/N4BAA (not Dennis/N4BBA
as mentioned in OPDX.709) and Bill/KG4WW will be active before, after and
during the CQ WW DX SSB Contest (October 29-30th). The contest callsign
will be KG4SB OR KG4WW. Operation class has not been decided yet. QSL
KG4SB via N4BAA and KG4WW via KG4WW.

PIRATE ALERT. Activity by a F5LPY/TU8 has been showing up on the DX Clusters. This is not possible. Bernard, F5LPY, has been back in France for about 12 months! This is a PIRATE operation so do not QSL.

PY0F, FERNANDO DE NORONHA. Fred, PY2XB, is now active as PY2XB/PY0F. The length of his activity from Fernando de Noronha (SA-03) is not known at this time. He seems to be active mainly on 30/17/12 meters CW. QSL via PY2XB.

QSL INFO AND NEWS.....
Alex, UT3UZ, is the QSL Manager for: EM0U, EM0U/p (Aug. 6-8th, 2004), EM0ITU (Sept. 21-24th, 2004). Station EM0U is the club station of the Ukrainian State Centre of Radio Frequencies and the 6th ITU Centre of Exellence. Alex has a new address: Alex Arbuzov, P.O.Box 7, KIEV-232, 02232, UKRAINE.

NEW QSL MANAGER. Due to the passing of Vance, W5VL, the new QSL Manager for W4A and J6J is N1WON. Both operations took place in 1999. QSL direct
only with a SASE please.

QSL TM380 direct (or by the bureau) to F5GNY: Michel Valette, 1 rue des Mimosas, F-31850, Beaupuy, France. Activity is to celebrate the first take-off of the AIRBUS 380 airliner through May 24th. Pictures and video
of the first flight are available at:
http://www.airbus.com/A380/Seeing/indexminisite.aspx

ZS8MI QSL STATUS. Ludwig, ZS6WLC, reported on May 10th: "Some of you would have received your cards, and some of you have not. I will be getting additional QSL cards tomorrow (as I have run out of cards), and will finalise all outstanding cards. If you have sent your card to the address below, your card has most likely been received and you will get a card back. If you have used the ZS6M post box address, it could have been stolen, so if you have not received a card and used that address, mail a card to the address below. I am sorry about the delay and interruptions, but I am out of E-mail contact quite regularly due to work reasons. Also, I have to mention that my QSL Manager, OM Bushy Roode, ZS6M, ex-ZS6YQ, had a serious stroke 2 weeks ago and is still in a coma in the hospital. I am meeting his son tomorrow and we will have a look to see whether he has outstanding cards as well."
The address to be used is: Ludwig Combrinck Ph.D, P.O. BOX 443, Krugersdorp 1740, South Africa.

SPECIAL EVENT. Look for special event station CQ1M to be active now through May 22nd. Activity is from Portimao, Portugal, to commemorate the 7th Grand Prix Formula 1 of Motonautica (boats engine) for the Championship
of the World. Operators are Paulo/CT1ITZ and Manuel/CT1EMO. Operations will be on 40/20/17/15/12/10 meters SSB. QSL via CT1ITZ (only direct QRZ.com).

SPECIAL EVENT. The Penticton BC Amateur Radio Club will be operating a special event station, VE7KVL, from the Kettle Valley Railroad, May 28-29th
(starting each day about 1600z). Operation will be on 20 meters around 14190 kHz, plus or minus. They will also be using IRLP. The operation will take place while the train is traveling on a short piece of the original track left over from the Kettle Valley Railroad line. Return trip takes about an hour and a half. QSL w/SASE to VA7DP.

SV9, CRETE. Claude, HB9CRX, will be active as SV9/F8UFT/p from Kissamos, July 17- 31st. Activity will be on 40-10 meters, the WARC bands included, CW only. QSL via F6ICG, direct or via the French Bureau.

TI, COSTA RICA (Update and EA8). Luis, EA5KY, updates OPDX on Tono's, EA9CP, upcoming TI operation from San Jose. His callsign will be TI2/EA9CP.
His favorite band is 20 meters (14250), but he will also be on 15 and 10 meters. QSL via his home callsign, direct or via the bureau. After this operation, Tono will be in EA8-land, June 15-23rd. His callsign is not assigned yet, but it will probably be EA8/EA9CP. QSL via his home callsign, direct or via the bureau.

TT8, CHAD. Philippe "Fil", F4EGS, will once again be active as TT8PK from May 20th to July 20th. He is in N'Djamena City for professional reasons, so his time will be limited. He plans to be on all modes (RTTY, PSK, SSB and may be a little CW) with a FT100D and a vertical MA5V. If you have need for Chad on a band, ask him on the air, and he'll maybe QSY. QSL via F4EGS, direct or by the bureau. ADDED NOTES: It has been reported that
Philippe has sent all of his documentation for his past operations from Chad, Togo, Tadjikistan and Gabon, to the ARRL. It was also mentioned that in August, Philippe is expected to be active from Kabul, Afghanistan.
More information is forthcoming.

TT8, CHAD. QSL Manager Dennis, PA7FM, provides the following update on the TT8M and TT8AMO operations. Michael, TT8M, is now QRT for about one month and will returned back home for a few weeks off. He will return to Chad around mid-June bringing antennas for 6m and probably also 2m. He will try to do EME on both bands then (JT6M/WSJT), and of course, he will try to catch every sporadic E opening into EU. In the meantime, Pierre, TT8AMO, will still be in Chad and will remain active in his spare time. Since Pierre will probably not be "out in the field" until Michael returns, he should be active about everyday. He will also be able to use Michael's antenna + antenna tuner, so he will be on all bands now. Dennis states, "QSLs for both operations are being designed right now and they will be printed as soon as possible." More information is available on: http://www.pa7fm.nl

VP2E, ANGUILLA. Four members of the Florida DXpedition Group, Inc., will be here between October 25th and November 1st for the CQ WW SSB Contest. Participating members are Bill/W4WX (VP2EWX), David/WA4ET (VP2EDP), Cory/N1WON (VP2ECM) and Clarence/W9AAZ (VP2EAZ). Each member will operate

a different band during the contest as a Single-Band entry. Look for them on all modes on 160-6 meters before and after the contest. QSL direct to their home callsigns.

VQ9, CHAGOS ISLANDS. Larry, VQ9LA (aka WD0HSP), innforms OPDX that he will
be off the island (Diego Garcia) and QRT for 3 months between May 4th and July 25th. He mentions that he really enjoyed all the 30 meters LP CW/RTTY
QSOs during the month of April. Larry states, "73 to all and see everyone on the low bands next season."

XY, MYANMAR (IOTA Op). Look for Nick, UT4UT, to be active as XY4U from Thebyu (aka Sandy) Island (IOTA AS-167), May 20-20nd. Activity is expected
to be on, or near, the CW and SSB IOTA frequencies with CW being his main mode. The operation will begin around 1000z, May 20th and end around 0900z, May 22nd. QSL via UT4UT (QRZ.com).

YB5, INDONESIA. Bob, ex-9V1GO, is now active as YB5AQB. Bob thinks he will
be here for at least two years, so 9V-land is effectively over and YB-land
is his new QTH. Bob reportedly has not been too active on the low bands for the past few weeks, but that is changing. Bob will have two stations in Indonesia. Look for him on the weekends from Batam and during the week from Jakarta. In Batam, he has a complete station for the low bands which is operational. In Jakarta, his apartment is on the 21st floor and the antennas are being put up for the low bands, and it is not operational yet.
He states, "So, during the week, all bands, all modes and not much 160/80 until I get QRO in Jakarta. Weekends when I fly back (1 hour 20 minutes from Jakarta) to Batam, low bands mostly. QSL via OK1DOT, direct only.

YI, IRAQ. Ilian, LZ1CNN, is now active as YI9LZ. His current activity is on 40-10 meters. In about a week, he will be active on the 80 and 160 meter bands. He preferably works on CW, but he will also be on SSB too. He'd like to participate in contests (depending on his duties of course). Ilian will stay there for about 6 months or possibly until the end of the year. QSL via LZ1ZF, by the bureau or direct to: George Vodenicharov, P.O. Box 8, 6000 Stara Zagora, BULGARIA. ADDED NOTE: YI9LZ counts for 3 points for the "St. Teodosii Tyrnovski Award". Details are available on: http://www.balkanclub.8m.com

Psychic Spasmophilia and Mystical Experience In Psychoneurosis is Not an Illness, Dabrowski refers to a condition identified as "spasmophilia," defined as "the tendency toward muscular twitching, spasms, or convulsions from even slight mechanical or electrical stimulation" (pp.304-305), and a type of personality, called the "tetanoidal personality," defined as a "personality type...characterized by muscular twitching, spasms, tendency to convulsions, etc., as in tetany" (p.305).

Roger Wiseman is 49. He studied the history of Dwarfism at DeVry on weekends.

For some years he had symptoms of excessive nervous excitability, he was depressed and began to think of the danger of mental illness. In a few months his condition became more aggravated. He went through periods of "mental spasms." On one hand he considered himself normal; on the other hand he thought of himself as one overly concerned with menial issues.

He went to look at places of concern (he lives in West Virginia after the Divorce); he experienced the tragedies of the past as something of actual validity, something authentic. He was hypersensitive to successful people. He thought that those who pass him by are being shown more respect than him, so he becomes responsible for the ruination of their lives... (p.82)

Roger says, "I have been experiencing muscle twitching and spasms all over my body for a few years now. It started in my left eye. At first, I would notice it after I sneezed, flinched or got under the shower. Then it started to do it on a more frequent basis. Then I started noticing small twitches in my arms, then my back, then in my legs. By the end of the week I felt them going off every few seconds, randomly, from head to toe. I have gone to Dr. Phil, had EMG, and they found nothing! I admit I suffer from anxiety, I decided to try Zoloft to see if this would stop the spasms. So far it hasn't helped. I sleep pretty well, and have no other health problems or ill feelings. I am wondering if anyone else has had this, or could shed some light?"

If this is the "real Lloyd" then he is the one that has nothing to say. A
no code Tech with total inability to even learn 5 wpm.

I would take Les any day, even without a ticket, over this loser Lloyd.

I base it on my experience as a traffic handler in both Amateur and MARS radio. I base it on my experience of personally copying 5 character coded groups in phone and in CW modes on a military circuit.

CW has better through put. You hit on the problem yourself. Having to slow down to make sure the other operator copied the text sent. Normally by using the phonetic alphabet. A good CW circuit does not have that problem, and with the use of "cut" characters a whole word/sentence can be sent without sending each individual character.

I certainly hope they documented the call. It will be good to have a government agency confirm that you have an unnatural interest in me and my family. Please say that you dialed 911. Please.

Dan and I are friends dimwit. Kinda burns you up, me being able to post
when I want doesn't it?

Dissing ham radio? Not me, I repair radios for amateur operators all
the time.

I'm not worried about anyone saying anything about me posting from a computer where I work.

Find someone else to stalk you dork!

Les

Thanks Les, good to hear from you again.

Dan/W4NTI

Little does Lloyd know. That isn't the real dumbass No-Code Lloyd, just
another gay stalker.

Dan was a high speed morse intercept operator in the military. I can
tell the difference between straight keys, keyers, and bugs. Just
happens I can copy code just fine.

Never had a desire to get a ham ticket. No big deal to me.

Dan and I have known each other for several years.

Les

2499. IC-746 or TS-2000

Newsgroup: rec.radio.amateur.misc
Date: 2005-05-15 22:45:42 UTC
From: Jim Leder <k8cxm@spam.fuse.net>
Message-ID: <7b993$4287d116$453db1ce$25275@FUSE.NET>
Source record: 51771

I've had a love affair with my old Kenwood TS-450sat since I bought my first one in the early 90's, but with Dayton looming, finally I got the go ahead from the XYL to upgrade. I've narrowed my choice down to a new Kenwood TS-2000 or a new IC-746 Pro. I know the features of both quite well, but I have read and heard a lot about the IC-746's problems with the IC-151 protection diodes and ESD (electro static discharge). I've seen what Icom has on their website about this problem, but wonder what current users think about it. I know there are a lot of IC-746 Pro owners out there, as well as TS-2000 owners, but I really would like to hear some HONEST opinions on this particular problem with the 746. Do many/any of you have repeat problems with the infamous 'no transmit' on the IC-746 due to the ESD issue? Has this problem been over blown? Is it still a problem, even though Icom claims they will repair it and already have it solved on the newer models?
I recently had the opportunity to play with an IC-746 and I was impressed. A good friend has a TS-2000 and I will get to play with it this week. But I am now looking for HONEST opinions on both units, especially the 746.
Thanks!

Sounds to me he is jealous. He must have been stopped by his boss (the pimple faced 16 year old) from using the Pizza joints coco II machine.

Certainly can. In fact a guy on a "keyer" also has a nice signature. Lots of folks that don't know...just don't know.

2503. IC-746 vs. TS-2000

Newsgroup: rec.radio.amateur.misc
Date: 2005-05-15 23:03:22 UTC
From: Jim Leder <k8cxm@spam.fuse.net>
Message-ID: <b1ae5$4287d53b$453db1ce$25345@FUSE.NET>
Source record: 51775

I've had a love affair with my old Kenwood TS-450sat since I bought my first one in the early 90's, but with Dayton looming, finally I got the go ahead from the XYL to upgrade. I've narrowed my choice down to a new Kenwood TS-2000 or a new IC-746 Pro. I know the features of both quite well, but I have read and heard a lot about the IC-746's problems with the IC-151 protection diodes and ESD (electro static discharge). I've seen what Icom has on their website about this problem, but wonder what current users think about it. I know there are a lot of IC-746 Pro owners out there, as well as TS-2000 owners, but I really would like to hear some HONEST opinions on this particular problem with the 746. Do many/any of you have repeat problems with the infamous 'no transmit' on the IC-746 due to the ESD issue? Has this problem been over blown? Is it still a problem, even though Icom claims they will repair it and already have it solved on the newer models?
I recently had the opportunity to play with an IC-746 and I was impressed. A good friend has a TS-2000 and I will get to play with it this week. But I am now looking for HONEST opinions on both units, especially the 746.
Thanks!

Tsk. Typical Robeson IMPLICATION. NO details of

1. The actual authority in this "Fairfield County."

2. What was said. [Robeson will cite some alleged
"privacy" ergo he will not have to reveal anything]

3. Nothing at all on the "interesting" part.

4. All of the above is just total nonsense, a
fantasy on Robeson's part.

>> > You fit right in with Brian Burke and Lennie Anderson! They
both

Actually, Robeson is "taking the chance" by NOT finding
out anything in detail. He is BLUFFING without having
done any research.

> Take a chance, Oh Cowardly One...

Robeson seems to be the "coward." Having had over five years to "research" ANYTHING I've mentioned in regards to employers OR currently-living amateur radio licensee friends, he has FAILED to do so.

Instead, Robeson FABRICATED an entirely FALSE person who allegedly "knew me" at NADC (closed for a decade) back in 1971. Robeson MANUFACTURED a FALSITY that I "was seeking employment there" even though I've explained otherwise (I was, and continued to be, an employee of RCA Corporation until 1975). Robeson took a "coward's" route by MANUFACTURING A FALSITY.

> Chief AF MARS. (Need the address?) Can get you the address for
>the administrative officer at 1st MAW or MCB camp Butler if you'd like.

The USAF Communications Headquarters is at Scott AFB, isn't it? Why is Stebie mentioning Air Force? :-) Stebie might think that Scott AFB will close its doors quickly since it is on the DoD closure list...then "nobody can find out." :-)

In reality, DETAILED unit records in the U.S. military are NOT kept forever. This is particularly true for enlisted personnel. Few military units and installations remain intact in one place with "personnel departments" equivalent to civilian employers. Units can be deactivated, reactivated, or merged with other units on a rapid basis, their names and nomenclatures changed (seemingly at whims of higher commanders) as fast as orders can be "cut." :-)

Stebie is BLUFFING when he expects an old unit of "his" to be intact 24 years after his claim of service there. Not only that, but he is ignorant of the Privacy Act of 1974. Requests for information must be in writing. Legal cites: 5 U.S.C. 552a(3)(3)on writing plus authority on information in 44 U.S.C. 2907, 3101, and Public Law 104-134 (April 26, 1996).

The best bet for a response is through NARA at the NPRC [National Archives and Records Administration, National Personnel Records Center at St. Louis, MO] Website: www.nara.gov (click on links to get NPRC)

Requests for information BY veterans or approved family relatives is free but can take up to 12 weeks. Requests for information MUST be done in WRITING, sent by mail or FAX. There IS a charge for others, such as employer personnel departments, but costs will have to be determined for that first before

any information is returned.

Since the NPRC has some 70 million records, they require detailed information such as an SN or SSN. [my ASN was RA16408336 but the USA and USAF changed over to SSN on 1 Jul 69, USN on 1 Jan 72, and USCG on 1 Oct 74] To submit ANY request for information, Standard Form 180 must be used whether by mail or FAX (form available for download on website or by writing NPRC at 9700 Page Ave., St. Louis, MO, 63132-5100). A veteran's SSN (Social Security Number) MUST be included whether or not a Service Number (SN) is included in the form.

Such corroborating request data is necessary in WRITING to put a damper on bluffers, blackmailers, fraud and scam artists or other perverse individuals out to "get" others. However, the bluffers can just manufacture their own "records" and use others' lack of their SSN to verify the bluffers' service record CLAIMS. Since those records do NOT contain EVERYTHING, CLAIMS cannot be ascertained fully...so the CLAIMANT can go on their outraged, high-horse attitude against anyone doubting them! :-)

One way to ascertain and verify another's claims is to cite friends and acquaintences who served together in the same unit...as I did with Gene Rosenbaum, N2JTV. Or have an interview done with an unbiased third party such as the Pacific Stars & Stripes (visible on estripes archives for 10 Nov 2002). Or have in possession documents from the unit or by the unit (as I do, two of which are posted at another's website)...or have official service branch photographs marked by the distinctive back-of-photo information (as I do).

Apparently Robeson doesn't accept any mention of friends who have amateur radio licenses (as I have with W6MJN or KD6JG). Robeson thinks such are "make-believe." :-) In that case the Los Angeles County Registrar-Recorder is "also wrong" since Al Walston (W6MJN) and his signature is on my marriage certificate as a witness (he was my best man). It's ALL a "make-believe" to Robeson if he doesn't accept it or hates someone.

> No cajones?

Tsk, tsk, tsk. "He-man challenges" oriented towards overloaded testosterone levels and/or sexual ability?

In that case, Robeson has "no cojones" (nor ability to spell any better in Spanish) since he hasn't gotten up the courage to check out anything of mine, not after five years of finding it out. He has gotten that information more than once, publicly, in here.

Stebie would seem to prefer sitting around, doing NOTHING but personal insults, denigrations, fake humiliation-laughter, and almost countless BLUFFS which are just LIES. He will NOT hesitate to call others for "liars," perhaps because he has done so much LYING of his own in the past?

Stebie is the ROLE-MODEL of today's U.S. amateur radio Extra class licensee? [he is not chastised by fellow Extras so he must be "approved by the amateur community!"]

NOT a good role-model. Does NOT arouse any "interest" (other than masochism) in joining the "ranks" of amateur radio.

Let me say right off- CW is my favorite and almost only mode. With that said
this contest (which I enjoyed watching) was more about the data entry system
than it was the mode. Given large ergonomic keyboards I believe the touch
typist could beat my paddle handily.

I agree that a good touch typist on a proper keyboard could beat either one
but what this exercise demonstrated is that just because something is old
doesn't mean it is obsolete and just because something is new doesn't mean
it is the end all and be all.

I researched for many months before making my decision to go with the IC746Pro over the TS2000. I certainly haven't regreted it this past 18 months. One thing that I certainly find superior in the ICom is the DSP unit. It makes digging signals out of severe noise a dream.

Which asshole spoofed my id?

Mr. Null - you can't be too bright if you don't recognise sarcasm!
So for the benefit of the dummies here I'll explain. My "question" about ham bands and modes is a sarcastic put-down to the idiot who posted a totally off topic item!

BTW - if a post that looks like it comes from me does not originate from news.saix.net then it is not me!

2512. Question Regarding Re-building The Ni-Cad Battery Packs For The R.S. HTX-202 & HTX-204

Newsgroup: rec.radio.amateur.misc
Date: 2005-05-16 07:57:26 UTC
From: raymond miller <radioman@localnet.com>
Message-ID: <118gkj6sm3pjf9d@corp.supernews.com>
Source record: 51784

Hello,
N2NJK Ray Miller here (Williamsville, New York - next to Buffalo). I know through the release, lifetime and their final exodus that these were quite controversial radios with some hams. Best way of putting it is you either loved them or didn't want to be anywhere near them. I have two of each and found them to be a reasonably priced "workhorse" especially for me being disabled and subsequently, on a bit of a tight budget.

I do seem to ramble on <G>!

At any rate, does any other person out here know if any of the cordless telephone batteries R.S. has generally on hand would give me the correct voltage and amperage? If so, which ones? OF COURSE, Keeping in mind like the rest of the guys on a HT that the longest life between chages.

Sincerely & '73s

Raymond A. Miller
N2NJK

Hey idiot!Yes you Roger Conroy.Read my post again.I think it is on topic as
I have posted asking to swap my radio for a scanner.This is a scanner group
I take it.So i aked if someone wanted to swap an ICOM R3 for my Bose.
So if that is off topic,I think I would appoligise for ruffeling your
feathers.But on the other hand if not you should just read it and stop
posting you negatory remarks and stop being an ass like youseem to be.

JUST WHAT WE NEED IS MORE NEWSGROUPS ASSHOLES!!!!!!!!

Nope. Wrong again, but then I guess you're used to it.

Don't need to, Lennie.

I don't doubt any of the places you said you were in. I was able
to verify at least one of them, so I will give you the benefit of the
doubt on the rest.

> Instead, Robeson FABRICATED an entirely FALSE person

> took a "coward's" route by MANUFACTURING A FALSITY.

I didn't "MANUFACTURE" anything, Lennie.

Sorry you found it embarrasing to find out that I >>DID<< take the
time to follwo up on your "CV".

> > Chief AF MARS. (Need the address?) Can get you the address for

> like.
>
> The USAF Communications Headquarters is at Scott AFB,
> isn't it? Why is Stebie mentioning Air Force?

I didn't mention the Air Force. I mentioned AF MARS.

I was a member of USAF MARS at one point. Gave everyone here the
callsign and dates I was a member. Your puppetboy asked for
information. That was part of it. Now he's trying to worm his way out
from under having to actually find out that, yes, Steve was telling the
truth.

> Stebie might think that Scott AFB will close its doors
> quickly since it is on the DoD closure list...then
> "nobody can find out."

Nope.

Those records will be in tact somewhere. And all of my various
MARS callsigns have been "public" knowledge on my QRZ "bio" for YEARS.

You and your PuppetBoy have missed a prime opportunity to try and
prove me wrong, but have never taken it....Oh yeah...I forgot...It was
all TRUE! Screws up THAT rant!

> In reality, DETAILED unit records in the U.S. military
> are NOT kept forever.

But the records I am telling YOU about are.

> Stebie is BLUFFING when he expects an old unit of "his"
> to be intact 24 years after his claim of service there.

That "old unit" was a Marine Corps Air Wing and a Marine Corps
Base. Two minutes with Google will prove they are still there.

As are all of the units I ever served with EXCEPT NAMTD 1032 at
MCAS Tustin.

> Not only that, but he is ignorant of the Privacy Act of

> authority on information in 44 U.S.C. 2907, 3101, and
> Public Law 104-134 (April 26, 1996).

Sheesh, Lennie!

I told you over and over years ago that I'd sign a release for you
when you brought that up the FIRST time.

You never took advantage of THAT offer, either.

Big snip of snow job on recovering military records.

The fact is Lennie will never follow up on ANY of the facts I have
given him because they will prove him wrong...Again...

> Apparently Robeson doesn't accept any mention of
> friends who have amateur radio licenses (as I have
> with W6MJN or KD6JG). Robeson thinks such are
> "make-believe."

There you go lying again, Lennie.

I think they are real. They are also personal friends of yours.
They'd be pretty WEAK friends if they didn't stand up for you, right or
wrong.

On the other hand, I HAVE spoke with at least one person who no
reason to misrepresent an opinion about you.

Very telling.

> In that case the Los Angeles
> County Registrar-Recorder is "also wrong" since Al
> Walston (W6MJN) and his signature is on my marriage
> certificate as a witness (he was my best man).

Judging from what we've seen of your behaviour in this forum, he
was the ONLY man in your wedding party.

> In that case, Robeson has "no cojones" (nor ability to
> spell any better in Spanish) since he hasn't gotten
> up the courage to check out anything of mine, not
> after five years of finding it out. He has gotten
> that information more than once, publicly, in here.

As I said...You've already been "outted". By a thrid party with no
reason to misrepresent his opinion.

> Stebie would seem to prefer sitting around, doing
> NOTHING but personal insults, denigrations, fake
> humiliation-laughter, and almost countless BLUFFS
> which are just LIES. He will NOT hesitate to call
> others for "liars," perhaps because he has done so
> much LYING of his own in the past?

No...because you've BEEB CAUGHT LYING so often, Lennie.

Don't lie and you won't be called a liar.

> NOT a good role-model. Does NOT arouse any
> "interest" (other than masochism) in joining the
> "ranks" of amateur radio.

I guess you've missed the big message here, Lennie.

We don't want you. You have nothing to offer...You've offered
nothing, you've DONE nothing of any value to or for Amateur radio.

It really is THAT simple.

Steve, K4YZ

Jim-

I went through the comparison bit a couple of years ago, only between the TS-2000 and the IC-756 Pro II. I chose the Icom primarily because of the impressive spectrum display.

Just playing with the radio may not be enough. The IC-756 works fairly well in most respects, but when I went to program its memories, I found that it did not have the capability of storing repeater frequency pairs. Since my intended use includes several local 6 Meter repeaters including two different splits, this shortcoming makes it impossible to quickly switch between repeaters.

I had never encountered a recent model radio that had this shortcoming. Even my old IC-706 (original) could store all the necessary frequency and tone data in each memory location. If this matters to you, be sure to check the 746 to see if it has the same problem.

The 746 Pro certainly has some issues but the TS-2000 has one of the
worst front ends you can stick yourself with.

2525. The End Game: Baxter Thread of 2003

Newsgroup: rec.radio.amateur.misc
Date: 2005-05-17 11:40:17 UTC
From: "Bob Sherin, W4ASX" <Sherins@bellsouth.net>
Message-ID: <1116330017.138493.69550@o13g2000cwo.googlegroups.com>
Source record: 51847

After a din of controversy, inteference, defamation, suddenly silence. The Glenn Baxter a/k/a IARN a/k/a AARU a/k/a Amateur Peace Corp can no longer be heard on 14275.

There is an uncharacteristic silence on this issue. After all the K1MAN swagger with green cards and felony affidavit complaints and defamation of the FCC, could it be that the U.S Marshalls moved in and seized his equipment?

Perhaps his license has been lifted or, Glenn, faced with incontrovertible process, has thrown in the towel. There is no doubt a story is developing, one that has yet to see the light of day.

Bob Sherin

p.s. Below are earlier posts on the subject.

It's beginning to sound like the Apollo 13 Moon Mission at K1MAN's Place;

Sam, we have a problem!!!

For the real reasons behind the K1MAN Baghdad Baxter broadcasts go to:

http://users.adelphia.net/~k3vr/trex.htm

For all of you amateurs afraid that Baghdad Baxter is going to file criminal charges against you just remember, he is not going to stop his attempt to ruin the Amateur Radio Service until you stand up for what is right.

Sir, I was squarely behind you in your anti-K1MAN opinions -- until I heard you call him a "piece of s***", repeatedly, on the air. Now I stand in my own corner, hopefully joined by those more able to control themselves and more capable of fighting the good fight in an intelligent, thoughtful manner. I won't stand for ruination of the Amateur Radio Service in ANY form. And *that* is standing up for what is "right".

Subject: Baxter Exposed: A Rational Approach
Reply to Author | Forward | Print | Individual Message | Show original | Report Abuse

Gentlemen, before we are overcome with mob mentality, let's step back and take a deep breath.

That's what I did, as I gathered my past journalism on Glenn Baxter and

the IARN to send to Brian, K3VR. Brian is involved in a major journalistic project on this subject which is worth reading. I had written two cover stories in January and February, 1989, and a follow-up
in March, 1989 that were published in Florida Skip Magazine.

Among other things in that dossier was an IARN accord with the Young Communist League of the then-Soviet Union. I must admit here and now, I
was an "official" participant.

Transfixed by mulling this earlier time, I lost myself in reading the record. Picking myself up, I began wondering how we've come to the present time in which we're accusing Baxter and his organization of nefarious conduct.

At the time of the Soviet initiative, we hams in the West were starved for communications with Soviet hams after having lived through the trigger-happy Cold War. So when the Armenian Earthquake struck and UB5WE, Victor from the Ukraine, came on announcing he could handle third
party traffic, everyone involved thought a watershed had arrived. The technicalities of obtaining permission paled to no consequence.

Ever since, Glenn Baxter has carried on this nonchalant attitude toward

what is essentially foreign policy. Bougainville, Somalia, Jordan, Israel and others. He, his organization and his associates are violating the Logan Act, which limits foreign policy to our federal government. At the sound of Bougainville, I took flight.

Glenn Baxter: Misguided, irresponsible, yes. But terrorist, no. Let's

survey his sincerity. When the cameras are running and the broadcast waves crackling, he is at his charismatic best. I sent several video tapes to him of me representing the network on Miami television during natural disasters. Though he vowed to return them, he hasn't.

We so advertised our emergency capability that when Andrew hit, demolishing my community and home, I awaited my leader. We had no food,
telephone, electricity, law enforcement. A week. Two weeks. A month.

Six months. To this day, Baxter has never as much as asked me a thing about it.

Like a magician, his total pre-occupation is the aggrandizement of his own image. One must listen with a wary ear and read with a wary eye lest the magic trick you. The U.S. Supreme Court did not hold that his

bulletins are legal, as he would have you believe. Rather the Court propounded the principle that once a thing is litigated, that decision is a bar to another suit on the same issue. Known in legal parlance as

res judicata, Baxter bootstrapped this principle and his bulletins, taking a giant leap. We are thus led to believe, the Supreme Court would annoint his bulletins, let alone busy itself with hearing an appeal on them. Nonsense.

In the 80s, the FCC declared, with some measure of formality, Baxter's broadcasts legal. But with the arrival of Riley Hollingsworth, Esq., our regulator at the FCC, Baxter and his bulletins have fallen under scrutiny again.

Hollingsworth mailed Baxter a certified letter on January 29, 2002 detailing the FCC's complaints. In it Baxter is warned concerning "complaints we are receiving about deliberate interference, threats against those who do not relinquish the frequencies for your use or who

would complain, or who have complained, erratic operation, broadcasting,
unauthorized tape recording and broadcast of telephone conversations, business use of an Amateur station and lack of station control ... ." Up to the time of this writing Baxter has failed and refused to comply.

Meanwhile, he continues enlarging his broadcasts. Hams, wanting to use

the frequencies, are livid. Uncomprehending, Baxter sees some kind of plot against him, as well as an ARRL highly-paid agent behind it.

But Baxter's conduct is more sufferable. He's defaming Mr. Hollingsworth as nothing but a cheap crook, a claim this writer finds bold-faced slander and completely contrary to fact. As Americans, we cannot allow a well defined controversy to weaken the power of government nor to throw our community into anarchy.

The wheels are grinding on that letter of January 29, 2002. And when action is taken, Baxter will lose his ham radio license, this commentator predicts.

2535. 400Hz Servomotor

Newsgroup: rec.radio.amateur.misc
Date: 2005-05-17 21:55:11 UTC
From: IZ5FCY Roberto <iz5fcy_NOTRASH@arrl.net>
Message-ID: <re1hi1yfycsb.2ka6atu8s4j7.dlg@40tude.net>
Source record: 51857

Hi to all!
I need if your help.
I have a lot of 400Hz Muirhead Servomotor-Tachometer generator mod.
15M81A,fom Mil surplus.
For 400Hz supply isn't a problem but I Don't have idea how to apply or
drive this servomotors.
This motor is supplied with a 115Vac primary plus two 13Vac control
windings, one tachometer 115 Vac primary with a secondary output.
Do you have some suggestion, scheme, application notes for use this motors
in a light CNC project?
Will be welcome application notes, schematic, literatures or URL's for
this devices..

I please you to reply by email, many thanks in advance and sorry for
bandwidht..

Ciao from Italy....

Saluti da Roberto IZ5FCY

La teoria ï¿½ quando si sa tutto e non funziona nulla.
La pratica ï¿½ quando funziona tutto e non si sa perchï¿½.
Mi sento un vero "radioamatore" poichï¿½ ho raggiunto
entrambi gli obiettivi:
non mi funziona nulla e non so il perchï¿½!

2536. WANTED: MOTOROLA MICOM X OR XF radio.

Hi all,

I'm looking for a Motorola Micom XF radio.
Must be in excellent condition and proper working order, guaranteed as such.
Please include price and photos with your reply.
thanks!
Randy

2537. "Interace" Question

Newsgroup: rec.radio.amateur.misc

Do you know where HQ, AF MARS is? (Doh!)

Do you know which agency Air Force MARS belongs to? (Doh!)

> I was a member of USAF MARS at one point.

Alleged member.

Gave everyone here the
> callsign and dates I was a member.

Alleged member.

Your puppetboy asked for
> information. That was part of it. Now he's trying to worm his way
out
> from under having to actually find out that, yes, Steve was telling
the
> truth.

Check your authentic Air Force MARS documentation. The address is on
it. Of course, you didn't know that because you've never had authentic
Air Force MARS documentation, because you've never been a member of Air
Force MARS.

You knowledge of any service's MARS communications is grossly lacking.

"Sorry Hans, MARS >>>IS<<< Amateur Radio!" Hi, hi!

2542. Re: The End Game: Baxter Thread of 2003

And guess what else isn't happening on 14.275? Moron Canadians speaking Polish.

Things are much better now.

Dan/W4NTI

"Bob Sherin, W4ASX" <Sherins@bellsouth.net> wrote in message news:1116330017.138493.69550@o13g2000cwo.googlegroups.com...
After a din of controversy, inteference, defamation, suddenly silence. The Glenn Baxter a/k/a IARN a/k/a AARU a/k/a Amateur Peace Corp can no longer be heard on 14275.

There is an uncharacteristic silence on this issue. After all the K1MAN swagger with green cards and felony affidavit complaints and defamation of the FCC, could it be that the U.S Marshalls moved in and seized his equipment?

Perhaps his license has been lifted or, Glenn, faced with incontrovertible process, has thrown in the towel. There is no doubt a story is developing, one that has yet to see the light of day.

Bob Sherin

It's beginning to sound like the Apollo 13 Moon Mission at K1MAN's Place;

Sam, we have a problem!!!

For the real reasons behind the K1MAN Baghdad Baxter broadcasts go to:

http://users.adelphia.net/~k3v&#65533;r/trex.htm

For all of you amateurs afraid that Baghdad Baxter is going to file criminal charges against you just remember, he is not going to stop his attempt to ruin the Amateur Radio Service until you stand up for what is right.

Sir, I was squarely behind you in your anti-K1MAN opinions -- until I heard you call him a "piece of s***", repeatedly, on the air. Now I stand in my own corner, hopefully joined by those more able to control themselves and more capable of fighting the good fight in an intelligent, thoughtful manner. I won't stand for ruination of the Amateur Radio Service in ANY form. And *that* is standing up for what is "right".

Subject: Baxter Exposed: A Rational Approach
Reply to Author | Forward | Print | Individual Message | Show original | Report Abuse

Gentlemen, before we are overcome with mob mentality, let's step back and take a deep breath.

That's what I did, as I gathered my past journalism on Glenn Baxter and

the IARN to send to Brian, K3VR. Brian is involved in a major journalistic project on this subject which is worth reading. I had written two cover stories in January and February, 1989, and a follow-up
in March, 1989 that were published in Florida Skip Magazine.

Among other things in that dossier was an IARN accord with the Young Communist League of the then-Soviet Union. I must admit here and now, I
was an "official" participant.

Transfixed by mulling this earlier time, I lost myself in reading the record. Picking myself up, I began wondering how we've come to the present time in which we're accusing Baxter and his organization of nefarious conduct.

At the time of the Soviet initiative, we hams in the West were starved for communications with Soviet hams after having lived through the trigger-happy Cold War. So when the Armenian Earthquake struck and UB5WE, Victor from the Ukraine, came on announcing he could handle third
party traffic, everyone involved thought a watershed had arrived. The technicalities of obtaining permission paled to no consequence.

Ever since, Glenn Baxter has carried on this nonchalant attitude toward

what is essentially foreign policy. Bougainville, Somalia, Jordan, Israel and others. He, his organization and his associates are violating the Logan Act, which limits foreign policy to our federal government. At the sound of Bougainville, I took flight.

Glenn Baxter: Misguided, irresponsible, yes. But terrorist, no. Let's

survey his sincerity. When the cameras are running and the broadcast waves crackling, he is at his charismatic best. I sent several video tapes to him of me representing the network on Miami television during natural disasters. Though he vowed to return them, he hasn't.

We so advertised our emergency capability that when Andrew hit, demolishing my community and home, I awaited my leader. We had no food,
telephone, electricity, law enforcement. A week. Two weeks. A month.

Six months. To this day, Baxter has never as much as asked me a thing about it.

Like a magician, his total pre-occupation is the aggrandizement of his own image. One must listen with a wary ear and read with a wary eye lest the magic trick you. The U.S. Supreme Court did not hold that his

bulletins are legal, as he would have you believe. Rather the Court propounded the principle that once a thing is litigated, that decision is a bar to another suit on the same issue. Known in legal parlance as

res judicata, Baxter bootstrapped this principle and his bulletins, taking a giant leap. We are thus led to believe, the Supreme Court would annoint his bulletins, let alone busy itself with hearing an appeal on them. Nonsense.

In the 80s, the FCC declared, with some measure of formality, Baxter's broadcasts legal. But with the arrival of Riley Hollingsworth, Esq., our regulator at the FCC, Baxter and his bulletins have fallen under scrutiny again.

Hollingsworth mailed Baxter a certified letter on January 29, 2002 detailing the FCC's complaints. In it Baxter is warned concerning "complaints we are receiving about deliberate interference, threats against those who do not relinquish the frequencies for your use or who

would complain, or who have complained, erratic operation, broadcasting,
unauthorized tape recording and broadcast of telephone conversations, business use of an Amateur station and lack of station control ... ." Up to the time of this writing Baxter has failed and refused to comply.

Meanwhile, he continues enlarging his broadcasts. Hams, wanting to use

the frequencies, are livid. Uncomprehending, Baxter sees some kind of plot against him, as well as an ARRL highly-paid agent behind it.

But Baxter's conduct is more sufferable. He's defaming Mr. Hollingsworth as nothing but a cheap crook, a claim this writer finds bold-faced slander and completely contrary to fact. As Americans, we cannot allow a well defined controversy to weaken the power of government nor to throw our community into anarchy.

The wheels are grinding on that letter of January 29, 2002. And when action is taken, Baxter will lose his ham radio license, this commentator predicts.

Poor lil Stebie doesn't understand that "AF" is a common
abbreviation for AIR FORCE.

I think the Internet needs some kind of yellow highlighter
for the brain-dead readers. :-)

>> I was a member of USAF MARS at one point.

>Alleged member.

An "Assistant" member? Just like an "Assistant NCOIC?" :-)

Stebie has the "proof in his wallet." :-)

>>Gave everyone here the callsign and dates I was a member.
>
>Alleged member.

Tsk. His "member" needs a little blue pill...?

Do modern - or even older - callbooks include MARS
callsigns?

Stebie will probably babble about "calling the VA" for
"verification" on that. :-)

>
>"Sorry Hans, MARS >>>IS<<< Amateur Radio!" Hi, hi!

Stebie has BEEN to Mars? Many times? Probably Seven times?
Hostile planet, but not much Action.

About the best way Stebie could be "in" AF MARS is to have
him stuffed and mounted in a case at the museum-lobby of the
USAF Communications Command at Scott AFB. He could become a
static display. [fits his "static" in here...lots of QRM]

I'll have to go back to www.grunt.com ("Sgt Grit's" store
"If we don't have it, Chesty wouldn't want it...") and see
if they have some authentic Stebie MARS authentications.
QRZ doesn't have his MARS calls. Does Buckmaster?

Maybe the "Tonight Show" with Jay Leno will have him as a
"guest?" Kind of fits in with their "morse code triumphant"
sort of "contest." Hi, hi!

Meanwhile, back to the Extra Double Standard newsgroup where
mighty macho morsemen can call their opponents "jackass" and
"horse's ass" and "penis head" (in Yiddish) but their
opponents must be oh-so-polite and civil back to them. That
kind of talk is "approved" by Jimmie Noserve...

I am sure your screen has highlighter and "White-Out" both on it,
Lennie.

Nope. That would be YOUR problem.

I was wondering how long it was going to take you to get to
that...

Sucks to have your rants ruined on network TV, doesn't it,
Lennie...?!?!

You got all the "civility" due to you and then some for a long
time, Lennie. You got exactly what you wanted.

This road was paved by you. Enjoy the trip.

You're a liar.

You're a fool.

And yes, you're a putz.

It really is THAT simple.

For years, Wes has been using USAF computers paid for by the taxpayers to read and post to usenet. Not only is there a question about the misuse of DoD machines (it is against policy to use government machines for personal services), but there is the ancillary question of just what Wes is doing getting paid by the taxpayers to sit around and play on usenet.

Even though Wes has bullied people like Lloyd, he has been allowed to get away with the abuse at Keesler AFB without anybody ever writing to either the CO's or the XO's office. Over at SSC to the west, people have been fired for doing what Wes does.

So shut up Wes and don't bully Lloyd any more. This is a word to the wise because time lords always win in the end.

And stay off NIM Busters. We know its you. R

The memo that has "IMPEACH HIM" written all over it.

The top-level government memo marked "SECRET AND STRICTLY PERSONAL", dated eight months before Bush sent us into Iraq, following a closed meeting with the President, reads, "Military action was now seen as inevitable. Bush wanted to remove Saddam through military action justified by the conjunction of terrorism and WMD. But the intelligence and facts were being fixed around the policy."

Read that again: "The intelligence and facts were being fixed...."

For years, after each damning report on BBC TV, viewers inevitably ask me, "Isn't this grounds for impeachment?" -- vote rigging, a blind eye to terror and the bin Ladens before 9-11, and so on. Evil, stupidity and self-dealing are shameful but not impeachable. What's needed is a "high crime or misdemeanor."

And if this ain't it, nothing is.

The memo uncovered this week by the TIMES, goes on to describe an elaborate plan by George Bush and British Prime Minister Tony Blair to hoodwink the lanet into supporting an attack on Iraq knowing full well the evidence for war was a phony.

A conspiracy to commit serial fraud is, under federal law, racketeering. However, the Mob's schemes never cost so many lives. Here's more. "Bush had made up his mind to take military action. But the case was thin. Saddam was not threatening his neighbors, and his WMD capability was less than that of Libya, North Korea or Iran."

Really? But Mr. Bush told us, "Intelligence gathered by this and other governments leaves no doubt that the Iraq regime continues to possess and conceal some of the most lethal weapons ever devised."

A month ago, the Silberman-Robb Commission issued its report on WMD intelligence before the war, dismissing claims that Bush fixed the facts with this snooty, condescending conclusion written directly to the President, "After a thorough review, the Commission found no indication that the Intelligence Community distorted the evidence regarding Iraq's weapons." We now know the report was a bogus 618 pages of thick whitewash aimed to let Bush off the hook for his murderous mendacity. Read on: The invasion build-up was then set, says the memo, "beginning 30 days before the US Congressional elections." Mission accomplished. You should parse the entire memo -- reprinted below -- and see if you can make it through its three pages without losing your lunch. Now sharp readers may note they didn't see this memo, in fact, printed in the New York Times. It wasn't. Rather, it was splashed across the front pages of the

Times of LONDON on Monday.

It has effectively finished the last, sorry remnants of Tony Blair's political career. (While his Labor Party will most assuredly win the elections Thursday, Prime Minister Blair is expected, possibly within months, to be shoved overboard in favor of his Chancellor of the Exchequer, a political execution which requires only a vote of the Labour party's members in Parliament.)

But in the US, barely a word. The New York Times covers this hard evidence of Bush's fabrication of a casus belli as some "British" elections story. Apparently, our President's fraud isn't "news fit to print."

My colleagues in the UK press have skewered Blair, digging out more incriminating memos, challenging the official government factoids and fibs. But in the US press nada, bubkes, zilch. Bush fixed the facts and somehow that's a story for "over there."

The Republicans impeached Bill Clinton over his cigar and Monica's affections. And the US media could print nothing else. Now, we have the stone, cold evidence of bending intelligence to sell us on death by the thousands, and neither a Republican Congress nor what is laughably called US journalism thought it worth a second look.

My friend Daniel Ellsberg once said that what's good about the American people is that you have to lie to them. What's bad about Americans is that it's so easy to do.

- discovered by the Times of London. - GP]

SECRET AND STRICTLY PERSONAL - UK EYES ONLY
DAVID MANNING

From: Matthew Rycroft

Date: 23 July 2002 S 195 /02

cc: Defence Secretary,Foreign Secretary, Attorney-General,
Sir Richard Wilson, John Scarlett, Francis Richards, CDS, C,
Jonathan Powell, Sally Morgan, Alastair Campbell

IRAQ: PRIME MINISTER'S MEETING, 23 JULY

Copy addressees and you met the Prime Minister on 23 July to discuss Iraq.

This record is extremely sensitive. No further copies should be made. It should be shown only to those with a genuine need to know its contents.

John Scarlett summarised the intelligence and latest JIC assessment. Saddam's regime was tough and based on extreme fear. The only way to overthrow it was likely to be by massive military action. Saddam was worried and expected an attack, probably by air and land, but he was not convinced that it would be immediate or overwhelming. His regime expected their neighbours to line up with the US. Saddam knew that regular army morale was poor. Real support for Saddam among the public was probably narrowly based.

C reported on his recent talks in Washington. There was a perceptible shift in attitude. Military action was now seen as inevitable. Bush wanted to remove Saddam, through military action, justified by the conjunction of terrorism and WMD. But the intelligence and facts were being fixed around the policy. The NSC had no patience with the UN route, and no enthusiasm for publishing material on the Iraqi regime's record. There was little discussion in Washington of the aftermath after military action.

CDS said that military planners would brief CENTCOM on 1-2 August, Rumsfeld on 3 August and Bush on 4 August.

The two broad US options were:

(a) Generated Start. A slow build-up of 250,000 US troops, a short (72 hour) air campaign, then a move up to Baghdad from the south. Lead time of 90 days (30 days preparation plus 60 days deployment to Kuwait).

(b) Running Start. Use forces already in theatre (3 x 6,000), continuous air campaign, initiated by an Iraqi casus belli. Total lead time of 60 days with the air campaign beginning even earlier. A hazardous option.

The US saw the UK (and Kuwait) as essential, with basing in Diego Garcia and Cyprus critical for either option. Turkey and other Gulf states were also important, but less vital. The three main options for UK involvement were:

(i) Basing in Diego Garcia and Cyprus, plus three SF squadrons.

(ii) As above, with maritime and air assets in addition.

(iii) As above, plus a land contribution of up to 40,000, perhaps with a discrete role in Northern Iraq entering from Turkey, tying down two Iraqi divisions.

The Defence Secretary said that the US had already begun "spikes of activity" to put pressure on the regime. No decisions had been taken, but he thought the most likely timing in US minds for military action to begin was January, with the timeline beginning 30 days before the US Congressional elections.

The Foreign Secretary said he would discuss this with Colin Powell this week. It seemed clear that Bush had made up his mind to take military action, even if the timing was not yet decided. But the case was thin. Saddam was not threatening his neighbours, and his WMD capability was less than that of Libya, North Korea or Iran. We should work up a plan

for an ultimatum to Saddam to allow back in the UN weapons inspectors. This would also help with the legal justification for the use of force.

The Attorney-General said that the desire for regime change was not a legal base for military action. There were three possible legal bases: self-defence, humanitarian intervention, or UNSC authorisation. The first and second could not be the base in this case. Relying on UNSCR 1205 of three years ago would be difficult. The situation might of course change.

The Prime Minister said that it would make a big difference politically and legally if Saddam refused to allow in the UN inspectors. Regime change and WMD were linked in the sense that it was the regime that was producing the WMD. There were different strategies for dealing with Libya and Iran. If the political context were right, people would support regime change. The two key issues were whether the military plan worked and whether we had the political strategy to give the military plan the space to work.

On the first, CDS said that we did not know yet if the US battleplan was workable. The military were continuing to ask lots of questions.

For instance, what were the consequences, if Saddam used WMD on day one, or if Baghdad did not collapse and urban warfighting began? You said that Saddam could also use his WMD on Kuwait. Or on Israel, added the Defence Secretary.

The Foreign Secretary thought the US would not go ahead with a military plan unless convinced that it was a winning strategy. On this, US and UK interests converged. But on the political strategy, there could be US/UK differences. Despite US resistance, we should explore discreetly the ultimatum. Saddam would continue to play hard-ball with the UN.

John Scarlett assessed that Saddam would allow the inspectors back in only when he thought the threat of military action was real.

The Defence Secretary said that if the Prime Minister wanted UK military involvement, he would need to decide this early. He cautioned that many in the US did not think it worth going down the ultimatum route. It would be important for the Prime Minister to set out the political context to Bush.

Conclusions:

(a) We should work on the assumption that the UK would take part in any military action. But we needed a fuller picture of US planning before we could take any firm decisions. CDS should tell the US military that we were considering a range of options.

(b) The Prime Minister would revert on the question of whether funds could be spent in preparation for this operation.

(c) CDS would send the Prime Minister full details of the proposed military campaign and possible UK contributions by the end of the week.

(d) The Foreign Secretary would send the Prime Minister the background on the UN inspectors, and discreetly work up the ultimatum to Saddam. He would also send the Prime Minister advice on the positions of countries in the region especially Turkey, and of the key EU member states.

(e) John Scarlett would send the Prime Minister a full intelligence update.

(f) We must not ignore the legal issues: the Attorney-General would consider legal advice with FCO/MOD legal advisers. (I have written separately to commissionthis follow-up work.)

Hollingsworth mailed Baxter a certified letter on January 29, 2002
detailing the FCC's complaints. In it Baxter is warned concerning
>"complaints we are receiving about deliberate interference, threats
>against those who do not relinquish the frequencies for your use or
who

>would complain, or who have complained, erratic operation,
>broadcasting,
>unauthorized tape recording and broadcast of telephone conversations,
>business use of an Amateur station and lack of station control ... ."
>Up to the time of this writing Baxter has failed and refused to
comply.

Yeah, but a part of that letter was overturn in 2004. In the 2004
letter the FCC ruled that his broadcast where legal. The FCC also
stated in that letter that there was a time limit on information
bulletins.

The memo that has "IMPEACH HIM" written all over it.

The top-level government memo marked "SECRET AND STRICTLY PERSONAL", dated eight months before Bush sent us into Iraq, following a closed meeting with the President, reads, "Military action was now seen as inevitable. Bush wanted to remove Saddam through military action justified by the conjunction of terrorism and WMD. But the intelligence and facts were being fixed around the policy."

Read that again: "The intelligence and facts were being fixed...."

For years, after each damning report on BBC TV, viewers inevitably ask me, "Isn't this grounds for impeachment?" -- vote rigging, a blind eye to terror and the bin Ladens before 9-11, and so on. Evil, stupidity and self-dealing are shameful but not impeachable. What's needed is a "high crime or misdemeanor."

And if this ain't it, nothing is.

The memo uncovered this week by the TIMES, goes on to describe an elaborate plan by George Bush and British Prime Minister Tony Blair to hoodwink the lanet into supporting an attack on Iraq knowing full well the evidence for war was a phony.

A conspiracy to commit serial fraud is, under federal law, racketeering. However, the Mob's schemes never cost so many lives. Here's more. "Bush had made up his mind to take military action. But the case was thin. Saddam was not threatening his neighbors, and his WMD capability was less than that of Libya, North Korea or Iran."

Really? But Mr. Bush told us, "Intelligence gathered by this and other governments leaves no doubt that the Iraq regime continues to possess and conceal some of the most lethal weapons ever devised."

A month ago, the Silberman-Robb Commission issued its report on WMD intelligence before the war, dismissing claims that Bush fixed the facts with this snooty, condescending conclusion written directly to the President, "After a thorough review, the Commission found no indication that the Intelligence Community distorted the evidence regarding Iraq's weapons." We now know the report was a bogus 618 pages of thick whitewash aimed to let Bush off the hook for his murderous mendacity. Read on: The invasion build-up was then set, says the memo, "beginning 30 days before the US Congressional elections." Mission accomplished. You should parse the entire memo -- reprinted below -- and see if you can make it through its three pages without losing your lunch. Now sharp readers may note they didn't see this memo, in fact, printed in the New York Times. It wasn't. Rather, it was splashed across the front pages of the

Times of LONDON on Monday.

It has effectively finished the last, sorry remnants of Tony Blair's political career. (While his Labor Party will most assuredly win the elections Thursday, Prime Minister Blair is expected, possibly within months, to be shoved overboard in favor of his Chancellor of the Exchequer, a political execution which requires only a vote of the Labour party's members in Parliament.)

But in the US, barely a word. The New York Times covers this hard evidence of Bush's fabrication of a casus belli as some "British" elections story. Apparently, our President's fraud isn't "news fit to print."

My colleagues in the UK press have skewered Blair, digging out more incriminating memos, challenging the official government factoids and fibs. But in the US press nada, bubkes, zilch. Bush fixed the facts and somehow that's a story for "over there."

The Republicans impeached Bill Clinton over his cigar and Monica's affections. And the US media could print nothing else. Now, we have the stone, cold evidence of bending intelligence to sell us on death by the thousands, and neither a Republican Congress nor what is laughably called US journalism thought it worth a second look.

My friend Daniel Ellsberg once said that what's good about the American people is that you have to lie to them. What's bad about Americans is that it's so easy to do.

- discovered by the Times of London. - GP]

SECRET AND STRICTLY PERSONAL - UK EYES ONLY
DAVID MANNING

From: Matthew Rycroft

Date: 23 July 2002 S 195 /02

cc: Defence Secretary,Foreign Secretary, Attorney-General,
Sir Richard Wilson, John Scarlett, Francis Richards, CDS, C,
Jonathan Powell, Sally Morgan, Alastair Campbell

IRAQ: PRIME MINISTER'S MEETING, 23 JULY

Copy addressees and you met the Prime Minister on 23 July to discuss Iraq.

This record is extremely sensitive. No further copies should be made. It should be shown only to those with a genuine need to know its contents.

John Scarlett summarised the intelligence and latest JIC assessment. Saddam's regime was tough and based on extreme fear. The only way to overthrow it was likely to be by massive military action. Saddam was worried and expected an attack, probably by air and land, but he was not convinced that it would be immediate or overwhelming. His regime expected their neighbours to line up with the US. Saddam knew that regular army morale was poor. Real support for Saddam among the public was probably narrowly based.

C reported on his recent talks in Washington. There was a perceptible shift in attitude. Military action was now seen as inevitable. Bush wanted to remove Saddam, through military action, justified by the conjunction of terrorism and WMD. But the intelligence and facts were being fixed around the policy. The NSC had no patience with the UN route, and no enthusiasm for publishing material on the Iraqi regime's record. There was little discussion in Washington of the aftermath after military action.

CDS said that military planners would brief CENTCOM on 1-2 August, Rumsfeld on 3 August and Bush on 4 August.

The two broad US options were:

(a) Generated Start. A slow build-up of 250,000 US troops, a short (72 hour) air campaign, then a move up to Baghdad from the south. Lead time of 90 days (30 days preparation plus 60 days deployment to Kuwait).

(b) Running Start. Use forces already in theatre (3 x 6,000), continuous air campaign, initiated by an Iraqi casus belli. Total lead time of 60 days with the air campaign beginning even earlier. A hazardous option.

The US saw the UK (and Kuwait) as essential, with basing in Diego Garcia and Cyprus critical for either option. Turkey and other Gulf states were also important, but less vital. The three main options for UK involvement were:

(i) Basing in Diego Garcia and Cyprus, plus three SF squadrons.

(ii) As above, with maritime and air assets in addition.

(iii) As above, plus a land contribution of up to 40,000, perhaps with a discrete role in Northern Iraq entering from Turkey, tying down two Iraqi divisions.

The Defence Secretary said that the US had already begun "spikes of activity" to put pressure on the regime. No decisions had been taken, but he thought the most likely timing in US minds for military action to begin was January, with the timeline beginning 30 days before the US Congressional elections.

The Foreign Secretary said he would discuss this with Colin Powell this week. It seemed clear that Bush had made up his mind to take military action, even if the timing was not yet decided. But the case was thin. Saddam was not threatening his neighbours, and his WMD capability was less than that of Libya, North Korea or Iran. We should work up a plan

for an ultimatum to Saddam to allow back in the UN weapons inspectors. This would also help with the legal justification for the use of force.

The Attorney-General said that the desire for regime change was not a legal base for military action. There were three possible legal bases: self-defence, humanitarian intervention, or UNSC authorisation. The first and second could not be the base in this case. Relying on UNSCR 1205 of three years ago would be difficult. The situation might of course change.

The Prime Minister said that it would make a big difference politically and legally if Saddam refused to allow in the UN inspectors. Regime change and WMD were linked in the sense that it was the regime that was producing the WMD. There were different strategies for dealing with Libya and Iran. If the political context were right, people would support regime change. The two key issues were whether the military plan worked and whether we had the political strategy to give the military plan the space to work.

On the first, CDS said that we did not know yet if the US battleplan was workable. The military were continuing to ask lots of questions.

For instance, what were the consequences, if Saddam used WMD on day one, or if Baghdad did not collapse and urban warfighting began? You said that Saddam could also use his WMD on Kuwait. Or on Israel, added the Defence Secretary.

The Foreign Secretary thought the US would not go ahead with a military plan unless convinced that it was a winning strategy. On this, US and UK interests converged. But on the political strategy, there could be US/UK differences. Despite US resistance, we should explore discreetly the ultimatum. Saddam would continue to play hard-ball with the UN.

John Scarlett assessed that Saddam would allow the inspectors back in only when he thought the threat of military action was real.

The Defence Secretary said that if the Prime Minister wanted UK military involvement, he would need to decide this early. He cautioned that many in the US did not think it worth going down the ultimatum route. It would be important for the Prime Minister to set out the political context to Bush.

Conclusions:

(a) We should work on the assumption that the UK would take part in any military action. But we needed a fuller picture of US planning before we could take any firm decisions. CDS should tell the US military that we were considering a range of options.

(b) The Prime Minister would revert on the question of whether funds could be spent in preparation for this operation.

(c) CDS would send the Prime Minister full details of the proposed military campaign and possible UK contributions by the end of the week.

(d) The Foreign Secretary would send the Prime Minister the background on the UN inspectors, and discreetly work up the ultimatum to Saddam. He would also send the Prime Minister advice on the positions of countries in the region especially Turkey, and of the key EU member states.

(e) John Scarlett would send the Prime Minister a full intelligence update.

(f) We must not ignore the legal issues: the Attorney-General would consider legal advice with FCO/MOD legal advisers. (I have written separately to commissionthis follow-up work.)

You and Lennie brag about having been Veterans, however you seem
to have a problem with understanding exactly what being a veteran is

and what it stands for.

The last five Presidents of the United States seem to have had a clear vision of volunteerism...and also about "service".

Guess they shudda consulted with you two first, eh...?!?!

The FCC and Baxter have a long history, one in which each has been off base.

When Mr. Hollingsworth came on the scene, Baxter's bulletins had been sanctified by no less than two formalized writings: 1) A letter from the FCC to Kenneth Black of Ulmerton, England equating his bulletins to ARRL's activities, 2) An Order holding that there can be no time limit on information bulletins.

These pronouncements in the 80's preceded notices of apparent liabiliity in the 90's approximating $10,000. In response, Baxter issued his defense, unable to get a receipt back that his material had been received, and he's never heard a word since on the matter.

Still, his bulletins are replete with infirmities: commercialism, defamation, foreign policy, etc., etc. What has happened with the FCC letter of 2002 signifies a new FCC direction: Quiet negotiations. No longer the big ballyhoo on the Rain report and Newsline, Mr. Hollingsworth is settling these matters with informal agreements at no cost to the taxpayer.

Avoid litigation at all cost is the new FCC moto. And so you can no longer hear Baxter on 20 meters with his bulletins. Asked by this writer as to what happened, no comment was the answer.

Bob Sherin, W4ASX

April 14, 2004
Mr. Glenn A. Baxter
RR 1 Box 776
Belgrade Lakes, ME 04918

RE: Amateur Radio license K1MAN

Dear Mr. Baxter:
This letter explains in what ways your Amateur station has come into compliance with Commission rules since our letter to you of January 29, 2002; and notifies you of two areas of operation that, if not corrected, will lead to enforcement action against your license and/or designation of your renewal application for a hearing. By letter dated January 29, 2002, the Commission notified you that your understanding of various Amateur Radio Service rules was incorrect. We outlined your apparent misconceptions regarding station control, publishing a transmitting schedule
and how that related to interference, threats made to licensee complainants, including threats made with so-called "felony complaint affidavits", broadcasting and broadcasting of tape recordings and telephone conversations. The January 29 letter detailed complaints received by the Commission, and explained that your method of station control, i.e., "a timer from Radio Shack", did not achieve compliance with the Commission's Rules when you were not present at the control point for your station and, therefore, did not satisfy the Commission's Rules regarding automatic control of a station. We explained to you that to comply with the Commission's Rules you must be at the transmitter, or at the transmitter control point, every moment your station is transmitting when your station is locally or remotely controlled; and that if the station is
controlled by telecommand from the control point using a radio link, the frequencies used for telecommand must comply with the Section 97.201 requirements for an auxiliary station (may transmit only on the 1.25 m and shorter wavelength bands, except 219-220, 222-222.150, 431-433 and 435-438 MHz segments). By letter dated March 4, 2003, the Commission's Boston Office notified you that Commission monitoring and numerous complaints filed with the Commission indicated that the problems outlined in January 2002 had not been corrected. The letter stated that your Amateur station was apparently being used for broadcasting various programs having nothing to do
with Amateur Radio; and that transmissions from your station were being used for deliberate interference and for communications in which you apparently had a pecuniary interest. The Boston Office letter stated that transmissions started and ended erratically, were sometimes repetitive and abruptly ended with no identification as required by

Commission rules, and that such operation indicated that the transmissions were not under proper control of a licensed operator. The letter noted
also that you continually broadcast notices of so-called "felony complaint affidavits " that you claimed to have filed with the United States Justice Department against other Amateur Radio licensees whom you perceived to have interfered with your broadcasts, or refused to relinquish their operating frequency to you.
The Boston Office's letter stated that transmissions from your Amateur station included references to a degree program and directed listeners to your website that advertised an "American Radio School Technician Degree in Electronics" for "$299.95". On that web site you solicited donations for radio equipment, advertised a credit card, and solicited donations and advertised
for "IARN" and "AARA". The letter from the Boston office pointed out that such use of your station was in apparent violation of Section 97.113(a)(3) of the Commission's rules, which prohibits "Communications for hire or for material compensation, direct or indirect...." and "Communications in which the station licensee or control operator has a pecuniary interest..."
The letter from the Boston Office requested that you provide substantial additional information about the operation of your station, including submission of a log detailing the information on a weekly basis until further notice. In January 2004, the Boston office notified you that you could discontinue the log submissions, and referred the case to this office. We have reviewed the information you submitted, as well as numerous complaints filed against your station. Additionally we have reviewed tape recordings made by Commission personnel of your transmissions at various times during 2003 and 2004 subsequent to the Boston Office letter of March 3, 2003.
It is the finding of this office that you are, with some exceptions, generally in compliance with the Commission's rules in the Amateur Service related to broadcasting and information bulletins, and we explain as follows. Broadcasting is prohibited in the Amateur Radio Service, with some exceptions. Section 97.3(a)(10) defines broadcasting as "transmissions intended for reception by the general public, either direct or relayed." One-way transmissions are limited in the Amateur service, but an
exception is allowed in Section 97.111(b)(6) for "Transmissions necessary to disseminate information bulletins." Information bulletins are defined by Section 97.3(a)(26) as messages "directed only to Amateur operators consisting solely of subject matter of direct interest to the Amateur service." There are no specific time limits placed upon information bulletins by Commission rules. A review of your programs at random times since March 3, 2003 indicates that your transmissions were
directed to Amateur Radio operators, not to the general public, and that the individual bulletins were related to the Amateur Radio Service. The only notable exception was the offering of a reward for information leading to the identity of parties making threatening

telephone calls to you.
The station control problems outlined to you in warnings from the Commission appear, with minor exceptions, to have been corrected. During the monitoring period your station abruptly ended transmission with no identification in one instance, and started transmissions in mid-sentence in another instance.
There are, however, two areas in the operation of your Amateur station that must be corrected in order to avoid enforcement action and/or a designation of your renewal application for hearing to determine if you are qualified to remain a licensee. These are: 1) deliberate interference resulting from your commencing operation on top of ongoing communications, in violation of Section 97.101(a) and (d); and 2) use of your Amateur station for pecuniary interests, in violation of Sections 97.113(a)(2)and (3).
Regarding deliberate interference, we receive continuing complaints, and our monitoring verifies, that your transmissions start up on top of existing communications of individual licensees as well as nets such as the Salvation Army Team Emergency Radio Network. Such operation constitutes deliberate interference. Stations engaging in ongoing communications are not obligated to stop transmitting when K1MAN wants to start transmitting on a frequency, and complainants are so
advised by the Commission. You appear to believe that the publication of a transmission schedule gives you the right to begin transmitting on a certain frequency at a certain time, even if the frequency is occupied. It does not. All frequencies in the Amateur Radio Service are shared--no frequency is assigned for the exclusive use of any station, and your Amateur station has no greater rights to a frequency at any particular time than any other Amateur station. Section 97.101(d) of the rules prohibits an Amateur station from willfully or maliciously interfering with any radio communication or
signal. Moreover, publishing a schedule is merely one of the several conditions necessary for the control operator of a club station to accept compensation for transmitting information bulletins, pursuant to Section 97.113(d) of the Commission's rules. Your station K1MAN, however, is not a club station. Regarding use of an Amateur station for pecuniary interest, we note that your Amateur Radio program transmissions regularly advertise your web page at www.K1man.com, and on those pages you advertise items for sale by the American Amateur Radio Association (AARA), including T shirts, hats and a "Technician Degree Diploma". You advertise the sales commissions
and "overrides" that your State Directors and Section Managers can receive, and detail ways in which your Section Managers can earn money by recruiting members, selling hats, name badges or T shirts. Section 97.113(a)(2) prohibits communications for hire or for material compensation, direct or indirect, paid or promised. Section 97.113(a)(3) prohibits communications in which the station licensee or control operator has a pecuniary interest. We remind you that any attempts to threaten or intimidate Amateur radio licensees operating on the Amateur bands will

reflect adversely upon your qualifications to remain a Commission licensee, and would be the subject of a license revocation or renewal hearing. By letter dated December 11, 2001, you were warned against the sending of your so-called "felony complaint affidavits" to various Amateur Radio licenses that you perceive to either cause interference to your station or which do not relinquish to you the frequency on which they are operating. Complainants were advised by the Commission to forward any such "affidavits" they received to the Commission, and that they could otherwise be ignored. The United States Attorney for your jurisdiction also warned you that the mailing of such "affidavits" is contrary to law. Apparently you have discontinued those threats. We also remind you that, in regard to the taping and broadcasting of telephone calls, you must comply with applicable state laws.

In conclusion, failure to correct the deliberate interference caused by K1MAN, and the continued use of K1MAN for pecuniary interests, will lead to enforcement action against your license. Either would be sufficient to designate your renewal application for an evidentiary hearing to determine if you are qualified to remain a Commission licensee. An adverse finding in regard to threats to complainant licensees, or violation of state law regarding recording and broadcasting telephone conversations, would lead to enforcement action against your license and would be sufficient to designate your renewal application for an evidentiary hearing to determine if you are qualified to remain a Commission licensee. You would have the burden of proof in such a proceeding.

You should be aware that in 1990, the Commission revised its character qualifications policy, expanding the types of non-FCC-related misconduct that it would consider as bearing on licensee or applicant character qualifications (Policy Regarding Character Qualifications in Broadcast Licensing, Policy Statement and Order, 5 FCC RCD 3252 (1990) (Character Policy Statement), recon. granted in part, denied in part, 6 FCC Rcd 3448 (1991), further recon. granted, 7 FCC Rcd 6564 (1992). The Commission concluded that "a propensity to comply with the law generally is relevant to the Commission's public interest analysis, and that an applicant's or licensee's willingness to violate other laws, and, in particular, to commit felonies, also bears on our confidence that an applicant or licensee will conform to FCC rules and policies. The 1990 Character Policy Statement

applies to Amateur Radio licensees just as it does to all other FCC licensees (See, e.g., Herbert L. Schoenbohm, Decision, 13 FCC Rcd 15028 (1998), recon. denied, 13 FCC Rcd 23774 (1998), aff'd in part, dismissed in part sub nom. Schoenbohm v. FCC, 204 F.3d 243 (2000), cert. denied, 121 S. Ct. 405 (2000); Leslie D. Brewer, Order to Show Cause, Notice of Order of Suspension,

Notice of Opportunity for Hearing, and Notice of Apparent Liability for a Forfeiture, 16 FCC Rcd 5671, licenses revoked, 16 FCC Rcd 12878 (2001).

Accordingly, we will continue to review the operation of K1MAN in light of the issues outlined above.
CC: FCC Northeastern Regional Director
FCC Boston Office District Director
Honorable Paula D. Silsby, United States Attorney, US Department of Justice, District of Maine
Timothy D. Wing, Assistant U.S. Attorney, U. S. Department of Justice, District of Maine

I don't act on "hot" tips.

Produce authentic documentation.

> Dates...times...places...callsigns....

Yes! Authentic documentation with dates, times, places and names.

Got any?

> You know...those little things called "facts"...(I know that's a

Indeed. Jim could have volunteered to serve in the Unites States
Military. He had other more important things to do like pursue a
degree in engineering, and looking out for himself. And the military
still needs engineers, even if they are civilians. Go to
WWW.USAJOBS.OPM.GOV and select "Middle East."

> Guess they shudda consulted with you two first, eh...?!?!
>
> Steve, K4YZ

I'm good with volunteerism in the U.S. armed services. Tell Jim to let
us know how it's going when he gets there.

In all of Title 47 C.F.R., the term "service" is a regulatory
one denoting the type and kind of radio activity being
regulated. Stebie doesn't understand that. He thinks that
the amateur service is some kind of "national service" or
"service to the country." :-)

In that case, the Citizens Band Radio SERVICE will have all radio
amateurs outnumbered by a large ratio. :-)

>Indeed. Jim could have volunteered to serve in the Unites States
>Military. He had other more important things to do like pursue a
>degree in engineering, and looking out for himself. And the military

>WWW.USAJOBS.OPM.GOV and select "Middle East."

Doesn't matter. Jimmie Noserve is an EXPERT on the military.
He KNOWS how military men feel/act/etc. Jimmie can "correct"
any veterans' "mistakes." He's read several books on the subject...

No, you're not

> Tell Jim to let
> us know how it's going when he gets there.

You swore to uphold and defend the Constitution of the United
States.

Obviously you have a problem, however, with people who live their
lives within that same Constitution.

So...was your Oath as a member of the Armed Forces just some words
you recited in order to get a federal job? Sure looks that way.

Does anyone know how to disable the scan resume fuction?
because when i scan my memory channels it locks on a channel it will
resume scan after a few seconds, even if there is activity on the
current channel. a little annoying when you are listening to police or
fire or local repeater channels.many thanks in advance-kc5kco

I'm offended that Jim claimed "service in other ways." What other ways?

2567. Ham Radio getting boring? Here's a little spice to your radio life!

Newsgroup: rec.radio.amateur.misc
Date: 2005-05-21 04:26:58 UTC
From: Sparky <sparky_unit_412@yahoo.com>
Message-ID: <1116649618.495266.104990@g14g2000cwa.googlegroups.com>
Source record: 51789

Simply put, Amateur Radio has become terribly boring. CB radio may have its share of occasional light hearted moments, but the real excitement and thrill of the magic of radio has certainly disappeared due to various factors of which we are all most familiar.

For those of you who are searching for the excitement and thrill you once experienced when you first discovered the mystical allure of radio communication, there's a place where you just might find for what you've long been searching.

Let me invite you to check out and ultimately join:

http://groups.yahoo.com/group/all-band_radio_renegades_and_outlaws

This group is specifically designed to provide bored Amateur Radio Operators, CB'ers, Pirate Broadcasters, Commercial Radio Station owners, engineers, on-air talent, RF Technicians, Shortwave Listeners, Legal-Beagles, Newbies and non-techies a place where one can regain a sense of wonder at the sheer exploration of what we like to refer to as "Phunny Phreekin'cies". Modify your radios, put 'em on phreekin'cies on which they were not intended to operate, and enjoy a little harmless game of "cat & mouse". We've done and are doing the exhaustive research as to what operating phreekin'cies are not going to cause any disruption of official, life-dependant traffic. Our first and foremost concern is that we do not jeopardize existing services and their operations. Fellow bootleggers, there are TONS of phreekin'cies just waiting to be populated by a bunch of fun-loving renegades and radio outlaws! Remember, the 11 meter freeband is again taking it's cyclical demise, so we have to go "where the weather suits our clothes", so to speak.

Right now, we're playing around with 6.800 MHz LSB and 13.555 MHz USB (the 45 meter and 22 meter bands respectively). So what are you waiting for? When you finish listening to your favorite Pirate Broadcaster on 6.925 MHz or thereabouts, QSY to the chit-chat channel of 6.800 and discuss the programming you've just heard. Or get on and call CQ and see who comes back!

Please join us at:

http://groups.yahoo.com/group/all-band_radio_renegades_and_outlaws

...and put a little fun back into your two radio operations before your radios become homes for mice, insects, and various genus of mold.

73 -- ~Sparky~

Often imitated -- NEVER duplicated.
Sparky -- AM/FM/SSB/CW from the ol' Cornpatch Mobile:
KALL-2671 -- CB Radio;
Unit 412/RF412/CO3026 -- Freeband 26-28MHz;
Radio Outlaw 412 -- 6.800 LSB & 13.555 USB;
W9*** -- Amateur (Ham) Radio;
WQRM313 -- GMRS;
M/V Mysterious Traveller -- Marine;
plus FRS, MURS, Shortwave... in other words DC to Daylight.
...got frequencies? ...got phun phreekin'cies?

Please join us at:

>From the FCC website:

One-Way Transmissions

Q. What types of one-way communications are amateur stations authorized to transmit?

A. Section 97.111(b) provides for one-way communications. In summary, auxiliary, beacon, space and stations in distress are specifically authorized to make certain one-way transmissions. Additionally, an amateur station may transmit the following types of one-way communications:

1. Brief transmissions necessary to make adjustments to the station;

2. Brief transmissions necessary for establishing two-way communications with other stations;

3. Telecommand;

4. Transmissions necessary to providing emergency communications;

5. Transmissions necessary to assisting persons learning, or improving proficiency in, the international Morse code;

6. Transmissions necessary to disseminate an information bulletin; and

7. Telemetry.

Q. What is an "information bulletin"?

A. The term is defined in Section 97.3. It is a message directed only to amateur operators and consists solely of subject matter of direct interest to the amateur service. The control operator of the station transmitting an information bulletin is responsible for determining that the subject matter is of direct interest to the amateur service.

Q. Does an amateur station transmitting information bulletins have to share the channel?

A. Yes. Section 97.101 provides that each station licensee and each control operator must cooperate in selecting transmitting channels and in making the most effective use of the amateur service frequencies. A specific transmitting channel is not assigned for the exclusive use of any amateur station. Section 97.101 also provides that no amateur operator shall cause interference to any radio communication or signal. There is no exemption for amateur stations transmitting for information bulletins.

Q. Is broadcasting prohibited?

A. Yes. Section 97.113 prohibits amateur stations from engaging in any form of broadcasting or in any activity related to program production or news gathering for broadcasting purposes.

Q. Is there an exception to this prohibition?

A. Yes, there is one exception: Communications directly related to the immediate safety of human life or the protection of property may be provided by amateur stations to broadcasters for dissemination to the public where no other means of communication is reasonably available before or at the time of the event.

Q. What is "broadcasting"?

A. Section 97.3 defines the term "broadcasting," in the context of the amateur service, as a transmission intended for reception by the general public, either direct or delayed.

Bored with amateur radio???
Spice up your life with an exciting visit from the FCC and various other
federal authorities.
For the small price of a several thousand dollar fine you may also get a
very long stay in one of several luxurious federal prisons "meals are
included". During your stay you will not be bothered with that damn old
boring amateur radio!

Highly, highly unlikely. Guys like Jim have no problem letting guys like you, me, and Steve take the risks. They set way, way back and make the calls.

Later on you learn that they gave blood at the ARC Bloodmobile on the third Thursday and are very, very good with it all. They "served" in other ways. Cheers with a little glass of OJ. Hi!

Yep. However there's no "enemies" of the Constitution here...

> > Obviously you have a problem, however, with people who live
> their
> > lives within that same Constitution.
>
> Explain.

No explanation is necessary. Your on-going support of Lennie's
cowardly "Jimmie Noserve"'s rants is evidence enough.

> Hey, while you're at it, why don't you produce authentic
> documentation of your alleged "A" NCOIC MARS/Okinawa.

Right after we get some of the information we've been asking YOU
for for YEARS...

> > So...was your Oath as a member of the Armed Forces just some
> words
> > you recited in order to get a federal job? Sure looks that way.
>

ways?

Why would you expect Jim to answer such an insulting question when
YOU have overtly refused to answer questions he's put to you for YEARS,
Brain?

(Rhetorical question...we know the answer...you're a coward...)

Only one big one...being three paygrades junior to the guy who was
>>THE<< NCOIC.

> > Stebie no got them. Tsk.
>
> Hmmmm? No docs = lies. His rules, his logic, his embarassment.

I'm not the embarrassed one here, Brain.

In case you weren't paying attention, only Todd falls for your
misdirects, and that's because he's a developmentally delayed adult.

So far, nothing Jim has stated has been incorrect. He's corrected you AND Lennie on numerous military issues, communications and otherwise, and has yet to be shown to be wrong.

> Highly, highly unlikely. Guys like Jim have no problem letting guys
> like you, me, and Steve take the risks. They set way, way back and
> make the calls.

Don't try to lump yourself in with me, Brain. Most of my time in the USMC was crewing the MC version of the Pave Low (CH53A and D), a lot of which got me put in places I was not real happy to be in.

You and Lennie got to play rear area office clerk for most of your tours. I give you some added credit for your Somalia tour, your misrepresentation of your Amateur Radio exploits notwithstanding, but not by much.

> Later on you learn that they gave blood at the ARC Bloodmobile on the
> third Thursday and are very, very good with it all. They "served" in

I lucked out. The only "injury" I suffered in the field was some sand that got in under my visor and flight glasses and irritated the be-jeebers out of me. Some of my colleagues weren't so lucky. That bloodmobile donation you just made fun of was their ticket home alive instead of in a bag.

Hi! Silly Gunny has his blinders on.

Jim constantly makes statements on things which he has no experience in. Jim constantly tells others to be silent on things which they have little or no experience in. That is a clear double-standard. That you won't see it is telling.

He's corrected
> you AND Lennie on numerous military issues, communications and
> otherwise, and has yet to be shown to be wrong.

I recall you being corrected on military and MARS communications issues. Often.

Radio Shack High Performance Amplifier (Catalog # 15-1109)
I'm selling this VHF/UHF/FM amplifier because I recently got cable TV and
don't need my rabbit ears anymore. I bought this amplifier from Radio Shack.
I live in an apartment in a big city and it didn't have a huge effect. But
in the suburbs with an antennae on the roof or with a less obstructed view
of the sky, it should produce good results. The unit is in excellent
condition. (I take care of my stuff.)

Talk about making mistakes.

1) This is about amateur radio equipment
2) This isn't a buy and sell newsxgroup
3) You aren't even selling it outright, you are advertising
your auction

2599. TVI on cable channel 6

Newsgroup: rec.radio.amateur.misc
Date: 2005-05-22 20:11:20 UTC
From: Dave Reinhart <wa6ilt@NOamsat.org>
Message-ID: <IH5ke.16497$KQ6.8422@trndny02>
Source record: 51821

I live in Shrewsbury, MA. Recently, channel 6 started having problems with TVI. The signal is cw, but it's very fast and appears to be only number strings. I seem to remember hearing something a long time ago about stations sending only number strings, but I can't pin it down. Anybody have any ideas?

I looked up the frequency for cable channel 6 and started at ham frequencies that could multiply up to that but didn't find anything that sounded like that signal.

Thanks.

But Jim says he "served in other ways." What ways?

.

Give it a rest, old timer. What Steve (or any other person) did or did not
do in service to this country is none of your business.
Nobody owes you an answer to anything.

It is probably just as well that Steve didn't bump into you at Dayton. You
would have had to walk all the way back to your car to change your Relys.

Brian, it doesn't matter in HERE.

Stebie will "come back" with "you are LYING" and make some kind of
dire implication "to reveal all to your wife" or some other
nonsense and just ignore production of actual proof. Stebie will
name-call, insult, denigrate anyone demanding that HE produce any
proof and that will be that. It's a standard Bluff.

>
>He's talking about the guys driving 1982 Subaru station wagons with
>"save da mediteranean fruit fly" and rainbow bumper stickers.

I think that Stebie's fanciful imagination was working overtime when
he got to the "presidential service" bit! :-)

Since FDR's time, Truman, Eisenhower, Kennedy, Johnson, Carter,
Reagan, Nixon, Ford, and G.H.W. Bush *ALL* served in the U.S.
military
but long before Stebie's alleged USMC "career." That's NINE U.S.
Presidents. I don't think any one of them had an amateur radio
license!

Clinton did NOT serve IN the U.S. military and Dubya never got
beyond the Air Guard. I don't think either one of them had an
amateur radio license. But Stebie gots an Extra AMATEUR license
so he is "comparable" in "service" to at least NINE U.S.
Presidents!!!

Geezus H. Cottonpicker, Stebie done stretched things out so FAR
that his comparison rubber BROKE. Stebie has SNAPPED.

This Memorial Day I'll do what I think on HONORING the veterans
of the United States military. You have and I have. I will
mention Cpl Elmer Hardy and Capt Jim Tomlinson, both gone
suddenly on the 1st of July, 1950, both members of *MY* Signal
Battalion (the one I served in). I will HONOR them and the
other 18 members of MY Battalion who lost their lives in the
same crash in Korea...sent there from the "rear-area" of Japan
by Gen MacArthur to improve communications after the North
Koreans invaded South Korea.

Stebie is going to say I "dishonor" them by mentioning them.
He has stated that before and that is just as damnably FALSE
as anything he has ever babbled. Normally I would have told
Stebie ("Mr. Seven Hostile Actions") to Go To Hell. He is
already there. Scroom.

Jimmie Noserve never worked any REAL radio communications beyond amateur hobby stuff. He never took any Oath on being inducted and never even got to "dine with the Captain" (on an aircraft carrier) and being "served by drudges." He never ever had any worries that anyone on the "other side" would harm his precious being. He could sit back and laff and laff at the "errors" of getting wrong USSR aircraft nomenclature and poke fun at no-coders doing REAL COMMUNICATIONS just a few flying hours away from hostiles.

>> >I'm good with volunteerism in the U.S. armed services. Tell Jim to

They are the "elite" and shouldn't risk their precious bodies in any way. We are the "drudges" that Kellie talks about, the lower class, not near as ELITE as the No-Serves.

>Later on you learn that they gave blood at the ARC Bloodmobile on the

>
>HALF A FRIGGIN LIFETIME AGO FOR RADIO EXPERIMENTORS!!! Idiot!

Jimmie was THERE...in his heart. :-)

Gosh and gee-whilikers...in 1953 I was doing HF communications
while in the U.S. Army and didn't have to know a thing about
morse code. Reason is probably that NONE of the three dozen
high power transmitters at one station (only the 3rd largest in
the Army network) used any morse code. NONE of the personnel
at that station were required to know morse code to operate
all those transmitters (minimum 1 KW RF out, maximum 15 KW
but later increased to 40 KW). HF bands, 24/7 operations,
nearly a quarter million messages handled each month.

>> In 1963, in its original "incentive licensing" proposal to FCC, ARRL
>> proposed that full privileges be available only to Advanced and
Extra
>> licensees, and that the Advanced be reopened to new issues. This

>Got any??? Privs for those not able to achieve 90WPM will be

>reassigned to the BPL bands. Idiot!

As Jimmie Noserve likes to put it, "that's simply 'untrue'." :-)

Brian, you have to understand that Jimmie is the Compleat
(amateur) Manchurian Candidate. Fully brainwashed into thinking
that the ARRL is the holy grail of "truth" and all good works.

>> In 1990, ARRL supported the creation of a nocodetest amateur radio
>> license.
>
>Why not 1987??? Idiot!
>
>Where was the ARRL's leadership when the FCC made the "Novice
>Enhancement?" Why did the FCC have to go it alone without the ARRL's
>"""Leadership???""" Extra-wipe! Idiot!

Jimmie is WRONG BY OMISSION. According to all the documents
PRIOR to the final decision on FCC 90-53, the ARRL was
AGAINST that. The ARRL only supported the final R&O on the
creation of the no-code-test Technician class AFTER THE FACT.

Jimmie just can't bring himself to admit that many OTHER
parties were trying to cancel the code test PRIOR to 1990.
Some time spent in the FCC Reading Room of the correspondence
PRIOR to 1990 will show enough support for No-Code-Test that
the FCC was lobbied into the 90-53 issuance.

Once the NO-CODE-TEST Technician class was established, the
ARRL had no other choice to "support" it...it would have been
politically destructive to the League to oppose it AFTER THE
FACT.

Jimmie wants to OMIT certain details to show that the ARRL is
in the "leadership." It isn't. The ARRL still hasn't gotten
a membership larger than a quarter of all licensed U.S.
radio amateurs.

The FASTEST GROWING CLASS in U.S. amateur radio - since 1991 -
is that very same NO-CODE-TEST Technician class. NO OTHER
class has grown so large, so quickly, in the history of
amateur radio as regulated by the FCC since 1934.

Jimmie is going to trot out his outworn cliches' and other
statements (nearly all sinning by omission of details) and
state "that is simply wrong." :-) He can't think for
himself anymore in amateur radio matters, apparently. He
is one of the number-one bunting putter-upper and flag
waver for the League. The ARRL can do NO wrong in his eyes.

>N2EY is so full of EXTRA excrement that I just can't allow the rest of
>his original post to be quoted. You offend thinking people unlike any
>"off color" callsign that you would care to strike.

In my view, Jimmie is so brainwashed that he can't help himself. He, like Stebie da Avenging Angle of Dearth, is into such a fantasy that Jimmie really thinks what he writes is "truth" and anything contrary is "untrue." Jimmie just can't conceive of his words being in error, therefore he speaks "truth."

As to the "off-color callsign" (Kim's vanity call), that's just his personal morality thing. It's almost like he took Vows and was ordained a Priest in the Holy Orders of the Church of St. Hiram...of the Latter-Day Radio Saints? Or was it Former-Day Radio Saints? Must be that for his wanting to cite all those "leadership" actions happening during and before he was born. Another amateur "role-model" to emulate on seeking the "highest goals" in amateur radio...complete Nirvana in morsemanship. Ho hum.

> wa6ilt@NOamsat.org

So why would you assume that a station sending hi speed CW number groups
would originate from a HAM station?

If this is not a troll I would start by getting a good tape of the signal,
if possible, via a spectrum analizer possibly. That way you can use it to
compare to when you do hear it on the lower HF frequency. Positive
signature and all that.

If it is indeed sending number groups then it is possibly a spy station.
And yes they still do that sort of thing. Especially now that the Western
nations in their stupidity have all but buried Morse Code.

Let me know if you get anywhere. And if you are serious I can possibly turn
you on to some folks that could help you out.

Use my e-mail please.

Well I sort of thought those blinder improved Stebie's
looks...kind of softened the fierce scowl he always shows
in pictures. [I do wish he would have a dentist work over
his teeth so he could smile in those photos...]

>Jim constantly makes statements on things which he has no experience
>in. Jim constantly tells others to be silent on things which they
have
>little or no experience in. That is a clear double-standard. That
you
>won't see it is telling.

Tsk. Jimmie has played with some surplus military radios
and suddenly becomes "expert" enough to "correct" others who
have worked with them...like AN/PRC-104s and AN/PRC-119s.

Jimmie made a bunch of "guru observations" of the aerospace
business a year or so ago, yet he's not told of which
companies those were...or the government branch where he was
employed as a "space expert."

Jimmie claims to be a "radio manufacturer" (!) yet there is
no record of such a business in the business journals. He
DID show pictures of a klugy vacuum tube transmitter that was
supposed to be "state of the art"...and built in the 1990s.

>> He's corrected
>> you AND Lennie on numerous military issues, communications and
>> otherwise, and has yet to be shown to be wrong.
>
>I recall you being corrected on military and MARS communications
>issues. Often.

Tsk. Again, it's a point-of-view. To Stebie he NEVER makes
mistakes. [he won't admit to such at any rate...]

Everyone ELSE LIES if they disagree with heroic Stebie.

Tsk. Stebie >>IS<< the Constitution! :-)

Saying anything against Stebie is Sedition, Treason Against
The State!!!

>> > Hey, while you're at it, why don't you produce authentic
>> > documentation of your alleged "A" NCOIC MARS/Okinawa.
>>
>> Right after we get some of the information we've been asking
YOU
>> for for YEARS...
>
>So then, you really are a liar. You're the very thing you claim of
>everyone else.

Ah, not quite from Stebie's point of view. In his distorted view
Stebie is "always truthful" but everyone who doesn't like him is
a "LIAR," "deceitful," "hates ham radio," and/or has underarm odor.

>> > > So...was your Oath as a member of the Armed Forces just
some words
>> > > you recited in order to get a federal job? Sure looks that way.
>> >
>> > I'm offended that Jim claimed "service in other ways." What other
ways?
>>
>> Why would you expect Jim to answer such an insulting question
when
>> YOU have overtly refused to answer questions he's put to you for
YEARS,
>> Brain?
>
>Why wouldn't he? He has no problem insulting others.

Tsk, now Jimmie Noserve is going to be furious! Jimmie "NEVER"
"insults" anyone...all he does is "point out mistakes" that
"others do." :-)

>> (Rhetorical question...we know the answer...you're a coward...)
>
>Hi, hi! That's rich coming from the guy who couldn't make Dayton to
>see me. Seven hostile actions? Hi!

Tsk. Readers are still unaware of Stebie's mighty warrior acts
WHEN and WHERE of those "seven hostile actions!"

Maybe they were "special ops" and veddy, veddy "secret" that
Stebie can't reveal? :-)

[gosh, maybe we can hear one of his "HALO Drop" stories?]

>So is Jim checking out the governments needs over in the desert? He
>would be drawing a nice, tax-free paycheck.

Jimmie is "serving in other ways" by defending the Constitution
of the ARRL...against all enemies, especially the domestic
no-coders. Plus he is probably training for another marathon,
another "service for his country." Hi, hi!

That and keeping his Time Machine running so he can jump back to times when Kode was King in raddio. "Important national service," you bet! :-)

<insert eight lines of all-caps hyena laghter here>

Poor, anal -retentive Acey. Why, I bet you dare not drive "willy
nilly" in empty parking lots, preferring instead to follow the lines
and arrows with unquestioning obedience to their implicit directional
instructions on the completely void-of-vehicles surfaces. What fun!
But hey, if you enjoy playing with your expensive ham radio equipment
to make meaningful contacts such as "Hi. My name is Ace. Your signal
is 5 by 9. My radio is a Yaesuwood and my antenna is up there real
high. Well, bye for now, and I hope we can again exchange similarly
meaningful intercourse in the near future. This is WH2T signing off."
How exciting, and more power to you, Acey. Maybe after repeating that
scenario in seemingly endless occurrences for several decades, you may
find yourself searching for some different excitement that takes you
slightly off the beaten path that actually allows you to - oh my! -
think for yourself. But wait. Those "paved surfaces" are without
directive lines. Never mind.

Whoa, there, "SEA STALLION."

The CH-53A to CH-53D are called "Sea Stallion," NOT "Pave Low."
CH-53E is called "Super Sea Stallion."

The "Pave Low" is the MH-53E through O suffix, operated mostly
by the USAF. More specifially "Pave Low II" to "Pave Low VI."

The "CH" in the type designation stands for Cargo, Helicopter.

The CH-53A through CH-53D are CARGO HAULERS.

Some of the MH-53s are into special ops. But, the Sea Stallion
is basically a CARGO HAULER, first operational in 1966.

Took only a few minutes on the Internet to check that out.

Now, heroic "seven hostile actions" veteran, what exactly ARE
you trying to foist over on everyone with a CARGO HAULER, and
whatinhell does that have to do with AMATEUR RADIO?!?!?

As usual, the "seven hotile actions" hero is running another
reputation SCAM on everyone. Significant OMISSIONS of information
along with an outright LIE on aircraft names versus type number.

If you are going to LIE, BLUFF, SCAM, try to get your military
nomenclature CORRECT. You did NOT do so! Stand down.

That is all. Dismissed.

No screaming eagle, huh, rear area gutless one...?!?!

Ya think that MAYBE that's why I said "...the MC >>>version<<< of
the Pave Low..."...?!?!

Brain was in the Air Force. That's why the cross-reference.

> The "Pave Low" is the MH-53E through O suffix, operated mostly
> by the USAF. More specifially "Pave Low II" to "Pave Low VI."

Amazing how "smart" you are with the click of a mouse, eh...?!?!

Too bad you can't retain some of that...

> The "CH" in the type designation stands for Cargo, Helicopter.

Very good....Still not any "smoking gun", though...

> The CH-53A through CH-53D are CARGO HAULERS.

As is the CH53E Super Sea Stallion, on which I was qual'ed.

> Some of the MH-53s are into special ops. But, the Sea Stallion
> is basically a CARGO HAULER, first operational in 1966.

Actually first operational in 1965.

The "CARGO HAULER" was used for "special ops" through out it's
career too, Lennie. That's why the USMC had them fitted with VULCAN's,
-50's, etc.

That's also why the USMC fit's them for vertical envelopment.

The USMC, The Air Force and the Navy all used them for SpecOp insertions, Maritime patrol, security-of-the seas missions.

> Took only a few minutes on the Internet to check that out.

Sure did.

Guess what else...?!?!

The airframe comes off the same production line at Sikorsky at Stratford, CT.

The same airframe...Over 80% interchangeable.

And the missions of the CH-53 (ALL variants) far exceed "CARGO HAULING".

Of course you didn't know that because the scope of your knowledge stopped at your wrist.

> Now, heroic "seven hostile actions" veteran, what exactly ARE
> you trying to foist over on everyone with a CARGO HAULER, and

> along with an outright LIE on aircraft names versus type number.

I didn't lie about a single thing, Lennie.

If you want a REAL education, you should read some of the histories of the USMC's various Sea Stallion units...Most notably HMH-462, HMH-464, HMH-363 and HMH-361.

I was in all except 464 at one time or another.

Take the time to do some research and you'll find a few of those "seven hostile actions" you claim I never participated in.

> If you are going to LIE, BLUFF, SCAM, try to get your military
> nomenclature CORRECT.

I did so. Absolutely correct.

> You did NOT do so!

Leonard H. Anderson has uttered another falsehood. Why does he insist on doing that?

> Stand down.

You do not now have, nor did you ever, nor will you ever have the authority, expertise, training, experience or qualifications to give me an order or to imply you are giving me an order.

The service history and deployment of the CH53-series aircraft is
yet another "field" in which YOUR "experience" is from a mouse click.

I was there. You were not.

You're just TOO inadequate.

Putz.

> "Colleagues?!?" GROUND crew wre exposed to "hostile fire?"

If you think that my "maintenance" MOS meant I never left the
ground, you've once again demonstrated your complete and utter lack of
knowledge and experience on yet another topic, Lennie.

Since you're so busy mouse-clicking lately, why don't you avail
yourself of some knowledge on USN/USMC Enlisted Aircrew training and
deployment, Lennie...?!?!

You're making yet another fool out of yourself otherwise...As if
THAT is news...

Putz.

Seve, K4YZ

You will "honor" no one until you've published an unequivocal
apology for your cowardly and snivveling attempts to use the sacrifices
of others in order to embellish what was an unremarkable tour of duty
in the Army.

Such as:

> I will mention Cpl Elmer Hardy and Capt Jim Tomlinson, both gone
> suddenly on the 1st of July, 1950, both members of *MY* Signal
> Battalion (the one I served in).

They were not members of "YOUR" signal batallion, Lennie.

You were still in the States when they died. A civilian.

> I will HONOR them and the
> other 18 members of MY Battalion who lost their lives in the
> same crash in Korea...sent there from the "rear-area" of Japan
> by Gen MacArthur to improve communications after the North
> Koreans invaded South Korea.

And you were STILL not a member of THEIR signal batallion.

You were still in the States when they died. A civilian.

> Stebie is going to say I "dishonor" them by mentioning them.

No, I do not state, nor have I EVER stated, that you dishonor
them by "mentioning" them.

What I DO state is that you try to embellish your own character
with THEIR scarifices, just like you did in the foregoing three
paragraphs.

Just like I've been saying all along....

> He has stated that before and that is just as damnably FALSE
> as anything he has ever babbled. Normally I would have told
> Stebie ("Mr. Seven Hostile Actions") to Go To Hell. He is
> already there. Scroom.

"Hell" is where people who try to embellish their own meager
"service" by trying to associate themselves with MEN who died three

years earlier go, Lennie...

Put on that NOMEX underwear, Lennie.

You did it before...You did it today...Just like I said you had.

Thanks for proving me right again...

> A respectful salute to you, Brian, as one veteran to another.

At least Brian got a shot at some real live-fire service...(pun
not intended)

YOU are just the fire-and-brimstone service...

If they exhibited their typical condescending
mentality or mannerisms like they do to the paying
dealers/vendors in the outside flea market, this would
not suprise me at all. I'd not even donate a cheap prize
pair of dollar store headphones. BTW we really liked the
condition of the dealer's parking lot this year!
The blacktop of the Hara Arena reminded me of a
cross between the Lunar landscape and the San Andreas
Fault in some places. As someone on the live chat
commented quite accurately: '..the Hara should rent out
their parking lot to Range Rover for Customer Test Drives
during the weekdays'.

> Also I would say that both the flea market and the
> inside vendor numbers were down by at least 20%.
> There were MANY empty spaces in the flea market
> area when in past years it was mostly full.

Year after year less and less sellers. I attribute this to
e-Bay, the cost of selling at the Hamvention and the
ever diminishing returns. 9:00 AM on Sunday was
positively dismal. I would say that fully 40% of the
outside Vendors packed up and left on Saturday night.

This year was our last, Dayton is just not worth it anymore.
Better to sell it online and have the UPS Truck
come to your house and pick the stuff up for
delivery instead of carting it 500+ miles just to bring
it all back home rain dampened again...

> I also heard that Mendelson wanted more space and a break
> on the flea market rental since they are going out
> of business. The Hamvention, based I what I heard
> around, said no dice, so they didn't even bother
> to show up and they're only a few miles from the
> arena too.

We heard the same story making the rounds
among the dealers on Saturday. Probably true.

> They spaced out many of the inside
> vendor booth areas so it wasn't too obvious that
> the number of vendors was way down.
> What did anybody else notice? I hope the above
> isn't a long term trend.

Those spaces were a combination of that and
a small number of dealers who decided not to
go at all the last minute. The hamfest committee
was hoping that alot of people would show up
and pay for a space...like that was going to happen. (!)

I also saw several tables of 100% cell phone and computer
junk which was a major disappointment. I would be
rather PO'ed also if I paid $40 to get in and I saw
standard flea market type vendors selling stuff that
I could see, at any weekend mart FOR FREE and
with no admission charge!

Forget it folks..
IMHO Dayton is finished, stick a fork into it.
It will never go back to what it once was Years ago
despite all the marketing and hype that they make it.
Oh there will always be the camaraderie and the new
equipment showings, but the flea market is just about finished.
Stick to hamfests located with 30 miles of your QTH.

I agree. It looked more like a drive-in rummage sale than a hamvention at
the outside vendors booths.

If it was so bad in years past, why did you go this year. My last trip to Dayton was about 1995 and my impression of the used equipment for sale outside was that it had been carted between too many other hamfests. And there was a surprising amount of non-radio electronic gear and parts. The inside was the usual glitzy trade show and one vendor actually had bikini clad women prancing around.

In my experience hamfests in general are showing lower attendance because of both internet-based competition and the ham radio hobby itself being on the far side of the growth and maturity curve.

In the Hamventions defense it's not their fault as to what is brought inside for sale. They're probably trying to do the best they can to put on a good event.

Agreed, most stuff is going to eBay these days, and no problem with that. Can't really fault a seller for wanting to move his/her equipment rather than waiting another year for Dayton.

I've seen the same here even with local fest's over the last number of years.

I liked the blond working in the "Radio Works" booth. The two working
around the corner from the Kenwood exhibit were nice, and the top heavy
one working in the far back corner in the hall where the Hummer was at too.

The Bottom Line:

Ham Op's in general and the Hamvention Committee
and the DARA has yet to grasp that timeless law of
Business MBA called: "The Law of Diminishing Returns".

Yeehaa! Too bad I didn't get to see it

> In my experience hamfests in general are showing lower attendance
> because of both internet-based competition and the ham radio hobby
> itself being on the far side of the growth and maturity curve.

Now you've hit on something. I wouldn't doubt that a lot of people who are "fed up" with Dayton are just tired of the whole hamfest thing in general.

I've been going for three years now. There were less vendors this year than last. But there was less crap than last year also. And a lot of the crap that went missing this year was the people selling ancient computers and old HT junk. If you wanted ham radio items, there was plenty to be had. And I'd rather have fewer vendors selling more ham radio equipment than more vendors selling IBM XT's and Old Handi-talkies that some Fire department got rid of in 1990.

Interesting that with the high prices that Collins equipment has been getting lately, a lot of them came out of the woodwork. I would suggest that anyone collecting them keep their eyes open for good deals.

I guess "Extra-wipe" was a bit strong. So sorry.

> Jimmie is WRONG BY OMISSION. According to all the documents
> PRIOR to the final decision on FCC 90-53, the ARRL was

Oh, please. You know how these guys are about documentation. Long on demands, short on product.

> Once the NO-CODE-TEST Technician class was established, the
> ARRL had no other choice to "support" it...it would have been
> politically destructive to the League to oppose it AFTER THE
> FACT.

The train was leaving the station. Toot-toot. They had to jump aboard
or get left behind.

> Jimmie wants to OMIT certain details to show that the ARRL is
> in the "leadership." It isn't. The ARRL still hasn't gotten
> a membership larger than a quarter of all licensed U.S.
> radio amateurs.

Not only that, but the FCC doesn't appear to be looking at the ARRL in
any leadership capacity.

> The FASTEST GROWING CLASS in U.S. amateur radio - since 1991 -
> is that very same NO-CODE-TEST Technician class. NO OTHER
> class has grown so large, so quickly, in the history of
> amateur radio as regulated by the FCC since 1934.

Don't confuse them with the facts

> Jimmie is going to trot out his outworn cliches' and other
> statements (nearly all sinning by omission of details) and

Ever since I pointed out that his comment "A morse code exam would be a
barrier to morse code use" was exactly our point, he's gotten Extra
defensive and ultra-sensitive.

> As to the "off-color callsign" (Kim's vanity call), that's just

I especially like his vision of an active amateur radio service during WWII. Hi! What a vision! What a revision!!!

Nope. You've continually denigrated my service and Len's with REMF and
box-kicker descriptions.

First they would have to get someone young enough to realize anything in a position where they could help... krist, hamvention... that looks more like a convenction of geriatric patients at a knitting competition...

Well, it was bright and lit up well--all those bald heads relecting the light... <grin>

Warmest regards,
John

That's too bad since this is one of the few flea markets where you can find this "old stuff". In fact I found exactly what I was looking for, some old 72 pin 32MB EDO memory sticks and some 128MB 168 pin DIMM memory sticks. It was FAR cheaper than any vendor on line I found, if they even had what I was looking for in the first place. Those old computers get put into service as packet nodes, dedicated remote rig control computers, DSP based sound card digital modes, etc. I would rather tie up the old PII 333MHz machine I'm using right now, got it for $80 including the monitor at a local Ham fest, than my new AMD FX-55 system. Now all I have to do is find some Linux based sound card software.

The correct terminology according to K4YZ is "Musta beem selling SOMEthing!". I don't know how you "beem" sell SOMEthing, but I'm sure "Steve" (alias for K4YZ) will provide a weasel-worded explanation.

Methinks yer one lucky dude OM!

Look at it this way......

You can be laughing one minute at
the amusing reads in rrap, and have
Al Jazeera Network on the TeeVee
in the background (with the sound
off) and be amused at pics of islamic religious
fanatics blowing each other up via IED's
or S-B'ers on an hourly basis in Iraq the next.

One final question, is kooky Brother Stair audible
in Kuwait via shortwave? He must go over real well
in A-rab land! :)

>
>Hey, you went through the IGY57/58. Did you notice anything unusual
>about the propagation?

I returned to the States in early 1956.

The only thing I recall was a TOTAL ionospheric blackout
(on local midnight shift) in the Fall of 1955. Lasted about
three hours, give or take. Back-logged about 100 messages or
so which impacted the flow a bit. Before IGY, of course.
Only the long-distance circuits (nearly all) over 300 miles
were affected. VHF and above LOS was not affected.

>
>Oh, please. You know how these guys are about documentation. Long on
>demands, short on product.

Yes, I do...but remember that "these guys" are all PCTA Extras
and have their Double Standard to rationalize their actions.

However, Jimmie is still upset about OLD postings in here and
demands some kind of "recount" and weird "admission of guilt"
over some imaginary "wrongdoing." Jimmie's MISDIRECTION into
old, old posting arguments is one form of his rationalizations.

>> Once the NO-CODE-TEST Technician class was established, the

>> Nirvana in morsemanship. Ho hum.
>>
>I especially like his vision of an active amateur radio service during
>WWII. Hi! What a vision! What a revision!!!

Super vision! [either he IS that or NEEDS that... :-)]

Jimmie "lived" IN WW2...in his heart and fantasy...just never
was IN the military or faced the prospect of harm to his body
then or later...when he was alive and could have, but didn't,
serve in the military. "He served in other ways..."

I just can't picture Jimmie using an M-209 Code Converter and
tapping on an AN/GRC-9 to "send intel back from the front lines"
to his unit (which wasn't done much in actual fact). Since the
tanks and trucks depended on VOICE comms over VHF sets in Yurp
then, he can't be pictured using a knee key in a bouncing
Sherman tank facing the Panzers along the Rhine. Neither can
he be thought of as "working" the ARC-5 sets in B-17s and B-24s
over Germany (the two pilots used the Command set, the radio-
op-gunner was only connected to the low-HF Liason set). He
certainly wouldn't use VOICE on the first "handie-talkie" (on
HF, operational in 1940) since he thinks HF is only for morse.
Neither would he be pictured using a BC-1000 "walkie-talkie"
(VHF voice only and Heavy backpack) even though that was
widely used - and praised - by the "grunts" of that time,
both in Italy and in Yurp. Jimmie is a MORSEMAN and that is
that... :-)

1. Helicopters are NOT a radio subject, let alone AMATEUR RADIO.

2. Military aircraft nomenclature, names are NOT a requirement
in AMATEUR RADIO.

3. Are there any AMATEURS operating "helicopter mobile?" :-)

>> The "Pave Low" is the MH-53E through O suffix, operated mostly
>> by the USAF. More specifially "Pave Low II" to "Pave Low VI."
>
> Amazing how "smart" you are with the click of a mouse, eh...?!?!

All the information on the Internet is at ANYONE's disposal.

> Too bad you can't retain some of that...

Not my job. Too bad Stebie can't remember to get names correct
on helicopters he has "served." :-)

>> The "CH" in the type designation stands for Cargo, Helicopter.
>
> Very good....Still not any "smoking gun", though...
>
>> The CH-53A through CH-53D are CARGO HAULERS.
>
> As is the CH53E Super Sea Stallion, on which I was qual'ed.

1. The colloquial term for "qualified" is spelled "qualled"
as it is pronounced.

2. The CH-47 and CH-54 are also Cargo Handlers, types that
I've designed test sets for...and gotten them in
production and eventually delivered (RCA EASD).

>> Some of the MH-53s are into special ops. But, the Sea Stallion
>> is basically a CARGO HAULER, first operational in 1966.

FORTY YEAR OLD DESIGN. :-)

> The "CARGO HAULER" was used for "special ops" through out it's
>career too, Lennie. That's why the USMC had them fitted with
VULCAN's,
>-50's, etc.

Tsk...next thing will be Stebie bragging on his "special ops"
experience...maybe with a "HALO Drop" story? :-)

The tactical and strategic use of helicopters is NOT anything
close to AMATEUR RADIO POLICY.

> That's also why the USMC fit's them for vertical envelopment.

NOT applicable to AMATEUR RADIO POLICY.

> The USMC, The Air Force and the Navy all used them for SpecOp
>insertions, Maritime patrol, security-of-the seas missions.

NOT applicable to AMATEUR RADIO POLICY.

> The airframe comes off the same production line at Sikorsky at
>Stratford, CT.

NOT applicable to AMATEUR RADIO POLICY.

> The same airframe...Over 80% interchangeable.

NOT applicable to AMATEUR RADIO POLICY.

> And the missions of the CH-53 (ALL variants) far exceed "CARGO
>HAULING".

NOT applicable to AMATEUR RADIO POLICY.

> Of course you didn't know that because the scope of your
knowledge
>stopped at your wrist.

Not my job to know details of helicopters. :-)

> I didn't lie about a single thing, Lennie.

Not in Stebieworld. Stebie NEVER lies in Stebieworld...everyone
else does there... :-)

> If you want a REAL education, you should read some of the
>histories of the USMC's various Sea Stallion units...Most notably
>HMH-462, HMH-464, HMH-363 and HMH-361.
>
> I was in all except 464 at one time or another.

NOT applicable to AMATEUR RADIO POLICY.

> Take the time to do some research and you'll find a few of those
>"seven hostile actions" you claim I never participated in.

Is Stebie's name featured anywhere on those "research pages?"

So far, none of us readers have found out the WHEN and
WHERE of Stebie's famous "seven hostile actions."

Hint: This newsgroup is NOT about the Glory of the USMC
or about helicopters. Try to stay focussed. If you write
names of helicopters, try to get them CORRECT.

>> If you are going to LIE, BLUFF, SCAM, try to get your military
>> nomenclature CORRECT.
>
> I did so. Absolutely correct.
>
>> You did NOT do so!

Tsk, tsk. I corrected you and you admitted to the INCORRECT
"cross-reference" (your term for covering up your mistake). :-)

BWWAAAAAAAAAAAAAHAAAAAHAAAAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAH
HAHAHAHHAHAHAHAHAHAHAHAHAHA<gasp>HAHAHAHAHAHHAHAHAHAHAHAH
HEHEHHEEHEHEHEHEHEHEHE!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!

Tsk. Stebie ought to go to work for "Sgt Grit - 'if we don't
have it, Chesty wouldn't want it."

NOBODY can tell mighty Stebie ANYTHING!

BWWAAAAAAAAAAAAAHAAAAAHAAAAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAH
HAHAHAHHAHAHAHAHAHAHAHAHAHA<gasp>HAHAHAHAHAHHAHAHAHAHAHAH
HEHEHHEEHEHEHEHEHEHEHE!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!

> The service history and deployment of the CH53-series aircraft is
>yet another "field" in which YOUR "experience" is from a mouse click.

Absolutely! :-)

BWWAAAAAAAAAAAAAHAAAAAHAAAAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAH
HAHAHAHHAHAHAHAHAHAHAHAHAHA<gasp>HAHAHAHAHAHHAHAHAHAHAHAH
HEHEHHEEHEHEHEHEHEHEHE!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!

I've spent 53 years working in RADIO-ELECTRONICS, not
helicopters. This forum is NOT about helicopters. This
newsgroup is about RADIO, specifically amateur radio policy.

So, Stebie, how much time did you spend in Building 82? :-)

Temper fry...

>get's it's Enlisted Aircrews, Lennie?

Nope. This newsgroup is about AMATEUR RADIO POLICY, not
the glory and history of the USMC.

So...Seve can tell us exactly WHAT those MOSs DO, can he? :-)

Tsk, so far Seve has AVOIDED stating outright that he was
an aircrewman. That leaves only GROUND crew...which are
as important as any position for 40-year-old aircraft designs.

>> >You don't "give" me anything. My service is not up for your
approval.
>>

Sevie committed Navigational Error! Wrong HEADING! :-)

Of course, there's the possibility he suffers from mental
blackouts and just cannot remember American history.
Traumatic Stress Syndrome from those "seven hostile actions?"

>> Poor fella thinks the Constitution of the USA has some kind of
>> paragraph saying "everyone has to abide by this wanna-be Dill
>> Sergeant (with the pursed, pickled lips and sour disposition).
>
>He needs to be ignored. His shrillness level will go up until he is

Since I and my wife each got LCD flat-panel displays last
year, I'm not worried about him breaking our monitors.
I may have to sleeve the fluorescents over the L-desk in
translucent sleeving, though.

As for "shrillness" [plus outrage] at least 40 db over S9,
wait until I show a copy of his "dishonoring my unit"
message to the guys who are going to be at the Westwood
federal cemetary on Memorial Day! Poor Sevie gonna be
so outnumbered by REAL veterans... :-(

I never "denigrated" your service, Brain.

I said your Amateur Radio activities from Somalia were not legal.

I've also told you to not lump me into the same pile with you and Lennie. I give you more credit for having been in a forward area, and have acknowledged that.

Your mentor's only exposure to any "incomming fire" was required rifle range time. last I checked RF-burns and paper cuts don't count for much.

What "weasel worded" explanation, Hans?

You STILL have yet to explain this alleged insult adequately to
anyone.

I said that pretty faces in comely attire sell things. That's
nothing that any first year advertising student doesn't already know.

So...Just running off at the mouth on yet another self-righteous
rant, hans?

Seems like it too me.

Detail for ISS contact with Coronado School in California on 5/24/05
at 17:21UTC

Coordinator: Dieter Schliemann,KX4Y Event Type: School Contact
Start Date (mm/dd/yy): 05/24/05 End Date (mm/dd/yy): 05/24/05
Open to the Public: Yes Special Event Callsign: NA1SS

City: Coronado State/Province: CA
Country: US

Additional Comments:

We hope to see you join us in listening to this contact between the
ISS and the Coronado School in California on 24 May 2005 on the
EchoLink AMSAT and EDU_NET servers. The event will start at 17:21UTC.
Please give the EDU_NET server your preference over the AMSAT server
for your connection. This will keep the load light on the AMSAT
server, assuring us of better audio quality all around.

If using IRLP is more convenient for you than using EchoLink, please
connect to the IRLP reflector 9010. The ARISS IRLP Team is feeding
the audio into that reflector. No prior approval is needed to connect
to the IRLP reflector 9010.

Thanks for your interest and 73, de Dieter kx4y

My current general purpose logging software (HyperLog) is no longer supported,
so I am looking for a replacement.

Following are my requirements.

MUST HAVE
--Intel/MS platform (Win, DOS, whatever)
--Radio aware
--Keyboard-centric (no mouse for routine logging)
--Callbook CD aware
--Import/Export ADIF
--LoTW integration
--Award tracking (DXCC, WAZ, etc)
--Print QSL report labels
--Impecable track record of author support

Nominations please. (Price not important)

73, de Hans, K0HB

Didn't see that. But as a Japanese owned company, they have a different culture, and some of the things they do might seem a little different to us.

Yup... that seems different!

My 2 cents worth is Win-EQF. Used it when it was DOS based only and it has only gotten better over time.

Support by the author is second to none, really great.

Try the free version, if ya like, register it to get all the award modules working.

Not associated in any with, just a very happy customer.

K7SAM

As you've seen, people seem to be quite partisan about their favorite
loggers!

I've tried a bunch. Didn't really like *any* of them. Gave up & wrote
my own. Linux platform though all the components are also available for
Windows & the underlying Perl code should run on Windows with little or
no modification. It doesn't have rig control, CD support, or LotW
integration though they could all be added.

Neat thing is that all QSOs are logged into a standard database engine.
Any query I can think up, I can run. Got a QSL card from AP2IA?

mysql mylog -e "update log set name='Ijaz', city='Lahore', grid='MM62'
where call='AP2IA'"

and the data is updated for all QSOs. Can't do that with most other
programs.

Well all of the people there, at the Hamvention, were American. I wonder
if the girls were some of their kids and that was a way to take them along
and have Icom foot the bill?

Farnsworth, Yikes!

I'm fairly certain that's why I didn't become a General class in 1987.

Speaking of weasel-worded explanations from Steve, I'm still waiting
for an explanation why he has posted my house number here?

Hans said it best:

"The correct terminology according to K4YZ is "Musta beem selling
SOMEthing!". I
don't know how you "beem" sell SOMEthing, but I'm sure "Steve" (alias
for K4YZ)
will provide a weasel-worded explanation."

I didn't get the bath robes either.

I would agree...the days of hamfests are coming to a close.

I was a faithful attendee of Dayton until 1999....since then I have NO urge to go since Ebay serves my needs well.

This last summer I went to our local hamfest after not going for ten years...it confirmed that I had not missed anything by not going.

I seriously doubt that the Dayton Hamvention will last another ten years.

I also suspect we will begin seeing manufacturers going the same route as the hobby continues to die out.

Sure they are.

If we can be bombarded with reams of old tales on how you dodged
"incomming artillery fire", "served under the threat of the Soviet
Bear", and how "you" passed 1.2 million messages, >>I<< can discuss
helos.

> 2. Military aircraft nomenclature, names are NOT a requirement
> in AMATEUR RADIO.

Neither are the names of soldiers you never served with and who
died three years before you were ever in the Army...but you deem it
necessary to being them up anyway.

> 3. Are there any AMATEURS operating "helicopter mobile?"

There was at least one in the Marines many years ago. I know of
several Flight Medics with Life Flight (Nashville) and Life Force
(Chattanooga) today who are Amateurs and carry HT's on occassion.

> on helicopters he has "served."

I did get them correct. Absolutely correct.

YOU tried to make an issue out of my making an anolgy between the
USMC CH53 and the USAF Pave Low.

It didn't work.

> >> The "CH" in the type designation stands for Cargo, Helicopter.

> as it is pronounced.

And many people abbreviate it "qual'ed". You don'...that's fine.
But YOU were never one of those persons "qual'ed" on ANY airframe.

> 2. The CH-47 and CH-54 are also Cargo Handlers, types that
> I've designed test sets for...and gotten them in
> production and eventually delivered (RCA EASD).

And never qualified on either of them as a flight mechanic,
aircrewman, gunner or other flgith crew.

Not a one.

And it's cargo HAULERS, not cargo "handlers", Lennie. 'Handlers'
are known as LOADMASTERS...On USMC heavy helicopters the Crew Chief
also doubles in that role.

> > >> Some of the MH-53s are into special ops. But, the Sea Stallion
> >> is basically a CARGO HAULER, first operational in 1966.
> >
> > Actually first operational in 1965.
>

> Tsk...next thing will be Stebie bragging on his "special ops"
> experience...maybe with a "HALO Drop" story?

Nope...Never was a SpecOp operator.

> The tactical and strategic use of helicopters is NOT anything
> close to AMATEUR RADIO POLICY.

True. But you're not qualifed on all three subjects, yet in the
last three days you've tried to preach to me on them.

Silly Rabbit.

At one time or another I've participated in all three.

> > That's also why the USMC fit's them for vertical envelopment.
>
> NOT applicable to AMATEUR RADIO POLICY.

Got your nose rubbed in your error again, eh Lennie...?!?!

> > The USMC, The Air Force and the Navy all used them for SpecOp
> >insertions, Maritime patrol, security-of-the seas missions.
>
> NOT applicable to AMATEUR RADIO POLICY.

Got your nosed rubbed in your own error again, eh, Lennie? Of
course any brief "search" via Google, et al, will produce numerous
reports that substantiate exactly what I said...

> > The airframe comes off the same production line at Sikorsky at
> >Stratford, CT.
>
> NOT applicable to AMATEUR RADIO POLICY.

Got your nosed rubbed in your own error again, eh, Lennie? Of
course you want to change subject now...Got caught with your "facts"
exposed again...

> > The same airframe...Over 80% interchangeable.
>
> NOT applicable to AMATEUR RADIO POLICY.

Quite correct...But still absolutely true.

> > And the missions of the CH-53 (ALL variants) far exceed "CARGO
> >HAULING".
>
> NOT applicable to AMATEUR RADIO POLICY.

Of course it is, Lennie.

YOU made an issue out of it! And still absolutely true.

> > Of course you didn't know that because the scope of your
> knowledge
> >stopped at your wrist.
>
> Not my job to know details of helicopters.

Ahhhhhhhhhhhhhhhhhhhhhhhhhhhhhhh ! ! !

THERE WE GO!

Lennie thought he'd be a smart alec and try to "ding" me on yet
another topic HE was unfamiliar with...

Got zinged!

YESTERDAY he "knew the details"... Now that he got slapped around
for his errors, it's...

........."NOT MY JOB"...!!!!

BBBWWWWHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAH
AHAHAHAHAHAHAHAHAHAHAHA
! ! ! ! ! !

> > I didn't lie about a single thing, Lennie.
>
> Not in Stebieworld. Stebie NEVER lies in Stebieworld...everyone
> else does there...

Not in "Stebieworld" (wherever that's supposed to be), not
here...Not about these topics...

> > If you want a REAL education, you should read some of the
> >histories of the USMC's various Sea Stallion units...Most notably

>
> Is Stebie's name featured anywhere on those "research pages?"
>
> So far, none of us readers have found out the WHEN and
> WHERE of Stebie's famous "seven hostile actions."

And you won't from me.

"NOT applicable to AMATEUR RADIO POLICY".

> Hint: This newsgroup is NOT about the Glory of the USMC
> or about helicopters. Try to stay focussed. If you write
> names of helicopters, try to get them CORRECT.

Hint: It's "focused". That error's been pointed out to you
frequently but you continue to make it.

And I got them "CORRECT"...Including who flies what and why....

> >> If you are going to LIE, BLUFF, SCAM, try to get your military
> >> nomenclature CORRECT.
> >
> > I did so. Absolutely correct.
> >
> >> You did NOT do so!
>
> Tsk, tsk. I corrected you and you admitted to the INCORRECT
> "cross-reference" (your term for covering up your mistake).

No error...no mistake. The USMC flies the "CH53" (and variants)
and the USAF flies the "Pave Low".

> NOBODY can tell mighty Stebie ANYTHING!

Plenty of folks can "tell me lots"...

YOU, on the otherhand, seem to ahve a problem getting a LOT of
things about Amateur Radio and current military aircraft right, Lennie.

> > The service history and deployment of the CH53-series aircraft is
> >yet another "field" in which YOUR "experience" is from a mouse click.
>
> Absolutely!

And LIMITED to that "experience".

I, on the otherhand, have FIRST HAND experience and didn't need to
find a URL to get it...

> I've spent 53 years working in RADIO-ELECTRONICS, not
> helicopters. This forum is NOT about helicopters. This
> newsgroup is about RADIO, specifically amateur radio policy.

No...You spent 53 years riding other people's coat tails. And now
you spend your retirement riding the mouse to try and impress people
with what you can find out "now" because you didn't do it "then".

Putz.

It won't die out unless prospective hams choose to believe false statements like "... as the hobby continues to die out". You are attempting to create a self fulfilling prophecy. There are bound to be fluctuations both up and down over the years but at over 600,000 licensed hams we are not yet in any danger of dying out unless people believe unsupported statements like yours.

other. Pre-recorded marine marches softly fill the air,
interspersed
with dits and dahs of a few PCTA morsebirds not yet extinct. The
Tomb of the Unknown Solder is a lonely place, deep in the valley of
neuroses, anger, and frustration. The single sentinel counts
cadennce to himself, muttering "flux you, flux you" between the slow
steps. His fists are clenched, eager to do bottle but only sipping a
cup of unkindness. It is sad but the sentinel at the Tomb of the
Unknown Solder keeps going. He does not know why and that is the
tragedy. The sun slowly sets on the Tomb of the Unknown Solder
leaving only the red light of fire in the eyes of the muttering
sentinel. Those glow in the dark like LED pilot lights. Hatred
lives on in his twilight of despair.

Temper fry.

Dee:

That is all fine and dandy, and a scope goat for the why "hams are NOT dying" mantra... what group(so) are a smaller minority than the hams, and why should anyone (even the FCC) bother with such a small group--when--it can be combined with other users and managed much more intelligently, fairly and cheaply... hams are just not that special--this is all ancient technology they have and deal with, the future needs to combine young engineers and scientists into communications so everyone ends up with a better use of the radio spectrum...

The younger hams should set the course, they will inherit what they build... within one decade many of those holding ham tickets will be gone, in two decades the numbers are LARGE, in three decades those numbers are FRIGHTENING!!!!

Those under 40 would best pilot this ship...

JS> But look at the pilots of the ARRL.

Do you know of a source for reliable data on ham licenses that drills down below the often quoted total licenses outstanding. Are there any studies that estimate the number of active licenses and ages of the holders and how those numbers have trended over time.

Unfortunately I don't have much...only rumor and innuendo.

The FCC statistics are interesting and show what appears to be a gradual decline in membership - The total of renewals plus new licenses is less than total expirations. The FCC staff analysis in 2000 was not exactly glowing in it's projection about the future - kind of a gradual decline. It would be interesting to see the data over a longer period of time but I believe FCC changed it's methods around 2000.

What is missing is how much current licenses are used. With that data we could guesstimate expirations. That would take a study that the FCC doesn't have the resources to fund and one the ARRL may not want to know the answer to.

There may be a point in the future where the new loss of members begins to increase but there is no way to forecast that because licenses are good for 10 years and there is no way to project future expirations because we don't have any idea what current license usage is.

And people under 40 (or under 50, for that matter) aren't going to
bother with Morse Code, for the most part.

It will be interesting to see what the license numbers look like in a
few years in countries that have eliminated the code requirement. Will
the numbers be better there? For that matter, are other countries
seeing the same apparent declines that we see in the US?

Dee,

I am basing my comments on what I see within the hobby.

When I went to Dayton, I was a member of a group of about 30 members who spent significant time and money to go and we did that for many years.

>From that group, now only less than five people go to Dayton and even those only go every couple years.

These are people who do hold licenses but use them less and less if at all. Many have since sold their stations.

Ham radio is in its twilight years and as the old guard dies off which is happening at an ever increasing rate, the slide into obscurity will accelerate.

As has been noted earlier, take a hard look at the demographics of the attendees of the Dayton Hamvention. It is obvious to the most casual observer that the age of the attendees is heavily weighted to the 50-60+ year range. Give them another ten years and the numbers decline further, it is doubtful that they will have the numbers to sustain the costs incurred to host the Hamvention.

I also think that manufacturers are preparing for this decline. The recent cancellation of the Drake R8B indicates that the hobby is not capable of supporting its equipment needs or the development of new product. The drop in the prices in collectibles such as the Collins line is another indicator that money is being spent elsewhere as interest wanes.

Your thoughts?

Same here for the N3FPJ for "general logging" and ease of use plus great rig control interface. I personally have used it but my mainstay is DXBase 2006 which I've used for years since it has the easiest logging procedure, and is geared to DX'ing , awards tracking and alerting one to "needed countries"

Measuring how crowded the bands are? But that would require
measurements from years ago to mean much. Assuming that most
hams using their license spend about 2 to 3% time transmitting and
the rest listening (tuning around the bands looking for interesting
DX or rag chews) one could get a rough idea how many active
hams exist. Do one measurement on a contest weekend, and another
on a non contest weekend. From a QTH in the midwest. One would
have to figure how many hams are in propagation range at the
time of measurement.

a number of collins gear models continue to bring in " staggering "
used prices .... this and the interest / prices keep rising on
ebay.

to see what I mean go to the " radio: CB, Ham, & Shortwave "
category and type in Collins and then look at the prices that the
640 " closed out " items have brought and be stunned !!!!!!!

used drake gear is right there behind collins too ....

some examples of recent collins sales :
http://cgi.ebay.com/ws/eBayISAPI.dll?ViewItem&category=48700&item=5776496330&rd=1
gasp........
http://cgi.ebay.com/ws/eBayISAPI.dll?ViewItem&category=4671&item=5776923356&rd=1
double gasp ....
http://cgi.ebay.com/ws/eBayISAPI.dll?ViewItem&category=4671&item=5776501846&rd=1
omg .....
http://cgi.ebay.com/ws/eBayISAPI.dll?ViewItem&category=4671&item=5775948196&rd=1
huh ???? ....
http://cgi.ebay.com/ws/eBayISAPI.dll?ViewItem&category=1502&item=5774578908&rd=1
numbing ....
http://cgi.ebay.com/ws/eBayISAPI.dll?ViewItem&category=4674&item=5775229238&rd=1

and 100s more, recently .... simply shocking used prices
.... if this is a " drop " in prices I wouldn't want to see
the higher ones !!!!!!!!

k..............

Well there ya go! These folk have run their course in Ham radio and are bored and dropping out. Happens in a lot of hobbies

> Ham radio is in its twilight years and as the old guard dies off which
> is happening at an ever increasing rate, the slide into obscurity will
> accelerate.

Any hobby dies out for the person that loses interest.

Making a demographic out of the people at Dayton? Just how many young kids are you expecting to see there?

I don't doubt that the Ham radio population is likely an older one. I also don't doubt that demographics for a lot of hobbies are shifting. It wasn't until my 40s that I started to get enough spare time to even think about a hobby. I tried Amateur astronomy, but the wx in central PA is kinda like Seattle, and I looked into amateur radio. BTW, if you think Ham radio is graying, Amateur astronomy would shock you.

The young ones will come into the hobby. We just have to wait for them to grow up.

> I also think that manufacturers are preparing for this decline. The
> recent cancellation of the Drake R8B indicates that the hobby is not

> capable of supporting its equipment needs or the development of new

Yeah, how many hams do you think ever had a Drake R8B? And of those who do, how many use it as part of their station?

The drop in the prices in collectibles such as the Collins
> line is another indicator that money is being spent elsewhere as
> interest wanes.

Personally I think any price drop in Collins equipment is on account of potential buyers regaining sanity. At Dayton this year, there were a lot of them. Some sold, a fair number didn't. Especially at the one tent where the people were trying to sell them for way over their worth.

Collins is old tube stuff. Fine radios no doubt, but hardly worth the price of a decent new rig.

So many came out this year at Dayton that potential buyers could pretty much call the shots. After all, you can ask for @ kilobucks for an old Collins, but is it worth that much if no one buys it for that much?

It looks like the bottom line is that back in
June 1997 there were 678,473 licensed hams
and in May of 1995 there were 664,972 licensed hams.
Thats a decrease of 2 percent over 8 years. Its a decline but not by much.

Does anyone have statistics that go back three or four decades??

Reminds me of an old giggler.

Guy tunes around looking for a hole on 20M, finds one and asks "Is this
frequency in use?"

A snarly 30 over nine signal pops up "Yes it's in use, I'm listening on
it."

>
>
>
> - Mike KB3EIA -

maybe the value of the radio is in the beholder
or it's applications ....

for example , I have a satori / sherwood modded
, full boat, drake r-4c and a fully loaded FT1000 field ....sitting
side by side .. here in the shack and the so called " old tube
r4-c " blows the doors off my much newer
and more expensive FT1000mp v . the FT1000 receiver
is an embarrassment as compared to the drake on
weak DX in a VERY crowded CW band. no comparison
at all. people tell me that many of the collins receivers can be
tuned up to outperform even the drake r4-c receivers. maybe THAT is
why people pay more for a drake r4-c (I have $1200 to $1400
invested in mine , so far) or collins !! certainly the value is
in the weak signal / crowded band performance to me and
looks like it is to a LOT of other people too.

obviously , for your operating needs, solid state rigs do the job
.... but for those of us that need competition grade cw receivers
...... some tube receivers are still doing a better job. different
strokes for different folks. I've got the best of both worlds and ,
for me, tubes still do a better job in certain applications. (both
my amps < a alpha and a henry > have tubes too) .... I do
use my FT1000 for my transmitter / exciter tho .. ha ha ha ha ah.

k.................

> price of a decent new rig.

Antiquities are only worth what people are willing to pay for them
including old tube junk. 10 to 15 years ago an old Chrysler Hot Rod from
the 60's or 70's wasn't worth much, now you can't touch one in very good
shape for less than 3 to 4 times the original selling price new. Go figure.

What would be of much more interest is the use to which the licenses are put. A history of how the various classes operated over time would provide a big clue as to what is happening to the service now. Hard numbers are better than the constant speculation I see here all the time. For example a decline in some types of operations could reflect a trend where the technology in use is either unpopular or being replaced by another one. For example AM by SSB. This would even answer the ever present question, and assertion, that Ham Radio is being supplemented by increased computer use and the Internet. Knowing that then the ARRL could spend it's time promoting those things that apparently Ham Radio still had the edge in capabilities. If you want increased license numbers then you have to know how to "market" Ham Radio, and if you don't know what the market wants, or you promote the wrong thing, then you end up with a declining market share, i.e. license numbers.

Well that's straight forward enough at first glance. The sticking point is many don't want a Ham ticket for any reason, they don't even know what it is. The ones you need to ask are those who find they get what they want using other means, computer - Internet, AFTER considering Ham Radio. The ideal place to find that information are the classes the ARRL is pushing under their educational program.

This is an important point because the kids can then make an "informed" choice based facts and first hand experience instead of something they read in a magazine or seen on TV / movies. Also just how many of those kids that do get licensed stick with the hobby? For those that don't these are the ones that have the answers as to why, for example the cell phone - instant messaging fits their needs and interest better. I don't know if the ARRL even bothers to try and collect this kind of data.

>I'd almost bet they are telling the truth...

Why wouldn't they?

> Yanno, you can do a lot of things to try to fix something--but when you

If you're going to try random chance at least try to narrow down the number of options, improve the odds of success, a bit. That's only going to happen if the ARRL gets systematic about collecting some useful and meaningful data, otherwise known as market research.

Normally I just sandbag on the side in this news group reading the posts. Most of the arguments over licensing numbers are petty much useless since most don't have any hard statistical data to support their points. I have to admit some of the arguments I've read are very well constructed and logical, but without the hard data it's just all speculation.

The dilemma, if you want to describe it as that, of declining Ham licensees is little to worry about. It appears that some few hand-wringers are making much ado about nothing.

I have noted that, over the years, the majority of new Hams are not joining the ARRL. And for good reason, too.

The ARRL is a dinosaur, replete with septegenarians who are interested in doing things the 'old way'. Many new Hams look at the yearly fee to be a member and simply toss the application in the waste basket. I did this very thing some 25 years ago and never looked back.
After all, who really needs the ARRL? What do you get for your membership? A monthly magazine? Big deal.

I will leave the speculation and 'hard data' gathering processes to others who show an interest in data processing. Their efforts will be of little value in the long term scheme, other than they gathered some numbers and percentages that have little, if any, value in the long run.

Meanwhile, catch me on the HF bands. I'll leave the overcrowded two meter repeaters to the handi-talkie newbies.

All the more reason to upgrade.

In VK, we continue to see a steady decline, both in absolute numbers and in
membership of our national radio body (Wireless institute of Australia)
despite the removal of CW as an comulsory entry requirement onto HF.
However, we are about to see a new licence system introduced similar to the
UK system (which I believe resulted in an increase in numbers there). Age
demographics are pretty much on the "old side" - but there continues tobe a
trickle of young amateurs coming on line - how it will go in the end, not
sure.
On a side note, the use of HF appears to have increased, but not
dramatically and it would be difficult to prove conclusively that this is
the case (based mainly on callback numbers to the weekly WIA broadcasts).

And they think they're hot shit with underpowered radios that barely
cover the noise on the repeater. Two meter simplex is cool, though.

Need a lot bigger sample size though. The younger people that I know find
the code the most fascinating part. The resistance comes from people taking
up ham radio who are middle aged. However neither your sample nor mine is
large enough to draw conclusions.

Keep in mind that any change in rules may take years to have a noticeable impact on the number of licensees. How long has VK been codeless? Has it been long enough to have the hoped for impact? If you change licensing systems, the same questions need considered before judging it.

Here in the states, it seems that the last couple of changes in licensing requirements has had no noticeable long term effect.

"Why not just do what I did, ask the younger people why they are not interested in getting a ham ticket..."

I think the ARRL and the licensed hams need to consider that question too. Most young people don't see ham radio as an up-to-date way of communication. Rather they see the licensing and equipment required as an anachronism. They have numerous highly portable license-free ways of communicating with one another and getting information about the world. Why go through the hassle of getting a license and radio equipment only to find out that the people you work and play with are not on the bands. They don't know what see you on 2 meters means - and when it is explained most of them say but I can do that on a cell phone with lots of people right now.

Hiya OT,

What a compliment! I haven't been called a "kid" since, well, I was a kid. As an "Old Timer" myself (QCWA for a LONG, LONG time), and, in case you're interested, a high-speed CW operator (no computer needed, thankyouverymuch), a member of the beloved (please bow down now) ARRL for so many years I can't seem to remember (see, I AM OLD), you can plainly see I hardly qualify as a "kid". I may act like one, but for those of you whose age causes you to lose your "childlike love of life", I feel truly sorry for you.

A "troll" I am not. Troll this, my friend. Listen for me on 6.800 MHz LSB, 13.555 MHz USB, or any of the other "naughty" 11 meter frequencies we so often refer to as "freeband". Oh yeah... you'll find me on 30 and 40 meter CW, too. But you'll have to guess the callsign. I may not be a "troll", but I ain't stupid.

Wanna play "Let's Compare Our Experiences and Licence Class" game?

I didn't think so. TTFN

73 -- ~Sparky~

P.S. Next time, (apparently you're new to Usenet) please stay with the original message's title so it's easier to follow the threads. That, OT, is offered at no charge.

On Wed, 25 May 2005 12:07:03 GMT, "OT" <Nomail@msn.com> amazed us with:

2761. A friendly little invitation to the "NOT TROLL" Sparky Voltz

Newsgroup: rec.radio.amateur.misc
Date: 2005-05-28 16:03:44 UTC
From: Sparky Voltz <sparky_unit-412@yahooEY.com>
Message-ID: <cl4h91lshoqf8s2umomhhhnkn83sv1u8un@4ax.com>
Source record: 51633

Howdy, friends, neighbors and fellow phun-lovers,

It's your ol' pal -- the (NON) TROLL (as accused by Mr. Nameless and Email-less [gutless] OT) -- Sparky inviting you to take a gander at the actual "Sparkymobile" outfitted for all sorts of interesting operation on many unusual, phun phreekin'cies. Ya just never know where in the RF spectrum you might catch ol' Unit 412! But keep listening, folks! I'm real. Not a troll. Not a fake. Not some figment of your imagination. I'm HERE, Baby!

Check it out. And please, control your drooling. Your keyboard usually is not saliva-friendly. :)

http://community.webshots.com/user/sparky_unit_412

73 -- ~Sparky~

P.S. Again for you, OT, and other clueless newcomers unfamiliar to the proper protocols of Usenet, replies to this message should really contain the original message's subject title by incorporating "Re". It makes it so much easier to read your all too often silly, not-well-thought-out nonsense. I mean, your frequent highly intelligent thoughtful response to the original subject matter.

Shalom

Often imitated -- NEVER duplicated!

Sparky -- AM/FM/SSB/CW from the ol' Cornpatch Mobile:

KALL-2671 -- CB Radio;
Unit 412/RF412/CO3026 -- Freeband 26-28MHz;
Radio Outlaw 412 -- 6.800 LSB & 13.555 USB;
W9*** -- Amateur (Ham) Radio;
WQRM313 -- GMRS;
M/V Mysterious Traveller -- Marine;
plus FRS, MURS, Shortwave... in other words DC to Daylight.

...got frequencies? ...got phun phreekin'cies?

Please join us at:

http://groups.yahoo.com/group/all-band_radio_renegades_and_outlaws/

This competition, coupled with the testing requirements,
sure puts ham radio at a disadvantage. How many kids,
saddled with tons of tests and other such from school,
really want to be bothered with more of this?

Perhaps not so obviously. I've been getting into Hollow state
technology recently. Bought a couple olde tube Heathkits and their power
supplies at Dayton, and will restore them. I came into Ham radio (radio
at all) too late for tube stuff, and frankly, the tube rigs seem very
cool to me.

It would seem that you should sell that FT1000 and go strictly tubes if all you do is use it for transmitting. 8^)

I don't find the internet or cell phones to be any competition to
Amateur radio at all. The internet requires the ability to click a
mouse. Cell phones are for yacking on. Neither are technical hobbies.

Cell phones as a hobby? Sounds odd! 8^)

Every student going though the electronics and engineering courses at the college here knows very well what a ham ticket is (the instructor is a ham), and darn well pass any of the exams blindfolded... seldom do they see the need or have the desire when they have tuned the bands and listened...

You think most other colleges are different?

Warmest regards,
John

Hi everyone,
I've been studying for my general class ticket and i have most
of my code down, at 13wpm. (even though i only need to know 5wpm) I
lost my study gide for General, does anyone know where i can find it
online? Preferably a PDF.

Thanks,
Kim

I have a single russian tube (two tube in push-pull driving it--in the amp) which is outputting approx. 4.5KW... can you imagine what the transistor (mosfet) amp which could match it would look like--or cost!!!!

Warmest regards,
John

??? I guess your outlook and idea of what Ham radio is is to chat with your buds? In that respect, you are probably correct. If all you want to do is *that*, you are better served by chat rooms or the telephone. Why on earth anyone with that as their main interest would become a ham is beyond me. Ham radio is not the best hobby for that, although we can do that.

They don't know what see you on 2 meters means - and
> when it is explained most of them say but I can do that on a cell phone

Really, have you seen the new devices by nokia? Surf the web, instant message, download, upload.... cell phones are just about to take one GIANT step for mankind....
http://reviews-zdnet.com.com/Nokia_N770_Internet_Tablet/4505-3127_16-31396042-2.html

The new N770 Internet Tablet by Nokia uses Linux (no fees paid to Microsoft or anyone!--so os is free) will blow the socks off anyone not up-to-date....

Warmest regards,
John

He's right: www.arrl.org is a good source.

So is www.eham.net, and in particular <http://www.eham.net/exams/>, where you also can have sample exams generated for you, using the current FCC question pools, for any element you'd like to try.

Enjoy, study, try for your Extra. Element 4 wasn't all that hard; I was surprised that I passed, but I passed: only missed 4 questions.

What do people call the guy who passed his medical school exams by only one point?

Doctor.

CW as a requirement for access to HF was dropped as at 01 Jan 2004. There has not been the expected massive increase in amateur licences - I think that VK currently has around 10,000 licenced amateurs (plus or minus a few) - with numbers pretty stagnant/decreasing slightly. I feel that there has been enough time for the expected increase to be visible, but this has yet to occur - maybe the majority of those with an interest in radios already have their licences, or lost interest in the subject - who knows. Onto another part of the thread - age. Most amateurs are older - when I took out my licence aged 23, I was one of the youngest around - going to the first club meeting, I was somewhat dismayed to see that I was the youngest by at least ten years, but at least I had lots of experience to learn from. Nowdays (ten years later), I am seeing young people getting into the hobby, but not in the numbers that I would like to see, nor in the numbers that we need to have a healthy population. Buggered if I know what to do, but the new foundation licence that is due to come in (not sure when as the date seems to continue slipping right) has great promise to at least increase numbers.

I have just bought a Kenwood TS711A and its got a slight problem.
The 100hz digit on the main frequency readout,
and the RIT readout works fine when it reads 0, but as soon as I
tune off the 0, all the seven segments light up and it reads 8. This
makes it useless.

If I select a memory that has never had a frequency stored in it,
the 100hz digit reads 8 instead of the - that it should. example-
- - -. - - -.8. 8.0 when it should read
- - -. - - -.-. 0.0

I've tried a processor reset, but made no difference. Anyone got any
ideas?

I don't think a year is really long enough to tell. In addition, is the word getting out to prospective hams? Did the decrease in numbers come from lack of interest on the part of prospective hams or the failure to find prospective hams? Changes in licensing will have no noticeable impact when people don't even know that ham radio exists or barely know it exists but have no idea what it is all about.

If you are into RACES/ARES or the like, then Ham radio is very useful. What happens when the cell towers, twisted pair & trunked radio systems are overloaded or damaged in a disaster? That is where ham radio can shine. Also it may not be "high tech", but when you build you own Yagi or cubical quad antenna & know that you have to think a little bit to make communication in a certain country (what band to use to make the hop) takes some thought vs. cell phone & internet which takes very little thought. My .02

"Before the internet and cell phones, we had television and regular
phones. "
JS> That is true, we did have television and land line telephones,
with all of their inherent limitations. But the internet provides a
range of communication that is unmatched by any other method of
communication, including 13 channels of VHF, a smattering of channels
on UHF on TV and rotary dial phones.

> Why go through the hassle of getting a license and radio
> equipment only to find out that the people you work and play with are
> not on the bands.

"??? I guess your outlook and idea of what Ham radio is is to
chat with
your buds? In that respect, you are probably correct. If all you want
to
do is *that*, you are better served by chat rooms or the telephone. Why

on earth anyone with that as their main interest would become a ham is
beyond me. Ham radio is not the best hobby for that, although we can do

that. "

JS> Communication is what amateur radio is about...people talking with
one another usually about everyday things or as you say "chatting with
their buds". And it is about the camraderie of people enjoying and
talking about their equipment. And how could we forget band congesting
contesting - how many people one can have a 5 word conversation with
over a set period of time. The hobby isn't about providing useful
emergency communications however. The last time I heard a hurricane
net it descended into chaos with hams trampling over one another trying
to be the first to contact someone in the emergency area. Hams have
not "saved the day" other than in their dreams for a long long time.

If ham radio is about something else, please inform me as well as the
potential hams who see amateur radio as little more than an expensive
and self-limiting way of talking to one another. Or said another way
if you stripped the communications aspect from the hobby what would be
left. And how many people would queue up for licenses?

Hams take a cavalier attitude when it comes to explaining the value of
ham radio, they end up driving the young new entrants away. They find
it difficult to consider new ways that might attract new blood into the
hobby. Hams have to be able to explain what the benefits of being a
ham are. Unfortunately most adopt a bunker mentality that goes like

this: "The requirements are what they are because I had to take them long long ago. Yes morse code is important, but I really can't tell you why. If you have to ask what the benefits of being a ham are, then there is a good chance you won't enjoy being a ham. Please consider another hobby."

Ouch: How do you spell clueless? I loves you dearly Michael, you're a very nice guy and yer heart is in the right place but you have this frustrating penchant for getting over yer head at warp speed when discussions turn to even moderately deep-end techie sorts of topics. You done it again.

This guy is obviously into low-band weak signal dxing on 160/80/40 etc. Those of us take this game seriously understand what it takes in the way of rcvr performance. He's talking about using his modded R4-C as an outboard RX because of it's legendary front end performance, it's blocking dynamic range and it's third order intercept points as they relate to successfully dealing with very difficult band conditions. Which leaves out your Heath treasures and all members of the FT-1000 clan in this particular pursuit.

"If the tube stuff is better, then I'd go for it in a minute" eh? Welp there ya go.

Part of the problem here is that the "base" demographic numbers of total US population is changing. The increase or decrease in the absolute numbers of hams is not germane.

A more accurate statistic for the last 40-50 years is the change in the percentage of hams in the total US population.

Example:

say you have 200,000 hams in 1930 in a population of 200 million (1%) vs 250,000 in 2000 in a population of 350 million.
Even though you have an increase in the ABSOLUTE number of hams the PERCENTAGE of hams is going down.
In this example: As a group, the relative impact and visibility of hams vs the total US population is going down.

Does any one know the URL of an accurate set of historical ham population data? Hopefuly from the very begiining of FCC licensing?

DX Bulletin No. 711
BID: $OPDX.711
May 30, 2005
Editor Tedd Mirgliotta, KB8NW
Provided by BARF80.ORG (Cleveland, Ohio)

Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, AB5K & the AR TelNet Clusters Network, K1XN & GoList, NC1L, W2VU, N3SL, NG3K, W3UR & The Daily DX, W3YY, N4AA & QRZ DX, N5FG, K7ABV, K8YSE, 4X6UO, CT1END, CO8TW, DF4SA, DL1EK & The DX News Letter, F5CWU & La Gazette du DX, F5NQL & UFT, F6AJA & Les Nouvelles DX, G3SWH, I1JQJ/IK1ADH & 425 DX News, JA1ELY, JI6KVR & JA-IOTA Islands News, PT7WA, SP5XSD, SV1RK, VA3RJ & ICPO, VK4AAR and VK8NSB for the following DX information.

DXCC COUNTRY/ENTITY REPORT: According to the AR-Cluster Network for the week of Sunday, 22nd/May, through Sunday, 29th/May there were 209 countries active. Countries available: 3B8, 3B9, 3D2, 3DA, 3V, 3W, 4J, 4L, 4S, 4X, 5B, 5H, 5N, 5R, 5T, 5U, 5V, 5X, 5Z, 6W, 6Y, 7Q, 7X, 8P, 9A, 9G, 9H, 9J, 9K, 9M2, 9N, 9Q, 9V, 9Y, A2, A3, A4, A5, A6, A7, A9, AP, BV, BY, C3, C5, C6, CE, CE9, CM, CN, CP, CT, CT3, CU, CX, D2, D4, D6, DL, DU, EA, EA6, EA8, EA9, EI, EK, EP, ER, ES, ET, EU, EX, EY, F, FG, FJ, FK, FM, FO, FR, FY, G, GD, GI, GJ, GM, GU, GW, HA, HB, HB0, HC, HI, HK, HL, HP, HR, HS, HZ, I, IS, J3, J6, JA, JT, JW, JY, K, KG4, KH0, KH2, KH6, KH8, KL, KP2, KP4, LA, LU, LX, LY, LZ, OA, OD, OE, OH, OH0, OK, OM, ON, OX, OY, OZ, P2, P4, PA, PJ2, PJ7, PY, PY0F, PZ, S0, S2, S5, S7, S9, SM, SP, ST, SU, SV, SV5, SV9, T7, T9, TA, TF, TG, TI, TK, TR, TT, TU, TY, UA, UA2, UA9, UK, UN, UR, V2, V3, V4, V5, V7, V8, VE, VK, VK9N, VP5, VP8/h, VP9, VQ9, VR, VU, XE, XT, XU, XZ, YA, YB, YI, YK, YL, YN, YO, YU, YV, Z2, Z3, ZA, ZB, ZC4, ZD7, ZF, ZK1/s, ZL, ZP, ZS

* PLEASE NOTE: The report "could" contain "Pirate/SLIM" operations or more likely a "BUSTED CALLSIGN". As always, you never know - "Work First Worry Later" (WFWL).

3D2, FIJI. Andre, GM3VLB, is once again active as 3D2LB from Beachcomber Island (OC-121) until June 2nd. Activity is expected to be on 80-10 meters CW/SSB. Over the past week he has been heard mostly on 20 meters SSB. This is expected to be a holiday style operation. QSL direct only to his home callsign: Andre Saunders, 6 Douglas Crescent, Kelso, Roxburghshire TD5 8BB, Scotland, UK.

4X17/4Z17, ISRAEL (Special Activity/Event). The Israel Amateur Radio Club (IARC) is proud to announce a special Amateur Radio operation honoring the largest Jewish sport event in the world - the 17th MACCABIAH GAMES - scheduled to be held in Tel-Aviv between July 10th-21st. Look for 14 Israeli special event stations to be on the air for 30 days beginning June 21st (20 days prior to the official opening of the games) until July 21st. Twelve stations will be active with the letters in their suffix from which the word "MACCABIAH" can be spelled. The other two stations will use a wild card ("joker") to assist the task. Here are the callsigns:

Group A: 4X17M, 4X17A, 4X17C, 4X17B, 4X17I and 4X17H
Group B: 4Z17M, 4Z17A, 4Z17C, 4Z17B, 4Z17I and 4Z17H
Joker: 4X17MG and 4Z17MG

A special Award will be available for stations having at least 6 valid QSOs with the participating special event stations. The operation is valid for all radio amateurs and SWLs around the world. More details are available via the following Web pages:
http://www.iarc.org/~4z4tl/Maccabiah17_main.htm
http://www.iarc.org

9M8, EAST MALAYSIA (Mountain DXpedition Postponed!). OPDX has been informed by Alan, VK4AAR, that the proposed June expedition to a Dayak village in the mountains near Kuching City has been postponed until August 31st. (See OPDX.709 for details) Nothing else has been changed. Operators are still being sought to join them, and any one interested should contact 9M8SC at:
chansc44@yahoo.com
Alan, VK4AAR, wants it understood that he is NOT the organizer of this venture. Mr. S C Chan, 9M8SC, is in the driving seat and all E-mails should be directed to him. However, Alan is their QSL Manager by appointment. The callsign will be announced later.

A3, TONGA. YL operators Elizabeth/VE7YL and Gwen/VK3DYL are now active as A35YL from Nuku'alofa (OC-049). Look for them to be active from Vava'u (OC-064) before they leave on June 8th. Their expected activity will be on 40-10 meter CW and SSB. They were spotted this past week on 20 meters CW/SSB and on 40/17 meters CW. QSL via VK3DYL, by the bureau or direct with 2 USDs or 1 new IRC.

A3, TONGA. Rick, AI5P, is expected to be in Tonga from May 28th until June 7th and be active as A35PX. Activity will be mostly on CW on 40-10 meters. As this was being typed no QSNs were reported. QSL via AI5P.

C6, BAHAMAS. Pete/W2GJ and Steve/AA4V are currently planning two trips to Crooked Island (NA-113). They are expected to be active in the IOTA Contest in July, and the CQ WW SSB Contest in late October. Both contests will be a Multi-Single entries. Their callsigns will be C6ARV (AA4V) and C6APR (W2GJ). Both operators will be active on the WARC bands before and after the contests. QSL via their home callsigns (QRZ.com).

C6, BAHAMAS. Eric, K9GY, will be active as C6AYM from December 23rd to January 1st. He will be on the Islands of Nassau and Paradise. Activity will be mainly QRP CW on 40-10 meters and also 6 and 2 meters. QSL via

K9GY.

CQ MAGAZINE NEWS RELEASES. CQ Editor Rich Moseson, W2VU, sent out two press releases this past week. OPDX InterNet Subscribers will receive the complete press releases as extra bulletins. The following are excerpts or summary of the two press releases:
* CQ Introduces "iDX Award" to Help "Wake Up DXing" -- CQ Amateur Radio magazine announced the introduction of the "iDX Award," the third and final piece of its three-part "Waking Up DXing" program designed to encourage more DXing activity among ham radio operators. DXing, for the uninitiated, is the "sport" of contacting other hams in faraway places. The CQ iDX Award recognizes confirmed contacts with 25 to 100 different countries ("entities") made using remote bases or repeaters linked with Voice over Internet Protocol (VoIP) networks, such as IRLP or Echolink, and is aimed at developing a DXing "mindset" among newer hams. Contacts for the new award may be made beginning January 1, 2006. Complete details are in the June 2005 issue of CQ and on the CQ Web site at: http://www.cq-amateur-radio.com

* CQ Announces 2005 Hall of Fame Inductees -- From Dayton, OH, on May 22nd, CQ Amateur Radio magazine announced the induction of 17 new members of its Amateur Radio, Contesting and DXing Halls of Fame.

CQ Amateur Radio Hall of Fame inductees are:
Mario Ambrosi, I2MQP
John Chambers, W6NLZ
Ted Cohen, N4XX
Bob Ferrero, W6RJ
William "Bud" Hargreaves, K4HMV
Chod Harris, VP2ML
Ivan "Sonny" Harrison, W5HBE
Edmund Marriner, W6BLZ/W6XM
Boris Meshevtsev, RV3IZ/EX3TM
Les Moxon, G6XN
Loyd Sigmon, W6LQ
Phillip Smith, 1ANB
Jonathan Taylor, K1RFD
Thomas, Ralph, W2UK/KH6UK

CQ Contest Hall of Fame inductees are:
Jeff Briggs, K1ZM
Charles "Rusty" Epps, W6OAT

CQ DX Hall of Fame inductees are:
Masayoshi Ebisawa, JA1DM

CS9, MADEIRA ISLAND (Special Event). During the month of July, look for special event station CS9SRA to be active comemorating the 50th aniversary of the Cattle Exibition in Porto Moniz, Madeira Island (CT3). Details are available (in Spanish) on the following Web pages:
http://www.arrm.pt.vu
http://members.netmadeira.com/arrm/noticias.htm

CU4, AZORES (Contest/IOTA/Lighthouse Activity). A group of 12 European operators will activate Graciosa Island (EU-175) between July 23rd and August 4th. Hermann, HB9CRV, will kick it off as CU4/CT3FN on 6 meters, including a beacon on 50.112 MHz. The entire group will begin operations as CU4T from Lighthouse do Carapacho (LH-113) on July 27. The operators mentioned are: CT1AGF, CT1EPV, CT1EGW, CT1GFK, CT1GPQ, DJ2VO, DF6QV, G3KHZ, HB9CNU, HB9CQL, HB9CRV/CT3FN and HB9EBV. For the IOTA Contest, July 30-31, look for the group to be a Multi/Single entry, and the callsign will be changed to CU4M, then revert to CU4T after the contest. Outside of the contest, operations will include RTTY and PSK. QSL CU4M and CU4T to CT1GFK, direct or by the bureau. QSL CU4/CT3FN via HB9CRV, direct or by the bureau.

DXCC NEWS. Bill Moore, NC1L, ARRL DXCC Manager, reports that the following operation is approved for DXCC credit:
T68G - Afghanistan. Current operation effective April 2005.

IOTA NEWS.....
AS-084. A group of eleven Koean operators will activate Chu'ja Island from June 3-5th. Operators will sign homecall/4. The group of operators mentioned are: HL2EJT, HL1OJQ, HL1OYF, HL1SRJ, HL1VAU, DS1KOQ, DS1NMA, DS3MLG, DS4NMJ, DS4NYE and the President of the Korea Amateur Radio League, HL2AGG. QSL via HL1OYF.

EU-055. Ric, DL2VFR, will be active as LA/homecall from Hellesoy Island between now and June 3rd. Activity will be mainly CW. QSL via his home callsign (by the Bureau is "OK").

EU-056. Ric, DL2VFR, will be active as LA/homecall from Otroy Island, between June 4-11th. Activity will be mainly CW. QSL via his home callsign (by the Bureau is "OK").

EU-064. Members of the Provins ARC will be active using a special callsign (TM0**) on the Ile de Noirmoutier (DIFM AT-020) during the RSGB IOTA Contest (July 30-31st). The group will be active from Bernard's, F9IE, QTH. Team members mentioned are: Franck/F4AJQ, Bernard/F9IE, John/F5VHQ and Pascal/F5JSD. QSL via F4AJQ, direct or by the bureau.

EU-065. Look for a multi-national team from France, Scotland and Belgium to be active as TM4Z from Ouessant Island (DIFM AT-001) in the IOTA Contest (July 30-31st). QSL via F4DXW, direct or by the bureau.

EU-108. Jim, MM0BQI, will be active as MM0BQI/p from Lunga Island, Treshnish Isles (IOSA NH-17 and SCOTIA DI-09), June 2-5th. Activity will be on 80-10 meters, including the WARC bands, using CW, SSB and RTTY. QSL via MM0BQI, by the Bureau or direct to: Jim Martin, MM0BQI, 3 Lismore Avenue, Edinburgh, EH8 7DW, SCOTLAND.

EU-158. Operators Mike/SV1RK, Stavros/SV3CUJ and Kostas/SV1AER will be active as J48SI from Sapientza Island and Sapientza

Lighthouse (GRE 116) on June 3-5th. Their main activity will be on 40/20/17/15 meters. This will be the first ever amateur radio activation from Sapientza Island.

EU-184. Members of the Oulu University Radio Club will be active as OH8T/P from Hailuoto Island during the IARU Region 1 Field Day (CW), June 4-5th. QSL via the bureau.

J6, ST. LUCIA. Operators Scott/N9AG (J68AS), Kirk/W8QID (J68ID) and Mark/WB9CIF (J6/WB9CIF) will be here from June 21st to July 5th. Their activity will be mostly 6 meters, RTTY and 160 meters (for the VKs), but all bands are available. QSL to their home callsigns.

KH2, GUAM. Philip, KH2X, will be active from Guam (OC-064) during the RGSB IOTA Contest (July 30-31st) as a Single-Op/High-Power entry. QSL KH2X.

P4, ARUBA. John, W2GD, will be active again as P40W during the CQ WW DX CW Contest (November 26-27th) as a Single-Op/All-Band/High-Power entry. QSL via N2MM. Look for activity on the WARC bands and 160m during the week before the contest.

QSL INFO AND NEWS.....
NEW QSL MANAGER. Phil, G3SWH, is pleased to announce that, effective immediatedly, he has been appointed the QSL Manager for James, 9J2CA. Phil states, "Direct preferred, Bureau OK or E-mail for Bureau card, but please remember that bureau cards take a very long time. Five years is typical. Please include adequate postage and a C6 sized SAE for the return of any direct QSLs. U.S. Dollars are *MUCH* preferred to IRCs but please remember that 1 USD is *NOT* sufficient postage for an airmail reply outside Europe. Please note that the current, new style of IRC has an expiration date of 31st December 2006. Mint stamps and other currencies are *NOT* welcome."

NOT THE MANAGER. Phil, G3SWH, reports that he has started to receive QSL requests for 9K2CQ, and he is NOT the QSL Manager. He has also been seeing spots on the Cluster naming him as the QSL manager.

NOT THE MANAGER. Maurice, F5NQL, DX Page Editor for Megahertz Magazine, informs OPDX that he is "NOT or HAS EVER BEEN" the QSL Manager for 7V2SI (Sandja Island) and 5U5Z. The correct QSL routes are as follows:
7V2SI - QSL via OM3CGN (per Buck.com):
Ivan Gombos, Box 55, Rimavska Sobota, 97901, Slovak Republic.
E-mail: om3gch@nextra.sk
5U5Z - QSL via Roger, G3SXW. Address for direct cards is (Buck.com):
Roger K. Western, 7 Field Close, Chessington, Surry KT9 2QD, England, UK
E-mail: G3sxw@compuserve.com

QSL CO8TW via IZ8CCW. Activity was during the CQ WPX CW Contest. Look for the log to be posted at: http://www.qsl.net/co8tw/

All CS5A QSOs will be confirmed via the bureau automatically. For direct cards, the QSL Manager is CS1GDX: Grupo Portugues DX, P.O.Box 1156, 2736-996 Agualva, Portugal.

QSL VQ5L to LA9HW, by the Bureau or direct (Please note that it is neccessary to send 2 USDs for return postage from Norway when QSLing direct). This special prefix was used from Turks and Caicos Islands (VP5) during the CQ WPX SSB Contest in March.

QSL LX7I via LX2AJ. Operator was Jorgen, DL4SDW, in the CQ WW WPX CW Contest.

Andy, SP5XSD, reports that the SP60VD special event station's logs are now online at: http://sp5kvw.webpark.pl/sp60vd.htm

QSL TM4Q via F6FYA. Activity from Berthenay (Department 37). Their Web page is: http://www.qrz.com/tm4q

NEW QSL MANAGER. Stuie, VK8NSB, informs OPDX that he has a new QSL Manager. The new manager is Neil, VK6NE. QSL is "OK" via the Bureau or direct.

QSL ZW8A via PS8HF and ZW8DX via PS8DX, both direct only. Activity is by the Teresina DX Group (PS8) from the Canaria Island (SA-072).

SILENT KEYS.......
Bill, VK4FW, informed OPDX that "I have just received news that Norman Jockane/C21NJ became silent key last year. This explains why we have not heard him on the bands."

Floyd, N5FG, informs OPDX that Bushy Roode, ZS6M, became a "Silent Key" on Monday, May 23rd.

OPDX and its readers would like to send out our deepest sympathy to Norman's and Bushy's families and friends.

SPECIAL EVENT. To celebrate the 73rd annual "24 Heures du Mans" being held June 18-19th in Le Mans, France, the radio amateurs of Sarthe will activate TM6ACO between June 5-19th, which includes the 24 hour race. Activity will be on all bands CW and SSB. A special QSL card will be issued. QSL via F6KFI. The radio amateurs of Sarthe have been airing a special callsign for 54 years, since 1952. These callsigns have been used in the past: F3YE, F3XC, F8GE, F6KFI, TV6ACO and TM6ACO. A special "24 Heures du Mans Award" is available for anyone who has contacted three of the special callsigns (GCR + 10 Euros) by sending to F6KFI: BP22088, F-72002 LE MANS CEDEX 1 (FRANCE). More information is available at: http://asso.proxiland.fr/aras72/

SPECIAL EVENT (Lewis and Clark Bicentennial Commemoration). Members of the "Great Falls Area Amateur Radio Club" in Great Falls, Montana, will activate the special event callsign, W7M, from 0000z, June 13th through 2359z, June 26th. Suggested frequncies are:
SSB - 3855, 7250, 14250, 21350 and 28350 kHz
CW - 35 kHz up from band edge
QSL with SASE/IRC to: W7ECA, P.O.BOX 1763, Great Falls, MT. 59403-1763

T88, PALAU. Yasu/JA6BJV and Toshio/JA3IFT will be going here for their vacation between June 3-6th. Yasu will operate CW as T88AG and Toshio will operate SSB as T88AH. They will be on all bands, but mainly on 40 meters and above. QSL via the bureau, to their home callsigns or direct to their address below.
JA6BJV: Noriyasu Noguchi, 3-7-4 Midorigaoka, Arao, Kumamoto, 864-0033 JAPAN
JA3IFT: Toshio Nishina, 224-1, Jyuri, Ritto, Shiga 520-3039 JAPAN
The T88AG log is expected to be uploaded to the LoTW.

VU, INDIA. Bob, W3YY, informs OPDX that he is sorry to report that Miku, VU2WAP, has lost his main tower and antenna which were destroyed in a recent storm. Miku is currently assessing the damage and deciding what to do next.

ZB2, GIBRALTAR. Adrian, G0KOM, will be active as ZB2/G0KOM for the UKSMG 6 meter Contest during the first weekend of June. He expects to be active between June 2-6th. Although his primary efforts will be 6 meters, he will also have HF capability and will also operate on all bands except for 160m. Adrian hopes to travel to Gibraltar at least 2 more times over the summer for the sporadic E season. QSL via his home callsign.

DXCC COUNTRY/ENTITY REPORT: According to the AR-Cluster Network for the week of Sunday, 22nd/May, through Sunday, 29th/May there were 209 countries active. Countries available: 3B8, 3B9, 3D2, 3DA, 3V, 3W, 4J, 4L, 4S, 4X, 5B, 5H, 5N, 5R, 5T, 5U, 5V, 5X, 5Z, 6W, 6Y, 7Q, 7X, 8P, 9A, 9G, 9H, 9J, 9K, 9M2, 9N, 9Q, 9V, 9Y, A2, A3, A4, A5, A6, A7, A9, AP, BV, BY, C3, C5, C6, CE, CE9, CM, CN, CP, CT, CT3, CU, CX, D2, D4, D6, DL, DU, EA, EA6, EA8, EA9, EI, EK, EP, ER, ES, ET, EU, EX, EY, F, FG, FJ, FK, FM, FO, FR, FY, G, GD, GI, GJ, GM, GU, GW, HA, HB, HB0, HC, HI, HK, HL, HP, HR, HS, HZ, I, IS, J3, J6, JA, JT, JW, JY, K, KG4, KH0, KH2, KH6, KH8, KL, KP2, KP4, LA, LU, LX, LY, LZ, OA, OD, OE, OH, OH0, OK, OM, ON, OX, OY, OZ, P2, P4, PA, PJ2, PJ7, PY, PY0F, PZ, S0, S2, S5, S7, S9, SM, SP, ST, SU, SV, SV5, SV9, T7, T9, TA, TF, TG, TI, TK, TR, TT, TU, TY, UA, UA2, UA9, UK, UN, UR, V2, V3, V4, V5, V7, V8, VE, VK, VK9N, VP5, VP8/h, VP9, VQ9, VR, VU, XE, XT, XU, XZ, YA, YB, YI, YK, YL, YN, YO, YU, YV, Z2, Z3, ZA, ZB, ZC4, ZD7, ZF, ZK1/s, ZL, ZP, ZS

* PLEASE NOTE: The report "could" contain "Pirate/SLIM" operations or more likely a "BUSTED CALLSIGN". As always, you never know - "Work First Worry Later" (WFWL).

3D2, FIJI. Andre, GM3VLB, is once again active as 3D2LB from Beachcomber Island (OC-121) until June 2nd. Activity is expected to be on 80-10 meters CW/SSB. Over the past week he has been heard mostly on 20 meters SSB. This is expected to be a holiday style operation. QSL direct only to his home callsign: Andre Saunders, 6 Douglas Crescent, Kelso, Roxburghshire TD5 8BB, Scotland, UK.

4X17/4Z17, ISRAEL (Special Activity/Event). The Israel Amateur Radio Club (IARC) is proud to announce a special Amateur Radio operation honoring the largest Jewish sport event in the world - the 17th MACCABIAH GAMES - scheduled to be held in Tel-Aviv between July 10th-21st. Look for 14 Israeli special event stations to be on the air for 30 days beginning June 21st (20 days prior to the official opening of the games) until July 21st. Twelve stations will be active with the letters in their suffix from which the word "MACCABIAH" can be spelled. The other two stations will use a wild card ("joker") to assist the task. Here are the callsigns:

Group A: 4X17M, 4X17A, 4X17C, 4X17B, 4X17I and 4X17H
Group B: 4Z17M, 4Z17A, 4Z17C, 4Z17B, 4Z17I and 4Z17H
Joker: 4X17MG and 4Z17MG

A special Award will be available for stations having at least 6 valid QSOs with the participating special event stations. The operation is valid for all radio amateurs and SWLs around the world. More details are available via the following Web pages:
http://www.iarc.org/~4z4tl/Maccabiah17_main.htm
http://www.iarc.org

9M8, EAST MALAYSIA (Mountain DXpedition Postponed!). OPDX has been informed by Alan, VK4AAR, that the proposed June expedition to a Dayak village in the mountains near Kuching City has been postponed until August 31st. (See OPDX.709 for details) Nothing else has been changed. Operators are still being sought to join them, and any one interested should contact 9M8SC at:
chansc44@yahoo.com
Alan, VK4AAR, wants it understood that he is NOT the organizer of this venture. Mr. S C Chan, 9M8SC, is in the driving seat and all E-mails should be directed to him. However, Alan is their QSL Manager by appointment. The callsign will be announced later.

A3, TONGA. YL operators Elizabeth/VE7YL and Gwen/VK3DYL are now active as A35YL from Nuku'alofa (OC-049). Look for them to be active from Vava'u (OC-064) before they leave on June 8th. Their expected activity will be on 40-10 meter CW and SSB. They were spotted this past week on 20 meters CW/SSB and on 40/17 meters CW. QSL via VK3DYL, by the bureau or direct with 2 USDs or 1 new IRC.

A3, TONGA. Rick, AI5P, is expected to be in Tonga from May 28th until June 7th and be active as A35PX. Activity will be mostly on CW on 40-10 meters. As this was being typed no QSNs were reported. QSL via AI5P.

C6, BAHAMAS. Pete/W2GJ and Steve/AA4V are currently planning two trips to Crooked Island (NA-113). They are expected to be active in the IOTA Contest in July, and the CQ WW SSB Contest in late October. Both contests will be a Multi-Single entries. Their callsigns will be C6ARV (AA4V) and C6APR (W2GJ). Both operators will be active on the WARC bands before and after the contests. QSL via their home callsigns (QRZ.com).

C6, BAHAMAS. Eric, K9GY, will be active as C6AYM from December 23rd to January 1st. He will be on the Islands of Nassau and Paradise. Activity will be mainly QRP CW on 40-10 meters and also 6 and 2 meters. QSL via

K9GY.

CQ MAGAZINE NEWS RELEASES. CQ Editor Rich Moseson, W2VU, sent out two press releases this past week. OPDX InterNet Subscribers will receive the complete press releases as extra bulletins. The following are excerpts or summary of the two press releases:
* CQ Introduces "iDX Award" to Help "Wake Up DXing" -- CQ Amateur Radio magazine announced the introduction of the "iDX Award," the third and final piece of its three-part "Waking Up DXing" program designed to encourage more DXing activity among ham radio operators. DXing, for the uninitiated, is the "sport" of contacting other hams in faraway places. The CQ iDX Award recognizes confirmed contacts with 25 to 100 different countries ("entities") made using remote bases or repeaters linked with Voice over Internet Protocol (VoIP) networks, such as IRLP or Echolink, and is aimed at developing a DXing "mindset" among newer hams. Contacts for the new award may be made beginning January 1, 2006. Complete details are in the June 2005 issue of CQ and on the CQ Web site at: http://www.cq-amateur-radio.com

* CQ Announces 2005 Hall of Fame Inductees -- From Dayton, OH, on May 22nd, CQ Amateur Radio magazine announced the induction of 17 new members of its Amateur Radio, Contesting and DXing Halls of Fame.

CQ Amateur Radio Hall of Fame inductees are:
Mario Ambrosi, I2MQP
John Chambers, W6NLZ
Ted Cohen, N4XX
Bob Ferrero, W6RJ
William "Bud" Hargreaves, K4HMV
Chod Harris, VP2ML
Ivan "Sonny" Harrison, W5HBE
Edmund Marriner, W6BLZ/W6XM
Boris Meshevtsev, RV3IZ/EX3TM
Les Moxon, G6XN
Loyd Sigmon, W6LQ
Phillip Smith, 1ANB
Jonathan Taylor, K1RFD
Thomas, Ralph, W2UK/KH6UK

CQ Contest Hall of Fame inductees are:
Jeff Briggs, K1ZM
Charles "Rusty" Epps, W6OAT

CQ DX Hall of Fame inductees are:
Masayoshi Ebisawa, JA1DM

CS9, MADEIRA ISLAND (Special Event). During the month of July, look for special event station CS9SRA to be active comemorating the 50th aniversary of the Cattle Exibition in Porto Moniz, Madeira Island (CT3). Details are available (in Spanish) on the following Web pages:
http://www.arrm.pt.vu
http://members.netmadeira.com/arrm/noticias.htm

CU4, AZORES (Contest/IOTA/Lighthouse Activity). A group of 12 European operators will activate Graciosa Island (EU-175) between July 23rd and August 4th. Hermann, HB9CRV, will kick it off as CU4/CT3FN on 6 meters, including a beacon on 50.112 MHz. The entire group will begin operations as CU4T from Lighthouse do Carapacho (LH-113) on July 27. The operators mentioned are: CT1AGF, CT1EPV, CT1EGW, CT1GFK, CT1GPQ, DJ2VO, DF6QV, G3KHZ, HB9CNU, HB9CQL, HB9CRV/CT3FN and HB9EBV. For the IOTA Contest, July 30-31, look for the group to be a Multi/Single entry, and the callsign will be changed to CU4M, then revert to CU4T after the contest. Outside of the contest, operations will include RTTY and PSK. QSL CU4M and CU4T to CT1GFK, direct or by the bureau. QSL CU4/CT3FN via HB9CRV, direct or by the bureau.

DXCC NEWS. Bill Moore, NC1L, ARRL DXCC Manager, reports that the following operation is approved for DXCC credit:
T68G - Afghanistan. Current operation effective April 2005.

IOTA NEWS.....
AS-084. A group of eleven Koean operators will activate Chu'ja Island from June 3-5th. Operators will sign homecall/4. The group of operators mentioned are: HL2EJT, HL1OJQ, HL1OYF, HL1SRJ, HL1VAU, DS1KOQ, DS1NMA, DS3MLG, DS4NMJ, DS4NYE and the President of the Korea Amateur Radio League, HL2AGG. QSL via HL1OYF.

EU-055. Ric, DL2VFR, will be active as LA/homecall from Hellesoy Island between now and June 3rd. Activity will be mainly CW. QSL via his home callsign (by the Bureau is "OK").

EU-056. Ric, DL2VFR, will be active as LA/homecall from Otroy Island, between June 4-11th. Activity will be mainly CW. QSL via his home callsign (by the Bureau is "OK").

EU-064. Members of the Provins ARC will be active using a special callsign (TM0**) on the Ile de Noirmoutier (DIFM AT-020) during the RSGB IOTA Contest (July 30-31st). The group will be active from Bernard's, F9IE, QTH. Team members mentioned are: Franck/F4AJQ, Bernard/F9IE, John/F5VHQ and Pascal/F5JSD. QSL via F4AJQ, direct or by the bureau.

EU-065. Look for a multi-national team from France, Scotland and Belgium to be active as TM4Z from Ouessant Island (DIFM AT-001) in the IOTA Contest (July 30-31st). QSL via F4DXW, direct or by the bureau.

EU-108. Jim, MM0BQI, will be active as MM0BQI/p from Lunga Island, Treshnish Isles (IOSA NH-17 and SCOTIA DI-09), June 2-5th. Activity will be on 80-10 meters, including the WARC bands, using CW, SSB and RTTY. QSL via MM0BQI, by the Bureau or direct to: Jim Martin, MM0BQI, 3 Lismore Avenue, Edinburgh, EH8 7DW, SCOTLAND.

EU-158. Operators Mike/SV1RK, Stavros/SV3CUJ and Kostas/SV1AER will be active as J48SI from Sapientza Island and Sapientza

Lighthouse (GRE 116) on June 3-5th. Their main activity will be on 40/20/17/15 meters. This will be the first ever amateur radio activation from Sapientza Island.

EU-184. Members of the Oulu University Radio Club will be active as OH8T/P from Hailuoto Island during the IARU Region 1 Field Day (CW), June 4-5th. QSL via the bureau.

J6, ST. LUCIA. Operators Scott/N9AG (J68AS), Kirk/W8QID (J68ID) and Mark/WB9CIF (J6/WB9CIF) will be here from June 21st to July 5th. Their activity will be mostly 6 meters, RTTY and 160 meters (for the VKs), but all bands are available. QSL to their home callsigns.

KH2, GUAM. Philip, KH2X, will be active from Guam (OC-064) during the RGSB IOTA Contest (July 30-31st) as a Single-Op/High-Power entry. QSL KH2X.

P4, ARUBA. John, W2GD, will be active again as P40W during the CQ WW DX CW Contest (November 26-27th) as a Single-Op/All-Band/High-Power entry. QSL via N2MM. Look for activity on the WARC bands and 160m during the week before the contest.

QSL INFO AND NEWS.....
NEW QSL MANAGER. Phil, G3SWH, is pleased to announce that, effective immediatedly, he has been appointed the QSL Manager for James, 9J2CA. Phil states, "Direct preferred, Bureau OK or E-mail for Bureau card, but please remember that bureau cards take a very long time. Five years is typical. Please include adequate postage and a C6 sized SAE for the return of any direct QSLs. U.S. Dollars are *MUCH* preferred to IRCs but please remember that 1 USD is *NOT* sufficient postage for an airmail reply outside Europe. Please note that the current, new style of IRC has an expiration date of 31st December 2006. Mint stamps and other currencies are *NOT* welcome."

NOT THE MANAGER. Phil, G3SWH, reports that he has started to receive QSL requests for 9K2CQ, and he is NOT the QSL Manager. He has also been seeing spots on the Cluster naming him as the QSL manager.

NOT THE MANAGER. Maurice, F5NQL, DX Page Editor for Megahertz Magazine, informs OPDX that he is "NOT or HAS EVER BEEN" the QSL Manager for 7V2SI (Sandja Island) and 5U5Z. The correct QSL routes are as follows:
7V2SI - QSL via OM3CGN (per Buck.com):
Ivan Gombos, Box 55, Rimavska Sobota, 97901, Slovak Republic.
E-mail: om3gch@nextra.sk
5U5Z - QSL via Roger, G3SXW. Address for direct cards is (Buck.com):
Roger K. Western, 7 Field Close, Chessington, Surry KT9 2QD, England, UK
E-mail: G3sxw@compuserve.com

QSL CO8TW via IZ8CCW. Activity was during the CQ WPX CW Contest. Look for the log to be posted at: http://www.qsl.net/co8tw/

All CS5A QSOs will be confirmed via the bureau automatically. For direct cards, the QSL Manager is CS1GDX: Grupo Portugues DX, P.O.Box 1156, 2736-996 Agualva, Portugal.

QSL VQ5L to LA9HW, by the Bureau or direct (Please note that it is neccessary to send 2 USDs for return postage from Norway when QSLing direct). This special prefix was used from Turks and Caicos Islands (VP5) during the CQ WPX SSB Contest in March.

QSL LX7I via LX2AJ. Operator was Jorgen, DL4SDW, in the CQ WW WPX CW Contest.

Andy, SP5XSD, reports that the SP60VD special event station's logs are now online at: http://sp5kvw.webpark.pl/sp60vd.htm

QSL TM4Q via F6FYA. Activity from Berthenay (Department 37). Their Web page is: http://www.qrz.com/tm4q

NEW QSL MANAGER. Stuie, VK8NSB, informs OPDX that he has a new QSL Manager. The new manager is Neil, VK6NE. QSL is "OK" via the Bureau or direct.

QSL ZW8A via PS8HF and ZW8DX via PS8DX, both direct only. Activity is by the Teresina DX Group (PS8) from the Canaria Island (SA-072).

SILENT KEYS.......
Bill, VK4FW, informed OPDX that "I have just received news that Norman Jockane/C21NJ became silent key last year. This explains why we have not heard him on the bands."

Floyd, N5FG, informs OPDX that Bushy Roode, ZS6M, became a "Silent Key" on Monday, May 23rd.

OPDX and its readers would like to send out our deepest sympathy to Norman's and Bushy's families and friends.

SPECIAL EVENT. To celebrate the 73rd annual "24 Heures du Mans" being held June 18-19th in Le Mans, France, the radio amateurs of Sarthe will activate TM6ACO between June 5-19th, which includes the 24 hour race. Activity will be on all bands CW and SSB. A special QSL card will be issued. QSL via F6KFI. The radio amateurs of Sarthe have been airing a special callsign for 54 years, since 1952. These callsigns have been used in the past: F3YE, F3XC, F8GE, F6KFI, TV6ACO and TM6ACO. A special "24 Heures du Mans Award" is available for anyone who has contacted three of the special callsigns (GCR + 10 Euros) by sending to F6KFI: BP22088, F-72002 LE MANS CEDEX 1 (FRANCE). More information is available at: http://asso.proxiland.fr/aras72/

SPECIAL EVENT (Lewis and Clark Bicentennial Commemoration). Members of the "Great Falls Area Amateur Radio Club" in Great Falls, Montana, will activate the special event callsign, W7M, from 0000z, June 13th through 2359z, June 26th. Suggested frequncies are:
SSB - 3855, 7250, 14250, 21350 and 28350 kHz
CW - 35 kHz up from band edge
QSL with SASE/IRC to: W7ECA, P.O.BOX 1763, Great Falls, MT. 59403-1763

T88, PALAU. Yasu/JA6BJV and Toshio/JA3IFT will be going here for their vacation between June 3-6th. Yasu will operate CW as T88AG and Toshio will operate SSB as T88AH. They will be on all bands, but mainly on 40 meters and above. QSL via the bureau, to their home callsigns or direct to their address below.
JA6BJV: Noriyasu Noguchi, 3-7-4 Midorigaoka, Arao, Kumamoto, 864-0033 JAPAN
JA3IFT: Toshio Nishina, 224-1, Jyuri, Ritto, Shiga 520-3039 JAPAN
The T88AG log is expected to be uploaded to the LoTW.

VU, INDIA. Bob, W3YY, informs OPDX that he is sorry to report that Miku, VU2WAP, has lost his main tower and antenna which were destroyed in a recent storm. Miku is currently assessing the damage and deciding what to do next.

ZB2, GIBRALTAR. Adrian, G0KOM, will be active as ZB2/G0KOM for the UKSMG 6 meter Contest during the first weekend of June. He expects to be active between June 2-6th. Although his primary efforts will be 6 meters, he will also have HF capability and will also operate on all bands except for 160m. Adrian hopes to travel to Gibraltar at least 2 more times over the summer for the sporadic E season. QSL via his home callsign.

I know how to use a mouse.

But it's a distraction that a good logging program shouldn't need. I want to be able to log without looking at the screen (to see where to click) or take my hands off the keyboard.

Hence my REQUIREMENT for a keyboard centric software design.

Well in ACLOG (http://www.n3fjp.com/) you can reconfigure the entry boxes in the order and tab order that works for you and then just move from field to field with the tab key or space key (except in fields where a space would be a legitimate entry such as in the comment field).

Give the demo a try.

It's unlikely these days that new software will be fully keyboard centric but of the ones that I have tried, this one is the easiest to use from a keyboard point of view. You can always drop the author an email on questions. And if you like, I can try to answer specific questions since I'm pretty familar with it.

Dee D. Flint, N8UZE

Conditions were outstanding on Friday. The A and K index were the lowest I have ever seen. It was so quiet I could hear signals coming from E and W at the same time. Amazing. Thats what ya get when you run a simple vertical loop like me.

I managed 423 Qso's and 324 mults in 12 hours.

Dan/W4NTI

Acey,

You are one sick, sick individual. Your reference to "kiddy porn" speaks volumes on your own secretive Usenet activities.

Not only that, you have no earthly idea as to the status of my amateur licence of 35+ years (for your info -- sheesh, why oh why am I wasting my time with this moron?) I was a "WN9" as a novice in 1970, then upgraded to a "WB9". When the vanity callsign program came along. I changed the "WB9" call to a "W9", since that's what all the "OT's", including my elmer, the now-silent key W9FED, had back in the day. CW (do you have any idea what that is, Acey?) is my favorite mode on the ham bands at speeds that would leave your little pinhead spinning.

Your oh-so-clever and terribly time consuming endeavor of changing my message to suit your own perverted sense of darkness was really quite amusing, had it not been for the fact that it was terribly offensive to those of us who care to conduct discussions without resorting to sexual innuendo and outright perversion. Did you give any thought to the fact that children may be reading your filth? Obviously not. Or you just don't care.

Your obnoxious diatribe has landed you in my bit-bucket, Acey Baby. So buh-bye. I would like to say it's been nice conversing with you, but it hasn't. You have wasted enough of my time. You are NOT welcome to join my group, view my photos, or clean my toilets.

Least regards, you idiot.

~Sparky~

2801. UNIDEN HR2600 FM problems

Newsgroup: rec.radio.amateur.misc
Date: 2005-05-30 05:25:49 UTC
From: Mike <revellm@sbcglobal.net>
Message-ID: <xtxme.922$4u.49@newssvr33.news.prodigy.com>
Source record: 51523

I recently acquired a Uniden HR2600. It seems to work fine except on FM. When in FM, the display light goes out and there is a burst of noise. No receive or transmit.

Anybody seen this problem. Any help would be greatly appreciated.

Sincerely
Mike

2804. Reeeeal Basic Logging Progran ?

Newsgroup: rec.radio.amateur.misc
Date: 2005-05-30 10:51:34 UTC
From: Gary
Message-ID: <7rrl915se10b50ich52pi4buohvcrcsvjs@4ax.com>
Source record: 51526

I've been following the thread on the general purpose logging program but even those seem too advanced for my simple needs. All I need is something where I can type in a call and see if I've worked the station before and also something that allows for comments, like FISTS numbers etc. Free would be an extra bonus ;)

Thanks in Advance.

Once again Win-EQF fills the bill. It can either way, mouse or keyboard. Keyboard input is simple and direct. Another nice touch is the hot key system it has, lets you jump to a particular place on the screen. As an example, at any time while logging press the Alt-G key and you are taken to the Grid Square block.

It will, like lots of other logging programs, let you design your own contest setup also. Nice if you do a state QSO party that does not have a standard format.

Yup sure did but I didn't have much time so ended up with 50 QSOs and 48 multipliers.

For me, the highlight was getting New Zealand on 40 meters (100 watts into multi-band ground mounted vertical). Yahoo!

Other antennas used: Antron 99 vertical, G5RV in a horizontal V configuration, and 80 meter skyloop. The latter also worked very well on 15m actually.

They come in two flavors: 1) so basic they won't do what you want or 2)
ones that have more than you need.

I'd recommend looking at the ease of use rather than worrying about whether
it is too advanced.

Download the demos and try them out. In my opinion, N3FJP's ACLOG has the
most user friendly interface. You can try the demo for free and the full
version is very inexpensive.

Know how that goes. We got lucky this weekend. No family doings in the
way, no bad weather and great conditions for the most part. I worked 20m
CW ONLY. Didn't even listen on any other band.

In 1963, the CBers outnumbered the Ham Population.

The number of US hams exceeded 250,000 in 1963.

1917 - about 6,000

1928 - about 17,000

1936 - about 46,000

1950 - near 90,000

1956 - over 140,000

1958 - about 160,000

1963 - over 250,000

1977 - 327,000

1989 - over 500,000

1997 June - 678,473

2001 Jan 1 - 682,240

2002 Oct 31 -- 684,355

Total number of USA Licensed Amateurs by License Class

As of May 14, 2000:

Novice - 49,329
Tech/+ - 334,254
General - 112,677
Advanced - 99,782
Extra - 78,750

Total all classes - 674,792

As of April 3, 2005

Novice - 28,869 (-41.48%) (-20,460)
Tech/+ - 318,221 (-4.80%) (-16,033)
General - 137,093 (+21.67%) (+24,416)
Advanced - 76,706 (-23.13%) (-23,076)
Extra - 106,238 (+34.91%) (+27,488)

Total All Classes - 667,318

Total all classes (5/14/00) - 674,792
Total all Classes (4/21/03) - 687,860
Total all classes (9/6/04) - 674,788
Total all classes (4/3/05) - 667,318

Total loss of 7,474 since 5/14/2000 (Was 674,792)
Total loss of 7,470 since 9/6/2004 (Was 674,788)
Total Loss of 20,542 since 4/2003 (all time high of 687,860)

Notes,
For the 9th straight reporting period, all classes except for Extra
declined. There was a net loss of 845 licensees in this reporting period
from the last reporting period.

The base totals are from implementation of the then new licensing changes in
May 2000. September 6, 2004 is the date I started measuring the changes. The
peak number was in April 2003.

While the current administration would like to make out that the "economy is strong", there seems to be mounting evidence that it is harder for people to increase there economic situation, move up the ladder of success, etc. Immigrants who used to only take 3 generations to get from where they are to the mainstream middle class are now expected to take six generations to do it, if at all. The country is, reportedly, becoming less of a meritocracy, where people move up based on their ability, and more of a "caste system" where people are born to an economic level, and move up only with great diffuculty.

See:

http://www.csmonitor.com/2005/0523/p17s01-cogn.html

This is probably at work for holding back a lot of potential amateurs. You don't go spending the money you might once have spent on a radio if you're 30 yrs old and a technical geek - you now spend it on the rent.

Prosperity is becoming more of a rare thing, with really staggaring numbers of jobs being shipped overseas because their workers will build a software program at a pay of $30K per year, compared with a worker here that gets $80K per year. The general "think" on this by the American public seems to be that the $80K SW engineer here is just too greedy, and deserves to be out of a job in preference to the $30K a year Indian or Russian or whoever. IOW, grassroots opinion is supporting the outsourcing.

So this is probably the basis for how this hobby, and a lot of other hobbies requiring the spending of significant cash, is going to fail - not for lack of personal interest or ability, but from an economic lack of ability to reasonably pursue the hobby. Yeah, we've always sat around and wanted a bigger

tower like Chief Brody wanted a bigger boat - but the basic stuff of ham radio, a decent transciever, is likely harder for the newer hams than it used to be for us. Heck, we had Heathkit! Now, people either don't have good jobs, or their present jobs are so uncertain that they won't spend the money and go in debt for the radio or tower or whatever.

So, welcome to the 21st Century.

What to do about it? The income tax is largely at work here. Corporate taxes make producing things here more expensive. Companies ship their jobs overseas where the aren't taxed so much - if India were to tax a worker there 50%, and take that $30K a year SW engineer down to $15K, is that more or less expensive overall than using the Stateside SW engineer at a 28% rate for that level of salary. 28% of $80K is $22,400. So, that's _more_ $$$ down the drain for taxes here than a 50% tax overseas would be.

Get rid of the income tax, and espcially the corporate income tax, and replace it with a sales tax, and all of a sudden that cheap accounting software package from India that used to cost $200 now costs maybe $260. In the meanwhile, the equivalent product built here, for $250 or so, first has its price go down from the USA-based company not having to pay income tax, and then add the sales tax percentage, and you get a _much_ more competitive USA-built piece of software.

Hooray! Its what we need now... I mean _NOW_.

>I will leave the speculation and 'hard data' gathering processes to
>others who show an interest in data processing. Their efforts will be of
>little value in the long term scheme, other than they gathered some
>numbers and percentages that have little, if any, value in the long run.
>
>Meanwhile, catch me on the HF bands. I'll leave the overcrowded two
>meter repeaters to the handi-talkie newbies.

Well, there's nothing wrong with repeaters, handi-talkies, and newbies. We need the newbies, and having lotsa repeaters is a _good_ thing.

This is 2nd hand from a local ham telling the story of an emergency exercise involving FEMA and a communications network over a local repeater. Everything was going outstandingly when the FEMA guy thought he'd throw a monkey wrench into the works. He went over to the net control guy and told him to simulate the repeater going down. Net control just called the guy with the biggest home signal and told him to tell everybody to go to another local repeater, and the net was back on the air pretty much without skipping a beat. The FEMA fellow said, "How'd you _do_ that?" NC just smiled and said, "Hey, we have backups!"
>
>All the more reason to upgrade.

Always a good idea.

I worked most of the weekend using 100W into an L-shaped dipole (~16ft of
wire hung from a tree, plus 16ft laid on the ground) for 20m (and above),
plus a 40m dipole (at about 6m agl). Managed 821 QSOs and over 400
mults...I thought the conditions were pretty good for a change.

hi all,

running WINXP on a homebuilt athalon XP2600 setup.

i am trying to set up this motorola we800g bridge to my linksys
broadband router. for useage in my workshop to connect back to my
wireless house broadband.

1st problem...in setup
i can setup the moto we800g bridge to a pc, get it configured and then
reboot. in the setup of the bridge, it identifys my house network, and

it appears to configure itself for it and completes. (im not running
anything fancy..no security or encryption)
and i can access the bridge via the http://192.168.30.1 and surf all
around the bridge menu's no problem. the problem is that i cant surf
the net thru it on this one setup PC. the signal strength report of my

network is about 40% so thats more than enought to establisg a
connection. its like it all works but wont connect to the network.

if i can resolve this, i want to hook it to my linksys router to the
bridge so i can setup multiple ethernet shop computers to bridge over
to my home pc.

i have even tried setting up DHCP in the bridge but as soon as i click
restart it
hangs, and even if i reboot, then it wot work atall until i reset the
bridge

thanks
hamradioman2000

Why do you need a bridge to connect your Win XP system to the Linksys wireless router?

I've been directly connecting my Win XP Pro system to a Linksys wireless router, which for the past 16 months has worked just fine.

Could you add the corresponding general population figures. Then we could
see if the number of hams is growing faster or slower than the general
popluation.

How about adding the general population figures so we could calculate the
growth in hams versus the growth in the overall population.

Excellent show John. I worked several G's but don't think you were one of
em. Yes band was in great shape.

I used to operate from Germany back in the 70s and did some contesting back
then. Really do understand how it is over there in a major contest. Had a

lot more stamina back then too. hi.

July 1, 1919 104,514,000 1,306,000 1.26
July 1, 1918 103,208,000 -60,000 -0.06
July 1, 1917 103,268,000 1,307,000 1.27 NOTE:
National population data for the years 1900 to 1949 exclude the
population residing in Alaska and Hawaii. National population data for the
years 1940 to 1979 cover the resident population plus Armed Forces overseas.
National population data for all other years cover only the resident
population. Estimates of the population including Armed Forces
overseas are as follows:

1919 105,063,000
1918 104,550,000
1917 103,414,000

National population data for the years 1900 to 1929 are only available
rounded to the nearest thousand.

Data for this table comes from Current Population Reports, Series P-25, Nos.
311, 917, 1095, and our National Population Estimates web page. All
Population Division publications may be obtained by writing to Population
Division, U.S. Bureau of the Census, Washington, D.C. 20233; calling the
Statistical Information Staff at (301)457-2422; or by e-mailing a message to
POP@CENSUS.GOV (please include telephone
number).--"Dee Flint"

Using your numbers plus the census data closest in date to your data gives
the following:

Year
Hams
General Population
Hams as a Percent of Population

1917
6,000
103,268,000
0.006%

1928
17000
120,509,000
0.014%

1936
46000
128,053,180
0.036%

1950
90000
152,271,417
0.059%

1956
140000
168,903,031
0.083%

1958
160000
174,984,130

0.091%

1963
250000
189,241,798
0.132%

1977
327000
211,908,788
0.154%

1989
500000
246,819,230
0.203%

1997
678473
267,783,607
0.253%

2001
682240
281,674,017
0.242%

2002
684355
287,941,220
0.238%

Looks more like a leveling off than "dying" to me.

2831. Re: problem with wireless bridge in workshop to home network

Newsgroup: rec.radio.amateur.misc
Date: 2005-06-01 03:15:09 UTC
From: I'm NOT DON <hamradioman2000@yahoo.com>
Message-ID: <1117595709.253838.159350@g14g2000cwa.googlegroups.com>
Source record: 51553

ok heres a more expanded description of my setup

in my workshop i have several pcs running 98SE and i have several ethernet appliances (munet electric meters) and instead of buying wireless adapters for all of them, i want to use all thier existing ethernet hardware and a spare wired router i have. the most cost effective way to do this is set up a bridge in the workshop and connect it to the WAN connection of the wired router and send all the shops data thru the bridge over to my house.. i had a guy at dayton hamfest explain how easy it would be to do it, and to the best of my abilities i have done what he said. (i have a degree in electronics and computer repair so i konw something about computers and networking), im just still kinda new to the wireless side of things. i have played with usb wireless G adapters in my house and they are soooooo easy to set up. this guy at dayton said basically that you configure the bridge with its software, let it find the network and finish config and it should work. its frustrating because i can communicate with the bridge setup web page but i cant surf the net thru it. and it sees my network at 40% wich i should be able to atleast use a bridgea like a glorified usb wireless adapter on one pc. hmmmmmmmmm......
i have had a wireless/wired network at home now for about a year with minimal problems, its just real easy to setup. thats why this is annoying me.

From: peter berrett <p.berrett@optusnet.com.au>
Message-ID: <429dc3dd$0$10304$afc38c87@news.optusnet.com.au>
Source record: 51557

Hi all

I am an Australian Amateur who is putting together an Amateur television station here in Melbourne Australia. I hope to be on air in the next week or so.

I wish to do some regular programming and thought that it would be good if I was able to source some Amateur videos of an educational or Amateur radio nature to be broadcast on VK3PB-TV. Although I do not have any videos of my own to exchange at this time it is possible that I will produce some programming in the future.

If you have some video material I could broadcast could you please send me an email at p.berrett@optusnet.com.au and let me know what you have that is available. I am happy to pay for amy copying and postage costs involved but if the videos are available in a mpg or digital format that would be even better as they could simply be emailed to me.

One think I am particularly interested in sourcing is a series of Dutch language lessons. I have just started to learn Dutch this year and it would be great if someone has produced a series of lessons for non-dutch speakers. I would also be particularly interested in French language lessons.It does not matter hwo old the videos are.

Thanking you for your help

cheers

Peter Berrett VK3PB

Source record: 51558

Just a suggestion since I haven't tried it, but have you considered connecting the TCP/IP output from your computer to a hub, and then connecting one port from the hub to the we800g to feed the ethernet LAN, and another port of the hub to the Linksys router handing WAN protocols? I've lost my copy of "Internetworking Using TCP/IP" but if I recall correctly, LAN and WAN protocols are not directly compatible. Perhaps all you need is a simple network hub to solve the problem, since the we800g may be sifting out some of the data needed for bidirectional WAN Internet connections.

For what it's worth I'm currently cable connected to a Linksys WRT54G wireless router (driving 4 additional computers via wireless links...wife, daughter, son, etc.) that is connected to a Linksys cable modem for Comcast Internet access. My LJ4+ B/W printer is on a wireless link from the router, as is a color printer on my daughters system plus a flat-bed plotter located in another area of our home. I haven't owned any strictly ethernet equipment in nearly 8 years.

Hope this helps. Harry C.

I wish that all of them would get the heck back
to 14.313 and 75 Meters. There ain't been a
really funny ham radio freq since RH busted up
the original 14.313 and 3.894.5 some Years ago.

Ham radio needs a DEDICATED HF COMEDY CHANNEL
on 20 and 75 Meters once again, to provide us all (ham and SWL
alike) with some good quality LIVE ENTERTAINMENT once again.

Heck...some of the keyclowns in rec.radio.amateur.policy would make
for great on-the-air personalities and "Dayton Celebrities" just like ole
Herbie, Porkbutt, Polly and the rest of em were Years ago if they'd
just get off Usenet and back on live radio once again!

Shoot, I can recall when Herb showed up at Dayton one year with
a few of the other Original 14.313 Clowns and hams were actually
lining up to get his autograph (!!). Now that's Ham Celebrity Status!

How about it boys? The stage is empty and you're just a PTT switch away
from ham radio stardom, unless you want to sit here and whack-off
to usenet postings like a couple of nerds !!

I don't think you can. I'm struggling to remember how it all works. I think the initial doping is done by the people who make the ingot. Making an ingot is pretty involved. You would have a very high utility bill if you decided to make an ingot yourself. But maybe you could buy ingots.

So, let's say it is a P-type ingot. Now you have to create N-type pockets in order for it to be useful. I think there are two main ways to do this. (I'm trying to remember. It's all a bit hazy.) I believe the normal way is that they mask off areas which are to remain P, and leave the N areas unmasked. Then they heat the wafer and allow N-type dopant to diffuse in. Like I say, it is all kind of hazy.

There would then be additional rounds of masking and diffusing where you convert part of your new N-type well back into P-type material (that's your base). And then there are also metalization steps. Then you would have to somehow attach leads to the metalized areas. It just seems too painful, and it's not like would be able to make anything fancier than the stuff you can buy.

Also, I do remember that nasty chemicals are involved, and the process control details are critical. Time, temperature, concentration/pressure. Clean rooms.

"How can I perform doping of silicon manually? "

What dopant do you want to apply? What is the nature of the silicon substrate? In general, you need a way to apply a closely controlled concentration of the dopant onto the surface. Arsnic and phosphorus can be applied as a liquid. Boron is typically applied in a vacuum either through ion implantation or LPCVD. There are many texts that explain the theory.

You need either a particle accelerator or an extremely deadly gas (Arsine, Phosphine or Di-borine depending on you dopant type). Once the dopant is on the surface of the wafer you will need to activate the dopant with a high temp furnace (typically a drive-in is done at 950C-1100C). If you used the particle accelerator you will need to aneal the wafer to restore the smooth surface. If you only want to dope certain sections of the wafer then you will need a lithography system. You should be able to pick up used equipment for about $1million US. Or you can hire a fab to do the work for you.

Also, you will get a better response from sci.engr.semiconductors.

Dwayne

2851. Questions Kenwood TKR-750 repeater

Newsgroup: rec.radio.amateur.misc

Hello All,

We bought a kenwood repeater TKR-750 and 2 diamond F23 antennas plus the programming software.

Unfortunately we can't hear anything beyond one kilometer. Here are the frequencies we are using:

TX 15900
RX 16000
TONE1413

The equipment are being used in africa in a remote location for an NGO helping refugees I am back here in the states now.

I would appreciate any pointers from the group.

Thanks.

- Nur

Nur,
first of all, I assume that those frequencies are legally licensed in whatever country you're in. You didn't mention anything about a duplexer or mechanical cavity filters, so can I assume you aren't using any? A 1 MHz Tx/Rx separation is very close at VHF to use for a repeater, unless you have a good duplexer with 80 dB or so of Tx-RX isolation, or have the Tx and Rx antennas vertically isolated by about 80 feet or more. Horizontal separation is not very helpful, as it would require a separation of nearly 10 times that horizontally to obtain the same isolation as the 80' of vertical isolation. Of course, this requires a tower, or tall building (maybe a water tank?). If you don't have one, you will need a duplexer, or run the transmitter power down to a couple of watts and get as much vertical isolation as you can. Summary: You're probably desensitizing your own receiver with your transmitter, which creates both wideband noise, and direct receiver desens from overload.

Good Luck,
Rick T.

I think you might be able to play around and make one up ok.

The ARRL has a page http://www.arrl.org/FandES/ead/youth/QSL-CARD-P2.pdf

I played a while with a html editor FrontPage from Microsoft just to be busy
you can
check it out... I never printed it so it may print funny he he
http://personal.atl.bellsouth.net/m/e/metacalv/WB9SMX%20QSL%20card.html
I got ill with heart trub's and never finished the card.

There are many qsl businesses that have samples to look at for example:
http://rusprint.com/html/qsl_cards.html

I had some made years ago... I had many samples sent to me via mail and took
parts from
different cards to do mine.

Good luck. 73 WB9SMX

Source record: 51577

well,
i have tried just connecting the bridge to a 16 port hub that i have connected to one of the 4 ports on the back of the router, and it didnt seem to do anything different.

i was told that a bridge was able to be plugged into the WAN port (i didnt get his email addr) he said he runs or had run that kind of setup and it worked fine. i still cant get the router to work just on the computer im setting it up on to surf the net. i can communicate to the bridge all day long tho' when its directly connected to my pc ethernet port for setup.

i either need to set up a static IP in the bridge that my router uses or will allow me to use, or set the bridge for DHCP and have some way to communicate with it once i reboot after the change, but i think because its not getting a IP from the router that i dont have an IP to log into the bridge with.

as another example....with the moto usb adapter i have, it got configured for DHCP and it requests an IP and the router assigns it one, then i can surf the net with the spare usb adapter. it seems the bridge should be just as easy.

I remember that back in the late 50's that Bell Labs was distributing
science project kits to schools to promote education. Remember that this was
back when the US was playing catch-up to the Russians.

One of the lits was put together to allow school kids to make silicon
solar cells right in the classroom with ordinary stuff found there. The kit
included silicon wafer slices, some chemicals, a 115 volt heating element
similar to the ones used in small radiant room heaters, some asbestos sheets for
insulation, some fine carbide sandpaper, and a list of instructions.

You built an oven from the heater and the asbestos sheets. The heater
was a ceramic cylinder with nichrome wire coiled around the outside and an
Edison screw base. The inside of the cylinder was open and you broke the
silicon wafer into pieces small enough to fit inside.

The wafer pieces were dipped into a water slurry of the chemical, I
forget exactly which chemical (probably something with phosphorous in it), and
placed in the heater/oven to get red hot. The original wafer pieces were
probably grown with an N or P dopant and the subsequent difusion created a
complemental doping.

The wafers were allowed to cool and then the carbide was used to remove
the surface on one side of the wafer to get back down the original silicon. I
forget exactly how the wires were added to each side, probably a loose flat
spiral of bare copper held in contact mechanically. When finished the kids had
a working solar cell.

My brother was given the kit by his science teacher to put together on
his own for "extra credit". I suspect the teacher just wasn't up to the task of
using the kit the way it was intended. I got the kit and played around with it.

So, in short, you CAN manually dope silicon without Billions of dollars
of equipment. I know because I've done it.

Thanks, Jim, for that post. I had started to respond similarly here, with my own twists and then read what you wrote -- with more detail than I remembered, actually.

I think the kit that Bell Labs put out was back in the early-to-mid 1960's. I recently spoke with the people who currently own the rights to this kit (recently being a few years ago) and they are/were still selling it. Unfortunately, it would be very difficult for me to find the phone number, today -- it was in 2001 when I last had this information at hand. But they were on the east coast.

to the OP:

Modern, pure silicon wafers are rather cheap, thanks to the number of them being processed. I haven't directly purchased any, but someone at HP's Deer Creek facility told me they were only a "few dollars each" (my memory says the figure was near $4) when I pointed to the boxes and boxes of them they had laying around. This is sliced, polished, and cleaned so that no particles larger than a micron remained, if memory serves. Perhaps you could contact a fab or someone who might know someone at one who might help you get fragments of broken ones. I use such broken pieces (which I treat rather poorly) as convenient and well studied reflectors/filters, sometimes.

However you proceed, if it is based on choices you are making and not on someone else's well-thought-out design, you should research it well. If you are considering doing this "manually," then you should study how these things were done when there were no fabs and they were just experiments in laboratories. And run anything you come up with by a knowledgeable chemist before you try it. You will want an informed opinion about the risks and mitigations and advise about what to consider trying. Hot materials can easily produce noxious gases.

As a side bar, I've built ovens from spare parts that could easily raise a wafer to passivating temperatures, such as near 1500 C for rapid oxide growth, that sat in my garage. Just for testing some optical ideas, not for making wafers, though. Got plenty of free wafers from fabs, no problem. Used 'plenty' of dry nitrogen gas to fill the chamber (1500 C and open air with 20% oxy isn't so good an idea) and keep it at slightly higher pressure than ambient so oxygen doesn't get inside. Cripes, do things become a mess if you forget to run the nitrogen! You can construct quite a nice little "oven" of your own with a water cooled quartz jacket and some tungsten lamps from your local hardware or home construction store, a power controller, and a nickel plated chamber (much, much cheaper than gold and works "pretty good".) Just a tap water flow is usually enough.

You don't want the quartz to get too hot, as it grows more opaque where it counts when it does and absorbs even more energy and melts in the resulting positive feedback. With a few kW of lamp energy and not enough cooling, bad things happen.

In any case, don't plan on building much other than a solar cell to start. And keep things really simple and as safe as you can, as you learn.

Jon

Of course, there's always the possibility of building point contact
transistors out of silicon in the comfort of your garage or kitchen. With a
flouride etchant to thin down a silicon wafer in the right spots and some indium
solder you could probably make a passable junction transistor.

In science it often happens that scientists say, 'You know
that's a really good argument; my position is mistaken,'
and then they actually change their minds and you never
hear that old view from them again. They really do it.
It doesn't happen as often as it should, because scientists
are human and change is sometimes painful. But it happens
every day. I cannot recall the last time something like
that happened in politics or religion.

The problem is with the word _manually_. Obviously anything that can be done by a machine can be
done by hand. Obviously with enough hardware for doing it and testing it and enough experimentation
one can learn to get the results desired. However anyone who has looked into the process would know
the right answer and not ask the question.

The question appears in line with the kit you mention. Is there a simple way to do it? is more like
the question sounds and the answer is no. And with the kit efficiency was likely so low that a high
impedance voltmeter was needed and no way to measure the current short of lab equipment the efficiency would be so low compared to even the cheapest commercial production.

So the answer is also no if the intention is a "try and see" bright idea. The idea might be sound
but the success so low as to be unmeasurable. So again the answer is no. And again anyone who knew
the difficulties involved would not ask the question.

But it is far more difficult than finding a sweet spot on a gallium crystal for a radio. You can go
through a lot of wafers before making one with little enough leakage to measure the effect. It took
Schokley and company a while to get an effect that could not be attributed to measurement error
beyond getting the effect in the first place.

The Ohio/Penn DX PacketCluster
DX Bulletin No. 712
BID: $OPDX.712
June 6, 2005
Editor Tedd Mirgliotta, KB8NW
Provided by BARF80.ORG (Cleveland, Ohio)

Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, AB5K & the AR TelNet Clusters Network, K1XN & GoList, NC1L, KA2RTD, NG3K, W3UR & The Daily DX, N4AA & QRZ DX, N4VA, K8YSE, AK0M, W0NB, DL1EK & The DX News Letter, F5CWU & La Gazette du DX, F5NQL & UFT, F8BBL, I1JQJ/IK1ADH & 425 DX News, JI6KVR & JA-IOTA Islands News, PA0KHS, PY5EG, VA3RJ & ICPO, VA7DP, VK4AAR and XE1KK for the following DX information.

DXCC COUNTRY/ENTITY REPORT: According to the AR-Cluster Network for the week of Sunday, 29th/May, through Sunday, 5th/June there were 206 countries active. Countries available: 3B8, 3B9, 3D2, 3DA, 3V, 4J, 4L, 4S, 4U1U, 4X, 5B, 5N, 5R, 5T, 5U, 5V, 5X, 5Z, 6W, 6Y, 7Q, 7X, 8P, 8R, 9A, 9G, 9H, 9J, 9K, 9M2, 9M6, 9N, 9V, 9Y, A2, A3, A4, A5, A6, A7, A9, AP, BV, BY, C3, C6, CE, CE9, CM, CN, CP, CT, CT3, CU, CX, D2, D4, D6, DL, DU, EA, EA6, EA8, EA9, EI, EK, ER, ES, ET, EU, EX, F, FG, FK, FM, FO, FR, FW, G, GD, GI, GM, GU, GW, HA, HB, HB0, HC, HI, HK, HL, HP, HR, HS, HV, HZ, I, IS, J3, J5, J6, J8, JA, JT, JW, JY, K, KG4, KH0, KH2, KH6, KH8, KL, KP2, KP4, LA, LU, LX, LY, LZ, OA, OD, OE, OH, OH0, OK, OM, ON, OY, OZ, P2, P4, PA, PJ2, PJ7, PY, PZ, S5, S7, S9, SM, SP, ST, SU, SV, SV9, T7, T8, T9, TA, TF, TG, TI, TI9, TK, TR, TT, TU, TZ, UA, UA2, UA9, UK, UN, UR, V2, V3, V4, V5, V7, V8, VE, VK, VK9N, VP5, VP8, VP8/h, VP9, VQ9, VR, VU, XE, XT, XU, YB, YI, YJ, YK, YL, YN, YO, YS, YU, YV, Z2, Z3, ZA, ZB, ZC4, ZD8, ZF, ZK1/s, ZL, ZP, ZS

* PLEASE NOTE: The report "could" contain "Pirate/SLIM" operations or more likely a "BUSTED CALLSIGN". As always, you never know - "Work First Worry Later" (WFWL).

4U1UN, UNITED NATIONS HQ. Mohamed, KA2RTD, Station Manager/4U1UN, informed OPDX on June 2nd that the "activation of the UN HQ station, 4U1UN, has been planned for Sunday, 5th June, with W1CX and KT1J as operators. Primary mode will be RTTY and PSK with possible SSB operation on 60M. The operation is, as always, subject to availability of the station." Hope you were able to catch them on the air (especially on 60 meters!). QSL via HB9BOU, as usual. NEWS FLASH (June 5th)... Just before going to

print, 4U1UN was heard active on 20/17 meters RTTY and 6 meters. 4U1UN was expected to be on 60 meters at 2000z.

6Y, JAMAICA. John, KB4CRT, will be active as 6Y5/KB4CRT from June 10-16th. Activity will be on 80-2 meters. Reports also indicate he will be in the VHF Contest. QSL via his home callsign, direct or by the bureau.

6Y, JAMAICA. Steven/KN5H and Art/N3DXX will be active as 6Y5/KH5H in the CQ WW DX CW Contest (November 26-27th) as a Multi-2/High-Power entry. QSL via KN5H.

CN8, MOROCCO. M'hamed, CN8NK, reports that he will participate in the "His Majesty King of Spain SSB Contest" (June 25-26th) as a Single-Op/ All-Band entry. His QSL Manager is EA5XX.

CY9, ST. PAUL ISLAND. Just a reminder that the St. Paul Island DXpedition is scheduled to start June 7th and last until July 7th. Their callsign will be CY9SS. The list of operators include: Robert/VY2RO, Chip/W1AIM, Doug/N6TQS, Alan/VE1AWP, Bill/VY2LI, Robby/VY2SS, Doug/VE1PZ, Charlie/N1RR, Paul/N1BUG, Jon/N0JK, Donald/VE1CY, the Tooner/TO0NIE, David/KY1V, Lowell/ VY2OX, Steve/VE2TKH, Dave/VA2DV, Gerry/W1VE, Ken/VY2RU, Dale/AA5XE, Don/ VA7DJ, Mitch/VE6OH, Krassy/K1lZ and Don/VE1AOE. The team is planning activity for the following: 2m weak signal CW/SSB/RTTY/PSK on HF and CW/SSB/WSJT/M/S-EME on VHF. They will have 2 HF stations and 6 meter station on Europe 24/7 and a 6 meter station for NA/SA. QSL direct to VY2SS: Robby Robertson, RR#3, Oleary, PEI, Canada C0B 1V0. Also via e-QSL. The logs will be uploaded to LoTW. Visit the CY9SS Web page at: http://www.cy9ss.com

CY0, SABLE ISLAND (Update). This DXpedition was tentatively scheduled to last 7 days in July, but now the team has announced that they may be there as long as 10 days. This may change depending on the weather. Operators Joe/W8GEX, Wayne/K8LEE and Phil/W9IXX are expected to be active as CY0AA from Sable Island (NA-063) starting July 27th. Activity will be on 160-6 meters CW/SSB/PSK/RTTY. QSL via K8LEE: Wayne Mckenzie, 24815 Joy Lynn Rd., Lawrenceburg, IN 47025. The team has selected a QSL printer, the cards will be a double card (two sided with pictures). They are looking to send the cards out about 4-5 weeks after their trip is over, so be patient. Also, they will try to have the logs online during the operation, if not, they will be available after the trip. Check out their Web page for updates at: http://www.wb8xx.com/sable

DXCC NEWS.....
DXCC YEARBOOK. Many have been reporting receiving their yearbook in the mail this past week. Your editor received his last Friday.

VU4 QSL PRESS RELEASE. Bill Moore, NC1L, ARRL DXCC Manager, sent out the following press release last week:
Clarification re: VU4RBI/VU4NRO QSL cards for DXCC credit.
We are accepting VU4RBI/VU4NRO QSO cards. A few cards have been rejected on the basis of incomplete information on the cards. We apologize to Bharathi, NIAR, et.al. for any misunderstandings.

If you received a QSL card complete with all data (time, date, band, mode and callsign), there is no problem. If you have a QSL card with less than complete data (callsign only, missing time/date, etc.) we will need to see the card at HQ. This is usual procedure. Blank cards and cards missing information are always subject to inspection at HQ. Do not add the missing information. As always we strive to maintain the highest integrity possible in the DXCC program.
Ms. Prasad has graciously agreed to supply additional log information where necessary. If you have only an incomplete card, do not alter the card by filling in the missing information. Simply send us the card, and we will try to obtain the fill. If you expect a direct QSL, it would be easier on everyone involved if you would wait for the direct card.

FP, MIQUELON. Tom, N6RA, will be active as FP/N6RA from June 9-21st. He is expected to concentrate on 6 meters, looking particularly for the West Coast, Europe and the Middle East stations. It is suggested to look for him on 50.120 MHz (except during the ARRL VHF Contest, June 11-12th). Joe, K2VUI, will be joining Tom on June 9-14th and will operate as FP/K2VUI. His activity will be on 80-10 meters. QSL via their home callsigns.

FS & PJ7, ST. MARTIN AND ST. MAARTEN. By the time you read this, Ramon, XE1KK, should be active until June 8th from both French Saint Martin as FS/VE7RKK and Dutch St.Maarten as PJ7/VE7RKK on the AO-51 satellite on some orbits. He states that he will be using a Kenwood TH-D7A(G) and a Pryme AL-800 antenna (no Arrow Antenna this time). His Grid locator is FK88 and IOTA is NA-105. He has informed OPDX that he is on vacation with his YL and will not be on the HF bands. QSL via XE1KK only, direct or by the bureau. Ramon has activated the following entities in the past: XE, W, VE, FP, OX, TF, PA, LX, OH0, ES, KP4, KP2, TG9, TI5, HC, HC8 and KH6.

IOTA NEWS.....
AS-117. Look for JA4NVY/4 to be active from Nino Island (JIIA AS-117-023) Hiroshima prefecture, June 6th. QSL via the home callsign. Also, visit the JIIA Award Web page at: http://www3.ocn.ne.jp/~iota/newpage61.htm

EU-101. Operators Juha/OH6OS, Toni/OH6TN and Pasi/OH6UM will be active as OH6M from Molpe Island, located in the Botnia Gulf, June 10-12th. Activity will be on 80-10 meters CW/SSB. QSL via the bureau.

EU-120. Members of the Warrington Amateur Radio Club will be active as GB0SGI from St. Georges Island, June 13-17th. Activity will be on all bands. Operators mentioned are: Mike/G4VSS, Mike/M0ACK, John/M0ANM, Ron/G0WJX, Bill/G0PZP, Jim/G3NFB, Philip/G3TEX and Keith/G8MKO. QSL via G0WRS, by the bureau is preferred.

EU-159. Laurent/F8BBL (CW) and Jean Marc/F4ECL (SSB) will be active as TM7CI on Cordouan Island for 48 hours non stop between July 22-23rd. Activity will be QRP on 80-10 meters CW/SSB.

Their equipment will be: FT817ND, W3FF Buddistick and dipoles. More info is forthcoming. QSL via F8BBL, 100% via the bureau or direct. Other reference numbers: DIFM AT-032, LH 271, ARLHS FRA007 and PB 018.

EU-159. Laurent/F8BBL (CW) and Jean Marc/F4ECL (SSB) will be active as homecall/QRP/P on Banc d'Arguin Island (DIFM AT-033) later this summer in August. Activity will be QRP on 80-10 meters CW/SSB. Their equipment will be: FT817ND, W3FF Buddistick and dipoles. More info is forthcoming. QSL via F8BBL, 100% via the bureau or direct.

EU-170. Gianfranco, I6GFX, and possibly others will activate a few Croatian islands in the EU-170 group as 9A/I6GFX between June 10-13th. Islands mentioned are: Ugljan (ACIA CIA-53, IOCA CI-134), Sestrunj (ACIA CIA-41, IOCA CI-104), Rivanj (ACIA CIA-40, IOCA CI-102), Jidula (IOCA CI-273) and Paranak Veli (IOCA CI-386). QSL via their home callsigns, direct or by the bureau.

EU-172. Palle/OZ5MJ and Jakob/OZ7AEI will activate two islands and lighthouses on Sunday, June 12th. Operators will sign using their homecall/p. They plan to activate Lyoe Island (DIA FY-009) starting around 0900z and Avernakoe Island (DIA FY-010) starting around 1230z. On Avernakoe Island, they will activate the two lighthouses on the island (DEN-156 Munke/Avernakoe) and (DEN-157 Nakke odde). If WX is fine (no rain), they will use 2 stations, mainly on 20 and 40 meters SSB. More up-to-date info about the activity and their logs after the operation will be available at: http://oz7aei.qrz.dk
QSL via the bureau or direct.

NA-055. Bill, N8PW, will be active as N8PW/1 from Mount Desert Island (USI ME-021S - Hancock County, Maine), June 13-18th. This will be a vacation style operation, as time permits. Activity will be on 40, 20 and 17 meters CW/SSB. QSL via his home callsign.

NA-112. Operators Kyle/W4KTF, Jim/KI4FVT and Sandra/KI4HVG will be active from Emerald Isle (USI NC-010S - Carteret County, North Carolina), June 12-19th. They will sign as homecall/p and be active on 40-6 meters SSB, with some 2 meters and 70 centimeters activity as well. QSL all callsigns via W4KTF.

OC-206. Operators Wally/VK6YS, Dan/VK8AN, Nigel/VK6KHD and possibly a 4th operator (TBA) will be active as VK6DHI from Dirk Hartog Island, August 20-23rd. Activity will be on 40/20/17/15/12/10 meters CW/SSB. QSL DIRECT to VK4AAR: Alan Roocroft, 376 Old Toowoomba Rd, Placid Hills 4343, Australia.

KH7K, KURE ATOLL (Update). A multi-disciplinary expedition to Kure Atoll, the northernmost Hawaiian atoll, will be carried out between September 22th and October 9th (Operation between September 24th-October 9th). The

expedition team is an international group of highly experienced radio amateurs and field scientists. They will activate Kure for radio amateurs worldwide, using the callsign K7C, and also implement an innovative satellite-internet system ("DXA") for real-time display of the expedition activities. In addition to the radio operations, the team will carry out a variety of projects in support of the wildlife sanctuary on Kure, including a study of invasive ants, documentation of shipwrecks, and collection of representative speciemens of marine organisms. Kure Atoll is the northernmost coral atoll in the world. It lies some 1958 km miles NW of Honolulu, which is the point of departure for the expedition. The voyage will take six days to reach Kure. The team will spend about two weeks on the atoll, and then return to Honolulu. The expedition team consists of the following:
Expedition Leader/DXA development - Robert Schmieder/KK6EK
Co-organizer/Antennas - Garry Shaprio/NI6T
Co-organizer/Satellite Link - Alan Maenchen/AD6E
MESS (Medical, emergency,
safety, sanitation) - Alan Eshleman, K6SRZ
European operations - Franz Langer, DJ9ZB
Equipment/Logistics - John Kennon, N7CQQ
Radio Equipment - Mike Mraz, N6MZ
- Ward Silver, N0AX
Information - Ann Santos, WA1S
Electrical Power - Charlie Spetenagel, W6KK
Relay Stations - Steve Wright, VE7CT

Onsite support
Kure Onsite Naturalist - Cynthia Vanderlip
Skipper, Machias - Bill Austin

QSL Manager is Tom Harrell, N4XP. QSL Route: K7C KURE DXPEDITION 2005, %K4TSJ, Box 1, Watkinsville, GA 30677. For more details, please visit the K7C Web page at: http://www.cordell.org/htdocs/KURE/index.html

KP1-5 PROJECT UPDATE. A press release by KP1-5 Project Committee was sent out last week stating that two Amateur Radio operators testified on Capitol Hill May 26th during an oversight hearing conducted by the House Subcommittee on Fisheries, Conservation, Wildlife and Oceans on the issue of access to the nation's wildlife refuges. The Amateur Radio operators advocated the reopening of Navassa (KP1 / IOTA NA-098) and Desecheo Island (KP5 / IOTA NA-095) to Amateur Radio use. Since the press release is very long, the complete announcement will be sent to all OPDX InterNet Subscribers as an additional bulletin.

P4, ARUBA. John, KK9A, will be active as P40A during the CQ WW DX SSB Contest (October 29-30th) and the CQ WW DX CW Contest (November 26-27th) as a Single-Op/All-Band entry. QSL both operations via WD9DZV.

QSL INFO AND NEWS.....
Goran, YZ1SG, reports that the logs for 5Z4YT1CS (Nairobi) and 5Z4YT1CS/M (Lamu Island AF-040) operations are now available online at: http://dx.qsl.net/logs/index.html

Please note that the correct callsigns are 5Z4YT1CS and 5Z4YT1CS/M (not 5Z4/YT1CS and 5Z4/YT1CS/M). Goran also states, "The original logs are in paper format (except about 1900 QSOs made in CQ WW) so there could be some errors in typing. If you can't find your QSO, you can send me an E-mail (yz1sg@eunet.yu), and I will check the copy of the original log." The QSLs for these operations are finally printed and Miki, YT1CS, will start answering all requests very soon.

Graham, M5AAV, reports that effective immediately, he is now the QSL Manager for John, 9M6/G3OOK. QSL requests can be by the Bureau or direct to: Graham Ridgeway, 6,Pilgrim Street, Nelson, Lancashire, BB9 0JQ, England. Graham states that John is hopeful of getting a "proper" 9M6 callsign in the near future - when he does he (Graham) will be handling the QSLs.

Steve, AK0M, informs OPDX that cards were received from the printer in April for his February C6ASB operations and were of poor quality. The cards are being reprinted, but as of June 3rd, he has not yet received them. He hopes to have the cards by mid-to-late June, but he doesn't have a promise date from the printer yet. They are photo QSLs and should be nice cards. Steve states, "If you are in a hurry and have submitted a request already, you can send me an E-mail at my QRZ.com address for AK0M, and I will send you one of the cards from the original printing. My apologies to those who are still waiting."

Larry, N4VA, QSL Manager for Manju, S21AM, informs OPDX that the correct QSL route for the recent S21SHQ operation is: AMINUL KAWSER KHAN, Deputy National Commissinor, Bangladesh Scouts, PO BOX #5130, post code 1205, DHAKA, BANGLADESH. Larry does not have any logs for that station, and Manju, S21AM, states not to send QSL cards to him.

SPECIAL EVENT. Authorities have granted Doug, VA7DP, to use the special callsign VA7YVET to commemorate the "YEAR OF THE VETERAN". The callsign is valid from June 4th (2005) to July 4th (2005). He will try to work as many bands as possible. QSL DIRECT ONLY w/sase or e-QSL (NO BUREAU).

SPECIAL EVENT. To commemorate the 2000th anniversary of the Roman City of Nijmegen (Noviomagum), a special callsign, PA2000N (PA "two thousand" N) has been issued. The callsign will be used during the period of July 8-23rd. This includes a Multi/Multi entry in the IARU Contest. A crew of local hams will air the callsign as much as possible in the indicated period. A special QSL will be printed, and you can send your QSL via the Dutch QSL Bureau (R35) or direct to PA0KHS: Henk van Hensbergen, Smaragdstraat 53, NL-6534 WN, Nijmegen, The Netherlands.

VK9C & VK9X, COCOS-KEELING AND CHRISTMAS ISLANDS. David, VK2CZ, will activate both of these islands on 2 meters EME using digital modes (no HF). Look for him as VK9CMO from Cocos-Keeling Island, August 18th to September 1st. Also, look for him as VK9XMO from Christmas Island, September 1-22nd. QSL via VK7MO direct. Visit the following Web page for more info at: http://www.qrz.com/vk9xmo

WRTC 2006 UPDATE. Oms, PY5EG, informs that they are pleased to announce
the "TEAMS SELECTION CRITERIA" for the next WTRC which will be held in
July 2006. Please visit the following Web pages for complete details:
http://wrtc2006.com (WRTC 2006 Home Page)
http://www.wrtc2006.com/criteria.pdf (Team Selection Criteria)

XU, CAMBODIA. Wim, XU7TZG, was heard this past week on 15/20 meters
SSB between 0730-1600z. QSL via ON4AJV.

2869. repeater questions

Newsgroup: rec.radio.amateur.misc
Date: 2005-06-06 02:52:40 UTC
From: Jim <asdf@seaqf.com>
Message-ID: <YTOoe.18764$x96.6562@attbi_s72>
Source record: 51391

Me and my Dad have been thinking about a ham certificate for quite some time. After trying cb and murs for use around the city we pretty much gave up on the radio hobby due to unreliability.

2m repeaters sound like a lot of fun and have coverage all around our town. I really don't have much to talk about with strangers but enjoy listening occasionaly.

What we were wondering if theres any way to use a repeater and only have our squelch open up when we call each other. of course once I am on the air I want to hear everything. I dont really want to hear chattering all day long just waiting for a contact. I hope this makes sense what I'm asking.

From a practical point of view home and cell phones are much better but thought the radio hobby could be fun.

We also dont like the idea of our names being public. is there any way that you can keep your name and address away from nosey people?

thanks for your time.

Considering your preference for privacy, maybe the cell phone is what you need.

The problem is not total number of Licenses its Number of ACTIVE hams.

Best estimates are that less than 25% of licensed Hams are active.
Since there are no real accurate way to measure this its an estimate based
on Memberships in various ham organizations vs licensed.

I'm not really concerned about on the air privacy because it would not be used for private conversation.

I see nothing wrong with wanting a private call sign though. I used to chat with friends on the cb and there were some very questionable people there. There are also a lot of ham radio operators like this but they behave slightly better on the air and a call sign is pretty much just a abbreviation for your home address and phone number.

As I tried to explain in my question I just wanted a way to mute my radio until a specific person calls me and then have the radio on so I can hear everyone. I guess this is not possible through a repeater.

This is not another "dig" at hames. I am amazed at what some hams have done by constructing their own equipment from the ground up and their quest for electronics and radio knowledge.

thanks for your time

You'll need to use radios with CTCSS encode and decode. My 2m/70cm rig
(Alinco DR610) has the feature but I've never used it. I don't know if a
repeater will pass on the tones or "strip them out".

Yep! Nextel..... no cell phone bill for "calls" as long as you use the walkie talkie side only. Per my understanding, that part is unlimited. To get a Ham license, you will get a license, and you'd need to use your call sign once every 10 minutes. Your call sign is able to be found on line and so - you would have a real problem with that. Nosey people? When you intend to "share" PUBLIC airwaves, you have to accept that you WILL be heard. Unless you're talking Drug deals, investments (to be kept secret), etc; usually no one would give a crap what you and your dad talk about unless you're violating the rules. The "Repeater" Control Operator is legally liable for anything said. It is their business to be "nosey".

I suggest you go with Nextel if that is your attitude. The way this question was put, I'd tend to believe it was a troll. Just another "dig" at the hams. There has been a LOT of that. Hell, given your attitude, even CBers would be too "nosey" for you. Yep... definately - go with Nextel. God forbid any Hams or CBers would want to hear what you and dear ole dad have to discuss. You'll have as much privacy as you want. You and dear ole dad could talk til the cows come home about anything your little heart desires and no one will hear you.....

Well, through repeaters, it isn't possible, least not that I am aware. Now, simplex - it can work. But, simplex can be tough. If you're unaware of what simplex is, that is radio to radio - no repeater. Every radio has somewhat different characteristics and so on in range, etc. I think you said you played with MURS. How about FRS? The range of 2 meters may be the same or slightly better. "IF" you're both at a fixed location, you could use external antennas. You can get a newer rig and program a PL into it for Transmit and Recieve. The only thing remaining is range required, and of course the license and making sure you do not say anything you don't want others to know. Mobile 2 meter rigs pack as much as 50 watts while H.T.s go up to about 7 with some models. I'm not aware of any that do more. So, that may help you decide.

As for the time, you're welcome. I try to help when I can, but sometimes things can be misinterpreted. Knowing what I know now, if you decide to get a license, I'll be the first to welcome you. Good luck.

Lou

??? How can that POSSIBLY be "true," Super Master Chief?

Do you realize you are correcting a "veteran of seven hostile
actions" who was also the ASSISTANT NCOIC of THE Okinawa
MARS 24 years ago?!? Tsk, tsk, tsk.

>However, the US Navy does issue callsigns to amateurs at Antarctic Bases (ie,
>KC4AAA, KC4AAC) and Guantanamo Bay (ie, KG4ML, KG4OX).

How about that. The Army MARS Hq callsign is NNN0AAA.

Does that appear in that Big Amateur Database at the FCC?

No? Sunnuvagun!

Oh, and thanks for that weblink at Harris Corporation's Tactical
Communications page. It was given out on paper form in 1996.
The second volume was prepared only a few years ago...but then
VHF and up isn't the proper playground for the HF Warriors,
is it? [Amateur Morsemen Warfighters to the Front...]

However, you should have made SOME mention of that informative
textbook "Now You're Talking!" from the ARRL which explains
it all...shouldn't you?

Excuse me while I go look up who used to post some phrase
about "gentlemen should not be disagreeable" or whatever it
was.

bit bit

Harris Corporation is a military communications contractor.

A.F. Global Weather Central purchased a Harris transmitter to kick-off
the Weather HFRB (rtty, fax) System at Elkhorn, NE (AKA Giant Talk).

Harris Corp. built the Satellite Data Handling System at AFGWC.

Harris Corp. built the A.F. tactical DMSP ground set.

Harris Corp. transceivers were stuffed in racks in the Transportable
Automated Weather Distribution System (TAWDS).

But weathermen don't do comms. Hi!

"Alleged?!?" :-)

Anyone can go to www.harris.com, click on "tactical radio"
text-button on the main page and get to the page to select
their TWO tutorials on radio communication. Actually FOUR
since they have the same material in Spanish. :-)

Of course at the Harris site they require a "registry"
before the downloads can begin. One must be veddy
OFFICIAL about it all. :-) No problem for me, I got
both of them...the first volume is what I have on paper,
they second one I haven't seen. Well done material.

Newcomers ought to begin with "Now You're Talking"
shouldn't they? That's veddy official for amateurs.
We can't have any of that MILITARY comms stuff in here,
can we? Tsk, tsk, tsk.

Going directly to the Harris site should be best considering
that ARRL in Newington has Harris transmitters for W1AW.
Ed Hare made a point of that in here over three years ago?
If Newington has authentic Harris transmitters, the Harris
website is therefore OFFICIAL for all hams.

Everbody get all ionized about the mighty HF ionosphere.
Beep, beep.

You might want to define reliability. If I remember correctly, it was Ham Radio that kept lines of communications open during many disasters that took other modes out of service. If that's unreliable then you may want to consider lowering your standards.

> 2m repeaters sound like a lot of fun and have coverage all around our
> town. I really don't have much to talk about with strangers but enjoy
> listening occasionaly.

For me, part of the fun of local chatter on 2M is that I am talking to people who might be stranger, or they might be my next-door neighbor. If you're looking for something private between you and your father, you should consider a private system and get a scanner to listen into Ham chatter.

> What we were wondering if theres any way to use a repeater and only have
> our squelch open up when we call each other.

Repeaters can be configured to respond to sub-audible tones that your radio emits when transmitting. Only those tones will open up the repeater, and then the repeater either passes the same tone or regenerates it so that radios configured like yours will open squelch. As others have mentioned, repeaters can be configured to listen for a certain touch-tone sequence and then begin transmitting.

Both of these would be private repeaters using frequency space allocated by the regional coordinator.

Alternatively, a commercial system, maintained by a vendor, would give you the private communications you seem to desire, and could also offer wide-range access.

> of course once I am on the
> air I want to hear everything.

Ham radios can be set to only emit a squelch-releasing tone or both emit and expect the tone. The former means you will hear all traffic on the frequency, which should be none because the repeater only opens on hearing the tone and no one uses a repeater frequency for simplex - direct - communications.

> I dont really want to hear chattering all
> day long just waiting for a contact. I hope this makes sense what I'm
> asking.

Not really. You started by saying that 2m sounds like fun, but now you say you don't want to enjoy it.

> From a practical point of view home and cell phones are much better but
> thought the radio hobby could be fun.

Half the fun is contacting other Hams, locating them, exchanging cards, working toward several awards based upon contact numbers or locations. And then there's the service aspect, that of providing emergency communications and other services during a disaster. Depending on your area, there may be varying degrees of activity in the emergency service, which trains by providing communications services for any variety of public events.

One can't forget the joy of building a rig, or antenna, or a complete radio shack. The first time you wire up a bunch of parts, give it some juice and start talking to someone halfway around the world is satisfaction not easily topped.

Many locations have clubs at which nearby Hams gather for regular meetings to exchange ideas, help each other building something or to advance in their license class.

> We also dont like the idea of our names being public. is there any way
> that you can keep your name and address away from nosey people?

Ham Radio is a public system, and being licensed means that your name and address of record can be viewed. It's how we help each other. There was a time many decades ago when I accidentally left my mobile rig transmitting while I was inside a shopping center. Those who found my car saw my license, looked up my name and then paged me. I was grateful and embarrassed, but without my call sign they could not have located me.

There is nothing preventing you from using a P.O. box as your mailing address.

Before you consider Ham Radio, since it sounds like its hobby aspect is more of an added bonus than the primary cause for consideration, figure out what you want to do and why.

Regards,
Larry

Well, this seems to be going absolutely nowhere. Sir, I'm afraid you are not aware what constitutes a "troll" on USENET. See, it's not like one of those mythical creatures lurking underneath bridges waiting for unsuspecting passersby. A USENET troll is someone who posts something only to get a reaction (usually negative, but any attention to the troll's post is stroking said troll's ego), akin to a fisherman trolling and seeing what fish may bite the bait.

My posts are not intended to simply initiate responses due to their somewhat controversial nature. I am sincerely interested in seeking other "radio outlaws" who, thanks to the First Amendment Right destroying efforts of Mr. RH (do you know to whom I am referring?) to turn Amateur Radio into his own personal (non)playground of "my way or the highway" type thing.

So, dear OT, if you care to hold a decent conversation, fine. However, if you choose to continue with the insults, accusations, and other annoying traits you've so eloquently exhibited here, I will put you right in the ol' bit bucket along with the pervert "Dr. Ace". (See, he is now invisible to me. Everything he posts automatically is tossed into the trash can, where it belongs.)

With that, OT, I wish you

73 -- ~Sparky~

Often imitated -- NEVER duplicated!

Sparky -- AM/FM/SSB/CW from the ol' Mobile:

KALL-2671 -- CB Radio;
Unit 412/RF412/CO3026 -- Freeband 26-28MHz;
Radio Outlaw 412 -- Echo-Charlie Bands;
W9*** -- Amateur (Ham) Radio;
WQRM313 -- GMRS;
M/V Mysterious Traveller -- Marine;
plus FRS, MURS, Shortwave... in other words DC to Daylight.

...got frequencies?

2904. Identify High Current Power Supply Transformer

Newsgroup: rec.radio.amateur.misc
Date: 2005-06-10 13:46:12 UTC
From: pinpassion <mjdrum@comcast.net>
Message-ID: <1118411172.605506.327170@o13g2000cwo.googlegroups.com>
Source record: 51426

Hi Gang,

I have a large and heavy power supply transformer
that is part of a high current power supply project
that was featured in 73 magazine back in 1973. It
was started by a ham radio operator and was never
finished. I am going to finish it, if I can. I am
trying to identify the transformer leads. This is
for a 12 volt, 40 to 60 amp output. Here are the markings:

This transformer was made by ADC and is marked 541-010 REV H.
There is a marking on it that says 3-19470 and what I think
is a date code of 7438. There are terminal connections on one
side that are numbered 1 - 6. On the other side the connections
are numbered 7 - 14. I need to know the connection scheme for
this transformer so I can put it to use. I contacted who I
thought was the manufacturer "ADC" for information, and that
did not help.

I don't have the issue of 73 magazine, and I don't even know
if this is the same transformer that may have been part of the
construction article. I can take pictures and post them if that
might help.

Anybody have any ideas?

Thanks a lot.

Mike

Voltz wishes he had an amateur radio license.
Most licensced amateurs know who Riley Hollingsworth - K4ZDH, is.
And YES, the First Amendment gives you (Spunky Voltz) the right to say idiot things.

Ace - WH2T

Are you sure this is a power transformer? Sounds more like a matching
transformer, of some type, to me.

Take some ohm readings. The primary should be around 100 ohms or so for 110
volt operation. The secondary will be much less of course.

Cross-posted to: rec.radio.amateur.digital,rec.radio.amateur.misc

Hi all,

Many of you (some of you?) know that psk31.org is a decent place to find out where to go to learn about PSK31.

I'm in the process of updating http://www.pwk31.org to give better links than it used to. I'm using a new research tool that I've started using for my web site at work, and for general collaborative work stuff, and thought it would be a great way to update the way psk31.org works. It also supports rss feeds, if you want to do that. Comments are welcome.

I'll be updating the page weekly, or even more often, if PSK things are happening.

Post replies here, use my reply addr shown here, or use the link on the page - your choice.

73,
Dave
kz1o

p.s. If you want to know more about the research tool that I am using (I'm not selling it, but I'd be happy to point you to them), either look at the web page source, or send me email.

DXCC COUNTRY/ENTITY REPORT: According to the AR-Cluster Network for the week of Sunday, 5th/June, through Sunday, 12th/June there were 201 countries active. Countries available: 3A, 3B8, 3B9, 3D2, 3DA, 3V, 3W, 4J, 4L, 4S, 4U1I, 4U1U, 4X, 5B, 5N, 5R, 5T, 5U, 5V, 5W, 5X, 5Z, 6W, 6Y, 7Q, 7X, 8P, 8R, 9A, 9G, 9H, 9J, 9K, 9M2, 9M6, 9Q, 9V, 9Y, A2, A3, A4, A5, A6, A7, A9, AP, BV, BY, C3, C6, C9, CE, CE9, CM, CN, CP, CT, CT3, CU, CX, CY9, D4, DL, DU, EA, EA6, EA8, EA9, EI, EK, EP, ER, ES, ET, EU, EX, EY, F, FG, FH, FK, FM, FO, FP, FR, FY, G, GD, GI, GM, GU, GW, HA, HB, HB0, HC, HH, HI, HK, HL, HP, HR, HS, HZ, I, IS, J3, J6, JA, JT, JW, JY, K, KG4, KH0, KH6, KL, KP2, KP4, LA, LU, LX, LY, LZ, OA, OD, OE, OH, OH0, OK, OM, ON, OX, OY, OZ, P4, PA, PJ2, PJ7, PY, PZ, S5, S7, S9, SM, SP, ST, SU, SV, SV/a, SV9, T7, T9, TA, TF, TG, TI, TK, TR, TT, TU, TY, TZ, UA, UA2, UA9, UK, UN, UR, V3, V4, V5, V7, VE, VK, VP2M, VP8/h, VP9, VR, VU, XE, XU, YA, YB, YI, YK, YL, YN, YO, YU, YV, Z2, Z3, ZA, ZB, ZC4, ZD8, ZK1/s, ZL, ZP, ZS

* PLEASE NOTE: The report "could" contain "Pirate/SLIM" operations or more likely a "BUSTED CALLSIGN". As always, you never know - "Work First Worry Later" (WFWL).

3DA, SWAZILAND (Update/Low Band Activity). Frosty, K5LBU/3DA0CF, reports good news for Low Banders, and all systems are a go for July from Swaziland. The operators are excited about the antennas for the low bands. He states that thanks to a fellow ham, they will have (3) 800 ft. beverages. One beverage will be pointed toward the U.S., one toward Europe and one toward Japan. They expect to be on the air by the 9th of July or possibly the 8th.

Frosty mentions that they will have two very tall verticals for 160-80 meters (they are at least 70 ft. tall, and they will try to put them at least 1/8th wave apart). He wished that they had several more operators on this trip, but he guesses Wayne, W5KDJ/3DA0JDK, will have to do all the CW. On 40 meters they will have the 40 meter kits on a Cushcraft A4S antennas which will be close to 40 meters high.

3Y0X PETER I DXPEDITION (Press Release #2006-1). The following was sent out by Ralph/K0IR and Bob/K4UEE on June 9th: "The Peter I DXpedition is scheduled for early 2006. We are pleased to announce that contracts have been signed with a two Chilean companies to provide a vessel and helicopter for the DXpedition to Peter I, Antarctica during Jan/Feb. 2006. The actual dates of the operation will be released on or about Sept. 1, 2005, but the general time frame will be between Jan. 16 and the end of February 2006. The actual dates depend on the vessel scheduling and weather considerations. It is the team's objective to be at Peter I for a minimum of two weeks with the actual operating time to be determined by weather and set-up time. Because of the likelihood of it being a very long time before Peter I will be activated again, we have set some very high QSO goals. Nine stations will be established on the island and QRV on all bands 160-10m, on the most common communications modes.
Most of the members of the 2005 team will participate in the 2006 DXpedition, but there are several slots available for new team members. Contact either: K4UEE (mallphin@aol.com) or K0IR (rfedor@cloudnet.com) for more information. This adventure is not for the faint-hearted!
Sponsors from the 2005 attempt are on board for 2006&#65533;.
See www.peterone.com <http://www.peterone.com> for a complete list.
This is a very expensive project. Although the team will be putting up approximately 70% of the DXpedition&#65533;s expenses, additional contributions from sponsors are being sought. Contributions by check or PayPal are very much appreciated. It is easy, just go to www.peterone.com <http://www.peterone.com>. Thanks for your support!
We will be posting DXpedition updates periodically, so please check the website often."

9A10, CROATIA (Special Event). Members of the Amateur Radio Club Koprivnica will be active with the special callsign 9A10KC now through December 31st. Activity is to celebrate the 10th Jubilee of the Community for the Technical Culture of the City of Koprivnica. The QSL Manager for this activity is Kresimir, 9A7K. Contacts with 9A10KC are also valid for both "Worked 9A PFX Award" and "Croatian County Award". Also, a "Koprivnica City Award" is available. For more details on the 9A10KC callsign and the above mentioned awards, visit the following Web page at: http://www.9a7k.com

9M2, WEST MALAYSIA (Please Change Your Databases). Ian, 9M2FB, was heard this past week on 20 meters CW just after 1515z. Ian E-mailed OPDX and informed us that since January of this year, he has been issued with the callsign 9M2FB (before that he was active as 9M2/G3TMA). He states, "It seems this is a reissue of a callsign issued to 9V1OK many years ago."

Some QSL CDs and databases are still listing 9M2FB via 9V1OK. This is incorrect. The correct QSL address for 9M2FB is on QRZ.com for direct cards or via G3TMA for bureau cards.

A5, BHUTAN. Takkuma, JF1EGV, was heard this past weekend as A52EGV on 21255 kHz starting a early as 1200z and as late as 1600z. QSL via operator's instructions. Also, A51AJ has been heard on 20 meters SSB after 1315z. QSL via DJ2MX.

CY9SS, ST. PAUL ISLAND. After a rough landing on the island, the CY9SS crew is now active until July 7th. Reported details by "The Daily DX" indicate that "while the crew was coming ashore, the team lost a generator and three tower sections, and the landing craft's captain hurt his leg. High wind and rain also hampered efforts to set up camp." Also, the WX has not been kind to DXpedition. Currently, the team is down to four operators. Krassy, K1LZ, broke a leg and had to be air lifted by a Canadian Search and Rescue helicopter (David, KY1V, went with them to help out). More operators (5) are expected on Tuesday, weather permitting. As this was being typed on Sunday, activity by CY9SS was on 20/17/15/12/10/6 meters. QSL CY9SS via VY2SS: 57 Tranquility Ln, Bloomfield,
PEI C0B 1E0 CANADA.

DAYTON HAMVENTION 2005 PHOTO GALLERY. The famous K8CX 2005 Dayton Photo Gallery is now up with 157 photos at: http://hamgallery.com/dayton2005/ Tom, K8CX states, "This makes the 9th consecutive year for Dayton Photo Gallerys."

DXCC NEWS. Bill Moore, NC1L, ARRL DXCC Manager, has informed OPDX that The following operation is approved for DXCC credit:
HZ1EX - Saudi Arabia; From October 27, 2004 through December 31, 2005.

*ADDED NOTE: Hans, SM0BYD, informs OPDX that he is the QSL Manager for this station. This station is also approved for LoTW. He also adds "DO NOT SEND IRCs!" IRCs are no longer valid in Sweden. Visit the following for details: http://www.qrz.com/SM0BYD

HB0, LIECHTENSTEIN. The first HA-LZ team will operate from here as HB0/homecall between June 19-26th. The QTH is a rented house on Malbun, 1602m ASL. The team members are: Valya/LZ5AV (XYL), Johny/LZ1PJ, Laci/HA0HW, Tomi/HA4DX and Geza/HA4XG. They plan to have three stations set up, and one will be on 50.100 Mhz with a 6 element Yagi. For HF, they will use a 3 element Yagi, Gps, and dipoles made by DunaX. Activity will be on all HF bands, incuding the WARC bands, and on CW, SSB, RTTY and PSK31. QSL via the LZ and HA bureaus or direct to the addresses you can find at QRZ.com.

IOTA NEWS.....
AS-059. By the time you read this, the station signing UE0ISL will be wrapping up their operation from Zav'yalova Island (RRA New One and expected QRT is June 13th). Activity was to be on 40/20 meters and possibly 17/15 meters. Later in July a team is planning a more serious trip to this island.

AS-066. Operators Dmitry/UA0LQJ, Yuri/UA0LG, Alex/UA0LDY, Anatoly/
RA0LHK, Igor/RA0LGG, Svetlana/RA0LHE, Kristina/UA0LHH and
Nick/UA0NM will sign UE0LBI from Bel'tsov Island June 17-21st.
They will also make a side trip to Petrova Island which is
not an IOTA and sign UE0LPI. QSL both operations via IK2DUW.

AS-147. Operators JA1KJW, JJ1JGI, JK1EBA, 7N4AGB plan to be active
from Rebun Island (JIIA AS-147-006), Hokkaido from July 15-18th
and Rishiri Island (JIIA AS-147-007) from July 18-21st. Look
for them to sign homecall/8. QSL via their home callsigns,
direct or via the bureau.

EU-NEW. Just a reminder to look for MS0IRC/p to be active from Rockall
Island (New IOTA!) around June 14th and lasting until June 21st.
(Read OPDX.703). Operators are Dave/MM0ALM and Jim/MM0CWJ.
Activity from this dangerous island will be primarily SSB on
all bands. QSL via direct to G0HXN.

EU-031. Operators IK8UND, IK8HCG and IK8TEO will join Virgilio, IC8OZM,
for the IOTA Contest. They will be signing IC8OZM from the
Island of Procida (IIA NA-002 and MI-080). QSL via the home
callsign.

EU-078. Members of the Radio Club Girona will activate Isla Meda Grande
(DIE E-001, DME-17199) as ED3MED on June 19th. Their activity
will be during the Spanish Islands Contest (D.I.E.) on 40 meters
CW/SSB. Operators mentioned are: Josep/EA3GM, Rafael/EA3QA,
Mai/EA3EGC and Miquel EC3AMR. QSL via EA3RCG (QRZ.com).

EU-138. Bernd, DL8AAV, will be active as SM7/DL8AAV/p from Aspo Island.
He is here on vacation until June 24th. Activity will be on
HF and SSB. QSL via the Bureau to his home callsign.

EU-171. Jakob, OZ7AEI, will activate the following islands in this
IOTA group on June 16th: Jegindoe (Danish Island Award NJ-006),
Ageroe (DIA NJ-018) and Mors (DIA NJ-002 and the Sillerslev
Lighthouse ARLHS DEN-064). He will sign OZ7AEI/p and his activity
will begin around 0700z, on 40 and 20 meters. QSL via his home
callsign, direct or by the bureau.

SA-039. Read the story about the 2005 CW5R DXpedition to Lobos Island
at: http://www17.ocn.ne.jp/~iota-ja/newpage3cw5r.html

SA-058. The Association of Radioamateurs of Venezuela and the Grupo DX
Caracas are pleased to announce that they are organizing an IOTA
DXpedition to the Carabobo State Islands (Specific island will
be announced shortly), to celebrate the 2005 Venezuelan Navy
Day. Look for them to sign YW4C, July 7-10th. Activity will be
on HF (SSB/CW/Digital) and 6 meters VHF (FM). Grid Locator: FK60.
QSL only via W4SO (Please, no USA stamps. Cards are verified
and mailed from Venezuela.)

KH2, GUAM. Yoshi, JE2EHP, will be active from Guam (OC-026) as K1HP/KH2
from June 17-19th. Activity will be on 160-6 meters CW/SSB. QSL via the

Bureau to JE2EHP.

LIGHTHOUSE ACTIVITY.....
Alfredo, IK7JWX, is expected to activate some new lighthouses in July and August for the WAIL, ARLHS and WLOTA Awards. The callsigns to be used are IK7JWX/P and IR7LH/P. Activity will be on 40/20/15 meters CW/SSB/RTTY/PSK31. Names of lighthouses and specific days were not provided. QSL via IK7JWX by the bureau. NO e-QSLs.

Ten members of the Starosherbinovskaya Amateur Radio Club were operating from the Lighthouse "Sazalniksky", ERU-174 for ARLHS and RLE-026 for RLHA (Russian Lighthouse Award), this past weekend (June 11-12th), using the the club callsign RW6AWW/p. They were expected to run both CW and SSB with two stations on the air. QSL via RW6CW.

LX, LUXEMBOURG (Also PA). Dennis, G3PNF, will be active as LX/G3PNF now through June 16th. Activity will be on 40/20/15 meters using Pro-Am whip dipoles. His suggested frequencies are: SSB - 7080 and 14180 kHz; CW - 7027, 14056 and 21056 kHz. QSL via his home callsign, direct or by the bureau. Look for him to be active as PA/G3PNF from the Netherlands between June 18-22nd.

QSL INFO AND NEWS.....
4U1ITU QSL INFO/STATUS. Jerry, N4JF, received the following message from Patrick, F6IRF, who was recently active from 4U1ITU and according to Attila, OM1AM, station manager: "As per club General-Assembly decision it has been decided that - considering the fact that LoTW is now operational and giving full satisfaction, one bureau card will not be sent anymore and systematically for each QSO. All QSOs have now been uploaded to LoTW, and we encourage you to use this system. - we will of course continue to reply to all bureau and direct cards, and to special requests like SWLs, but at the moment the backlog remains important and the manpower very limited..."

QSL CT6OO via CS1GDX,by the Bureau or direct to: P.O.Box 1156, 2736-996 Agualva, Portugal. Activity was to celebrate the Portugal Day Contest and the International Meeting CLube Fiat 500-600. Visit the Web page at: http://www.clube600500.com/

Ant, IZ8CCW, reports that he received the YE3K QSLs from IT9EJW's print shop. He states that all QSL cards are prepared and will be going out this week. To see the status of your QSL, visit the following Web page: http://www.mdxc.org/iz8ccw/ye3k.htm
All QSLs not requested via direct were send out June 11th via the bureau.

Zik, YT1HA, reports that QSL cards for 5Z4YT1CS are printed and are ready for sending. All stations who send their QSL direct will be returned the same way. QSLs are also "OK" via the bureau. For direct cards, QSL via YT1CS, and the address is: Miroljub Stosic, Jugoslovenska 70, Surdulica 17530, SERBIA and MONTENEGRO.

SILENT KEYS.....
*George, VK5ALS, reports that Don, VK3DZM, became a Silent Key (SK) on June 4th. Don was a very keen, well-known and liked operator on the 80 meters DX Phone scene for many years who will be sadly missed by all of his many amateur friends, his friends in general and his family.

*OPDX was informed that Eddy, FK8CR, became a Silent Key (SK) on June 8th. Eddy, who was active for many years, was on the first IOTA DXpedition to Chesterfield Island (FK5C) and on Matthew Island (FK5M).

OPDX and its readers would like to send out our deepest sympathy to the families and friends of VK3DZM and FK8CR.

SPECIAL EVENT (YL Activity/Event). Look for the special event station TF3SYL to be aired between June 10-18th from Reykjavik, Iceland, and during the Scandinavian Young Ladies Radio Amateurs (SYLRA) meeting that will take place between June 12-15th. Delegates from 8 different countries will be attending. Unni, LA6RHA, is the President of SYLRA. QSL via the bureau to TF3VS or direct to: Vilhjalmur Sigurjonsson, Digranesvegi 18a, IS-200 Kopavogur, Iceland. For more info, please visit the SYLRA Web page at: http://www.qsl.net/sylra/tf3syl.html

SPECIAL EVENT. Members of the F6KWP ARS and their friends are expected to be active until Jume 20th from the border of Belgium and Luxembourg during the 2005 HamEuro. Look for the following stations on HF: TM7HAM, ON6HAM and LX7HAM. QSL for the three callsigns via F6KWP direct or via the bureau.

SPECIAL EVENT. To celebrate the 50th anniversary of the National French Ham Railwaymen Group (GRAC), look for special event station, TM5RAC, to be on the air between June 15-28th. QSL as per operator's instructions.

SU, EGYPT. Gab, HA3JB, will be active again as SU8BHI from July 1st to December 31st. He will be active on all bands using CW, RTTY, SSTV, PSK and some SSB during many of the major upcoming contests. QSL direct only via HA3JB: Kutasi Gabor, P.O. Box 243, H-8601 Siofok, Hungary. Logs will be available at: http://www.qsl.net/ha3jb

TI0, COSTA RICA. Members of the Radio Club of Costa Rica and a U.S team plan to be active as TI0HQ in the IARU Contest (July 9-10th) from the Costa Rican HQ as a Multi-Multi effort. They expected to have 3 or 4 stations on the air from different locations. Activity will be on 160-10 meters CW/SSB. QSL via TI0RC. Operators mentioned are: TI2MOT, TI2GBY, TI2JCY, TI4ZM, TI3TLS, TI2CCC, TI2VW, TI2KAC, TI3MAO, TI2DLL, W4BW, K4UN, W4KTR, N5VI and possibly K4PI.

TT8, CHAD (Activity/News). Pierre, TT8AMO, was heard this past weekend on 17/15/12 meters CW at various times between 0730-1730z. QSL Manager Dennis, PA7FM, reports that "ALL" TT8M QSL cards have been answered in the past week...except for a few "problem" cards. He is expecting the TT8AMO QSL cards from the printer in the upcoming week, and will start answering those immediately. He will try to have them all answered before the end of this month. TT8AMO will be in Chad for about one more week

before leaving the country for a well deserved break. He will try to be active as much as possible in this last week. Dennis states that if you have worked him on some bands...please do NOT work him again....and again. It will keep others from working him for a 'new one'. TT8M will return to Chad on the 16th of June. He will bring a 5 element yagi for 6m (UKSMG sponsored) and probably also a long yagi for 2m + amplifier. He will concentrate on 2 and 6 meters (also he will try EME when the moon is there at the right time). The end of the operation is still 'open' but it's not sure if Pierre, TT8AMO, will return to Chad after his break. The complete logs and a look at the photo QSL is available at the following Web page at: http://www.pa7fm.nl

VK9C & VK9X, COCOS-KEELING AND CHRISTMAS ISLANDS (Correction/Updates). It seems your editor had a mix-up of operators for this upcoming operation. Rex, VK7MO, will activate both of these islands (not David, VK2CZ, as mentioned in OPDX.712 last week). Look for him as VK9CMO from Cocos-Keeling Island, August 18th to September 1st. Also, look for him as VK9XMO from Christmas Island, September 1-22nd. These operations are soley 2m EME using the digital modes (no HF), and will be staged from the Christmas Island Cricket and Sporting Club (same venue as for VK9XD in 2003/2004). This is the first ever known attempt at EME from either of these Zone 29 islands!! Of course during this period, terrestial 2m is also possible, and given the 'hot' Hepburn propagation in this part of the world, it is expected that opportunities to VK6 exist. YB0/YB1/9V1/4W3 are also within plausible range, but not anticipated. QSL via VK7MO direct. Visit the following Web page for more info at: http://www.qrz.com/vk9xmo

VK9X, CHRISTMAS ISLAND (Also VK9C). David/VK2CZ and Charlie/W0YG will go to Christmas Island on October 22nd. They will be active from October 23rd until November 6th. They plan to be active as VK9XD in the CQWW SSB Contest that next weekend. Before and after the contest, Charlie will be on the air as VK9XG (mostly on RTTY and CW), and David will be active as VK9XD. David will return to Australia on November 7th. On November 7th, Charlie will move over to Cocos-Keeling as VK9CG and be active starting November 8th on the same bands as from Christmas Island. QSL all contacts with VK9XG and VK9CG direct only to W0YG. QSL VK9XD via David's QSL Manager VK6NE.

VP2V, BRITISH VIRGIN ISLANDS. Glenn, WB9NDM, will be active as VP2V/WB9NDM from the Island of Tortola (IOTA NA-023), June 22-24th. Activity will be between 1300-1500z primarily on 20 meters SSB (14235 kHz). If conditions permit, he will also activate 17 and 15 meters. QSL via his home callsign, direct or by the bureau.

YK, SYRIA. Hikmat, YK1AM, is now active from Damascus and was heard this past week on 14222 kHz after 0300z. He is the son of Rasheed, YK1AA, who at one time was the only active ham in Syria for years. Rasheed became a "Silent Key" (SK) in 1991.

The transformer was built by the Magnetic Controls Division of ADC Telecommunications. The numbers you cite are their 10-digit part number, 3-19470-7438. That is the key number you need to research this item. (7438 is NOT a date code, it's the last four digits of the part number.)

We sold the Magnetic Controls Division to Onan in the mid-80's, so you might try to contact Onan and have them dig back in the archives for a print.

This coming Sunday....

+++ Now even more Buyers Parking !!!
Thanks to TKT we have use of their new parking lot
across Albany St from the SWAPFEST !!!

!! ** More Buyers PARKING is available ** for details see
http://web.mit.edu/w1gsl/Public/flyer

*** !!!! In our Traditional GARAGE and the adjacent lot !!!! ****
so come rain or shine or super heat the Flea is on !!!

********* $1 buyers discount with hardcopy of this notice ********

COMPUTERS - ELECTRONICS - HAM RADIO - COMPUTERS - ELECTRONICS - HAM RADIO

FLEA all SUMMER at MIT
Sunday June 19th 2005
9AM-2PM

Come to the city for a great flea - plenty of free parking.

MIT's electronics and ham radio flea will take
place on the third Sunday of each month this summer,
April thru October.

There is tailgate space for over 600 sellers and
free, off-street parking for >2000 cars!

Buyers admission is $5 (you get $1 off if
you're lucky enough to have a copy of our ad)
and sellers spaces are $20 for the first and
$15 for each additional at the gate.

The flea will be held at the corner of Albany and
Main streets in Cambridge; right in the Kendall
Square area from 9AM to 2PM, with sellers set-up
time starting at 7AM.

SEASON PASS + Advance Seller Discount

A sellers discount season pass is available which
offers a 30% discount. By prepaying you get a
discount and earlier admission. See the registration form.

*** Attention Sellers ***
Prepaid vendors.. Season Pass or monthly,

will be admitted FIRST.
Separate lines will form prior to gate opening
for prepaid and nonprepaid vendors

!! RAIN or SHINE !! Have no fear of rain, a covered
well illuminated tailgate area is available for all
sellers (6'8" clearance).

Talk-in: 145.23- (PL 88.5) W1BOS/R and
W1XM/R-449.725/444.725 (PL 114.8/2A).

2923. Automatically receive WeFAX?

Newsgroup: rec.radio.amateur.misc
Date: 2005-06-14 23:38:00 UTC

Hi. I am a recently licensed HAM and I have a question. Is there an easy, fairly inexpensive way to automate downloading WEFAX images and printing them out?

I have a standalone PC workstation. I would like to connect an (hopefully) inexpensive receiver and have it automatically pickup WEFAX images. If it could then print the WEFAX image for my area to a printer periodically throughout the day, that would be great.

What type of radio would I need? What WEFAX software should I use? Has anyone done this and have a write up?

Iï¿½m PC savvy (app. dev.), but am still pretty radio-inexperienced. Thanks for your help.

Well, you can try MultiPSK at http://members.aol.com/f6cte/index.htm

The program covers many digital modes, and includes HF Fax. I haven't tried it on that mode, so cannot comment on it's performance.

There is still some WEFAX operations on HF, but they are getting harder to find, as satellites have pretty much taken over. I used to spend a lot of time decoding them!

May I suggest using Google and searching for "WEFAX"? I would think that would return a great deal of information!

73 & good luck

Hello,

I'd like to invite you to work with station

SN0BSD

that will work from Cracow on 17,18,19 of June
due to MeetBSD 2005 conference (http://2005.meetbsd.org/).

Operators that will handle this:

Lukasz (SQ9JTI), Przemek (SQ8JIV), Dawid(SQ6EMM)

we will work on 80,40,20,10,2 bands (unfortunatelly we have
only 80m dipole on HF bans).

All QSO's will be confirmed with cards.

We will work thanks to help of PROIDEA organization
(http://www.proidea.org.pl/) and ham club SP9PKZ, which
help us to get a callsign.

Details will be on http://hamradio.pl/sn0bsd/

on behalf of SN0BSD
Dawid (SQ6EMM)

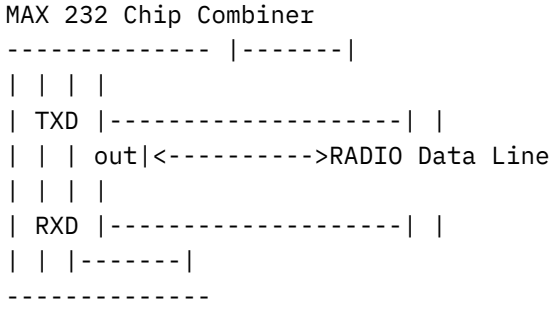
2927. Programming a Kenwood TK-690 VHF Transceiver

Newsgroup: rec.radio.amateur.misc
Date: 2005-06-15 12:52:01 UTC
From: pinpassion <mjdrum@comcast.net>
Message-ID: <1118839921.955343.242950@g43g2000cwa.googlegroups.com>
Source record: 51449

Hi Gang,

I am trying to work a circuit that I can use to
program a VHF receiver. I'm going to use the Maxim
MAX232 IC to do the TTL to RS-232 voltage conversion,
and this is very common. The trick I have to accomplish
is to take the TXD and RXD (transmitted data/received data)
on the TTL side of the chip, and combine it into 1 line
going to the radio.



Most interfaces are full duplex and they don't split up
the TXD and RXD signals. On this particular Kenwood radio,
they do. There is still data beng sent to the radio, and
data received from the radio. It is just using one line as
the pipe for both data lines. I was thinking two transistors
and a blocking diode. Anybody have any ideas? Kenwood sells
a cable that does this, but it's expensive and I am trying to
find a homebrew solution. All I need is the combiner circuit.
I already have the schematic for the MAX 232 circuit. This is
5 volts TTL. The radio is a Kenwood TK-690H.

Thanks in advance for any help.

Mike

2928. FCC fines K1MAN $21,000

Newsgroup: rec.radio.amateur.misc

FCC fines K1MAN $21,000
from ARRL
Website: http://www.arrl.org/news/stories/2005/06/14/100/?nc=1 on June 14, 2005
View comments about this article!

http://www.fcc.gov/eb/FieldNotices/2003/DOC-259301A1.html

NEWINGTON, CT, Jun 14, 2005--The FCC has issued a Notice of Apparent Liability for Forfeiture (NAL) proposing to fine Glenn A. Baxter, K1MAN, of Belgrade Lakes, Maine, $21,000. In the NAL, released June 7, the FCC alleges that Baxter has violated several sections of the Part 97 Amateur Service Rules. The list includes rules proscribing interference with ongoing communications, transmitting communications in which he has a pecuniary interest, failure to provide information the FCC requested, engaging in broadcasting, and failure to exercise control of his station. In the NAL, the FCC's Enforcement Bureau recites a litany of correspondence over the past several months to and from Baxter--a registered professional engineer and executive director of the American Amateur Radio Association (AARA).

"In response to numerous complaints of deliberate interference caused by transmissions from Mr Baxter's Amateur station K1MAN to ongoing radio communications of other stations, including stations participating in the Salvation Army Team Emergency Radio Net, the Bureau issued a Warning Notice to Mr Baxter on September 15, 2004," the NAL states. "The Bureau requested information from Mr Baxter with regard to the method of station control and what action, if any, was being taken in response to the complaints of interference."

The FCC said its Warning Notice also recalled a written warning dated April 14, 2004, advising Baxter that enforcement action would be taken if he failed to correct the deliberate interference attributed to his station and if he continued to use his station for pecuniary interest by advertising his Web site.

Baxter responded to the FCC Warning Notice on October 14, 2004, stating "no corrective actions are necessary at K1MAN" and that his means of station control "is in full compliance with all FCC rules" and that K1MAN "is in full compliance with all FCC rules, state laws, and federal laws."

According to the FCC, Baxter concluded his reply by saying, "I encourage you to take 'enforcement actions' and look forward to seeing you in court(s)."

Calling Baxter's response "insufficient," the FCC issued a second Warning Notice last October 29, spelling out his "obligations as a licensee to furnish the information requested by the Bureau." The Warning Notice also

reported the receipt of two more complaints of deliberate interference allegedly caused by K1MAN. The FCC gave Baxter 20 more days to provide information regarding the identity of the control operator and his method of station control on the dates and times specified in the recent interference complaints.

The FCC says Baxter responded last November 2 to indicate that his previous response had "provided all the information required by FCC rules and by federal law." He did not offer any information regarding the identity of the control operator or the method of station control, the FCC added.

The NAL also cites monitoring of K1MAN by FCC personnel and asserts that last November 27, "K1MAN began transmitting on top of ongoing communications at 5:54 PM EST on 3.890 MHz, disrupting the communications by other licensees." It alleged similar occurrences on December 8 and March 31.

FCC personnel from Boston inspected Baxter's station last November 30. During that visit, the FCC said, Baxter demonstrated that he could control his station's transmitter using a telephone interface. "Mr Baxter claimed that he monitored the station from a mobile receiver when not at the transmitter and that he could control the transmitter through a land-line or cellular phone," the NAL recounted.

The FCC said last December 1, K1MAN transmitted "a pre-recorded program lasting nearly seventy minutes, which consisted of an interview by Mr Baxter with Mr Jeff Owens." The Commission contends that the transmission "consisted of a lengthy broadcast of the telephone interview with Mr Owens" during which, it says, Baxter explained how Owens could invest in franchises of Baxter Associates--a management consulting, executive search and executive career management enterprise--and how Baxter planned to market franchises of Baxter Associates.

"Nothing in the program related to Amateur Radio, and no station call sign was given until the conclusion of the seventy-minute program," the FCC stated. The Commission said the transmission constituted a broadcast and an impermissible one-way transmission.

On December 19, 2004, the Commission asserts, K1MAN "broadcast transmissions of an apparently defective pre-recorded audio tape, which resulted in the repeated transmission of a nine-word phrase, and segments thereof, without any intervention of a control operator and without the identification of the station's call sign." The transmission lasted some 46 minutes, the Commission reported, noting that Baxter's station shut down abruptly in mid-sentence. The FCC said this incident indicated that the control operator did not have sufficient control over his station.

The Commission says on March 30, 2005, on at least four occasions on 3.890 MHz its monitoring personnel observed K1MAN advertising the AARA Web site, which "offers various products for sale." It concluded that those mentions and the transmission of the Baxter Associates interview violated FCC Amateur Service rules "by transmitting communications regarding matters in which he has a pecuniary interest."

The FCC further concluded that Baxter failed to supply information it had requested in its warning notices of last September 15 and October 29. Baxter has 30 days to pay the fine or file a written statement seeking a reduction or cancellation of the proposed fine.

It's about time the FCC dealt with K1MAN!

I worked for Microdyne for four years as a production tech and as an engineering tech. My last project was their RCB-2000 and DR-2000 series receivers. The RCB was a dual receiver with a combiner, while the DR was just a single receiver in the same case. Both had the same features and user interfaces. they ran on embedded NT and had 10/100 MHz Ethernet interfaces for complete remote control, or to store different configurations.

I'm still near Ocala, but I'm now 100% disabled and can only spend a few hours at a time in my shop here at home. Ocala is a nice area, but three of the hurricanes did a lot of damage here last year. The "Florida Greenbelt" runs across the back and one side of my property. It was so heavily wooded that you couldn't see any light between the trees. Now, there are more gaps than trees. Big pines were snapping about half way up and hitting the ground. They moaned and groaned for hours in the high winds, till they started snapping.

Hi all

A while back I used a Kenwood MC85 desk mic. It was the electret type which was able to cope with a wide variation in input level. I.e. I could sit up close or lean back in my chair and it sorted its own levels out. I found this very useful for late night ragchews, especially if I was typing or writing etc at the same time.
But, it packed up. I ended up with an MC60 as a replacement, which is a superb mic, but requires a constant distance between mouth and mic to maintain constant audio level to the radio.

I wish to buy another MC85-style "lean back in my chair" type. I don't want another MC85 due to the poor circuit design which led to my getting rid of it.

Years ago I spoke to some blokes who were using CB desk mics. I forget the make. Adonis maybe, but I might be wrong. They were singing the praises of these things and telling me they were far better than an MC85. They certainly sounded good and proved to be more reliable.

I want to try a CB mic with the trusty TS450. But from my experience I know that CB gear varies from reasonable quality to unbelievably bad. So thought I'd try and get some input from others experiences.

Anyone using one? What kind? How does it perform? How far can you remove yourself from the mic and it still controls its gain?

Thanks.

Jack sorry but mine isnt a CB desk mike but it is cheap and cheerfull and
seems to work quite well it's a Walton WM-308
OKKK its the adonis rebadged but still it seems to do the job plus it has
all the extras like No Roger Bleep and doesnt have an auto "10-4 good buddy
" loop on it

Hi Jack,
I don't have any CB mics. But I do have a Pryme model PMC-200 Desk Mic
with built in 4 band EQ. It also has UP/Down, Scan etc. buttons. I like it.
I believe it is the same as the Adonis but at about half the price. It is
designed to work with Kenwood, Yaesu or Icom rigs just by buying a different
mic cable that plugs into the back of the mic (no wiring needed). But if you
are using a mobile radio plan on wiring the mic.

Thanks for the very few senisble recommendations. I'll look those models up and have a think.

Funny though, I posted this to 3 ham groups. UK, Australia and the global (ie USA) groups.
Global got two sensible replies. Aus got a sensible discussion started. And UK started a lengthy thread trashing CBers and foundation license holders.

Does every thread have to do this? Do UK hams always have to project a global image of being a bunch of bicker pedantic wankers?

Just a thought. Carry on.

Yes, Jack. Absolutely EVERY thread started in uk.radio.amateur, after
only two or three 'overs', degenerates into trashing CBers and all those
whose are deemed never to taken the 'proper' Radio Amateurs' Examination
(not just those with Foundation Licences). It's all really a bit sad.
Ian.

I think you may have to abbreviate the word w*nk*r!!!...or maybe use t*ss*r!!!...as this could sometimes be interpreted as someone who tosses pancakes...

If you really wanted a sensible answer why on Earth did you post to this NG???!!!...

At this point I will give you a few sensible pointers...

Myself...I have a MD-100A8X...I also have a MD-200A8X...I have 2 MD-1c8's...I have a Heil headset pro plus(with both hc4 and hc5 inserts)...I have lots of standard mic's...I also have a W2IHY 8 band equaliser...

So here's the crux...you wanna sit back and relax put on the headset...use a foot-pedal...and the chill out zone is yours...you will still have 2 hands free to do whatever it is you wish to do with 2 free hands...

Does the tenth word in the first paragraph have any relevance to your
last paragraph?

Yes Ian, it is sad. Makes you wonder if a moderated group might be worthwhile. I am not normally a fan of moderation as I support free speech. But a group with an "ist" filter might be good. (sexist, racist, CBist, license classist). Some guys tried on yahoo, but ended up with a collection of separate and poorly supported cliches.

I co-run the UK CB Radio yahoo group and take the view that all messages are allowed, no matter how confrontational, so long as they are not abusive or way off-topic. And it works well. In 3 years we've only have a few off topic spammers to warn off.

These Turner mics have good compression, nice audio, and are built like
tanks:
Super Sidekick: http://www.eham.net/reviews/detail/2714
+3: http://www.eham.net/reviews/detail/3116
+3b: http://www.eham.net/reviews/detail/628

A Sadelta Echo Master Plus Classic (don't laugh) can sound very nice. I
remember doing a test with some friends one night, hooking up a Cobra
Dynamic Plus, Ham Master 4500, Caroline 4200, Sadelta Echomaster Plus and
a Turner Expander 500 one after the other without saying which mic was
which and everyone voted for the Sadelta.
http://www.eham.net/reviews/detail/4002

There's an Adonis listed here. My mate had one of these - it sounded OK
but nothing spectacular and definitely not worth the money.
http://www.eham.net/reviews/products/18

Thanks for that. Turner seems to be getting the thumbs up from everybody.

I used to have a Sadelta, and might try one again if I can get the basic model, without echo etc. Standard of build felt a bit cheap, but it worked well, and was value for money.

I have a 3 volt lithium memory back up battery which I think may be on its
way out. BUT.... its still reading 3.11 volts. Someone has told me to expect
a higher voltage than indicated. Is that right?
I'm going to replace it anyhow, but wondered what the story was.

Did you measure it under load?

Put a resistor across it (say 220 ohm) and see if the voltage drops
appreciably.

If so the battery's dead.

Peter

I use a Piezo DX-344 desk mike with a Alinco DX-70TH.
I've had many good reports on the transmitted audio.

As far as gain goes I keep it quite low, normally on the 2nd notch on
the slider, thats plenty for talking at a normal level and far from
ever overdriving the radio.

Measure it still connected within the circuit and
with the DC power switched off. If it still reads
3.11 volts then it's probably OK. I start to worry
when they read around 2.80 volts or if they are more
that 5+ Years old.

Also, BE VERY CAREFULL if the radio is a later model
Icom or similar Icom product.
Many Icom HF and VHF/UHF radios which were made
in the 1980's had their internal Op-system placed
onto volatile RAM. Bottom line is if you disconnect
the soldered in lithium coin cell of an older Icom radio
you will lobotomize the CPU and you will have to send your
Icom back to the facory for re-programming, assuming they
will still service it at all. Yaesu and Kenwood are NOT affected
by this problem.

DXCC COUNTRY/ENTITY REPORT: According to the AR-Cluster Network for the week of Sunday, 12th/June, through Sunday, 19th/June there were 212 countries active. Countries available: 3A, 3B8, 3B9, 3D2, 3DA, 3V, 3W, 4J, 4L, 4S, 4X, 5A, 5B, 5H, 5N, 5R, 5T, 5U, 5V, 5W, 5X, 5Z, 6W, 6Y, 7Q, 7X, 8P, 8R, 9A, 9G, 9H, 9J, 9K, 9L, 9M2, 9M6, 9Q, 9V, 9Y, A2, A3, A4, A5, A6, A7, A9, AP, BV, BY, C3, C6, C9, CE, CE0A, CE9, CM, CN, CP, CT, CT3, CU, CX, CY9, DL, DU, E3, EA, EA6, EA8, EA9, EI, EK, EP, ER, ES, ET, EU, EX, EY, EZ, F, FG, FK, FM, FO, FP, FR, FW, FY, G, GD, GI, GM, GU, GW, HA, HB, HB0, HC, HI, HK, HL, HP, HR, HS, HV, HZ, I, IS, J5, J8, JA, JD/o, JT, JW, JY, K, KG4, KH0, KH2, KH6, KL, KP2, KP4, LA, LU, LX, LY, LZ, OA, OD, OE, OH, OH0, OK, OM, ON, OX, OY, OZ, P2, P4, PA, PJ2, PY, PZ, S5, S7, S9, SM, SP, ST, SU, SV, SV5, SV9, T7, T8, T9, TA, TF, TG, TI, TK, TT, TU, TZ, UA, UA2, UA9, UK, UN, UR, V2, V3, V4, V5, V7, V8, VE, VK, VK9N, VP2M, VP2V, VP5, VP8, VP8/h, VP9, VQ9, VR, VU, XE, XU, YA, YB, YI, YL, YN, YO, YU, YV, Z2, Z3, ZA, ZB, ZC4, ZD7, ZD8, ZK1/s, ZL, ZP, ZS

* PLEASE NOTE: The report "could" contain "Pirate/SLIM" operations or more likely a "BUSTED CALLSIGN". As always, you never know - "Work First Worry Later" (WFWL).

4X, ISRAEL. Look for 4X0WV to be active once again in the 2005 CQWW SSB Contest (October 29-30th). The operator is West Virginia's ARRL Section Manager and Potomac Valley Radio Club (PVRC) contester, Hal, W8HC (ex-KC8FS). He will return to Israel in October for a third consecutive CQWW SSB Contest from the IARC Club Station 4X4REM in Reut, located

between Tel Aviv and Jerusalem. Joining Hal this year is Jerry, K8OQL, another PVRCer from West Virginia. They will operate as a Multi-Single entry using 4X0WV during the contest. The special callsign was used last year by Hal and Dave, WA8WV. QSL to W8HC or via the bureau.

5H, TANZANIA. On Saturday afternoon there was a meeting of the National Capital DX Association at (Frank) W3LPL's QTH, and Ralph Karhammer, VK4VB (aka 5H3RK), announced that he would be leaving Sunday, June 19th for Tanzania. Look for him on 40/20/15 meters CW. QSL via: Ralph Karhammer, 1306 34th Street NW, Washington, DC 20007-2801.

9J, ZAMBIA. James, 9J2CA, has been active recently on 20/17 meters CW. Watch these bands around 0430z and between 1400-1600z (maybe as late as 1830z). His QSL Manager is Phil, G3SWH. Phil states, "I have now received all of James' historic logs and the QSL cards from the printers."

A6, UNITED ARAB EMIRATES (News from ON5NT). Ghis, A6/ON5NT, informs OPDX that about 10 new A61-one-letter-suffix callsigns/licenses have recently been issued to local operators. OPDX has seen QSNs for A61M, A61Q and A61R. Look for A6/ON5NT to be active from Dubai until the end of June and then again during August and September. Ghis will spend his holidays at home in Belgium during the whole month of July. A multicolor-picture of A6/ON5NT QSLs will be ready on his return home in July. All cards received as of now will be answered in July. He tells OPDX that he has made 9000 QSOs.
ADDED NOTES FROM GHIS. Ghis provides the following updates on the operators in the World Food Programme:

ST, Sudan: Dane/S57CQ (aka ST2T) has left Sudan. He might be back there later in the year.
TT8, Chad: Michael, PA5M (TT8M), will return to Abeche, Eastern Chad around June 20th for about another month's stay and will then be leaving Chad. As soon as Michael has arrived, Pierre, HB9AMO (TT8AMO), will be leaving Chad. During the middle of last week, Pierre was up to 10000 QSOs.

B*HQ, CHINA. The Chinese Radio Sports Association (CRSA) HQ stations will be on air during the 2005 IARU HF World Championship. Nine well-equipped contest stations will sign 5 different special callsign on 160-10 meters, CW and SSB. They want to produce the best score ever done in China. Look for the following stations to be active:

Callsign	Band/Mode	Host Station	Operator
B2HQ	160m/SSB	BA2QA	BD2QA
B2HQ	160m/CW	BA2QA	BD2QA
B7HQ	80m/SSB	BA7NI	
B4HQ	80m/CW	BA4RF	BA4RF
B4HQ	40m/SSB	BY4RSA	BD5RV/4
B1HQ	40m/CW	BY1PK	BA1RB
B7HQ	20m/SSB	BA7JA	BA7JA
B4HQ	20m/CW	BY4BZB	BA4ED
B1HQ	15m/SSB	BA1AJ	

B7HQ 15m/CW BD7IPD BA7NQ
B4HQ 10m/SSB BA4RC BA4RC
B3HQ 10m/CW BY3CC BA3CE

ADDED NOTE: Two awards are available: CRSA HQ Award and the CRSA 0-9 District Award. Please contact BA4RF for details at: ba4rf@arrl.net

CY9SS, ST. PAUL ISLAND. The CY9SS operation still continues in spite of some early related weather problems. Reportedly, there are more operators on the island now. This past Sunday activity was heard on 160/40/20/15/6 meters some SSB and CW. There seems to be some confusion on the QSL address. There are three different addresses for VY2SS.

HamCall: Robert Robertson, #57 Tranquility Land, Bloomfield,
PE C0B 1E0, Canada
QRZ.com: Robert Robertson, #57 Tranquility Land, Oleary,
PE C0B 1E0, Canada
CY9SS
Web Page: Robert Robertson, RR#3, Oleary, PEI, Canada C0B 1V0

Since the CY9SS operation has a Web page with an address, OPDX suggests to use that address. However, OPDX would think all three addresses are "OK", because "Prince Edward Island" (PE or PEI) is not all that big.

GREEK (J4) ISLAND TOUR. Antonio, IK8VRH, and possibly others have announced their "2005 IOTA SV Tour". Activity will be on 20/17/15 meters CW/SSB/RTTY. QSL via IK8VRH. The proposed schedule is as follows:

Dates	Greek Island	Reference Numbers	Callsign
August 12-14th	- Spetses Island	EU-075 LH-GRE063	J48RH/P
August 16-18th	- Dokos Island	EU-075 LH-GRE058	J48RH/P
August 20-22nd	- Kityra Island	EU-113 LH-GRE120 *	J48RH/P
August 24-26th	- Sapientia Island	EU-158 LH-GRE116 **	J43RH/P

* Or possibly Elofonnisos Island (NO LH)
** Or possibly Skiza Island (NO LH)

HAMRADIO FRIEDRICHSHAFEN ACTIVITIES. Frank, DL4KQ, provides the following announcements:
The GDXF will honor Mrs. Bharathi, VU2RBI, and the NIAR VU4 DXpedition team with an "Award of Appreciation" at Hamradio Friedrichshafen. The ceremony will take place on Saturday, June 25th, 4:00 PM, Hall A2, Room 2 and will be attended by representatives of the Indian Embassy and the Indian Ministry of Communication & IT.

Following the ceremony and as a part of the GDXF program, Mrs. Bharathi will give a lecture about the VU4 DXpedition.

VU2RBI, VU4 DXpedition members and more VU hams, which operated during the Tsunami disaster from the Nikobar Islands, can be visited at the NIAR/GDXF booth during the Hamradio exhibition.

GDXF is glad to announce that a special VU4 QSL service will be available at their booth on Friday, June 24th, 3-4:00 PM and Saturday, June 25th, 1-3:00 PM.

Furthermore, the GDXF HAMRADIO program will include further presentations:

Following the VU4 lecture, Bob, KK6EK, will give a report about the planned K7C, Kure Island Dxpedition.

Already on Friday afternoon, 4:00 PM, Hall A2, Room 3, Andrea, IK1PMR, will give a presentation about the February 2004 6O0CW DXpedition to Somalia.

GDXF hopes to have arranged an attractive program and would be pleased if many visitors visit their booth.

ILLW UPDATE. Mike, GM4SUC, reports that as of Sunday, June 19th, there are already 164 stations in 31 countries that have confirmed their participation in the 2005 International Lighthouse/Lightship Weekend, August 20-21st. A list of the stations with QTH and QSL information can be found at: http://illw.net/2005_list.htm
If you want to join in the fun during the ILLW, please listen for other lighthouse or lightship stations. They wish to remind non-U.S. CW stations to operate above 14025 kHz to allow access by Advanced Class U.S. amateurs. Operations below 14225 kHz just eliminates the potential for some U.S. hams to work the LH stations. Last year there were 376 lighthouse/lightship stations active during the ILLW. So come and join them in the fun during the ILLW and make a total of over 400 lighthouse/ship station contacts. An entry form can be found on the web page at: http://illw.net

IOTA NEWS.....
AS-117. Operators JA0HNA, JE0OMG and JH0OLD plan to be active as homecall/p from Awa Island (JIIA AS-117-062) Niigata prefecture, from July 8-11th. QSL via their home callsigns, direct or by the Bureau. Visit the JIIA Award Web page at: http://www3.ocn.ne.jp/~iota/newpage61.htm

AS-133. Operators Jacques/ON4AJV and Willem/ON6TZ plan to be active as XU7TAS from Koh Tas Island between October 30th and November 10th. Activity will be around the clock on all HF bands, CW and SSB. QSL via ON4AJV (QRZ.com).

AS-147. Look for 7L3ATQ/8 to be active from Teuri Island (JIIA AS-147-008) Hokkaido coast Island, now through June 21st. QSL via the home callsign, direct or by the bureau.

EU-020. Martin, SM0DTK, will be active as SM0DTK/1 from Gotland Island now through August 28th. QSL via his home callsign, direct or by the bureau.

EU-093. Steve, G0SGB, will be active as EA5/G0SGB from either Tabarca Island (DIE E-006) and/or Benidorm Island (DIE E-007), June 20-30th. Look for him primarily on SSB on 14264 kHz daily.

QSL via his home callsign, direct only.

EU-189. Activity by MS0IRC/p from Rockall Island took place Thursday, June 16th. Some 262 QSOs were made, enough for the operation to meet IOTA qualification requirements. Operation was cut short due to weather.

NA-057. Operators Rick/W7AV, Darleen/K6JEN and Bob/KB7TX will be active from Utila Island (Grid EK66), Honduras, now through June 30th. Callsigns were not mentioned but will probably be HR9/homecall. Their activity will be on 40-15 meters CW/SSB/PSK. They are expected to concentrate on 6 meters when and if the band is open. There will be a breakable CW beacon (HR9/W7AV) directed towards the U.S. on 50110 kHz. QSL to their home callsigns.

NA-058. Tad, WF4W will be active as WF4W/4 from Jekyll Island from October 28th through November 2nd including a Single-Op effort in the CQWW SSB Contest. Outside of the contest, Tad will operate on the suggested IOTA frequencies, mostly CW, 80-10 meters including the WARC bands. There is a possibility of some SSB and RTTY operations. QSL via his home callsign, direct or via the Bureau.

J3, GRENADA. Remember to look for Dick, K5AND, as J3/K5AND on June 24th. He will be on the Island of Grenada (IOTA NA-024) until July 3rd. Also along on the trip are Arliss/W7XU, Holly/N0QJM and Johan/ON4IQ. Activity will be on CW/SSB on 6 meters (50107 kHz) and 2 meters. There will also be a 2m EME operation using the JT65a digital mode. You can make EME skeds on the following sites: http://www.dxers.info
http://www.chris.org/cgi-bin/jt65eme
NO SKEDS until they arrive on the island!

KH5, PALMYRA ISLAND (Postponed). Kimo Chun/KH7U and Patrick Guerin/NH6UY announced that their working trip to Palmyra, KH5, from June 28-30th, has been postponed. The announcement stated that their airplane seats were needed for other passagers. However, they are expected to go there for a few days later in the year, perhaps in a month or two. They state, "As always, operations are never predictable as we have specific tasks to complete and a somewhat short time to do them in. Generally, operations occur at local night time with the possibility of the hours at dawn and later. It is pretty much the same time zone as Hawaii, KH6/KH7 (UTC minus 10h). A new announcement will be forthcoming when we know more."

KP2, U.S. VIRGIN ISLAND. Bob/W9UI and his wife Traudel/WD6CTL will be at Windwood on the Island of St. Croix from June 23rd to July 8th. Like the other SWODXAers going to St Lucia, they will be on the lookout for 6 meter sporadic E contacts. At other times, they will be on HF (or diving!). QSL both operations via W9UI (by the bureau or direct).

LA, NORWAY. Giovanni, IZ2DPX, will be active as LA/IZ2DPX/P from July 11-17th. Activity will be with a FT-817 on HF and 6 meters. QSL via his home callsign, direct or by the Bureau. Visit his Web page at:

http://www.qsl.net/ik2duw

NEW LIGHTHOUSE WEB SITE. Visit the new Web site for the "Worked All Italian Lighthouses Award" (WAIL) at: http://www.wail.it/
There are new rules and many new references numbers. Other lighthouse Web sites to visit are: http://www.arlhs.com
http://www.wlota.com

OE50, AUSTRIA. The Austrian Amateur Radio Society will take part in the 2005 IARU-HF-Championship on July 9-10th. Their Club station will be on 24 hours on all bands, and they will work in the Headquarters-Section. The callsign will be OE50A, and during the Contest they will give out the HQ-Multi: OVSV. QSL via the bureau or direct to:
OVSV-HQ, Eisvogelgasse 4/1, 1050 Wien, Austria.
ADDED NOTE: This year it is also possible to earn two diplomas:
1. The W-OE-XHQ Diploma: For this Diploma, you have to work OE1XHQ-OE9XHQ or OE50A on 6 different Bands/Modes.
2. The OE50-Diploma: Austrian Amateur Radio Operators are celebrating 50 Years State Treaty with the Special Prefix OE50 from Jan. 1, 2005, to Dec. 31, 2005.
In 2005, Austria celebrates the 50th anniversary of the signing of the State Treaty which established political autonomy for the Austrian Republic after occupation by the Allied countries - the USA, Great Britain, France and the Soviet Union.

OH0, ALAND ISLAND. Tomi, OH6EI, will be active as OH0Z during the IARU HF Championships Contest (July 9-10th) as a Single-Op/All-Band/High-Power entry (possibly CW or Mixed, not yet decided yet). QSL via OH5DX.

PJ2, NETHERLANDS ANTILLES. Operators Geoff/W0CG, Martin/W1MD, Joe/W9JUV, John/N4RV and Charles/K1XX will be active from Curacao as PJ2T during the CQ WW DX SSB Contest (October 29-30th) as a Multi-2 entry. QSL via N9AG. Visit the PJ2T Web page at: http://www.pj2t.org

QSL INFO AND NEWS.....
MORE ABOUT IRCS AND SWEDEN. The information about IRCs for HZ1EX by QSL Manager SM0BYD has now been changed for SM0BYD on QRZ.com. It seems that IRCs are NOT sold in Sweden, but accepted for postage but with "problems"...

QSL MM0DFV/p and GM0WRR/p (Activity this past weekend from WAB square NX13 at the Mull of Galloway Lighthouse [ARLHS SCO-144] in Dumfries and Galloway Council Area.) via the RSGB QSL-Bureau or direct.

R750/RK2/UA2, KALININGRAD (Special Activity/Event/Prefix). Victor, UA2FM, RK2FWA Trustee, wants to remind everyone that from June 20th to July 20th, UA2 hams will be active with a R750 prefix celebrating the 750th anniversary of Konigsberg - Kaliningrad. He mentions that this month is a great opporunity to get their awards without QSL cards. Please, see the rules at the following Web sites. (Don't be confused with the cyrillic letters, move your cursor down, the English text is also there.):

Kaliningrad - Koenigsberg 750: http://www.qrz.ru/awards/detail/948.html
Kaliningrad Districts Award: http://www.qrz.ru/awards/detail/37.html

Most of the callsigns are suffix based, but some may be different. Please, do not send cards via Box 88 Moscow, since they do not cooperate with the SRR QSL bureau. Use the UA2 QSL Bureau address instead: UA2 QSL Bureau, ROSTO Technical School, ul.Ozernaya 31, Kaliningrad, 236029 Russia. Otherwise follow the operator's QSL instructions. Also, look for the UA2 Contest Club station, RK2FWA (aka RW2F), to be active signing R750KG during the above dates. Please, see QRZ.com for QSL info, or use the above bureau address.

SV9, CRETE. Tomaz, S59W, will be active as SV9/S59W on EU-015 between July 25th and August 14th. His activity will be limited, but he will be active in the RGSB IOTA Contest (July 30-31st) as a Single-Op/All-Band/ Low-Power entry. QSL via his home callsign.

T68, AFGHANISTAN. Johnny, LA5IIA, who has been active as T68G since March, informs OPDX that he will be working with UNICEF (Afghanistan) as a Telecom Officer until March 2007. He mentions that he will do his best to stay active as much as possible with an emphasis on CW, the WARC bands, low bands (He will do special effort towards North, Central and South America on 160-30m during winter season.) and some digimodes. However, he does state, "Be aware that power cut offs, unstable voltage, heavy thunderstorms and incredible man made noise makes it difficult to keep up a regular and steady activity." Johnny was heard this past week very active on 20 meters RTTY between 1230-2000z. His equipment is: FT-1000D, IC-706 MKIIG, ACOM 1000, R8 mulitband vertical, dipoles, 1/4 lmb vertical on 80m, inverted L on 160m and Pennant RX antennas for the low bands. QSL via LA4YW or via the info on QRZ.com. Visit his Web page at: http://home.broadpark.no/~johnnyj/YA8G/

TA, TURKEY (Also, IOTA op!). Look for Goran, YZ1SG, to be active (during his spare time) this week from Bodrum, Turkey, as TA4/YZ1SG, and also from Karaada Island (AS-098) as TA0/YZ1SG. Activity will last until June 29th. He states that he will use 100 watts and verticals. QSL is "OK" via the bureau or direct via his home callsign.

UA0, ASIATIC RUSSIA (New RRA!). Look for Andre/RA0CS/p, Slava/UA0AOZ/0 and Vlad/UA0ACG/0 to activate Toki Island (RR-14-05 new one, RDA: HK-15) located in the Bay of Sakhalin Group, June 24-26th. Activity will be on CW, SSB and BPSK31. QSL via their home callsigns. For details on the Russian Robinson Award (RRA), visit the following Web page at: http://hamradio.ru/rrc/AWARDS/rra_e.htm

V3, BELIZE. Jerald/K0BCN and Mike/WQ5C will be active as V31MX and V31MQ, respectively, from Caye Caulker (NA-073), between October 26th and November 1st. Look for V31MQ to operate in the CQ WW DX SSB Contest (October 29-30th) as a Single-Op/Single-Band/Low-Power entry (band TBD upon arrival). Outside of the contest they will be active on 20/17/15/12/10 meters CW/SSB/PSK. QSL via their home callsigns.

ZD9, GOUGH ISLAND. Larry, W1MLG, informs OPDX that Andy Repetto, ZD9BV, and his XYL, Lorraine, ZD9CO, are in Capetown, South Africa until September 2005. Lorraine required hospitalization, but she is now out and recovering. Andy is requesting/looking for a possible donation of a small rig that might be used for his return trip. He mentions that a possibility exists for a stop at Gough Island on the journey. He can be contacted in Capetown at the following local telephone number: 4613591

ZK1, SOUTH COOK ISLANDS. Tommy, VK2IR, will be active as ZK1IIR starting July 2-12th. Activity will be on all bands SSB from 40-6 meters. He is looking for a QSL Manager. His Email address is: vk2ir@optusnet.com.au

Thanks for the advise guys. I did measure it in circuit, and out. Same reading each time. I didn't measure under load which is a damn good idea and I don't know why I didn't think of that earlier :o)

Its over 5 years old, so I think I'll replace it anyhow. I'm getting some peculiar things happening with the display and this set is known for this when the battery goes low. Its a Yaesu TS711.

Hello,

we would like to thank all stations that were calling us,
unfortunately we were unable to respond to all of them, as
we've had huge QRM (S9 on 80m).

We've made 256 QSOs (what is very funny, as it is very nice
number for IT conference /2^8/).

Summary and photos are located under:

http://hamradio.pl/sn0bsd/

we wish you visit us.

QSL card is under construction, all QSOs will be confirmed.

Our work was possible thanks to PROIDEA organization
and ham club SP9PKZ, thanks!

As operators you could hear:

- Przemyslaw Frasunek (SQ8JIV)
- Lukasz Parysz (SQ9JTI)
- Robert Swiecki
- Dawid Szymanski (SQ6EMM)

on behalf of SN0BSD team

Dawid (SQ6EMM)
vy73!

Source record: 51295

Hi

I've got 2 hot hamfest finds so far this season and need documentation
both of them. If you have leads on schematics or mauals, I'd appreciate
hearing from you.

Here are the items:

1. A Heath HA-201A 2 meter fm amplifier. A schematic would allow me to
figure out how to re-bias this amp for linear service. Please note that
this is quite different from the HA-201 (without the "A" suffix) for
which there IS documentation at the BAMA site.

3. A Heath IB-1102 nixie based frequency counter. It's currently in
working condition but it triggers poorly at high frequencies. A
schematic / manual would allow me to re-adjust it / modify it for more
reiable opearation at > 100 MHz.
A kind member of rec.radio.amateur.eqipment was able to get me a
schematic for the similar IB-1101, and it will help some, but one for
the IB-1102 would help more !

The commercial sources for documentation on these 2 items are
asking very high (way more than the cost of the items themselves)
prices for the paper work.

Thanks in advance for any leads.

73,
Lenny W2BVH

"Under Load" means different things for different cells. Mem backup Li
cells are most often specd at micro-amps for current load. Excessive
current draw for Li cells can lead to immediate failure. In the area
of 2.5v, in-circuit means "Let's get it replaced now."

2975. 27.620 FM Repeater heard ! (new rare 'DX catch')

Newsgroup: rec.radio.amateur.misc
Date: 2005-06-22 18:40:19 UTC
From: SWL DX News <73varney@nosp.ucdavis.edu>
Message-ID: <a6b57$42b9b094$d1cc4e62$10819@snip.allthenewsgroups.com>

Exercpted from The KY4KY News : http://ky4ky.com/fyi.htm

(6/19/05) Floating Freeband (FM) Repeater On * 27.620 *

If you hear what sounds like a repeater outputting in the spectrum
between the 11 meter class D citizens band and the 10 meter
ham band, it's not an illusion. Rather it appears to be the creation
of some enterprising Freebanders who are operating this
latest, unlicensed repeater.

According to several reports received by Newsline, and others
posted to various Internet websites, the system in question
outputs on 27.620 MHz FM. It also seems to be located
not far from Pennsylvania's eastern most border.

But there is the interesting part. While it's not yet been
verified, the word on the street is that the input kind of floats
around the low end of the 10 meter ham band. There is some
speculation that the operators of this repeater monitor
the input frequency and move it when ham radio operators
running legal high power Morse come on the air on top of it.
At least there have been reports of strange announcements
which may be information to users as to where the input will next be found.

One Internet post describes this machine as one of a new
breed of Freeband roving repeater of the type first noticed
in the St. Louis area about two years ago. That is, those
who run these systems are physically moving the frequencies
and the geographic location of the machine to avoid detection
by ham radio T-Hunt squads and the FCC.

This is just the latest report in a string of 11 meter repeaters
that go way back to the early 1970's when
Freebanders - then called H-F'ers -- began tying together old
crystal controlled 11 meter AM transceivers as repeaters.
Most had outputs on channel 1 or 2 and inputs on CB Channel 40
or above. None worked very well and most were soon abandoned.

Note: We heard the "27.620 Machine" just before noon today in SE MO.
No word yet of they have a "QSL card address", although if they do this
\would be a RARE CATCH to confirm.

The Charleston and Little Rock freeband repeaters are linked
to business band repeaters and a seldom used ham repeater in one
case. There is a set up in Nashville where a repeater is cross
linked to repeaters in three other radio services.

OK.....

What SPECIFIC FREQUENCIES do they operate on then ??

Please provide your list of the same or a URL with info on the same.

Thanks!

Does anyone know of any good websites dealing with converting CBs to 10m amateur band?
Especially the good old PLL02a.

Start with this one; http://www.cbcintl.com/
Many articles where written for 73 Mag some 20 years ago on converting
Hy-gain type CB radios to 10 meter FM.
I have them all but it would be one heck of a job to scan.
Let me know if I can help.

It would be easier to find a 2950 then to convert a radio and be stuck
to "channels" in a VFO band.

Hi Jack,

Most of the mods are pretty simple and with the right radio involve simply changing a crystal. Not even that with some of the 02a's as the binary codes will easily reach 10 meters.

Now, if you want a challenge, try taking a CB down to 20 or 40 meters. Now you have to know some circiut fundamentals!

Good luck,
Al

"I still use my Cobra 148 GTL on 20 meters."

It was the PLL02a mods I was really interested in. Does anyone have the
details?
I'll work up to "challenging mods" in time :o)

Jack

i used to make up the eprom boards to mod the old cb's
still have the artwork for em so i can run you off a pcb for the 02a
even send you the eprom mod book in pdf if you like
regards

Drop a meter across the o2A out put , I just did an old phillips in 30
minutes , one of them will meter 500 kc and the one beside 1 meg , rest
is easy . No xtal required
not much help but I hadnt done one for 15 years and managed :_)
good luck

2996. K1MAN Demands The Press Explain Why Its Not Reporting His Side

Newsgroup: rec.radio.amateur.misc
Date: 2005-06-24 19:01:40 UTC
From: channel391@juno.com
Message-ID: <1119639700.031315.165540@g49g2000cwa.googlegroups.com>
Source record: 51318
Cross-posted to: rec.radio.amateur.misc,rec.radio.amateur.policy,rec.radio.shortwave

K1MAN is justly asking why the ham press has not presented his side of
the story. Please read his editorial response below:

K1MAN EDITORIAL - ED050616 -

WHERE IS THE OTHER SIDE OF THE STORY?

You read what the FCC says about K1MAN. You read about what other
hams say about K1MAN. Where do you read about what K1MAN says?
ARRL? No! QST? No! CQ? No! World Radio! No! K1TP? No!
QRZ? No! What is wrong with this picture, you ignorant hypocrites?
No wonder the Arabs hate our guts so much. No wonder Amateur Radio
is going down the tubes, led by ARRL.

I love both America and Amateur Radio, however. K1MAN will be on for
many many years to come, and the true scum of our precious hobby and
service will be thoroughly exposed in the upcoming court proceedings.
K1MAN has been on the air with IARN information bulletins since 1987,
and the FCC is as powerless to stop them as K1MAN is powerless to
stamp out amateur radio ignorance. Fear not fellow Radio Amateurs.
You have the constitutional right to be stupid! Only in America!

Join the American Amateur Radio Association today! See www.K1MAN.com

2997. K1MAN/IARN/AARA Prepare For War With FCC and ARRL

Newsgroup: rec.radio.amateur.misc
Date: 2005-06-24 19:13:05 UTC
From: channel391@juno.com
Message-ID: <1119640385.333248.143850@z14g2000cwz.googlegroups.com>

K1MAN SAYS:

FCC ISSUES A $21, 000 NOTICE OF APPARENT LIABILITY AGAINST K1MAN

In a "NAL" released 7 June 2005, the FCC has opened a pandora's box, according to Glenn Baxter, Manager of IARN, the International Amateur Radio Network, and AARA, the American Amateur Radio Association.

Mr. Baxter was recognized by the State of Maine legislature on March 13, 1991 and named as a Vermont Academy Distinguished Alumnus on October 1, 1993 for international amateur radio communications work with his IARN.

Mr. Baxter says that this whole charade is being driven by petty ham jealousy and the blatent incompetence of ARRL in failing over the years to come even close to the work of IARN in emergency communications work.

Mr. Baxter welcomes these court actions since he has been trying to "face off" with the Commission for over 15 years. "Many heads are finally going to roll," acording to Baxter. K1MAN's response is printed below together with the full text of the NAL.

In the matter of
Glenn A. Baxter, P.E.
Registered Professional Engineer

well, lets see. if k1man via channel391 is all concerned about not getting his side of the story out in all those magazines it must mean that he doesn't have enough of an outlet of his own to think he is reaching anyone. where are all his loyal followers? where are all the members of iarn coming out to support him? where is the world wide network of iarn writing to all their powerful friends building support for his case? and where is he? i haven't heard one of his broadcasts in quite a while, its kind of hard to pretend he is a viable source of information these days without the broadcast... and without the print media... and without the friends...

The commission is a very "leaky" organization, and my source
tells me a certain manager is, putting it mildly, furious that the
K1MAN NAL was issued. Look for one or more very quiet
early retirements and/or resignations.

Who cares what the idiot MAN has to say, his actions speak very loudly
about him.

3001. Petition to Deny Renewal to K1MAN

Newsgroup: rec.radio.amateur.misc
Date: 2005-06-24 21:40:37 UTC
From: policy-ham <hamop_62@hotmail.com>
Message-ID: <1119649237.556139.108330@g43g2000cwa.googlegroups.com>
Source record: 51322
Cross-posted to: rec.radio.amateur.policy,rec.radio.amateur.misc,rec.radio.shortwave,rec.radio.scanner,rec.radio.cb

Do any of you know about this on line petition to the fcc
to stop them from renewing the ham license of K1MAN? I found
it on eham.net.

L.L.

Petition to Deny Renewal to K1MAN:
Brian (K3VR) on June 15, 2005

By now, you've probably heard that K1MAN has received a large NAL
(fine) from the FCC, for Broadcasting, Wilful Interference, Lack of
Station Control, Failure to File Required Information, and Pecuniary
Interest.

Even if K1MAN were to pay this NAL, there is no guarantee that his
obnoxious behavior will change. If he were to lose his license, and yet
still continue to transmit, at least the Government could seize his
equipment.

The fact is, K1MAN has received lots of letters from the FCC over the
years and nothing to date has stopped his trashing of Amateur Radio.
For this reason, I believe he should permanently lose his license to
transmit over amateur radio.

As it happens, K1MAN's license is due to expire on October 17th. The
FCC already has a procedure in place where we, and the rest of the
listening public, can make our voices heard regarding K1MAN's license
renewal.

I propose we use the FCC's standard procedures to file what's known as
a "Formal Petition to Deny Renewal." Basically, the petition would be
signed by all of us who believe K1MAN's license should NOT be renewed.

As it happens, there is a website being written right now to accomplish
this task. The "Petition to Deny License Renewal to K1MAN" is in the
process of being written by Keith Lamonica (W7DXX).

Based on K1MAN's on-air behavior, we will ask that the FCC not renew
K1MAN's license this fall. I've already begun collecting comments.

All you need to do is indicate in writing, that you believe K1MAN's
amateur radio licenses should NOT be renewed.

Referencing his NAL letter, send your comments to:

Brian Crow
2550 Mosside Blvd

Suite 212
Monroeville, PA
15146

Include your comment in favor of the petition to deny license renewal to K1MAN, along with your name, callsign, address, signature, and a daytime phone number for verification.

Your comments will be submitted to the FCC along with the petition. Even a postcard with the required information will do it. If you have a lot to say, send me a letter.

Please join me in supporting this Formal Petition to Deny License Renewal to K1MAN. We need YOUR comments!

The website and petition, now in progress of being completed, is located at:

http://www.no2k1man.com/

Thanks for your support!

Blah blah blah.

I read the above piece of drivel on QRZ.COM, so where is the problem?
Answer - he flew into this raging tirade BEFORE it was published, not after
it was refused.

Brad.

Baxter lives in Massatoosets, or is it Massatoochits? Or in Massa Two Tits?
Any way you cut it, however you spell it, Glenn and his Blabfests are
hopefully going to be a thing of the past.
It will be interesting to see if Baxter will go down with both guns blazing
as he cohosts with arrogant Richard Whiten, ex WB2OTK and fellow jammer by
his side.
That $21,000 fine is sure to put a dent in his coffers, even for a
"professional engineer" of his self-proclaimed high standing.
Hey, Glenn. Ever entertain the idea of initiating a legal defense fund? I'll
donate two cents.

Hi Jack,
It is possible, I did convert a few of the 02 PLLs in years gone by,
I will look in my archives and see if I still have the instructions on file, may take a few days tho'
I used to use the Electrophone CB and I think after the mods they could cover a fair part of the 10m band.
Will get back to you.
HH

ROGER WISEMAN'S GREYHOUND MEN'S ROOM BAND

Lead vocal: Dr. Winston O'Boogie

It was twenty years ago today,
Roger Wiseman forced the boys to be gay
He's been going in and outa their rears
And he's made them into ravin' queers.
So watch out or I'll force on you
The act we've hated all these years,
Roger Wiseman's Greyhound Men's Room Band.

We're Roger Wiseman's Greyhound Men's Room Band,
Disciples of the Bucktoothed Choad,
Roger Wiseman's Greyhound Men's Room Band,
Sit back and watch us shoot a load.
Roger Wiseman's Greyhound, Roger Wiseman's Greyhound,
Roger Wiseman's Greyhound Men's Room Band.
It's wonderful to be here,
But Wiseman's full of crap,
The dirty goddamn pederast:
That fucker gave us syphilis,
That fucker gave us clap.

I don't really want to stop the show,
But I thought you had all better know,
That Wiseman's going to play a song,
On a stickpin that he stuck through his schlong.
So let me introduce to you
The one and only Bucktoothed Choad
And Roger Wiseman's Greyhound Men's Room Band.

Contest - Accumulative.

As from new year 2005 the Nordic activity contest (NAC 50 MHz) will move from 4 th. tuesday in the month. As there have been a contest round for the last 14 years at the present date/time, we feel a valuable activity will be lost by moving it. Therefor the OZ50MHz Group have decided to establish an accumulative contest at the present evening so "business as usual" can be maintained.
To keep things as simple as possible, we will have rules very close to the NAC. This means an Open class high power and an Open class low power section, a OZ high power and a OZ low power section.

Contest calendar 2005.

January 25 th. 18-22 CET / 18-22 UT
February 22 th. 18-22 CET / 18-22 UT
March 22 th. 18-22 CET / 18-22 UT
April 26 th. 18-22 CET / 17-21 UT
May 24 th. 18-22 CET / 17-21 UT
June 28 th. 18-22 CET / 17-21 UT
July 26 th. 18-22 CET / 17-21 UT
August 23 rd. 18-22 CET / 17-21 UT
September 27 th. 18-22 CET / 17-21 UT
October 25 th. 18-22 CET / 17-21 UT
November 22 nd. 18-22 CET / 18-22 UT
December 27 th. 18-22 CET / 18-22 UT

Rules - Open class 2005.

Participants.
OZ50MHz Group hereby invites all licensed radio amateurs outside Denmark to participate in the OZ50MHz Accumulative Contest - Open Class.

Date & time.
Fourth Tuesday in every month - 19:00-23:00 CET/Danish local time. (Never at December 24 th. or 25 th.)

Section.
OCHP. Open Class 50 MHz - High power > 100 w.
OCLP. Open Class 50 MHz - Low power < 100 w.
Single and multi operators participate in same sections.

Contacts.
Each contacted station counts only ones even if it is /A, /P etc.
Duplicates must not be deleted from the log, but shall be listed as a normal QSO with zero (0) points. In case points are claimed for a duplicate QSO, ten times the claimed points will be deducted.

All operation in accordance with IARU Region 1 bandplans. No contacts via active repeaters or EME are allowed.

Exhange.
RS(T) and Locator, e.g. 59 JO55WW. No QSO no. is needed!

Points.
1 point/km + 500 bonus points per WWL.

Awards.
In the annual result only the nine best contests are evaluated. The first three stations in each section, and the best station in each country, will receive an OZ50MHz Contest Award.

Entries.
Logs must be received no later than a week after the contest at the OZ50MHz Group. Logs received later than that will be used as check logs.

Logs may be submitted electronically to the contest manager, oz50mhz@qrz.dk

O. Bjørn Madsen, OZ6OM
Falen 35, 3 tv.
DK-5000 Odense
Denmark

Results.
The contest results can be seen at http://www.qsl.net/oz7six/OZ50MHzResults.html

Not exactly.

On HF, it is fairly unusual that you can hear both sides of a conversation, unlike VHF where if I can hear one station, I can usually hear the other. So when I want to call someone, I listen first. Hearing nothing, I send QRL? (or on phone, "is this frequency in use"). If the station I can't hear gets my QRL, he sends C and I go off looking for another frequency.

Very few, if any, digis actually listen first. Even if they did, they don't have a way to say "Is this frequency in use" and understand the response. And even if they could, they really don't have the opportunity to change frequency, since they need to call on the frequency that the remote robot is listening. It seems as if it would be very difficult to make these automated stations be friendly to other users.

That being said, it looks as if Winlink 2000 is going to be come a significant part of our emergency response, which is one of the reasons we have access to these frequencies to begin with. We should be looking at reasonable solutions, perhaps developing new technologies to enable this sort of capability, rather than just flaming.

Both the pro and con in this argument are absolutely unwilling to listen to/believe the other side. We amateurs need to get our act together and figure out how we can expand the use of a technology like Winlink 2000 without making these automated systems even more of a nuisance than they already are.

There's plenty of space. We just don't manage it worth a darn.
If you listen to the ham bands, you'll find that the
vast majority of our allocation is wasted. For instance:
you could put every CW QSO during Sweepstakes into about 75 KC of
spectrum and have lots of elbow room.
For phone, probably 100-125 KCs would be a big plenty.
People want their freqs to end in "5" or "0" and that
is just poor spectrum management. Look at ten and six
meters, even at the peak of the sunspot cycle;
90% of it is empty, wasted space.
Every major city has 100+ repeater pairs allocated,
twenty or thirty repeaters on the air and maybe *three*
that get any sustained use.
That's pitiful and a matter of *ego,* not communication.
75 meters is "crowded" only because of our 5-n-10 KC mindset.
Our problem is ego and "we've always done it this way,"
not a lack of spectrum.

We're going to either make room for new and enhanced
modes or we're going to be swept aside like blacksmiths
and locomotive boiler makers, guys.
The times is passin' us by....

Well.... first things first, of course.. why are we always posting such discussion in all these groups for commerce?

Second, and I quote.... "Whatchu talkin' 'bout Willis?"
> If the station I can't hear gets my QRL, he sends C and I go off looking
> for another frequency.
<sorry to whoever posted that. :-) >

I would normally bypass these things but I've been thinking about getting another HF rig lately....and I've been considering why I keep selling them off, trying to warrant a purchase again. I'm thinking it has to do with the words "purpose" and "use".

So, I'm looking at getting back into it and doing something besides setting up a radio and just randomly playing with it or gluing the vfo on some nonsense gathering place.

So here are my questions and observations for your perusal and general flaming.

From the original link posted:

That the HISTORICALLY HIGH LEVEL OF INTERFERENCE BY PACTOR STATIONS to everyone else has demonstrated time and time again that even the operator-controlled Winlink Pactor stations don't care if a frequency is busy (because they can easily take it away), in their passion to get their email from the Internet, so they MUST NOT BE ALLOWED to mix with hams trying to COMMUNICATE WITH EACH OTHER!

Q: Someone please take a minute and point out a single coherent thought or plausible point in the above statement. Bearing in mind that tuning to any random freq can find people squawking over each other like the noise in a crowded room, or a CW freq sounding like my kid running down the "try me" aisle in the toy dept... When did it become impossible for my station to hear 2 other stations that can't hear each other?

Next, from the original link posted.

That ham radio is a HOBBY, not a quasi-commercial email "service" as Winlink provides, and that ham radio, from the very beginning, has always been mainly about hams communicating with other hams, and not about being used for unattended email gateways to the Internet, mostly for a few sailors, because the FCC Maritime Radio Frequencies were set aside for that purpose and are underused.

Observation: If it serves a legitimate purpose and assists a single sailor, military or civilian, it serves a greater purpose than your latest blathering, contest, or quasi-award. The author can 'pucker up and plant one' on that statement. Again, if it is a ham station to ham station, WHERE is the plausible point?? ..... I think I hear a tiny voice yelling "ME, ME, ME... I shall rule the world!"

Also from the original like posted:

That all unattended wideband digital operations, of any type, MUST be confined to the current sub-bands for automatically controlled digital stations, and not allowed to use any frequency they wish just in order to avoid having to wait a short time for a clear frequency in the sub-bands.

Observation: I think SHOULD is a better word. Also take the entire point and reverse it, maybe they feel the same way in a crowded band. Why can't YOU wait a short time for a clear frequency?? [I shall rule the world!!] Also, if you [and Winlink, and Amateur radio in general] wake up and smell the ALE, then you again have a moot point.
If you've ever been on a radio, you realize that attended or unattended matters not; due to world dominators. The problem you're having is with courtesy, not digital ops. Good luck freeing the world of jerks and morons. [and from experience, a dense population infiltration such as the one in ham radio would be a good place to point yer scattergun when you start.]
There's lots of people with lots of free time to build up their personal anger levels for whatever reason, then look for a [safe] place to vent frustrations.
It's the same with the www.
Also, if you paid any attention to Riley at any point, you'd know that he already said APCO25 is fair game on the phone bands, so you are actually showing up on Saturday for the Friday night fights. Sorry you missed us, but thanks for coming out.

And again from the link.....

To stop this attempted takeover, *[I WILL START MY OWN]*
EVERYONE ELSE needs to vote NOT to agree to the Winlink request, so ARRL does not get the wrong impression that the "majority" of hams want to sacrifice the frequencies they use for communicating, so that the less-than-1%, that are Winlink users, don't have to wait longer than 90 seconds to receive an email on HF or can't send picture attachments to the Internet.

Q: STILL trying to understand why he keeps saying "stop hams from communicating so that hams can communicate!" and "I'm not gonna wait 90 seconds on a bunch just because they can't wait 90 seconds!"
You know what... I think Winlink has something wrong....maybe... there're WITCHES!! Everyone chant and point at Winlink... "witch, witch, witch...."
Come to think of it... that pesky ECHOLINK is still going on too! Where's my echolink pitch-fork? C'mon, let's get 'em! Bunch of internet-connected morons sucking up my drivel time... LET'S GET ON THE INTERNET AND COMPLAIN, ESPECIALLY IN ALL THE PLACES WE SHOULDN'T BE! Hahahaha.... this is too funny.

[NOTE: If the author wants real results, he should get on Winlink and email his concerns to the Winlink users... that will complete his hypocritical circle and restore balance to the universe.]
Also,
IF THEY CONSIST OF LESS THAN 1%, HOW THE HECK ARE THEY IN YOUR WAY, BUBBA??
All you want is to have your 100%, right? Why can't people just understand that? It's a mad, mad, mad, world...

Researching the author, I see he is a QRP fan.... leaving me to wonder....
WHY would he want to purposefully limit himself to barely enough power to communicate when he has available a perfectly good 50-100w radio market??
That will give him plenty of power to be heard and not too much to drown anyone out.
I'm betting he operates QRP wherever he wishes, forcing others to WAIT while the do-good folks "give in" feeling sorry and letting the little guy have the time/freq.... what a power rush that must be.
Then again, it could be that he's simply experimenting and enjoying the hobby in the fashion he CHOSE by right, etc....
Nah, couldn't be that.

Before anyone jumps on that, be advised that I've already experienced the common orations on the post-nuclear advantages of QRP training. Here's a news-flash boys... after the smoke clears, your QRP station will either be lost in the new and improved noise floor, or be one of the new big-guns on the suddenly quiet bands.... so I still miss the point. But do I make a hole for you when I hear you? Yes, I do. [Refer to that courtesy thing mentioned above.]

Also, if anyone wonders/cares, I have few "friends" on the local repeater too, since I only use it for communicating when a telephone isn't suitable, or whatever the rules suggest.
Curse me for using simplex instead of the repeater most of the time! See, I had this stupid idea, that the repeater is only useful to me when the communication requirements exceed simplex range. I must be a fool.
It seems that contacting my wife on the repeater [preceeded by paging tones to my alert monitor...OMG!!!] then making my contact, passing necessary info and clearing the frequency is just absurd to the local jaw-breakers who inevitably pounce on any break in the silence, almost demanding attention.
How rude I am for not sitting in my hot car in a parking lot for an extra 15 minutes every time I need to tell someone something simple and move on.

Don't get me wrong, I love to chat, ragchewing on a repeater [or HF] is no problem to me, but not every time I key a mic for goodness sakes! But, I digress...

I had a bumper sticker one time.... "I love Jesus, it's his groupies I can't stand.", and I wish I could find an analogous "I love radio, it's the operators I can't stand."

So, with my failure to "get it" along with my apparent stupidity, I now relinquish the floor to whomever.

To keep things as simple as possible, we will have rules very close to the NAC. This means an Open class high power and an Open class low power section, a OZ high power and a OZ low power section.

Contest calendar 2005.

January 25 th. 18-22 CET / 18-22 UT
February 22 th. 18-22 CET / 18-22 UT
March 22 th. 18-22 CET / 18-22 UT
April 26 th. 18-22 CET / 17-21 UT
May 24 th. 18-22 CET / 17-21 UT
June 28 th. 18-22 CET / 17-21 UT
July 26 th. 18-22 CET / 17-21 UT
August 23 rd. 18-22 CET / 17-21 UT
September 27 th. 18-22 CET / 17-21 UT
October 25 th. 18-22 CET / 17-21 UT
November 22 nd. 18-22 CET / 18-22 UT
December 27 th. 18-22 CET / 18-22 UT

Rules - Open class 2005.

Participants.
OZ50MHz Group hereby invites all licensed radio amateurs outside Denmark to participate in the OZ50MHz Accumulative Contest - Open Class.

Date & time.
Fourth Tuesday in every month - 19:00-23:00 CET/Danish local time. (Never at December 24 th. or 25 th.)

Section.
OCHP. Open Class 50 MHz - High power > 100 w.
OCLP. Open Class 50 MHz - Low power < 100 w.
Single and multi operators participate in same sections.

Contacts.
Each contacted station counts only ones even if it is /A, /P etc.
Duplicates must not be deleted from the log, but shall be listed as a normal QSO with zero (0) points. In case points are claimed for a duplicate QSO, ten times the claimed points will be deducted.

All operation in accordance with IARU Region 1 bandplans. No contacts via active repeaters or EME are allowed.

Exhange.
RS(T) and Locator, e.g. 59 JO55WW. No QSO no. is needed!

Points.
1 point/km + 500 bonus points per WWL.

Awards.
In the annual result only the nine best contests are evaluated. The first three stations in each section, and the best station in each country, will receive an OZ50MHz Contest Award.

Entries.
Logs must be received no later than a week after the contest at the OZ50MHz Group. Logs received later than that will be used as check logs.

Logs may be submitted electronically to the contest manager, oz50mhz@qrz.dk

Oh yeah... THAT was REALLY "coherent." LOL!
If people got ON the radio 5% as much as they speculated about it, we
would ALL be better off!

Contest - Accumulative.

As from new year 2005 the Nordic activity contest (NAC 50 MHz) will move from 4 th. tuesday in the month. As there have been a contest round for the last 14 years at the present date/time, we feel a valuable activity will be lost by moving it. Therefor the OZ50MHz Group have decided to establish an accumulative contest at the present evening so "business as usual" can be maintained.
To keep things as simple as possible, we will have rules very close to the NAC. This means an Open class high power and an Open class low power section, a OZ high power and a OZ low power section.

Contest calendar 2005.

January 25 th. 18-22 CET / 18-22 UT
February 22 th. 18-22 CET / 18-22 UT
March 22 th. 18-22 CET / 18-22 UT
April 26 th. 18-22 CET / 17-21 UT
May 24 th. 18-22 CET / 17-21 UT
June 28 th. 18-22 CET / 17-21 UT
July 26 th. 18-22 CET / 17-21 UT
August 23 rd. 18-22 CET / 17-21 UT
September 27 th. 18-22 CET / 17-21 UT
October 25 th. 18-22 CET / 17-21 UT
November 22 nd. 18-22 CET / 18-22 UT
December 27 th. 18-22 CET / 18-22 UT

Rules - Open class 2005.

Participants.

how do you mean?

why are you so threatened?

I mean you have been stalking me and my family.

You did make a personal website to track the spyware you went to the
trouble of putting on my computer.

You did try to blackmail me off of alt.support.autism

You did commit id theft.

I'm not the one makeing them mad.

You are.

You and your stalking activities...

I have an Icom R3 for sale with a copy of manual.I have no original box for it.It is the unblocked version.I am asking $300.00 or BRO for it plus shipping.Email me if interested.
Reason for sale is it is to complicated for me to play with.

June 27, 2005
Editor Tedd Mirgliotta, KB8NW
Provided by BARF80.ORG (Cleveland, Ohio)

Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, AB5K & the AR TelNet Clusters Network, K1XN & GoList, W2GB, WB2RAJ, WB2REM, WB2YQH, NG3K, W3UR & The Daily DX, WB3CDX, N4AA & QRZ DX, N5FF, WB6RSE, K8YSE, W8HC, WB8FSV, DL1EK & The DX News Letter, DL4KQ, F5CWU & La Gazette du DX, F5NQL & UFT, F8DQZ, I1JQJ/IK1ADH & 425 DX News, IZ8CCW, IZ0FKE, JI6KVR & JA-IOTA Islands News, VA3RJ & ICPO and VE5FN for the following DX information.

EDITOR'S SPECIAL NOTE: Too much fun at "Field Day" and "HOT WEATHER" (101 in an open air tent) causes a short bulletin!

DXCC COUNTRY/ENTITY REPORT: According to the AR-Cluster Network for the week of Sunday, 19th/June, through Sunday, 26th/June there were 200 countries active. Countries available: 3B8, 3B9, 3V, 3W, 4J, 4L, 4S, 4X, 5B, 5H, 5N, 5R, 5T, 5V, 5X, 5Z, 6W, 6Y, 7Q, 7X, 8P, 8R, 9A, 9G, 9H, 9J, 9K, 9L, 9M2, 9M6, 9Q, 9V, 9Y, A4, A5, A6, A7, A9, AP, BV, BY, C3, C6, CE, CE9, CM, CN, CP, CT, CT3, CU, CX, CY9, D4, DL, DU, EA, EA6, EA8, EA9, EI, EK, EP, ER, ES, EU, EX, EY, EZ, F, FG, FK, FM, FO, FP, FR, FY, G, GD, GI, GM, GU, GW, H4, HA, HB, HB0, HC, HI, HK, HL, HP, HR, HS, HV, HZ, I, IS, J5, J6, J7, J8, JA, JT, JW, JY, K, KG4, KH0, KH2, KH6, KL, KP2, KP4, LA, LU, LX, LY, LZ, OA, OD, OE, OH, OH0, OK, OM, ON, OX, OY, OZ, P2, P4, PA, PJ2, PY, PZ, S5, S7, S9, SM, SP, ST, SU, SV, SV5, SV9, T7, T8, T9, TA, TF, TG, TI, TI9, TK, TR, TT, TU, TZ, UA, UA2, UA9, UK, UN, UR, V5, V7, V8, VE, VK, VP2V, VP5, VP8/h, VP9, VQ9, VR, VU, XE, XU, XX9, YA, YB, YI, YK, YL, YN, YO, YS, YU, YV, Z2, Z3, ZA, ZB, ZC4, ZD7, ZK1/s, ZL, ZP, ZS

* PLEASE NOTE: The report "could" contain "Pirate/SLIM" operations or more likely a "BUSTED CALLSIGN". As always, you never know - "Work First Worry Later" (WFWL).

4X, ISRAEL (Update to OPDX.714). Hal, W8HC, updates OPDX on his 4X0WV CQWW SSB Contest activity. He states that he and Jerry/K8OQL will be active outside of the contest (about 12 additional hours on each side

of the contest). They will arrive late Thursday night (actually Friday A.M. in Tel Aviv) and will travel mid-morning on Friday to the IARC club station. On Monday morning after the contest they are off to Jerusalem for a couple days and then will head back to Tel Aviv on Wednesday and hope to spend a few hours with some of the 4X boys in Tel Aviv Wednesday evening. They will operate mostly CW outside the contest and will be on all bands.

BA4/BD4, CHINA (Also VR2). Jack, WB8FSV, informs OPDX that he and his family will visit China again this year, staying with his wife's family in Qingdao, China. From Qingdao, Jack will operate during his spare time as WB8FSV/BA4IT and WB8FSV/BD4JV from June 28th to July 27th. From July 28th to August 1st, Jack will be in Hong Kong, and he plans to operate a little from Charlie/VR2XMT's station as VR2/WB8FSV.

CY9SS, ST. PAUL ISLAND. The CY9SS operation still continues until July 7th. An update in the confusion of the VY2SS QSL addresses reported last is "there is no confusion". All three different addresses for VY2SS are good as reported by the CY9SS operators and friends of VY2SS. Here are the addresses again:
HamCall: Robert Robertson, #57 Tranquility Land, Bloomfield,
PE C0B 1E0, Canada
QRZ.com: Robert Robertson, #57 Tranquility Land, Oleary,
PE C0B 1E0, Canada
CY9SS
Web Page: Robert Robertson, RR#3, Oleary, PEI, Canada C0B 1V0

ADDED NOTE OF INTEREST: If you want to read about past CY9 operations, visit the Web page at: http://www.stpaulisland.net/amateurexpeditions.html

FO, FRENCH POLYNESIA. Jim, WB2REM, will be operating from Vahine Island and Bora Bora (OC-067) as FO/WB2REM from July 24th through August 3rd. Operations will be on CW/SSB and on 40-10 meters as time permits. QSL via WB2REM.

HI, DOMINICAN REPUBLIC. Franco, HB9OAB, will be active as HI7/HB9OAB from Punta Cana now through July 15th. Activity will be on 40-10 meters, the WARC bands included. QSL via his home callsign, direct or by the bureau.

IOTA NEWS.....
AS-154. Metin/TA1ED and Nuri/TA3BN will be active as homecall/0 from Giresun Island, July 1-4th. Activity will be on all HF bands plus 2 meter CW/SSB. Two stations will be on the air, one on SSB and the other on CW. QSL via their home callsigns, direct or by the bureau.

EU-042. Andy, DL7AT, will be active as DL7AT/p from Foehr Island (GIA N-17), July 3-9th. Activity will be on 40 and 20 meters SSB only. QSL via his home callsign, direct or by the bureau.

EU-045. Andrea "Andy"/IZ0EHO, member of the ARI Frascati DX Team, will be active as IB0/IZ0EHO from Ponza Island, between June

26th and July 9th. Activity will be on HF and 6 meters on
SSB and the Digital modes. Andrea will also try to activate
some rocks around Ponza the main island. He will use his
FT-857 and a vertical antenna. QSL via his home callsign.
Visit his Web page at: http://www.iz0eho.com
ADDED NOTE: This island is valid for the Italian Islands
Awards (IIA) Summer Activity 2005 Trophy. Details available
at: http://www.strangeradioteam.com

EU-064. The Radio Club of Redon (F6KQC) will be active as TM5DUM from
the Ile Dumet (DIFM AT-018), July 16-17th. This activity will
also count for DFCF reference 44-028 for the French Castles
Award, Departement de Loire Atlantique (44). Activity will be
on all HF bands with 2 stations, one for CW and the other for
SSB. They will also have one station for VHF phone. QSL via
F5SRH.

EU-165. Sal, IK2MKE, will be portable /IM0 between July 24th and
August 9th from San Macario Island (for the Italian Island
Award CA-012). QSL via the bureau or by the info on QRZ.com.

EU-189. Details on the recent "Rockall Ho! 2005", including some
pictures of the rock and the amateur radio operators (David/
MM0ALM and Jim/MM0CWJ) who activated MS0IRC/P, are now
available on The Rockall Times Web site at:
http://www.therockalltimes.co.uk/2005/06/20/rockall-triumph.html

NA-NEW
NA-175. Operators Mike/K9AJ and Bruce/KD6WW plan to activate Nunavut
(Kitimeot region) West (NA-NEW) Group and the West Central
Group (NA-175) sometime between September 1-7th. The exact
dates for each island group will depend on the weather and
solar conditions. Operators will sign VY0/homecall. QSL
via their home callsigns (QRZ.com).

NA-052. The Marco Island Radio Club will be using the special callsign
N4M to celebrate the founding of modern Marco Island (USI
FL-025S and Collier County, Florida), July 1-10th. Activity
will be on 14260, 18128 and 21260 kHz. QSL via N1DL: Karl Geng,
695 Embassy Ct, Marco Island, FL 34145.

NA-062. Paul, N3LTT, will activate various U.S. Islands in the Florida
Keys, but primarily Key Largo (NA-062, USI FL-049S, Monroe
County), between July 3-8th. There are no set times of activity,
but his activity will be mostly in the early mornings and
late evenings. Suggested frequencies are on 20 meters SSB
(between 14250-14260 kHz). QSL direct to N3LTT, or eQSL.

NA-066. Tony, K1USC, will be active as homecall/6 from Santa Catalina
Island (USI CA-016S and Los Angeles County, CA) with Boy Scout
Troop 655 during their summer camp at Emerald Bay Boy Scout
Camp, July 11-16th. Activity will be on 40-6 meters as time

permits throughout the week. Look for scouts to make some contacts as part of their requirements for their "Radio Merit" badge. QSL via Tony's home callsign, direct or by the bureau.

NA-213. Operators Rebekah/WG4Y, Angela/WN4C, Truman/NN4C, Allan/KV4T and Bridget/KS4YT will be active from Dauphin Island (USI AL-002S and Mobile County, Alabama), July 16-17th. Activity will be on 80-10 meters CW/SSB. QSL via operator's home callsigns, direct or by the bureau.

LIGHTHOUSE ACTIVITY. Alfredo/IK7JWX and some friends will be active as IR7LH/p, July 2-3rd, from Diga di Forte a Mare (ITA-187) and Castello a Mare N. Breakwater Head (Green Tower) (ITA-266) lighthouses on Islola Sant'Andrea (I.I.A. BR005 - Not IOTA). Activity will also be from Castello Alfonsino o Rosso o a Mare di Brindisi (DCI BR-001 for the Italian castles award). Activity will be on all HF bands SSB. QSL via IK7JWX, by the Bureau.

PJ2, NETHERLANDS ANTILLES. Operators Dan/N1ZZ, Malcolm/NP2L, Scott/W4PA, Jeff/K8ND, Steve/N8BJQ, Jim/W8WTS, Noel/W9EFL, Charles/WA9S, Jim/W0NB and Leo/S50R will be active as PJ2T from Signal Point, Curacao, during the CQ WW DX CW Contest (November 26-27, 2005) as a Multi/?? entry. QSL via N9AG. Visit the Caribbean Contesting Consortium at: http://www.pj2t.org

QSL INFO AND NEWS.....
5X1GS QSL STATUS. Bob, WB2YQH, reports that after several failed attempts to get the logs from Graham, 5X1GS, for October 2004 through 2005, they have been received. All QSL requests have been answered for those waiting cards. Graham notes he tried twice to E-mail them to his QSL Manager, WB2YQH, but one time it bounced and the next time there was no response. Graham thought Bob had the logs. It seems his corporate IT folks were adjusting the firewall, and this may have been the problem. ADDED NOTES: More news from Graham as to his inactivity. His tower had to be rebuilt after a bad storm, and he is just getting around to remounting the beams. Also, his mother has been very ill in the U.K., and he has been travelling back home often. He says he will be active in about 3 weeks. QSL via WB2YQH.

Graeme, J39BW, reports that he is now in the process of recovering his logs that were partially ruined during Hurricane Ivan. The hurricane also destroyed the roof of his home and much of his equipment. To confirm any contacts with J39BW he asks that you QSL DIRECT to his Manager WB2RAJ: Kash Kashdin, 4591 West Overlook Drive; Williamsville, NY 14221.

NEED A QSL MANAGER? Walt, WB3CDX, is volunteering to be QSL Manager for any DX, IOTA, or DXpedition. He states, "I provide all QSL printing and cards to stations I manage at no charge. Paper logs are OK. Electronic logs are preferred. Please contact me if you are interested, and we can then work out any other details." Walt's E-mail address is: avgisus@yahoo.com

TY, BENIN. Luc, F6FVX, will be active as TY/F6FVX from (Azove) northwest Cotonou in Benin, between August 13th and September 6th. He will be on the air with his TS-50 and dipole, and only on HF speaking the French language. QSL via the operator's instructions.

V3, BELIZE. Look for Jimmy, W6JKV, to be active as V31IV between now and July 6th. His activity will be mostly on CW on 6 meters. Europe stations are to look for him on 50091 kHz and North America stations are to look for him higher up the band. Jimmy will also try to operate EME.

VD2, CANADA (Zone 2). Pete, VE3IKV, plans to activate Zone 2 on 6 meters from Labrador (VO2) beginning early July. He will use the special callsign VD2X. The purpose of the trip is to investigate high latitude Sporadic-E propagation on the North American side as it is affected by proximity to the North Geomagnetic Pole. Special attention will be paid to multihop transatlantic paths, as well as double hop to central and western USA/ Canada. His equipment is a FT-650 and a 5-element K6STI wide spaced portable yagi (10dBd). Pete will be monitoring CW/SSB during the drive, and if the band opens up, he will switch over to the yagi. QSL via VE3IKV (QRZ.com).

YK, SYRIA. Saad, N5FF, will once again be active as YK1BA between July 2-16th. He informs OPDX that the purpose of the trip is not a DXpedition, so his operating will be "very spotty and not extensive at all." However, he hopes to be able to operate at least 3-4 hours a day. He thinks that he will limit his operating to 20 meters, unless the propagation is better on other bands (80-10m) at the time. His most probable operating times are between 0100-0400z (Americas and Pacific), between 1900-2200z and possibly between 1100-1400z (for the rest of the world). Saad will try to be around 14195 kHz on SSB, and 14045 kHz on CW. Also, check 14080 kHz for RTTY running split and listening 5-10 kHz up. QSL via N5FF only.

(This is from eham.net and qrz.com)
Glenn A. Baxter, P.E., K1MAM, (or as his parter and buddy Chris Murdoch, WA1HOD, calls him - K1MAN-kind) has a long long history with the FCC. For those of you just joining the debate, here is some information that might help explain why so many hams are eager to sign the Petition to Deny License Renewal to K1MAN at www.no2k1man.com

K1MAN, by his own actions, has made himself a very public figure. As a public figure, he's been widely discussed by his fellow hams here, on QRZ, and elsewhere on the internet, on amateur radio, in court rooms, discussed by his employers, his neighbors, discussed by the FCC, at CBS, and by the Department of Justice.

In reviewing the history of K1MAN and his qualifications to remain a Commission licensee, we can go back many years, to May of 1986, when he sued the advertising manager of QST and another employee of ARRL for conspiring to damage his business reputation.

QST had received a complaint that showed that Baxter's Collins Repair and Alignment Service had significantly overcharged a customer beyond an amount they had previously agreed upon.

The advertising manager at the time wrote Baxter on QST letterhead, saying, "When your service charges escalate from $75 to $225 and then to $275 we become very much concerned about the manner in which you are treating our members. You will recall that I discussed with you ... the highly suspect illegal spending of deposits which members were sending to you... unless you can convince me that your operation exists in the best interests of our members, we shall be unable to carry further advertising from you."

This exchange and the subsequent lawsuit by Baxter (dismissed) may help to explain why Baxter has attacked the ARRL and its staff with such zeal over the years. He says he wants to make IARN an "Alternative to ARRL" but, discerning readers may recognize another agenda.

Some old timers may recall Baxter's lawsuit against the FCC to maintain the old AM power output of 1,000 watts. That lawsuit was dismissed because Baxter failed to exhaust administrative remedies through the FCC before bringing suit. As the old adage goes, it appears there really is a drawback to acting as your own attorney.

You may also recall Baxter's 10 million dollar lawsuit against the FCC? He claimed he was defamed by the alleged suggestion by Riley Hollingsworth that he was shut down by the FCC. Baxter reported at the

time that he had merely taken a break to teach high school. This case was also dismissed because Baxter failed to exhaust his administrative remedies before bringing suit. Baxter has threatened to sue Riley personally, as well as other hams, including this writer. A threat that has yet to materialize.

On January 23, 2003, Walter Cronkite's attorney wrote to Baxter asking him to stop using Walter's voice ID over K1MAN's bulletin. "Mr. Cronkite previously requested that you refrain from any further use of the audiotape, or from any suggestion that he endorses your station, Association, or other operations." He (Ronald S. Konecky) went on to call Baxter's actions "a violation of Mr. Cronkite's rights, totally improper, and a cause of serious damage to his name and reputation."

Baxter's actions, have not endeared him to CBS, The Maine Department of Justice, Walter Cronkite, the FCC, or the countless hams who have complained about Baxter's relentless interference to their ongoing communications.

When Baxter began to send out his self-styled notices of Felony Affidavit Complaints to those he perceived as interfering with his bulletin service, it really hit the fan.

On January 5th, 1995, Jay McCloskey, the U.S. Attorney at the Maine Department of Justice wrote to Baxter, telling him, "It is against the law to write and mail this type of threatening communication, especially when it has no basis in fact. If you continue sending this type of letter, you may be subject to Federal criminal charges for misrepresentation and for using the mails to make threats. You may also jeopardize your amateur radio license; the FCC can use evidence of this type of conduct to demonstrate that you no longer meet the character requirements for a license."

Baxter responded to this letter on January 9, 1995 by writing to the Assistant US Attorney, stating, "Your blatant and malicious abuse of the power vested in you by the citizens of the United States is despicable, unethical, criminal and unprofessional." Baxter went on to demand a retraction, which, of course, he never received.

Baxter has hardly endeared himself politically to the members of the Maine Department of Justice, but the lack of political goodwill doesn't stop there. On January 23, 1995, FCC Counsel John Greenspan wrote to Baxter regarding an insulting letter he wrote to the Assistant US Attorney, "Your reply suggests to me that you may very well lack the character qualifications to be an FCC licensee. You certainly lack the maturity, but that is, unfortunately, not grounds for revocation. If it is ultimately determined that you have made improper threats, that determination could result in a hearing to examine your fitness to remain an FCC license and/or criminal prosecution."

John Greenspan went on to add, "Although you have not used lawyers in the past, I suggest that you consult with an attorney knowledgeable in

FCC procedures about your alleged conduct. To provide some incentive for you to do this, let me say that if you wish to speak with me for any reason, it must be through an attorney. I will not accept any calls or letters from you personally."

Not exactly a love letter is it?

Over the past 5 years Baxter has been contacted by the FCC on numerous occasions and his station has been inspected by the FCC. Baxter says he has received FOUR (4) NAL's to date. The FCC has writtent to him about allegations of broadcasting, deliberate interference, failure to identify, poor signal quality, erratic starting and stopping times, recording conversations without permission, and the list goes on...

Even Baxter's neighbors are not immune from his tendency toward trying to use the courts to settle what some might consider silly disputes that would be better handled by a personal phone call. More often than not, Baxter has lost in the courts due to procedural defects in his lawsuits. He is not, contrary to a popular myth, fabulously wealthy, or a lawyer.

According to staff at the IRS, his IARN charity did not even make enough money to require that he file taxes last year. An underfunded organization like IARN that engages in irresponsible activities like calling for jump teams to visit disaster areas who don't even request assistance, does not seem to me, to be an alternative to the ARRL, except perhaps in the mind of Mr. Baxter.

On May 4, 1983, Baxter sued a neighbor of his, Camp Runoia, a camp for little girls, because they stacked cordwood on the side of the road. The case was dismissed. The camp had removed the wood prior to the case being heard.

Baxter's other neighbors have apparently also had reason for concern regarding his allegedly threatening behavior. According to reports gleaned from court records in December of 2003, Baxter was dismissed from his job (fired) as station engineer for FM 95.3 in Augusta, Maine. When he applied for unemployment compensation, the attorney for the station advised his clients not to attend the unemployment hearing.

"Because Mr. Baxter has demonstrated offensive behavior similar to that which prompted his termination, I have advised the Bouchards not to attend Monday's hearing. I indicated to you in our conversation that the Bouchards' fear for their safety as a result of Mr. Baxter's threatening behavior. Mr. Bouchard terminated Mr. Baxter from employment when Mr. Baxter repeatedly acted in a threatening manner to his supervisor and to other employess at the job site.Mr. Baxter demonstrated his inability to act responsibly and to exert self-contol at the last hearing."

The attorney (Robert J. Stolt of Lipman, Katz & McKee) goes on to say, "Payments of benefits to Mr. Baxter is a lesser evil than someone being harmed by him."

Baxter sued regarding these comments, but the court held that the comments made by the attorney were completely privileged in nature and were therefore protected by law.

Ironically, Baxter's objections have ensured that they will reside in the annals of the Maine courts in perpetuity, for anyone with the desire to read them.

For all of these reasons, and the reasons in the present NAL, I will sign the petition to deny license renewal to K1MAN. I don't believe K1MAN is capable of engaging in good Amatuer practice, as we are all compelled by law to do.

Although I hold no malice toward Mr. Baxter personally, and I believe him when he says he suffers from mental illness, I believe that Mr. Baxter has already amply proven that he does not deserve to remain a Commision licensee.

K1MAN has pending enforcement issues. K1MAN has already been warned by the FCC that he may be referred to the ALJ due to ongoing enforcement issues.

K1MAN's renewal anniversary is on October 17th of this year. Here is an excerpt from an FCC letter to K1MAN dated January 29, 2002.

"The rules of the Amateur Service are straightforward and easy to understand. To the extent that you do not comply with Commission rules regarding the Amateur Radio Service, then to that extent enforcement action will be taken against your licenses. That enforcement action may include revocation of your station license, suspension of your operator license, a modification proceeding to restrict your operating privileges, or monetary forfeiture.

It is also important for you to understand that if these matters are not resolved, your operator/primary station licenses will not be routinely renewed; but instead will be designated for hearing before an Administrative Law Judge. In such a proceeding, you would have the burden of proof to show that your licenses should be renewed."

It's time for Baxter and all of his associates to stand before a Judge.

gee, sounds like another one looking to get probed by the system for
unprofessional behavior on (and off) the air......

I hate to say this Lloyd, but K1MAN earned whatever actions is being taken
against him. in fact, he demanded this action by his very threats.

in any case, I think I will sign that petition myself, just because Mr.
baxter's actions draw negative attention to the service as a whole.

I recorded the contact today, if anyone missed it and is interested.

(1.1MB)
http://traladin123.fastmail.fm/iss627.mp3

Mayborn Discovery Center, Waco, Texas telebridge via WH6PN
Contact is a go for Mon 2005-06-27 16:05 UTC 25 deg

Proposed questions for Mayborn:

1. Do you think the underwater training program prepared you for space?
2. Do you get hot in the puffy suit?
3. Do you work with the Hubble Vision and how far can it see?
4. How many miles out in space are you from Texas?
5. What kind of experiments do you do in space?
6. What is your favorite space food?
7. What happens when or if your equipment breaks in space?
8. Why canï¿½t kids go to outer space?
9. What do the moon and stars look like from the space station.
10. How old were you when you decided to be an astronaut?
11. How long did it take to get to the space station?
12. What kind of sensation do you get when going into space?
13. How do you talk to your family?
14. Do you have to buckle up when you go to sleep?
15. How large is the space station?
16. How do you know which way is up and which way is down?
17. Can you use a compass in space?
18. If you know your job is dangerous, why do you do it?
19. What does it feel like to be in outer space?
20. What is the space station made of and how long will it last?
21. What kind of job did you have before you became an astronaut?
22. How long did it take to put the space station together?

I likely would have sued regardin them myself OTOH I do enough about
the law to undersatnd the result but a better action might have been to

complain to Bar assoication

However I am glad to hear he tried the action of the Attorney were
clearly borish and sometimes it is neccasary to act go down in flames
on principle

old friend:

You wrote, "So what? John Kerry and GW Bush are public figures each throughly hated in certian circles (although rarely the same circles)"

Frankly, I'd say it was a "staged fight", with both owned by the same "promoters."

John

My Midlands was cutting in/out so I finally bench tested it. I had power to
the rig.
Out of frustration (it was a cheap rig) I wacked it and it came on!
It woud stay on for awhile, then out again. I "wacked it" back to life
several times.
This is a cheap radio so it might be fun to experiment. Why does it do this?
I checked the power connects, the solderings and whatnot and they all seemed
good. Can I save this rig? Anyone have any other suggestions or reasons as
to why it is doing this?
Just wondered..
Could you send it to tdufres@hotmail.com ?
thanxs!

Try resoldering all connections on the printed circuit board
Sounds like a hairline crack in the circuitboard - or somesthing on that
order

3050. Midlands CB woes-Partial Victory!

Newsgroup: rec.radio.amateur.misc
Date: 2005-06-28 04:39:27 UTC
From: TC Dufresne <tdufresne@neb.rr.com>
Message-ID: <3w4we.4595$hV5.832@tornado.rdc-kc.rr.com>
Source record: 51372
Cross-posted to: alt.radio.cb.skip,rec.radio.amateur.misc

OK. So I will declare partial victory. Thanks to all who offered their unique brand of humor and suggestions. I love these boards!
As suggested I checked all the solder joints, I did find some that looked a bit suspicious, but nothing that made any changes. It STILL would come on and off intermittantly when I smacked it.

I was just about ready to give up, and I thought I'd try one more thing. The on/off switch seemed to be the center of focus, and I then noticed when I pushed the shaft down and held it, the thing would light. Sooo, I figured something had to be up with the switch, right? So I powered up the soldering iron again and started looking for loose or odd solder joints. I pushed the switch down (not on or off, but down) and soldered a few of the suspicious joints. I had my magnifiers on and the whole bit.

As I pushed the switch down this time, I noticed a small, miniscule little flash, a spark, but very very tiny on one joint. Ooops! Forgot to power down before soldering that time. Could it be? Well, I resolderd that joint and she stayed on! Could it be that simple?

Well, long and short of it, it worked, but only to a point. The Emergency channel (weather radio) worked like a champ! I REALLY don't use the CB part of the rig (sour grapes?) so I am declaring partial victory. As I said, the radio is pretty cheap anyway, and I DID get it to work partially, right?

So, there you have it. I suppose all that banging and smacking (the radio does bear some of the marks) may have directly affected the CB side of the rig. Maybe loosened a crystal or something.

Again, this closes the chapter at least for now on the Midlands CB problem. Maybe I'll find another rig on E-Bay, huh? Well, live and learn.
Thanks again for your support.
Tom

Yes, with "Winlink over Pactor III" being a very noticeable offender here, in that it happens to be so popular at the moment.

> It seems as if it would be very difficult to make these
> automated stations be friendly to other users.

SCAMP intends to address this, and it is a very important problem to be "fixed." There are many people who dislike the idea of using any amateur radio bands for linking Internet data/e-mail/etc. at all (my hypothesis is that they must not have been all that thrilled with packetmail either, but the Internet is the straw that's breaking their backs), but of those who aren't 100% opposed to the idea to begin with, Winlink not presently using busy detectors is a legitimate complaint.

> Both the pro and con in this argument are absolutely unwilling to listen
> to/believe the other side.

There's a lot of this going on, to be sure, but the fact that SCAMP is making slow and steady progress suggests that there are some level heads that will (hopefully) prevail.

I see you aren't up on all the facts. its not a revocation, its a petition to deny a renewal. a revocation requires an entire process to be initiated (which so far, has been started with the investigation and the notice of apparent liability). However, I digress, this isn't a revocation.

as for my enemies, well, they have been mitigated or otherwise marginalized into obscurity (can you say the same?).

>
> Would you feel that they were justified in petitioning the FCC not to

well, you would have to justify it and show evidence before the fcc why it should be allowed. in fact, I welcome the challenge from you to attempt to do so. However, I would suggest you make sure all your I's are dotted and your T's crossed.

Just to make this point clear, Mr. baxter has violated a fair number of rules and regs over the years, and even continues to do so given the current circumstances. can you show anywhere in ham radio (on the air) where I have done so? didn't think so.

>
> This petition thing is a piss poor idea, invented by those who would
> unwittingly harm amateur radio itself.

and you base this opinion on what facts?

fact:
1. mr baxter has repeatedly and with intent violated part 97 on numerous occasions
2. he has violated other rules and regulations related to the above
3. he has issued frivolous threats through the mail (some of which is amateur radio related)
4. his statements in the public record indicate that he has no interest in helping the service, just trashing it.

lastly, he has used his station in a manner that suggested a pecuniary interest.

in this day of paranoia and distrust, people like him can always be pointed to as the worst possible example (and thus, give those in power a reason to take away what we worked so hard to achieve. which is the worse threat?

well you seem to think that the petition is a bad idea, perhaps you need to further review the facts before you go spouting off.

3056. Amateur Newbie Questions

Newsgroup: rec.radio.amateur.misc
Date: 2005-06-28 18:17:40 UTC
From: Timothy@tholtom.freeserve.co.uk
Message-ID: <1119982660.771248.274300@z14g2000cwz.googlegroups.com>
Source record: 51377

Question 1)

I studied Electrical Engineering (20 years ago now...lots of theory and little practice...) I remember we had access to very expensive RF test gear, amongst which was a Hewlett-Packard RF Spectrum Analyzer (US$200,000 (!!!) I seem to remember). A very, very nice piece of equipment. At that time the IT revolution/DSP was still very much gathering steam. Now that PCs with 3.4 GHz processors are available, plus pretty sophisticated DSP development systems, at a reasonable cost (several hundreds of dollars), is there a good homebrew RF spectrum analyzer available... I've seen plenty of AF spectrum analyzers available (Spectran etc.) ... What I'm after is something like:

low cost development board +
high end PC +
GNURadio (or whatever) +
Extensions to GNURadio

= Pretty (or very) good RF spectrum analyzer

Question 2)

In a similar vein, though of course not as expensive, Does anyone have circuit diagrams for a homebrewed function generator, working against an accurate internal reference, and putting out: pure sinusoids, square waves, saw tooth functions, white noise .... etc.

low cost development board (DAC??/Digitally Controlled Oscillator) + Buffering and Amplification +
PC +
Homebrewed Software

= Pretty (or very) good software controlled, test lab, function generator...

Anybody got any ideas...sorry if the answers to these questions are blindingly obvious!!!

Thanks

Tim

SImple

The FCC has found that his action are in violation but to the point
where a monetary remedy to the violations is sufficient. If his
violations were deemed severe enough they can and have in the past
also called for suspension or revocation of the license.

SO by the powers of the FCC and their wisdom, have not chosen to
suspend or revoke the license. Your actions go beyond what the FCC at
this time is willing to punish. I find it odd that there are some that
feel that more punishment is deemed and they are intent on getting
more anyway they can.

So at this time, there is no need for one to justify his license
because that has already been done by the FCC. From a bystander that
has no interest in this matter it appears that the penalty that the
FCC h as levied is insufficient for some so they seek greater
penalties.

Now I ask if my inference to this matter is wrong or not. DO you seek
greater penalty for his actions than the FCC at this time is willing
to extend? By petitioning the FCC not to renew his licence next year,
you and other seek greater penlaty than the FCC has currently levied.

I think the fact Baxter routinely violates the rules might have
something to do with this petition.

Is petitioning vigilantism? This seems like a very civil method of a
group letting their opinions be known.

There is a reason that many hams across the nation do not like Mr.
Baxter. Perhaps they have been interfered with by his broadcasts.
perhaps they have been served one of his "felony affidavits". Perhaps
they believe that he is in violation of Amateur Radio regulations, and
has been so for a very long time.

> There is already a system in place, but it isn't giving them the
> results they want, so they seek to find ways to take things into their
> own hands.

How is this "taking into their own hands? The petition has no legal
binding for the FCC. All this is doing is giving the message that a lot
of people do not think Mr. Baxter is deserving of having his license
renewed. It is their opinion, and they may express that opinion because
it is protected by the Constitution.

And it is an opinion that can reasonably be reached by reasonable people.

> That is the path to anarchy. That is the path chosen by fools.

Freedom of speech is the path to anarchy? Oy.

Opinions are like Assholes. Everybody has one, and yours
is hanging out in the open, when it comes to K1MAN. You
had better pull up your pants, before you become the
laughing stock, if you aren't already. You had better read
up on the Holegergenski case and petitions, before you make
yourself look even stupider than you are now. And when
were you given permission to trim newsgroups? You should
spend more of your time studying to upgrade from that
no-code tech license you have held for years.

What a crock. According to the FCC letters, this guy is a walking violation. If
someone plays by the rules, no petition will deny them renewal.

ok then, explain the "felony afidavits" that k1man sent out. you want to
talk about maliciousness and vigilantism, there you go.

The problem is, you attempted to divert the point from the thread.

>
> There is already a system in place, but it isn't giving them the

huh?
ever hear of bureaucratic inertia?
besides, the petition is just an alternate means to the same end (and its
valid under fcc procedures).

>
> That is the path to anarchy. That is the path chosen by fools.

step in line....

It may also be that English is not that person's first language.

I didn't immediately recognize it as English. However, since the person who wrote that gibberish claims to be a lifelong resident of the mid-west USA, I think we can presume he was TRYING to communicate in English, but it would be difficult to conclusively prove it from the evidence. Eh?

But Dan THAT would make too much SENSE! (grin)

The trouble is that the unattended robot train has already left the
station.
ARRL deliberately did this without carefully coinsidering the monster
that they created and now that they persuaded the FCC to go along
with it, the problem is too late to remedy.

One can only hope that they will learn from this horrendous blunder.
Looking at the latest proposal from this same committee, (segmenting
by bandwidth only) I see only more stupidity being foisted on a
majority by a small group in a smoke-filled room.

Most of us are finding out what they did each time, only after the
damage is done.

WHERE is even the basic polling of radio amateurs?
Did they ask amateurs in other countries that will be affected
by this?

Do 40m CW ops REALLY want to be HEMMED IN to the bottom 35 khZ?
OK the rules don't SAY that will happen, but if you give the
Mexican and VE SSB pests and the digital ops and MORE rope than
they have already taken, 40m CW could become a thing of the
past.

YMMV

Well said CHristy. But it IS the trend.

We want goverment to beat up "criminals" really hard for us.

We want the police to really HURT people when they arrest them.

We want the army to really HURT those prisoners in Abu Graib and
Guantanamo and the other prisons. That kind of toughness
will teach that K1MAN guy not to mess with US!

WE are #1 - and we are big and TOUGH and VERY masculine!

LOL!

I assumed you contacted your ARRL division director to make your views known? That's the mechanism by which decisions they make get input from everyday amateurs, so those amateurs' views can be represented in the "smoke-filled room".

After the ARRL's decision, how did your director explain to you how and why the decisions were made?

Or do you just sit and grouse and not bother to make your views known to someone who can actually do something about it?

P.S. If you identify yourself to your ARRL director only as "The Old Man", he's probably not going to pay much attention to you. And rightly so.

From my perspective, I can copy CW very well with a narrow filter, even
with a large amount of QRM from a digital system.

And, the digital system is probably not going to be able to deal with
my interference half as well as I can deal with its.

Since I am reading this on rec.radio.amateur.boatanchors, where it is
crossposted, may I recommend the use of the audio filter on the Collins
R-390A? It is frighteningly effective at getting rid of this trash.

Can anyone suggest a program for Windows (2000 Pro) that will key my HF rig for CW? I have a Rigblaster already hooked up and functioning for the digital modes, but would like to be able to key CW.

I don't really want or need the reception to be done by the computer, just the actual keying.

I also have a control cable hooked up to the rig from an RS-232 port on the PC.

Thanks in advance!

>known?

Good answer, Roy. But I'm pretty sure that "The Old Man" isn't a League
member, or if he is, he takes no part in his Section. He said:

>> Most of us are finding out what they did each time, only after the damage
>> is done.

Certainly I heard about it well before hand, and expressed some concern, in
this case to our vice-director who happened to be dealing with this
particular issue. I got some additional feedback which reduced, but did not
eliminate, my concerns.

I suspect if "The Old Man" was on the radar of his section or division folks
as someone who was reasonably active, he would have had plenty of
opportunity for input early on. Most directors send out emails about stuff
like this to anyone in their division they suspect is active. Actually, if
I recall there was even a mention of this happening in QST well ahead of
time, but there is a lot of stuff in QST and something like this is easy to
miss.

Most folks, though, would rather bitch than take a few minutes to educate
their representatives. Kind of a shame, really, that so many folks can
spend so much energy bitching, but are unwilling to spend even a little
energy to make amateur radio better.

..

A frequency-hopping spread spectrum system with a reasonable amount of error correction won't be bothered much at all by iCW, as a matter of fact. :-)

Howdy Dave,

I understand WriteLog does a fine job with cw keying/sending. The n1mm.com logger also does a good job.

Likely more than you wanted, but give them a look.

What rig and other software are you using?

Yes, but a frequency hopping system should recognize that this individual
channel is currently not good, and stop using it!

If it can, certainly... but it's the standard "near-far" problem in that you
may be able to hear the interferer (the FHSS system) but he can't hear you.
:-(

Sorry - I should have stated more specifics!

I'm using an Icom IC-746 rig. The software I've been using includes
MMSSTV, Logger32, MT63, among others. I have the Rigblaster hooked up
and working fine with all of those programs, and the RS-232 port can and
does handle controlling the rig. I just need guidance to a CW program
that can utilize what I already have!

thanks es 73

Hi,

I used to have novice call WD6BDK back in the mid to late 70s (76-79 I think?).

I'm hoping to upgrade from a tech to an extra on Saturday, and I was just told I could use my old expired novice call to skip element 1 (the 5wpm test). I'd rather not stress over element 1 (I can pass, but...).

If you or someone you know has an old callbook and could look me up and scan or fax me a copy of the page, I would be eternally in your debt.

Much thanks,

Paul

CALL STEVE
(Debbie Harry/Blondie/Purple Haze)

Cold nuts this winter, baby,
Call Steve to keep them warm
Need a blowjob this winter, darling,
Steve'll go down wherever you are
Steve'll use all his charm,
He likes to drink his cum lukewarm

Call Steve, Call Steve
For that wet blowjob
Call Steve any, anytime
Call Steve, Call Steve
For a wet blow job
You can call Steve any day or night
Call Steve

Steve covers dicks with kisses, baby,
Steve covers testicles with love,
Hairy, sweaty, or sal-ty, maybe
Steve can never get enough,
Faggots call Steve, he don't know why,
Breathless Steve never runs out of k-Y

Call Steve, Call Steve
For that wet blowjob
Call Steve any, anytime
Call Steve, Call Steve
For a wet blowjob
You can call Steve any day or night
Call Steve
Steve sucks on anything,
When you're ready, Steve can swallow your jing
Call Steve

[Break]

Oooooh oooohh Niggerdicks are Steve's only love,
Oooooh oooohh Niggerdicks, Steve can't get enough,
Oooooh oooohh Steve, moi cherie, au revioir
Anytime, anyplace, anywhere, anyway....
Steve'll suck anytime, anyplace, anyday---ay

[Break]

Call Steve, Call Steve
Sucking niggerdicks is his life
Call Steve, call him any, anytime
Call Steve, Call Steve
Call Steve for blowjobs some other time
Call Steve, Call Steve
Sucking niggerdicks is his life
Call Steve for his sweet desire
Call Steve, Call Steve
Call Steve for his lovin' of your dick big-time
Call Steve, Call Steve
Sucking niggerdicks is his life
Call Steve any, anytime
Call Steve, uh-hummm,
Call Steve
(fade out)

Thanks, unfortunately W5YI doesn't have a complete set, they're missing 1975-1983 apparently.

I a friend of a friend claims he's got a 1979 callbook with my callsign in it, but he's neither fax nor scanner enabled, so I'm still looking.

You could be right, sigh. I feel a little guilty for doing it this way, but if the FCC says it's good, then who am I to argue. Besides, I bet a few of them couldn't pass the new element 3. I took it in 197<8-9> timeframe, and it's a new ballgame.

There's ebay. Someone may be looking to unload stuff like this.
Then you could bring the entire callbook with you and that would
be plenty of evidence. But this will take time.

Also if you don't mind paying the fee, the FCC can provide a cofirmation.
But it takes a while to get confirmations of old paper records.

3110. Looking for new "owner" of the previously announced Yahoo! Group

Newsgroup: rec.radio.amateur.misc
Date: 2005-07-02 15:28:22 UTC
From: Sparky Voltz <sparky_unit_412@yahooEY.com>
Message-ID: <rdbdc1dsbnmee2e9gl7llb5rsvmec49t1h@4ax.com>
Source record: 51282

Hi gang,

Below you will find my reasons for "bowing out" of being the so-called owner of the Yahoo! group entitled "All-Band Radio Renegades and Outlaws". I'm sure some of you will feel the necessity to comment on my decision, and try and psychoanalyze me for coming to that decision, which is fine. If you're so inclined, fire away. OT, I welcome your comments, as you proved yourself to be a gentleman.

"Dr. Ace", your blather will forever be sent directly to my "bit-bucket" or, as I guess the current USENET nomenclature is now, "plonked" because of your absolutely sickening, perverted, offensive, and poorly thought out ramblings. I was, however, highly flattered that you would spend so much time in changing my sig into something so awful it exposed your true personality perfectly clearly. Now, I want you to keep thinking about me, night and day. Constantly. Think, "Sparky, Sparky, Sparky"... I want to be forever etched on your puny little mind. That said, may God bless you and allow you to repent and become a productive and decent human being. I know you have the potential. You've just not used it. At least not here on USENET. At your dinner table, I imagine you're a rather decent, friendly member of the rest of that group you're with. With that, adios, pervert.

Below is my original message. I should have done two things differently; one, I am going to send this version as a "Special Notice", since it is of a significant nature in regards to our group, and some of our members have selected to receive special notices only. Also, I should mention that I will NEVER cease my 11 meter and/or CB operation. Too bad if that ticks anyone off, I couldn't care less. As a kid, that pair of walkie talkies I got for Christmas left permanent impressions in my brain which will remain there until it ceases functioning. :) Like all those heterodynes, those southern accents and "handles", the fun of reaching "all the way" to my best friend's house 2 blocks away. I love CB, always have and always will. And, as I stated below, I love my CW. So there ya go.

And, if anyone loses sleep over the fact that I prefer to remain anonymous by using the handle "Sparky", that's your problem. The Internet is full of kooks, nuts, fruitcakes, hackers, stalkers, and other Neanderthals who take immense delight in seeking one's location and identity only to harass, annoy, and/or otherwise make a complete nuisance of themselves. Should anyone care to use their real name, their ham callsign, give their mailing address and telephone

number over the Internet, that's your business. Personally, I think it is terribly foolish and highly dangerous. But that's just my opinion. Deal with it.

I am ceasing transmissions on our group's 3, 6, and 13 MHz frequencies immediately. However, 13.555 MHz is allocated by the FCC as a Part 15 frequency and can be used without a license. Part 15 has fairly strict rules regarding power output and antenna limitations. I understand that frequency can be used by any mode of communication. So... I may set up a LEGAL part 15 station of some sort, either CW or SSB, if they are permitted, and attempt operation at some date and time, probably when band conditions are better. Like in 5 or 6 years. :) Otherwise, I shall remain a listener-only, as stated below.

Original message follows:

This group has grown beyond my wildest imagination. I really never expected more than a dozen or so members. However, it seems to be constantly growing, which proves to me that there is interest in this sort of radio operation and activity.

Believe it or not, I have come to the conclusion that I am no longer going to operate on the three HF frequencies we've chosen for our group. The main reason for my change of heart is that I've realized that operating on those frequencies could possibly interfere with our U.S. Military communications. In these seriously dangerous times I simply cannot -- and will not -- put our military personnel in any type of danger or risk. Therefore, I will no longer be transmitting on those frequencies. Secondly, I worked darned hard for my Amateur Radio license, and should I receive the deserved consequences for such illegal radio transmissions, I would most likely lose my Amateur Radio privileges. Frankly, it just ain't worth it. I love my CW way too much. :)

Therefore, I am resigning as "owner" of this group and handing over the reigns to someone else. I am, and will always be, a shortwave listener who is interested in LISTENING TO the unusual, including pirate broadcasters, "freeband" 2-way radio operations throughout the HF spectrum, and other unordinary and clandestine types of radio operations. I intend on remaining a member of this group, sometimes participating by writing posts and making comments, etc. However, I will no longer promote or endorse illegal radio activity on my own behalf.

If anyone is interested in becoming the "owner" of this group, please email me. I suppose the most fair way of determining who I assign that title will be based on the date the person joined. Sort of a "first come, first served" concept. And should there be a tie, well... I'll toss a coin. One person can be "owner" and the other can be assigned "moderator" status by the new "owner", if that person so desires.

Should I not hear from anyone by Friday July 8, I will simply close the group down for good. It's been fun, friends, and I've enjoyed the banter that's been going on here. I hate to see it end. So, it's up to y'all.

I'll await your request to become the proud, new owner of ABRRAO's. Thank each and every one of you for your joining up, your participation, and your opinions. I do look forward to the continuation of the group.

It's been real...

73 -- ~Sparky~

Often imitated -- NEVER duplicated!

Sparky - AM/FM/SSB/CW from somewhere in the Midwest U.S.A.:

KALL-2671 - CB Radio;
Unit 412/RF412/CO3026 - Freeband 26-28MHz;
W9*** - Amateur Radio;
WQRM313 - GMRS;
M/V Mysterious Traveller - Marine;
plus FRS, MURS...

...got frequencies? ;)

I applaud the "anonymous" CB'er from Illinois
for coming to the conclusion that
"operating on those frequencies could possibly
interfere with our U.S. Military communications".
And for his decision to stop his illegal operations,
so as not to "put our military personnel in any type of danger or risk".

But, I wonder.....
If "his" group of so called "Renegades and Outlaws" has so many members,
why does he continue to post his messages in rec.radio.amateur.misc
and so many other groups such as alt.radio.free ,
alt.ham-radio.exotic-modes ,
www.radiobanter.com , www.radio-forum.com , CB and Free Band groups?

He tries hard to hide and uses these Email addresses
(sparky_unit_412@yahoo.com)
and (tweak_01@walla.com)

One final point.....
With all of the effort Spunky Trollz, Spanky Pants
or whatever his "Handle" is has put into promoting his
group of so called "Renegades and Outlaws"
one would think he wouldn't need to post his crap in the Amateur Radio
groups.
P.S. I still don't believe he has an amateur radio license.

Ace - WH2T

Beware the Troll
a.. They will want to hide other personal information, because it can
demonstrate that they are not for real.
a.. Various excuses can be used for not releasing personal information,
including privacy.

Common types of troll messages or activities:

a.. off topic messages - "Anyone want to discuss CB ?" "No, this is an
amateur radio forum."

** SNIP**

Thanks for the suggestions! Some great programs were brought to my attention. Unfortunately, without rewiring my PC and radio, it appears that none of them will work.

I have the CT-17 cable from the RS-232 port to the IC-746, but that won't key the rig in CW mode. I also have the Rigblaster, which will key the rig using the PC audio card, but it will only key it in SSB mode, hence I lose the effects of the good CW filtering.

Oh, well! Not the end of the world by any means. Just back to the drawing board!

Thanks again!

On 13MHz it's 10,000 microvolts per meter at 30 meters

Hi OM, your ol' friend Sparky here...

I've been absent from USENET for a while, so I'm sort of coming in on the middle of this whole K1MAN thing. I've not been a Baxter fan for a long, long time. From what I read from my "ARRL Letter" it appears the FCC has just about had it with the guy. Undoubtedly, he will appeal whatever fines and/or incarceration orders are headed his way, wasting our taxpayers' money even more than its been wasted concerning his ongoing relentless and unnecessary QRM'ing, and litigation efforts. Great.

Let me know where I can sign up, too. Or, perhaps, you'd rather not have me on the same petition as yourself. :) Well, at least we agree on ONE thing. Baxter is (hopefully) done. Finished. Gone. Waaaaaaaa.....

Or, did I miss some sarcasm on your part?

73 -- ~Sparky~

Often imitated -- NEVER duplicated!

Sparky - AM/FM/SSB/CW from somewhere in the Midwest U.S.A.:

KALL-2671 - CB Radio;
Unit 412/RF412/CO3026 - Freeband 26-28MHz;
W9*** - Amateur Radio;
WQRM313 - GMRS;
M/V Mysterious Traveller - Marine;
plus FRS, MURS...

...got frequencies? ;)

On Sat, 02 Jul 2005 19:01:57 GMT, "OM" <Nomail@msn.com> replied:

If a ham dies, and he's never learned the code and doesn't do CW, is he still considered a Silent Key? I'm thinking maybe a Silent Mic (SM), or maybe even a Silent Echolink Operator (SEO). Or maybe even a Silent Earth-Moon-Earth (SEME) operator. How about a Silent-No-Code-Tech-With-Privleges-Above-30megs. (SNCTWPA30M).

I would say yes, since no matter what mode someone uses, or what their
priveleges, they are 'keying' something, whether a bug, iambic, straight
key, microphone or other device..

When I was a kid, I remember my dad using GI Bill money to go through the NRI National Radio Instititute courses.

Recently I thought it might be fun to go through a modern course like that.

Alas, NRI went out of business several years ago.

Does anyone know of any good radio/electronics correspondence courses to take these days? I don't care at all about "accredidation[sp?]" -- it's purely for my own learning's sakes.

Maybe they are busy monitoring anonymous remailers instead of
say, the Middle East or North Korea.
BWHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAH
AHAHAHAHAHAHAHAHAHA!!!!!!!!!!!!!!!

Spoken like a true Mental Midget.
Buy a Brillo pad and scrape the smegma from your overbite, Wiseman.

And while you are out and about, is there a Wal Mart in your area? Get you
to the store and buy a keyboard with the keys in the right place.
That is, after all, your excuse for your hundreds of "typos", is it not? And
after you get your new keyboard, be sure to lock it away lest Lloyd sneak
into your house and switch the keys around again. Oh, wait. You can't lock
it in your safe because Lloyd knows where your safe is and even knows the
combination.
You know how Lloyd is Wogie. He is everywhere. He's hiding in the bushes
across the street, he's sitting in the parked car two houses away, he's
listening to your phone calls and, heck, he's even in that Piper Cub flying
over your house on weekends.
Lloyd seems to be omnipresent in your life, doesn't he? Without Lloyd you
would have little reason to be. Your life would be meaningless without the
seemingly omniscient Lloyd controlling your Lithium addled brain, wouldn't
it? Without Lloyd in your shallow life you would cease to be. Zilch. Zero.
No Lloyd, no Roger Wiseman.

Oh, excuse me. In your fantasy world everybody is Lloyd be they real or
imagined.
You should again don your tin foil hat, Roger. That way Lloyd won't be able
to read your thoughts, insane as they are. Trouble with that darned tin foil
hat is that it causes your single brain wave to bounce around and collide
with itself as it seeks release, and that is the cause of your penchant for
foul language.

Saran Wrap, Roger. Saran Wrap. It works better. Place it over your head,
tape it tightly around your neck and say goodbye.

BWHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAH
AHAHAHAHAHAHAHAHAHA!!!!!!!!!!!!!!!

Why would you let the ARRL stand in the way of your getting a ham
license? That's a pretty weak excuse, you don't have to have a single
thing to do with the ARRL as a ham.

Hello all,

I am beginning the process of searching for some land on which to build a home. It will be located in the Pacific Northwest, in a fairly rural area. I expect to indulge myself heavily in my radio hobbies, including ham radio (especially on the HF bands) as well as a fair amount of Short Wave Listening. I would like to solicit advice on how to evaluate a potential location for quality of radio reception.

Aside from the obvious (i.e., a high elevation, away from high voltage power lines, plenty of room for antennas, etc.), are there any other attributes I should consider to ensure the location will be conducive to my radio activities?

Dennis

Why just ''high voltage'' power lines? I'd avoid all power lines.

Yes, the single most important location for outstanding DX on LF, MW and HF
is to site yourself right on the beach.
Much discussion has taken place about the "ideal" DX site and there is
considerable consensus among serious DXer's that DXing on the waters edge at
the beachside gives a major boost to signals.

Good luck in finding the Holy Grail of DX sites

CIE - Cleveland Institute of Electronics "may" still be out there. They had a couple programs I believe. I have what appears to be a complete course from them minus maybe some of their kits. I got it from someone who went through their training. Very nice books. "I" went through NRI and it too was ok. I've had electronics training before NRI and since then. Check E-Bay, often there are many books from NRI up for bid which cover a great deal of "beginning" electronics.

So what, just because you may not agree with everyone who goes to movies, does that stop you from going to movies? What made you think you had to pay any attention to those "loyal members". What do you care who has the biggest antennas or what brand of radio some other ham uses? I think it is all just a weak excuse about something you didn't want to put any effort into.

To: All Radio Amateurs [mailto:all@arra.com]
Subject: Important Organizational Announcement

ARRA Founder Glen Baxter cuts a deal with Washington

Belgrade Lks, Maine., July 1, 2005 - In a surprise deal, ARRA Founder K1MAN and FCC legal representatives at Dewey, Cheatum, & Howe, announced today that all charges and NAL pending against K1MAN would be dropped contingent on a merger agreement between ARRA and ARRL. Under the proposed arrangement, ARRL would acquire the American Amateur Radio Association (ARRA), a leading provider of Amateur Information Bulletin Services. The deal would unite the two most prominent Amateur Radio organizations in the United States. Financial terms of the proposed acquisition have not been finalized.

"The acquisition of ARRA complements ARRL's already extensive offerings to include up-to-the-minute information and interactive discussion on what is happening in the world of Amateur Radio," said Jim Haynie, W5JBP, president of ARRL. "Together, we will be more effective in taking on some of the challenges facing Amateur Radio, such as BPL and Spectrum Defense. This brings us one step closer to being the national membership association for Amateur Radio operators."

The acquisition also brings the strong leadership skills of Glenn Baxter, K1MAN, to the ARRL organization. Baxter has been named ARRL Third Vice President in the move. "Mr. Baxter is a welcome addition to our management team here at ARRL," said David Sumner, K1ZZ, and ARRL Chief Executive Officer. "I look forward to his fresh perspectives and enthusiastic approach to running a service organization like the ARRL."

"Water under the bridge," said Glenn Baxter of ARRA about past frictions between the two organizations. "Today marks a new beginning for all of us. We're in this together now." Plans for collocating Mr. Baxter and Mr. Sumner in adjoining offices at ARRL headquarters are currently underway.

In an official statement, Mr. Riley Hollingsworth, K4ZDH, FCC Legal Advisor for Enforcement added, "Over the years, Glenn and I have become very close. I look forward to continuing our professional relationship as he assumes his new position."

In an effort to accelerate the shift to its new on-the-air image, ARRL has already filed the paperwork necessary to make W1MAN the official call sign of the combined organization. Joe Carcia, NJ1Q, ARRL station manager was thrilled with the change, saying, "What a creative way to reflect our

traditional roots while also letting our bold, new face shine through!" Broadcast operations at the facilities of ex-W1AW will be shutdown immediately. ARRA's state-of-the-art studios in Belgrade Lakes, ME will become the new source of all ARRL transmissions.

Amateur Radio insiders applauded the move. "These are interesting times for Amateur Radio," said Gordon West, WB6NOA. "I sense a likely shift in the ARRL views on many areas of the service. I think we'll be feeling the positive impact of this merger for years to come."

"This is big . . . really big," said Joe Walsh, WB6ACU, lead guitar player for the Eagles. It's exactly the kind of thing that will send our ticket sales through the roof. With Glenn on vocals, and Sumner on drums . . . this tour season will be our best since '73"

Audio aficionado and Amateur Radio entrepreneur Bob Heil, K9EID, also supported the move. "This is a good thing for Heil, and it's about time these guys got together", said Mr. Heil. "We are already working on a special commemorative W1MAN microphone to honor the event."

ARRL was founded in May 1914 by Percy Maxim, a leading Hartford, Connecticut, inventor and industrialist. Today ARRL, with approximately 152,000 members, is the largest not-for-profit organization of radio amateurs in the United States.

No kidding. If Guy Atkins and his friends are out at Greylands when
The Big One hits, they'll be operating maritime mobile. It's a good 3-5
miles to high ground, according to my DeLorme state atlas.

Ohio/Penn DX Bulletin No. 716

The Ohio/Penn DX PacketCluster
DX Bulletin No. 716
BID: $OPDX.716
July 4, 2005
Editor Tedd Mirgliotta, KB8NW
Provided by BARF80.ORG (Cleveland, Ohio)

Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, AB5K & the AR TelNet Clusters Network, K1XN & GoList, WS1L, W2SN, NG3K, W3UR & The Daily DX, W3YY, KU4J, N4AA & QRZ DX, N4GN, K5LBU, KH6BZF, WQ7R, K8YSE, WB8YJF, CX7BY, CX6VM, DL1EK & The DX News Letter, F5CWU & La Gazette du DX, F5NQL & UFT, I1JQJ/IK1ADH & 425 DX News, IZ8CCW, JH8KYU, JI6KVR & JA-IOTA Islands News, OH6NJ, ON5NT, PY3DF, PY5EG/PP5JR, SP5UAF, TG9ANF, UT5UY, VA3RJ & ICPO and XQ1IDM for the following DX information.

DXCC COUNTRY/ENTITY REPORT: According to the AR-Cluster Network for the week of Sunday, 26th/June, through Sunday, 3rd/July there were 205 countries active. Countries available: 3A, 3B8, 3B9, 3DA, 3V, 3W, 4J, 4L, 4S, 4U1I, 4X, 5B, 5H, 5N, 5R, 5T, 5V, 5X, 5Z, 6W, 6Y, 7Q, 7X, 8P, 8R, 9A, 9G, 9H, 9J, 9K, 9M2, 9M6, 9N, 9Q, 9V, 9Y, A3, A4, A5, A6, A7, A9, AP, BV, BY, C3, C6, C9, CE, CE9, CM, CN, CP, CT, CT3, CU, CX, CY9, D4, DL, DU, EA, EA6, EA8, EA9, EI, EK, EP, ER, ES, ET, EU, EX, EY, EZ, F, FG, FK, FM, FO, FR, FW, FY, G, GD, GI, GJ, GM, GU, GW, HA, HB, HB0, HC, HI, HK, HL, HP, HR, HS, HZ, I, IS, J2, J3, J5, J6, J8, JA, JT, JW, JY, K, KG4, KH0, KH2, KH6, KL, KP2, KP4, LA, LU, LX, LY, LZ, OD, OE, OH, OH0, OK, OM, ON, OY, OZ, P2, P4, PA, PJ2, PY, PZ, S5, S7, S9, SM, SP, ST, SU, SV, SV5, SV9, T32, T5, T7, T8, T9, TA, TF, TG, TI, TK, TR, TT, TU, TZ, UA, UA2, UA9, UK, UN, UR, V3, V5, V6, V7, V8, VE, VK, VK9N, VP8/h, VP9, VR, VU, XE, XU, YA, YB, YI, YK, YL, YN, YO, YS, YU, YV, Z2, Z3, ZA, ZB, ZC4, ZD7, ZD8, ZK1/s, ZL, ZP, ZS

* PLEASE NOTE: The report "could" contain "Pirate/SLIM" operations or more likely a "BUSTED CALLSIGN". As always, you never know - "Work First Worry Later" (WFWL).

3DA0, SWAZILAND. Frosty, K5LBU, states, "All systems are go for the DXpedition to Swaziland. We should be on the air starting the night of July 8th." Daniel/ZS6JR (3DA0JR) and Frosty/K5LBU (3DA0CF) will start putting up antennas on the 6th of July. They will have a very tall vertical for 160-80 meters, along with three 800 foot beverages. They will have an A4 beam with 40 meters on it along with the 2 element 12-17 meters

beam at about 60 feet. Also, they will have a 6 meters 7 element beam along with a 2 meters 18 element beam at about the same height. Wayne/ W5KDJ (3DA0KDJ) will arive on the 8th of July, and he will be their main CW operator. They will be on the air for the IARU Contest and hope that they can get 3DA5HQ for the contest callsign. Their activity will last until July 18th. QSL via their home callsigns: 3DA0JR (via Daniel/ZS6JR), 3DA0KDJ (via Wayne/W5KDJ) and for 3DA0CF & 3DA5HQ (via Frosty/K5LBU). They hope that Andy, 3DA0TM, will join them to do some operating.

A6, UNITED ARAB EMIRATES. Ghis, A6/ON5NT, provides OPDX with updated news from A6-land. David Hardy, G4BXH, has just received his guest license in the UAE. He's A6/G4BXH. David has been in the UAE for many years and originally comesfrom the Falkand Islands and should be known to oldtimers under his VP8HJ call sign. This past week there were QSNs reported on 17/20 meters CW between 1000-1030z.

C9, MOZAMBIQUE (New IOTA and Also 3DA0). Alexey, UT5UY (ex-UR4LUG, UX0LV, EM5UIA) informs OPDX that he is the leader of a team of seven Ukrainian radio amateurs planning to be active from Chiloane Island (New IOTA) in the Sofala Province in the Indian Ocean July 28th through August 1st. Activity will include the IOTA Contest. This DXpedition is expected to be well equipped, and they will be on the air with 2-3 stations operating simultaneously. Stations will be on 160-10 meters with Yagi antennas and amplifiers. Alexey states, "All members of our expedition are very good operators. We plan to use C93DX callsign." Operators mentioned are: Alexey/UT5UY, Roman/UR0MC, Dim/UT5UGR, Dim/UT7UJ, Bob/UT7UT, Andy/UU4JMG, Alex/UX0LL and Andy/OK8ANM (UR4LRQ). Also, during the period between July 23rd and August 10th, they plan activity from Maputo, Mozambique, using their personal callsigns (C91UY, C91LL, etc.), and from Mbabane, Swaziland, using their personal callsigns (3DA0UY, 3DA0LL, etc.). QSL C93DX via UT5UGR. QSL all individual C9 and 3DA0 callsign via the operator's home callsign, direct or by the Bureau. This is expected to be a highly costly DXpedition, and the group is look for sponsors/financial help. If you or club can help, please contact Alexey by:
E-mail at: ut5uy@ukr.net
Mobile Phone: +38 067 5043408
For more information, please visit the DXpedition's Web page at:
http://www.c9.dxer.com.ua

CX, URUGUAY. In the next IARU Contest, look for members of the "Radio Club Uruguayo" (RCU) to use their official callsign CX1AA. A very large group of CX operators will activated this callsign on all bands 160-10 meters on both modes CW and SSB. QSLs for this operation only are via the QSL Manager KA5TUF.

FO, FRENCH POLYNESIA. Fred, F5INL, will be on a 2 year assignment in Papeete starting August 8th. His new callsign is FO5INL. Fred states it (seems) that this will be the first time a three letters suffix will be issued in FO5 area. He will use a TS50, AT50, morse paddles and some undetermined antennas. ADDED NOTES: During his stay he is scheduled to make a visit to Easter Island (SA-001) and possibly another location in

New Zealand. More information is forhcoming.

HQ9, HONDURAS. Ray, WQ7R, will be operating from Roatan Island (NA-057) from October 22nd to November 4th, possibly as WQ7R/HR9. His activity will be limited due to other commitments while on the island, but look for him on the HF bands on the modes RTTY, PSK and CW. There will also be activity on 6 meters CW/SSB. He will also be a Single-Op/All-Band/Low-Power entry as HQ9R in the CQ WW DX SSB Contest (October 29-30th). QSL both operations via N6FF.

IOTA NEWS.....
AS-076. Operators JN4MBO, JA5BEX and JF0BPT will be active as homecall/5 from Matsu Island (Kagawa Pref), July 7th. They will also activate other islands in the AS-076. Their purposed schedule is as follows: July 7-8th Awa Island
July 8-9th Takami Island
July 9-10th Oshima Island
QSL via their home callsigns, direct or by the bureau.

AS-117. Operators JA0HNA, JE0OMG and JH0OLD will be active as homecall/0 from Awa Island (JIIA AS-117-062 and Niigata Prefecture), July 8-11th. QSL via their home callsigns, direct or by the bureau.

AS-117. Operators JM4MDV and JE4EXD plan to be active as homecall/4 from Heigun Island (Yamaguchi Pref) from July 17-18th. After the operation a JIIA number will be issued (JIIA AS-117-???). QSL via their home callsign, direct or by the bureau.

AS-117. Operator JF0BPT will be active as JF0BPT/7 from O-shima Island (JIIA AS-117-005), Aichi Prefecture, Honsyu Coastal Island from August 15-16th, and Eno Island (JIIA AS-117-053), Miyagi Prefecture, Honsyu Coastal Island, August 16-17th. QSL via the home callsign, direct or by the bureau.

AS-147. Look for operator JN6CJR/8 to be active from Rishiri Island (JIIA AS-147-007, Hokkaido's Coastal Islands), July 6-7th. QSL via the home callsign, direct or by the bureau.

EU-009. Members of the Orkney Amateur Radio Club will be active as MM0MWW/P from the Isle of Egilsay (IOSA OR-12 and SCOTIA OI-22), July 8-10th. Activity will be on 80-10 meters CW and SSB with two complete stations with amps. QSL via GM0IFM, direct or by the bureau. Visit the Orkney Amateur Radio Club Web page at: http://www.eu009.com

EU-010. Dennis, M0LSB, will be active as MM0LSB/p from Harris (SCOTIA HI-21, IOSA OH-001) and Scalpay (SCOTIA HI-19, IOSA OH-025), in the Outer Hebrides group, between July 4-8th. Activity will be on, or near, the usual IOTA frequencies. QSL via M0LSB.

EU-029. Rene, DL2JRM, will be active as OZ/DL2JRM/P from Lolland Island (DIA SJ-015 for the Danish Islands Award), July 29th to August 1st. Look for Rene to be active during the RSGB

IOTA Contest on 80-10 meters QRP CW/SSB, with a FT-817, Windom and GP antennas, all solar powered. QSL via his home callsign, direct or by the bureau.

EU-040 (Cancelled)
EU-145. Carlos, CT1END, informs OPDX that authorization for the activity to Bugio Island (EU-040) for the RSGB IOTA Contest has been "denied due to the absence of security and conditions in the arrival and permanence in the Island." Instead, the members of the Portuguese DX Group (GPDX) will activate Culatra Island (EU-145) for the contest. Look for activity before and after the contest on 80-6 meters on CW/SSB. QSL via CS1GDX, by the Bureau or direct to: P.O.Box 1156, 2736-996 Agualva, Portugal.

EU-096. Operators Pertti/OH6HJE, Jarno/OH6NJ and Markku/OH6UV are now active as OH6AW/1 from Kustavi Island through July 5th. Their operation will be mainly on the HF bands CW/SSB, but take a look also on the VHF band.

EU-129. Look for DL0MFK/LH to be active from Usedom Island (DID/GIA O-13) and the Karnin Lighthouse (WLH DL-014 and ARLHS FED-274), August 20-21st. QSL via the bureau.

EU-158. Nick, SV3SJ, will be active as SY8M from Proti Island (MIA MG-092) during the IOTA Contest. Also, during August 1st, he will be signing SV3SJ/p with particular attention for USA and JA stations. QSL both SY8M and SV3SJ/p via IZ8CCW, direct or by the bureau.

NA-058. Jeff, KU8E, will be active as KU8E/p from St. Simons Island (USI GA-003S, Glynn County) in St. Simons Sound, Georgia, July 5-8th. Operations will be limited since this is a family vacation, so look for Jeff to operate mostly on 20 meters CW during his free time. QSL via his home callsign.

SA-069. Members of the "Atacama Desert DX Group" will be active as 3G1M from Santa Maria Island for 3 days next August 13-15th. Activity will be on 40-10 meters, including the WARC band and 6 meters, on modes CW, SSB, RTTY and BPSK1. QSL via XQ1IDM.

KH0, MARIANA ISLANDS. Look for operators Nao/JK1FNL (NA8O/KH0), Jim/7K4QOK (KG8RP/KH0) and Takky/JE1KUC (N1KU/KH0) to be active from Saipan, Nothern Mariana Islands (OC-086), July 8-11th. Activity will be on 40-6 meters CW, SSB and RTTY. QSL via their JA home callsigns, direct or through the JARL Bureau.

KH2, GUAM. Hide, JH8KYU, has a plan to spend several days on Guam Island. The main purpose of his trip is a general vacation like swimming, shopping and driving with his wife. But he will be active as K8YU/KH2 in the IARU Championship Contest (July 9-10th). The category will be the Single Operator/All-Band both SSB and CW. QSL via KH8KYU, direct to his mailing address in Tokyo or through the JARL Bureau. Don't send any cards to the

K8YU's callbook address or the W8 and KH2 Bureaus.

KH9, WAKE ISLAND. "The Daily DX" is reporting that there may be some activity by Mel, W3MR, as W3MR/KH9 during his current work assignment on the island. The length of his stay is not known. However, if Mel finds time to operate (work comes first), look for him on 20 meters using only 100 watts and a dipole. QSL via his home callsign.

LIGHTHOUSE ACTIVITY.....
Members of the Noyelles sous Lens ARS (F8KHD) will be active as TM1MAN from Ault Lighthouse between July 16-23rd. Lighthouse References are: French Onshore Lighthouse (DPLF) PB-056 and ARLHS FRA 175. QSL via F8CSD.

Look for DA0LH to be active from Robbenplate Lighthouse (FED-198) in Germany, July 21-24th. QSL via the bureau.

LY90, LITHUANIA. Lenio Marobin, PY3DF (ILERA-General Secretary), and a team of European members of the International League of Esperantists Radioamateurs (ILERA) will activate the special events station, LY90E, from the 90th Esperanto World Conference in Vilnius/Lithuania from July 23-30th. Suggested frequencies are: 7066, 14266, 21266 and 28766 kHz. QSL via LY2FN, direct (QRZ.com) or by the bureau.

NADXC DX DINNER BANQUET. The annual "North Alabama DX Club" (NADXC) DX Banquet held during the Huntsville Hamfest is rapidly approaching! This year's speaker is Wes Lamboley, W3WL, and Wes will be talking about his recent participation to Kerguelen Island as one of the operators of FT5XO. This year's banquet will be in Ballet Room of the Von Braun Center in Huntsville. This is the same venue as the last few years. Social time starts at 6:30 pm and dinner at 7:00 pm, Saturday, August 20th. Tickets to the 2005 NADXC DX Banquet are $29.00 each. Tickets may be ordered by sending your check or money order payable to NADXC, care of Vic Holland K4RVH, 219 Cedar Pond Dr, Madison, AL 35757 or by purchasing your tickets at upcoming NADXC meetings in July or August. SPECIAL NOTE: OPDX Internet Subscribers will receive a handy form to print for ordering tickets as an additional bulletin.

PP5, BRAZIL. It was announced that the first setup in Florianopolis for the WRTC 2006 is ready for operation. A Brazilian Team will operate from there in the 2005 IARU Contest as a Multi/Single CW and SSB MIX with the special callsign PP5WRTC. The callsign PP5WRTC has been specially issued by Anatel for this contest. The Brazilian Team includes: PP5JR/Sergio, PY2EMC/Eric, PP5WG/Walter, PP5UA/Pedro and PP5UB/Fernando. They are going to distribute a special commemorative QSL cards with photos from their first site setup. Voluntary donations with your QSL card will be very much appreciated. All funds captured will be transferred to WRTC 2006 organization.

PZ5, SURINAME. Bob/N3CXM and Carroll/KG4EHW will be active as PZ5JR and PZ5CM, respectively, until July 17th. However, their activity will be limited to their spare time. They have been there since June 30th, but

no QSNs have been reported yet. QSL both callsigns via K3BYV.

QSL INFO AND NEWS.....
QSL 8N5SAIT/5 via the Bureau. This was a special events station
(Shikoku Information Telecommunication Month). Activity was from the
following:
July 2-3rd: Tsu Island (Kagawa Prefecture, IOTA AS-076 and
JIIA AS-076-004)
July 3-4th: O-shima Island (AS-076 and JIIA AS-076-003)
JIIA Award http://www3.ocn.ne.jp/~iota/newpage61.htm

QSL JA6QDU/6 via the home callsign, direct or by the bureau. Activity
was from Hime Island (IOTA AS-012, JA6 Kyushu Coastal Island and
JIIA AS-012-001).

UA4WHX QSLS. We have been informed that the QSLs for the 2003 FO/AC4LN
activity and his other 2003 Pacific operations (A35VB, YJ0VB, 5W0VB,
T20VB...etc) are coming out. So those who are still waiting should be
hopeful and patient. Pictures of the QSL cards are available on Bob's,
W3YY, Web page under the DX section at: http://www.w3yy.com

Operators IP1/IK4RUX-Vanni, IP1/IK4JPR-Sergio, IP1/IK4GLV-Frank and
Albert SWL were active on from Tinetto Island (IOTA EU-083 and IIA
SP-003) this past week. QSL via their home callsigns, direct or by
the Bureau.

SN0, POLAND. Look for the Polish Amateur Radio Union (PZK) Team to once
again participate in the IARU HF World Championship in the HQ category.
Station SN0HQ will work from many locations. About 60 operators will
take part in this event. They hope to meet everyone on the bands during
the second weekend of July. For information about their special SN0HQ
awards and the SN0HQ Team of operators, please visit the following
Web page at: http://www.sn0hq.org/
QSLs for SN0HQ go via SP2PI (bureau or direct).

SN125, POLAND (Special Event). Look for special event station, SN125LO,
to be active now through July 20th. Activity is to celebrate the 125th
anniversary of the University of Sanok. Operations will be on the following
modes: CW/PSK/RTTY/SSB. QSL via SP8PAB, bureau ok.

SPECIAL EVENT (Also IOTA Op). Members of the Metropolitan 222 Amateur
Radio Society (K2MET) will sponsor a September 11th Memorial Station on
Governors Island, NY (NA-026), September 10th. Operations will take place
between 11:00 AM and 4:00 PM EDT (1500-2000z) on 21340 kHz, 14250 kHz and
7250 kHz (+/- QRM). QSL via W2SN.

SPECIAL EVENT. Look for the special event station, R3K, to be on the air
July 15-21st, from the space rocket corporation "Energy". Activity is to
celebrate the 30th anniversary of Apollo-Soyuz space program. QSL via
RN3DK to receive a special memorable QSL card.

SPECIAL EVENT. Look for special event station, TM5TDF, to be on 40 and
20 meters CW/SSB (and 2 meters/70 cm, SSB/FM/Repeaters), starting 1000z

on July 8th through 2400z on July 10th. Activity will take place as the "Tour de France" (cycling race) goes through the Great Ballon pass (Vosges area, 1350 meters ADSL). QSL via F6HAV.

SPECIAL EVENT. Hams of the North Cotentin will activate special event station, TM1TSR, on all bands and modes from July 9-22nd. Activity is to celebrate the "Tall Ship Races" in Cherbourg-Octeville harbor. They expect more than a hundred of great sailboats, 3000 sailormen and half a million visitors during this most important boat meeting of 2005. The tall ship races have been going on since 1956, and the main goal is to educate the young to the sea practice. They believe at least half of the expected sailors must be between the age 15 and 25. QSL via F6KFW.

TG4, GUATEMALA. Operators Mario/TG9ADQ, Francisco/TG9ANF, Edgar/TG9AXF and Sergio/TG9SM will operate using the special callsign TG4P from August 6-7th (from 1800z to 1800z) near Pacaya Volcano which is erupting constantly. It is located 17.1 miles to the south of Guatemala City, and it is 8,373 feet high. They will be operating on SSB, RTTY, PSK31 and CW on the bands 40, 20, 15, 10 and 6 meters, 24 hours simultaneously on all modes. QSL Manager is TG9ANF. NO BUREAU QSLS.

TK, CORSICA. Bon, DK1EAW, will be active as TK/DK1EAW between July 26th and August 2nd. His activity will be CW only and include participation in the RSGB IOTA Contest (July 30-31st) as a Single Op/Unassisted/CW/ Low-Power/24hr entry. Outside the contest, look for him on the WARC bands. QSL via his home callsign, direct or by the bureau. NO E-QSLs!

TREASURE HUNT FOR SEVEN (7) LOW-POWER STATIONS (OH2W, OH4W, OH5W, OH6W, OH7W, OH8W and OH9W). The IARU Radiosport event slated for July 9-10th, 2005, is a qualifying run for serious OH contesters to gain an official Finnish slot in the Amateur Radio Olympics (WRTC-2006) to be held in Brazil next year. The 100-watt stations listed above, all with similar antennas, will be competing against each other and looking for your QSOs! All bands, CW and SSB, are going to be used.
If you can log all seven (7) stations, you will qualify for a professional WRTC-2002 video presenting a similar WRTC event organized in Finland three years ago. James Brooks, 9V1YC, has donated these videos to those with all seven callsigns logged.
Six competitors - OH0XX, OH1NOA, OH1JT, OH2UA, OH4JFN and OH6RX - will be joined by a seventh dark horse racer with full power. W-suffix callsigns will be issued randomly just prior to the event.

USI NEWS (United States Island Award).....
CO-NEW. Roger, K0YY, plans to be active from Bridge Island (New for the U.S. Islands Award), located in the rare grid DM60, Routt County, Colorado, July 8-18th. Activity will be on 80-2 meters CW, SSB and Digital modes. QSL via home call (QRZ.com).

ME-NEW. Ken, AK1Q, plans to be active as AK1Q/p from Louds Island (IOTA NA-137, new for the U.S. Islands Award, WW Loc. FN53GW, Lincoln County), Muscongus Bay, Maine, between July 30th and August 1st. The RSGB IOTA Contest is the main purpose of this

expedition. Activity will be on 40, 20 and 15 meters, mainly
SSB but some CW at 15 wpm or slower. QSL via his home callsign
(QRZ.com).

NC-001S. Jon, WB8YJFI, will be once again active as WB8YJF/4 from
Ocracoke Island (NA-067), NC, July 24-31st. He will also be
active in the IOTA Contest. Activity will be on 80-10 meters
CW, RTTY, and some SSB. QSL via his home callsign - direct
for a FAST QSL.

V3, BELIZE. Colin, KU5B, will be active as V31UB now through July 10th.
Activity will be on 80-10 meters CW/SSB and possibly 6 meters. QSL via
his home callsign.

You need to drop by the local building codes office. Your home site will be located in a county or inside a city or town limit. Rules vary from place to place but every place has building codes and inspectors who inspect construction to ensure the codes are enforced.

Code enforcement varies from place to place -- I built houses in West Virginia, southwest Virginia, northeast Tennessee, and southeast Kentucky -- there were some counties where we never saw an inspector and the guy who issued our building permit at the county courthouse could not even read blueprint house plans -- but in other counties they inspected us at every turn.

If you are building in the county -- outside city or town limits -- the county will inspect you. If you are building inside a city or town limit, their inspectors will inspect your construction or they may use the county inspectors, or, your construction may be inspected by both county and town/city.

You need to check with the inspector's office or whichever office issues building permits to see if they enforce codes on towers and antennas. You may find that you can put up any tower, any height, anywhere you want -- or -- you may find that putting up even the simplest antenna support will require engineering drawings, environmental impact statement, and several inspections. Remember, too, if you are in the flight path of an airport, even a local grass strip, you will have height limits and lighting requirements on towers.

Also, you are likely to be wiring your house for a ham station, which means one room or one corner of the house will have several 110VAC outlets plus one or more 220VAC outlets for linear(s). The electrical inspector will find this strange and you need to talk with him BEFORE you even think about building so you get him on board with you -- he will tell you what the codes require so you don't have to rip out any wiring. Don't forget, too, that you will need some way for cables to go out of the house to the antennas -- and anytime you poke a hole in a wall, the inspectors get nosy -- you will need to ensure that the cable egress location has proper sealing, fire blocking, insulation, etc. Also, you'll need to ground the station -- talk to the inspector about that because he may look askance at a #4 copper wire running to a ground rod in addition to the one required at the entrance panel. Remember, too, when you start laying out your floor plan -- if you have water (a sink) within a few feet of the ham station, the outlets may be required to be GFCI protected -- and you don't want GFCI on your ham station outlets because you will forever be tripping the GFCI and shutting off the power -- so locate the ham station away from sinks and faucets.

Bottom line: Find your local building codes office and get to know them LONG before you select a building site.

Hi Dennis:

I would look into local Zoning laws to make sure someone won't build a
Power line / Station / (etc) next to your home.

Hire an architect . Tell Him /her about what you want in the way of RF
free wiring; Heck, approach an architect / EE instuctor at a local
college & see if designing your RF free house electrical set up is a
possible project for a student....

Do site surveys, with some wide range receiver, looking for noise where
there should be none (Consult radio Astronomers for this ??)

Use a log book for problems / Pluses, then compare locations using a
spread sheet.

If your house is in a rural area, RF Free, it's going to (Probably)
be good for Astronomy as well.. Walking around the Moon with a
telescope is always fun.

In closing, sounds like you have the world on a string; Congratulations
!!

Dan / NYC

Why would I care about the ARRL? I am not a ham and the ARRL is one reason I never bothered with ham radio. I went into broadcast and electronic manufacturing instead. If the people I have kill filed are the best example of ham radio, it can die for all I care. As far as the cemetery, I don't have that many years left so I will kill file whatever reprobate I have to, to enjoy them in peace.

One thing is obvious. You have no manners, and no social skills.

No Call = Opinions don't count.
BTW , I wonder why so many none licensed people (CBer's) post messages in
this amateur radio group.

3159. WANTED Kenwood filter YK-88A (AM 6KHz) for TS-430S

Newsgroup: rec.radio.amateur.misc
Date: 2005-07-04 00:20:28 UTC
From: Opcom <eccm@swbell.net>
Message-ID: <gh%xe.505$vT3.0@newssvr30.news.prodigy.com>
Source record: 51128
Cross-posted to: rec.radio.amateur.equipment,rec.radio.amateur.boatanchors,rec.radio.amateur.swap,rec.radio.amateur.misc

Looking for one..

Kenwood TS-430S optional filter YK-88A (AM 6KHz bandwidth)

Need for shut-in listening to SW broadcasts and the occasional AM
ham transmission.

The standard Kenwood AM filter is really the SSB filter which is
too narrow for AM BC SWL.

I realize this is an old part (1986), but maybe there is one out
there in a '430 that is only used for listening to SSB or CW (AM
TX does not require this filter, it's only used for wideband RX),
or maybe a junker TS-430S available I can rob one from.

Filter is plainly labeled and can be seen by removing the top of
the radio. May be marked "Trio" or "Kenwood" and will be marked
"AM FILTER YK-88A".

center frequency = 8831.5 KHz
passband = 6KHz @ -6dB
attenuation bandwidth = 11KHz >60dB

Thank you, any help would be appreciated, Please decode my e-mail
address below by removing spaces and subtituting @ for AT and .
for DOT (sorry spam is a real issue.)

It was all their loyal members who put me off amateur radio. I quickly tired of their bickering, and pissing contests over who spent the most on their station, who had the biggest antenna farm, and which brand of radio was the only one fit to be used on the air. I wanted to design and build high end receivers in the microwave range, then I got drafted and never considered a ticket again. I was awarded broadcast engineer as a civilian acquired skill while in basic training, and had enough hours keeping multiple transmitters on the air, along with two studios. Amateur radio had lost its appeal for me. I am still interested in receivers, but I don't have much time to work on them, and the hurricanes last year destroyed most of my test equipment. So, I'll have to see if I can afford to replace the equipment, repair the benches and put a new roof on the shop before I can do any serious work again. I am 100% disabled and can't climb a ladder, so I'll have to wait till i can afford to hire someone to do it for me.

Unless you specifically want a Kenwood part for restoration originality,
etc.
There is always International Radio (INRAD)
http://www.qth.com/inrad/

International Radio is a supplier of custom designed, high performance
quartz crystal filters for communications receivers and transceivers.
Filters are available for communications receivers and transceivers. This
includes ICOM, Yaesu, Kenwood, Drake, Heath, as well as special designs for
experimental work.

These guys do nice work. I will suggest getting an 8 KC filter instead of
the 6 KC one, though. Noisier, but better-sounding.

The following news is noted in the GEARVAKf (the "f" is silent) Bulletin.

"White Noise" Opposed By EEOC

Use of the term "white noise" to describe the production of signals over a wide range of frequencies by the cosmos, atmospheric electrical disturbances, and radio circuitry, has been condemned by the Equal Electrical Opportunity Commission (EEOC) as discriminatory.

EEOC spokesperson, Bruce Gweemser, said use of the term is considered derogatory because it attributes either negative or positive characteristics of such signals to a particular color. "If the connotation is negative," he explained, "then Americans of the light-skinned persuasion may be offended. On the other hand, if the connotation is positive, Americans of other darker varieties of skin shading may take offense."

Gweemser said that the EEOC strongly recommends the abandonment of the term "white noise" and replacement with another, more descriptive one. "Perhaps 'electrical-American noise' might be more appropriate," Gweemser suggested.

i fear we may soon realize "black noise."

that is bad as the terms: "a heart as black as sin", "it was the
blackest day of my life", "his black deeds were indicative of his
nature", all demonstrate

black is bad

Hi

I totally agree. I live a couple blocks from the beach, and when I take my portable down to the beach, I pick up tons of SSB frequencies. I mean a bunch. It's like the signals have an unobstructed line completely.

Lucky

it's already out there. google for 'black noise' and not only do you find
some rap group but also a six-sigma site that uses the term for a non-random
cause of variation. there is also well known 'pink noise' that is often
used in audio testing. and of course there is the generic 'colored noise'.
this site lists not only white and pink but also brown and blue:
http://www.ee.columbia.edu/~dpwe/noise/

Hey, dimwit, I am not the one who tried to convince this NG that I was a commissioned Army officer, YOU were...and I am supposed to be delusional? And
you even try to perpetuate it! First you lie about being a Lieutenant Colonel
in the Army...then it's only Lieutenant because you thought I would be so "impressed" (haven't stopped laughing that one off yet!), and then all the crap
about the FBI, arrest warrants, and other paranoia.

If we ask you to leave, or be silent, it is "gay bashing", the "visual images" your "lifestyle" brings to mind is/are offensive to me.

No. This is not gay bashing, it is insane rudeness on your part, and like some spoiled child I expect that you will force your bad behavior on us all.

Rarely will I banish one to the "bit bucket", you make it easy to do so without regret...

John

And another thing. I recall Jim or Kelly or some other Extra explain
that prior to the first 5wpm code exam, that there was no code exam.
But it was important to be able to understand code so that a government
station could tell you that you were interfering with them. And so
they implemented the 5wpm exam. And now that no other service uses
code...

All that has nothing to do with the ARRL being some reason for *you* not
getting a license. If you really wanted to put forth the effort to get a
license you would, ARRL or no ARRL. You just want to whine.

> Dr. Joseph Resnick.

That show was curious, buth this evening's show will be FAR MORE amusing!

Richard C. Hoagland, *James McCanney*, and Dr. Sky (aka Steve Kates)
will join together to talk about the Deep Impact Program and the
results of the probe's collision with Comet Tempel 1.

Dr. Sky (aka Steve Kates) is a reputable astronomer and speaker
but Hoagland and McCanney are two that prolly fell off the back of a
turnip truck in Arkansas. Hoagland will no doubt try to make a claim
the comet was part of an ailen spaceship or had some kind of a
face or other "non-natural" markings on it, and McCanney will likely
go on about Tesla or Chemtrails or some other goofy non-sequitor
topic. Should be a good show with lots of funny moments fer sure!

"Clowns to the left of me, Jokers to the right, here I am - stuck in the
middle with you....."

indeed fromt he History I have read at first their were just hams (no
tests etc) then code testing was introduced for exactly the purpose of
allowing Govt to warn us off their freqs

Indeed that was why what became s25.2 can into existance in the first
place

Look, we've been through this before. I was interested in equipment design and construction, not operating it. I was planning on trying to market a 160 through 6 meter AM and SSB receiver I had designed when I was drafted. After I left the service I got home to find that my shop building had been damaged and torn down while I was in the army. All my notes, prototypes, parts and test equipment were gone. I didn't have the money to replace them at the time, and I had to find a job, buy a home and get on with my life. During my years of working in electronics I spent a lot of years working with RF. I was setting up a shop in my four car garage to have a place to work when i retire. The hurricanes last year soaked everything, and most of it is beyond salvage. I am 100% disabled and can't repair the roof.

You can think whatever you want. I had lost interest then, just like a number of licensed hams I know here in Florida. They haven't been on the air in years and most of them aren't bothering to renew their license when they expire. Are you going to bitch at them, too?

As far as movies, I have been to two movies since 1987, and I doubt that I will ever go back to a movie theater. My ears rang for three days from the excessively loud sound system, and I had a headache for a week.

I started the project below to keep myself busy a few hours a week, and to help others, rather than sit around and bitch about everyone else.

I have a 4kHz one in my R5000 (compatible with the TS-430). I prefer that to
the Kenwood high qaulity 6kHz one.

My 430 has the filter so I can't test it, but if you look on the mods pages
you find a way of twisting knobs to get it to work without a filter.

You could also try the ts-430 yahoo group.

Geoff.

The FCC says that this guy must submit an EXPLANATION of why he said "shit" on the air on 2m FM simplex. Oh boy.

Are they listening to 11m CB or hams on 75m SSB at night?? Why pick on that guy?

http://www.fcc.gov/eb/FieldNotices/2003/DOC-249279A1.html

I think THEY should have to submit an explanation of why they ALLOWED shit on the air (BPL) - he he!

Howdy,

Linux is certainly way cool. Thanks for sharing the stats.

May I suggest one explanation? Since the release of win xp there is really
no reason to tackly Linux. Previously there was. win xp is the first "real"
win os for the general pop. <G>

Hi,

I'm replying through the groups since someone might have information relevant to my filter and your needs.

I have a Kenwood YK-88A-1 which I used to used in my R-5000.

All of the filters in my R-5000 and TS-430 were interchangeable, except that the YK-88A-1 came on a small plug in PCB designed specifically to fit the R-5000 AM filter mounting.

I removed the PCB to use one of the SSB filters in my TS-450 which uses all plug in filters; which have the same designation as those in the TS-430 except for the "-1" which signifies the plug in PCB.

When I still had my TS-430 I compared the specs and found the only difference was the center frequencies of the CW filters.

I'm going into this explanation since the YK-88A-1 spec sheet shows a center frequency of 8830 kHz and as I recall from the TS-430 manual the only filter that differed was the CW one.

So - my conclusion, based on comparing AM, CW and SSB filters is that the YK-88A-1 should be identical to the YK-88A except for the plug in PCB, which I have removed. - it also has a part number of L71-0237-.5 and "8H3" stamped on the side.

If you are interested I'll be pleased to send you photos to help in your decision.

Comments and clarifications are invited.

Regards,
Dave

Pragmatically, the guy must submit an explanation because somebody reported
him to FCC, most likely via ARRL. No, "they" are not listening on 11 meters
nor apparently on 75. But I'd be willing to bet that if you recorded some
of this activity so that the 'culprits' could be identified then reported it
to your ARRL Official Observer Coordinator that they too could get a note
from the FCC.

I use Linux when I can, Win95 when I can't use Linux. I operate the digital modes almost exclusively, and for the past few years have been using the soundcard digital modes almost exclusively. For a long time the most and the best software for those modes has been available only in Windows versions, but lately the situation for Linux is getting better.

My OS journey is probably a little different from most, as I was a user of Unix time sharing before there was Linux. And the first time I owned a PC was when a friend twisted my arm to get into Clover, which required a PC AT class machine to run the modem and software. So I had to get a used PC AT running DOS. I was also at the time using a PK-232 with a dumb terminal in front of it. Soon after Linux was starting to look good enough to use, so I bought a 486 machine to explore it. Then the K6STI RITTY software became available, which required at the time a 486 or better and ran under DOS, so I got a sound card for the 486 and made it dual boot to be able to run RITTY. Since then through various machine upgrades I have arrived at a Linux-only machine that I use for my work work, and a dual boot Win95/Linux machine that I use for the radio. I also picked up a Kachina radio, and the software for that requires Windows. So I have a choice of running the TS-940S with Linux and gmfsk in most modes, or with Windows and various pieces of software, or of running the Kachina with Windows software.

I'm not smart enough to write a control program for the Kachina that runs under Linux, and I don't expect anybody else is going to now that the radio is out of production.

I also have a laptop with Linux and Windows ME - I used to have to travel and used that with my portable radio setup

quit

i think all the people out there want to get amateur licenses now so
they can be reported by you and you type

some grew up after grade school

some did not

Shit is in the dictionary. I found shit in the American Heritage
Dictionary, 1975. Shit means: To deceive or mislead, among other
things.

Why is everybody so uptight about shit?

Nice stats. Too bad they probably aren't correct, since most Linux
browsers are configured to lie about themselves and the OS they're
running on. Seems there are a lot of pages that just won't work if you
don't tell the server you are running IE on some form of MS-Windows.
Firefox makes it easy to set up the fake headers for this very reason.

There is currently a survey underway at Groklaw in an attempt to find
out which sites are the worst when viewed with other browsers. My
biggest problem is Major League Baseball.

Yes, I still use Agent on Win98SE for the newsgroups. As soon as I
find a usable replacement, this final piece of Microsoft garbage can
be replaced.

I'm not to sure about the first test being 5 words per minute. Someone more savvy than I will have to let us know what the real scoop was.

I believe that 13 was the minimum until the novice came into being in the 50s.

The commercial licenses were a bit tougher. The standard circuits (commercial mariners) operated around 25 to 30 words per minute in the mid 60s. I know as I was with some folks that inspected a commercial vessel on Guam in the mid 60s and I chatted with the radio officer.

The 5 words per minute test was to allow entry level folks a chance to get their feet wet. It had nothing to do with being able to chase someone off a frequency.

What no one appreciates is that way back when, in almost any endeavor, there were no licenses. Who would Wilbur Wright apply to for an aircraft license? The first automobiles had no licensing restrictions. After a bit, they started posting speed limits as the "horseless carriages" startled horses! The same applied to radio. No licenses at first. Only when the airways started to get a bit crowded and folks started acting like they do in this newsgroup did laws come into being.

Eventually, folks needed laws. They needed to have a method of going down a street and knowing who had the right of way. Do you want someone parking in the middle of a street? Or going 60 or 80 miles per hour down a residential street?

Unfortunately, many do not understand that laws are to allow all of us to use limited resources in such a way that all can enjoy them.

As to Morse, I'm neither for nor against; I am however, somewhat aghast at the folks that do have a license and appear quite clueless as to any of the rules and regulations that are designed to protect all.

See "The Art and Skill of Radiotelegraphy" available as a free download.
It documents the history of testing for amateur radio. It was 5 wpm at the
beginning of testing. The multilevel code tests came in later.

Quick history of code tests for USA ham licenses:

The 1912 rules that moved amateurs to "200 meters and down" required a code test of 5 wpm for a standard amateur license. That state of affairs existed until the WW1 shut down in May, 1917.

It should be noted that during the WW1 shutdown, receiving as well as transmitting was forbidden.

When amateurs were allowed back on the air after WW1 (thanks to the work of Maxim, Stewart, and a few others, mostly prewar ARRL directors), the new licenses required a 10 wpm code test.

>From 1919 until 1936, the code test speed was 10 wpm. There was also an "Amateur Extra First Grade" license that required 20 wpm. It was short-lived in the early 1920s.

In 1936, the code test speed was raised to 13 wpm. The written exams were improved at the same time.

In 1951, the Novice and Technician licenses were created, and required 5 wpm. The Extra (as we know it) was also created then and required 20 wpm.

That state of affairs existed until 1990, when the code test waivers were introduced, and then 2000, when all code testing was eliminated except 5 wpm.

> their feet wet. It had nothing to do with being able to chase > someone off a frequency.

Exactly. The idea was that it would be easier and faster to learn by doing.

However, one of the reasons for code testing back in 1912 was to avoid interference. This was really a way of insuring that all radio stations knew and used the *same* code, because before 1912 there was more than one code in use on the air!

But interference mitigation was not the only reason for code testing. There are still good reasons for code testing today, such as its widespread use by amateurs.

Fun fact: Until 1927, Amateur Radio was not a separate service that was recognized by international treaty. Instead, it existed solely at the pleasure of each country, and the privileges varied all over the place.

All that changed in 1927, when a new treaty set up worldwide bands for hams, basic rules and procedures, etc.

One of the new 1927 requirements was that all amateurs pass a code test. Prior to that, code testing for hams existed only because individual countries required it.

Yep. "Wireless" was around for more than a decade before 1912. There were a few treaties and some regulations but they didn't do much, compared to what came after.

It should be remembered that many concepts we see clearly today were not even imagined in the early days. For example, broadcasting was not considered in the 1912 rules - nobody really thought that millions of people would own radio receivers to listen to stations that did nothing but transmit.

There were many bills written and proposed to regulate wireless before 1912, some of them very draconian. One concept that was fortunately defeated was the idea of licensing *receiving* stations...

Yup. Of course if there's only a few cars on the road and they go 10
mph top speed, you don't need many rules.

Didja know that it was Hiram Percy Maxim hisself who convinced the
fledgling US auto industry that traffic should keep to the right and
the driver sit on the left? HPM was into a lot more things than radio.

If your thinking of buying an HP computer product....DON'T !

HP has gone to India for all it's telephone Customer
Support and they all speak bad English and you can't
understand a word they are saying.

Buy an HP....
Have a problem...
Call up their Tech Support hotline....
You'll get "Pasheesh-from-Punjab" who talks like
he's got a mouthfull of marbles and can't understand
a word your saying because he'e been trained to
read from a script like a trained spider monkey....

(HINT: You'd be better off calling Habib at the local Dunkin-Dounutz for
tech support..)

---> F*CK Hewlett-Packard!! (another formerly great USA company that's
now frigged it's historic reputation for great customer service by
going to half-ass
overseas tech support in)

Buy someone else's product instead and tell HP (..and Aglient Technologies
too!)
to go do somehing with themselves and their crap products and support.

Signed: a former HP Business/Commercial customer.

Technically, and scientifically, it would probably be quite correct to say
that virtually all of his large intestinal volume really is 100% full of
real shit. Possibly a large fraction of his small intestins, too,
depending on your definition of shit. After death, you ain't worth shit
anyway (except maybe a dollar's worth of calcium, iron, etc.).

There are exceptions (eg. just before colonoscopies, sigmoidoscopies,
situations of that nature, etc.)

I think everyone's shit stinks. So does everyone's gas. Bad breath is not
too nice, either. We all get BO sooner or later, too.

;-)

(smart ass has spoken)

3268. Ham radio beginner?

Good luck! HP bought Compaq, so same applies. Last I heard, Dell was also
outsourcing to India for support. IBM sold out to China!

It is going to be tough boys, you are going to have to tighten your belts for your country, we have to provide excessive profits for out buddies in the large corporations and the friends of our noble families who need a standard of living approaching that of royalty (did you ever notice my dad was president too, we are the beginning of a blue-blood line of royalty, respect that.)

We just have to outsource these jobs to the people of the world who are left to take advantage of, your fellow americans have become too educated to work as slaves and live in poverty.

If things really get tough for you here, catch a boat to india or china, we will have a job for you there, just tell them george sent you.

Have you ever been to mexico, you might want to try there, it is closer and they have great tacos there for lunch... although smuggling drugs across the border is highly dangerous, it does provide big lucrative returns if you do not get caught.

Don't be afraid to try something new...

G.W.B.

I've had good experiences lately with a HP PC problem and a HP printer
problem using the on-line chat option. Both problems were taken care of,
and quickly.

3277. Ernie Lehman has died

Newsgroup: rec.radio.amateur.misc
Date: 2005-07-06 23:33:49 UTC
From: et472@FreeNet.Carleton.CA
Message-ID: <dahpotpso1@theodyn.ncf.ca>
Source record: 51049

I was listening to NPR and they had a piece on it, with Eva Marie Saint and her husband (who's name I didn't catch). The minute the name Ernest Lehman's name was mentioned, I thought "but he was a ham", and indeed Saint's husband actually did go into Ernie's interest in amateur radio, said in a way that it clearly was an important part of his life.

Doing a websearch, he died, of a heart attack, on July 2nd, but it just hit the news today.

The first time I heard of Ernest Lehman was in QST, in the October 1971 issue, when I was 11. I wouldn't be licensed for eight months, but there towards the back was one thing I could mostly understand, "How to Make A Jewish Movie", by Mel Shavelson. Basically a piece about setting up a station while he was in Israel to make a movie, "Cast a Giant Shadow", he mentions Ernest Lehman, and if I'm remembering properly (I can't find the issue at the moment), something about competition between the two when it came to amateur radio. (The same issue had a story from a yearbook from the thirties entitled "Radio Robert", a fictional story about a teenager who saved the day with amateur radio.)

I don't think I'd seen any of the films Ernest Lehman had been involved in at that point, but if you look at his entry at http://www.imdb.com he has a string of films to his credit that most people have either seen, or at the very least know about. Such as "West Side Story" and "The Sound of Music" and "North By Northwest". It's not that long a list, but it's obviously a pretty important list.

Oddly, considering the first time I read about him it was in reference to amateur radio, I know nothing about his involvement in the hobby, other than that it clearly was important to him.

But in the late seventies, he wrote "The French Atlantic Affair" which used amateur radio in a key scene, and then turned around and turned it into a mini-series in 1979.

Hmmm? What was the code test at the beginning of licensing?

Thanks for information, Dee.

I wonder if that's where Jim, N2EY got his information ;)

Heck, that was the *short* version!
>
> Either you're an Einstein, or a good Google user ;)

I'm neither - all that came from other sources. Writing that piece
about the past 50 years of US amateur radio licensing about 5 years ago

helped a lot. (you did see that piece?)

Didja know that in 1964-65 when the "incentive licensing" idea was being developed, FCC proposed a *fourth* code test speed of 16 wpm? Existing Advanceds would have been demoted to General, and a new "Amateur First Class" would have taken the spot between General and Extra. Fortunately that idea was abandoned.

Nope, not really. It is about rules.

I just finally solved a problem I've had. These cars and those stupid *loud* stereo systems in 'em. An idiot parked outside my house (lovely day, around 70 and low humidity) and I was trying to eat dinner.

I finally decided that "rules" don't work (there is a noise ordinance here). So .... I turned Direct TV to the big bands and started cranking. All 5 channels are hooked to Bose speakers rated sufficiently to handle it. Several hundred watts. Normally, the TV is too loud at 8 and I usually run it at 6 for television and perhaps 7 for music.

I only had it up to around 35 or 40 when I knocked 4 pictures off the walls. The whole house was shaking. I left it there for about 60 seconds, then turned it back down. The idiot figured it out. Since his windows were also open, I suspect he got the drift in a hurry. I could no longer hear his car system ;)

As to the folks that are discouraged by encroachment on the ham bands, they should figure out that sporadic e on the 10 meter band can be fickle. If you hear a very loud signal, that doesn't necessarily mean you can interfere with his transmission as he may be talking to someone you can't hear and can't hear you. Wait till he stops talking, then turn on the RTTY. Even barefoot, you'll likely kill his reception. If he can't hear 'em, he can't work 'em.

It ain't the number of guns you have, it's who you shoot.
:)))

With all due regards from Rochester, NY
Jim

Whoopsie... looks like I inadvertently stepped into something of which
I have no clue as to what is going on. X-scuuuuuse me.

I guess I'll just look up the facts and figures/rules & regs regarding
Part 15 operation in the 13 MHz band myself. Please allow me to
gracefully bow out of whatever is going on here. ??

Every ham I know in the area is either inactive, retired, or
disabled. The others moved out of the state when the Microdyne plant was
moved to Pennsylvania.

On the other hand, If I had charged them for repairs to their radios
over the last couple years that I was able to work I would have the
money to pay for a new roof.

It will happen, I just have to be patient. In the mean time I will
try to work in the 10' X 10' office in the back corner. I managed to
put the undamaged parts and tools in there. Now, if I can just arrange
it enough to set up a workbench.

One thing I learned in the electronic repair business was to never
take a check from a ham, cash only. Hams will always stiff you, but
I never met a freebander whose check did not clear. A Frebander's
check is always good.

Well... this is two strikes, and that's quite enough. I guess a good
ol' "plonk" (is that what it's called?) is in order, Mr. Smith.

bye bye

Hey, you wouldn't be a Dr. Ace colleague, would you? (That's a
rhetorical question, seeing as I will not be viewing any more of your
trash.) Maybe if someone could provide me a list of all perverts,
low-lifes, rude, ignorant, and otherwise brain-dead USENET
contributors, I could assemble a list of bit-bucket... excuse me,
"plonk"... candidates without actually having to read their offensive
blather.

I know, I know... I probably have to play to properly give the losers
their due. Maybe USENET isn't my bag after all. What a strange
place....

~Sparky~

Often imitated -- NEVER duplicated!

Sparky - AM/FM/SSB/CW from somewhere in the Midwest U.S.A.:

KALL-2671 - CB Radio;
Unit 412/RF412/CO3026 - Freeband 26-28MHz;
W9*** - Amateur Radio;
WQRM313 - GMRS;
M/V Mysterious Traveller - Marine;
plus FRS, MURS, SWL...

...got frequencies? ;)

Yuk. Plonk again. Goodness... this place is full of 'em. I think
maybe I'll go to another bar and order up a cold one and see if the
clientele there is of any higher caliber. This place is one scary
outfit.

Is this commonplace, or is it... wait... this is a cross-post. Guess
it's not isolated to this particular newsgroup.

Adios, loser.

I got some bad checks from CBers when I did 2-way radio and
commercail sound systems about 20 years ago in Ohio. I got even with
one jerk. He would put just enough in his checking account to pay his
rent and utilities so I waited till the first of the month to resubmit
the check. It cleared, and his rent check bounced. Boy, was he pissed!
;-)

After that, it was cash only, unless it was a commercial account.
Most of my customers were schools, churches and factories who didn't pay
in cash, but wouldn't write a bad check because you could file papers to
seize assets to cover a check and they weren't returned till the payment
was made.

fascinating. its rather funny. you don't have to be a ham to bounce checks
(seen plenty of them from the likes of: little old ladies, young couples,
professionals and even freebanders and regular cb'ers AND hams. doesn't
matter which group you are in, a check bouncer comes in any form.

perhaps you should reconsider your overgeneralization?

Never buy a HP or Compaq as you will not get any tech support. When I had to restore my system I found one of the disk in the restore set was bad. Never able to receive help needed to fix problem and HP didn't have the correct replacement CD. Ended up scraping system although it was only over a year old. NEVER BUY HP PRODUCTS.

Roger that. I finally gave up on my HP S20 Photosmart scanner after sending it in for out of warranty repair (to take care of any hardware problem) and have it sent back with note that there isn't anything wrong with it. I also paid for and went through their tech support line with no success. I finally tossed it and bought a much nicer Epson Perfection 4870 that does double duty as a document scanner. My other HP flatbed scanner is gathering dust on a shelf. HP? Never again!

Garsh. Just when Roger thought he had the "goods" on someone, it turned
out to be a dead-end street.

As Wogie likes to say, "Go back to the drawing board, Dickless Tracy."

I'm sure you or one of your buddies on here will sent them lies and
have booted off again showing everyone what total creeps you really
are, and FYI I am not gay and I'll find out who you are and sue you for
slander.

Ohio/Penn DX Bulletin No. 717

The Ohio/Penn DX PacketCluster
DX Bulletin No. 717
BID: $OPDX.717
July 11, 2005
Editor Tedd Mirgliotta, KB8NW
Provided by BARF80.ORG (Cleveland, Ohio)

Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, AB5K & the AR TelNet Clusters Network, K1XN & GoList, N1QAE, N2OO, N2YO, K3LR, NG3K, W3UR & The Daily DX, N4AA & QRZ DX, N4GN, K8YSE, WT8C, DL1EK & The DX News Letter, F5CWU & La Gazette du DX, F5NQL & UFT, I1JQJ/IK1ADH & 425 DX News, JI6KVR & JA-IOTA Islands News, JT1CD, LA9VDA, LU4BR, LU5FF, OH2BH, PG7V, VA3RJ & ICPO, VE3NQK, VK3DYL and VK4AN for the following DX information.

** SPECIAL NOTE FROM EDITOR: Due to some late and special IARU Contest announcements, the bulletin was released earlier than normal this week (Friday, July 8th) to accommodate the operators and keep the subscribers up-to-date.

DXCC COUNTRY/ENTITY REPORT: According to the AR-Cluster Network for the week of Friday, 1st/July, through Friday, 8th/July there were 215 countries active. Countries available: 3A, 3B8, 3B9, 3DA, 3V, 4J, 4L, 4S, 4X, 5A, 5B, 5H, 5N, 5R, 5T, 5V, 5X, 5Z, 6W, 6Y, 7Q, 7X, 8P, 8R, 9A, 9G, 9H, 9J, 9K, 9M2, 9M6, 9N, 9Q, 9V, 9Y, A2, A3, A4, A6, A7, A9, AP, BV, BY, C2, C3, C6, C9, CE, CE9, CM, CN, CP, CT, CT3, CU, CX, CY9, D4, DL, DU, EA, EA6, EA8, EA9, EI, EK, EL, EP, ER, ES, ET, EU, EX, EY, EZ, F, FG, FK, FM, FO, FR, FW, FY, G, GD, GI, GJ, GM, GU, GW, HA, HB, HB0, HC, HI, HK, HL, HP, HR, HS, HZ, I, IS, J2, J3, J5, J6, JA, JD/m, JD/o, JT, JW, JY, K, KG4, KH0, KH2, KH6, KH9, KL, KP2, KP4, LA, LU, LX, LY, LZ, OA, OD, OE, OH, OH0, OK, OM, ON, OX, OY, OZ, P2, P4, PA, PJ2, PY, PZ, R1FJ, S5, S7, S9, SM, SP, ST, SU, SV, SV5, SV9, T2, T32, T5, T7, T8, T9, TA, TF, TG, TI, TI9, TK, TR, TT, TU, TZ, UA, UA2, UA9, UK, UN, UR, V3, V5, V6, V7, V8, VE, VK, VK9N, VP2M, VP8/h, VP9, VR, VU, XE, XU, XW, YA, YB, YI, YK, YL, YN, YO, YS, YU, YV, Z2, Z3, ZA, ZB, ZC4, ZD7, ZD8, ZF, ZK1/s, ZK2, ZL, ZP, ZS

* PLEASE NOTE: The report "could" contain "Pirate/SLIM" operations or more likely a "BUSTED CALLSIGN". As always, you never know - "Work First Worry Later" (WFWL).

3V8, TUNISIA (IOTA Op). Some members of The Canary Islands DX Society (EC8ADU, EC4DX, EC8AUA) and some Tunisian operators have announced that they will be active from Djerba Island (AF-038). Activity will be on the WARC bands and on SSB/PSK31/RTTY between July 26-29th. They will also be active on SSB during the IOTA Contest July 30-31st. QSL via the Bureau to Javi, EC4DX; more infomation is available on QRZ.com. Visit the DXpedition's Web site at: http://www.cidxs.com

9M4, EAST MALAYSIA. Operators 9M6US and 9M6MU will activate the official IARU HQ station 9M4SHQ for Malaysia for the IARU Contest. Please note that this station will be located at the Hill View Gardens Amateur Radio Club station in Sabah. QSL 9M4SHQ via N2OO.

A3, TONGA. Alex, HB9FBO, will be active as A35BO from October 24th to December 1st. Activity will be on 160-10 meters, including the WARC bands, and on CW/SSB/PSK31. QSL via info on QRZ.com. Look for a A35BO Web page in the coming weeks.

CY9SS, ST. PAUL ISLAND. The CY9SS DXpedition on St. Paul Island went QRT on Wednesday, July 6th.

DX SUMMIT AND THE FINNISH TREASURE HUNT (OH2W, OH4W, OH5W, OH6W, OH7W, OH8W and OH9W). Martti, OH2BH, reports: "The Elisa Radio Club of Finland is managing the original world-renowned DX Summit, and you may have noticed that their heading includes the callsign of the group who operates the DX Cluster 'OH9W'. This coming weekend marks another interesting event when the DX Cluster will be employed to support the WRTC-2006 (World Radiosport Team Championship) OH qualifying run for 24 hours during the CW/SSB IARU Radiosport Contest that is sure to penetrate the bands. OH9W along with six (6) other W (Whiskey) callsigns will compete with low-power stations to capture the honors for Finnish team captain of the 2006 WRTC event. You are invited to try to log these seven stations by following this DX Summit link: http://oh2aq.kolumbus.com/dxs/wrtc.html
From the above link you can move to the DX Summit Main Page and send your own spots and compete for honors to be one of the stations producing the highest number of spots during this event. If you manage to work all seven stations, a professional video featuring the WRTC-2002 event will be yours at no cost. The competing captain candidates - OH0XX, OH1JT, OH1NOA, OH2UA, OH4JFN and OH6RX - will appreciate your call on all bands."

FW, WALLIS AND FUTUNA. OPDX was informed that Guy, FR5ZL, will be active here as FW5ZL between July 13th and August 13th. Activity will be on 40/30/20/15 meters CW/SSB, and possibly RTTY and PSK31. QSL direct to FR5ZL (NO QSLs via the French Bureau).

HI, DOMINICAN REPUBLIC. Members of the Lomadeltoro Contest Team will be active as HI3CCP in the CQ WW DX SSB Contest (October 29-30th) as a Multi-Op/High-Power entry. Operators mentioned are: HI3CCP, HI3TEJ, HI3NR and HI8ROX. QSL via ON4IQ.
Also, members of the Lomadeltoro Contest Team (operators not provided) will be active as HI3A in the CQ WW DX CW Contest (November 26-27th) as a Multi-Op entry. QSL via AD4Z. Visi the Lomadeltoro Contest Team's Web page at: http://www.lomadeltoro.com

INTERESTING PRESS RELEASE OF THE WEEK (New DXCC Entity?). OPDX received a press release from Eddie DeYoung, VK4AN, titled "ROYAL AMATEUR RADIO SOCIETY (RARS) of the HUTT RIVER PROVINCE PRINCIPALITY". The press release states:
"We are a small country, located on the Australian continent, just north of Geraldton, Western Australia. We just celebrated 35 years of Independence from Australia and have received recognition from a UN-member country! Due to recent events, we are now ready to commence radio transmissions! Firstly, we established the Ministry of Communications, a Communications Act was decreed, Radio Regulations were formulated using the IARU Regulations as a guideline, and a body to represent Amateur Radio in the Principality was created, to be known as the Royal Amateur Radio Society. The RARS came into being 01 July 2005. We have just applied for membership in the ITU/IARU-R3, and once a provisional prefix is granted by the ITU, we will qualify for new country status for DXCC purposes. We believe that we have submitted all the documentation that should be required. Once we have 'New Country' status, it is anticipated that a large number of DXers/Contesters will be eager to operate from here. The prefix block 'H5A~Z' has been applied for, and will be used (unofficially) until ratified by the ITU. We have a club-station room available at the main Government building, and acres of land for an antenna farm 'but' we do not have any equipment or antennas to offer visiting Hams as yet. We are asking the international DX community for help as we are an emerging country, and, as can be expected, funds are scarce to purchase equipment for the Club station. You and your group can help in several ways: by joining RARS; donate or sell radio items surplus to your needs at minimal cost; donation of funds. All donations of equipment and funds will be acknowledged by a personal letter of thanks from the RARS and our Sovereign, HRH Prince Leonard! Items can be sent direct to Hutt River Province, or to me for checking and any refurbishment. I am planning to return to Hutt River Province in a few months, and can take what we have and set it up to begin operations. DXpedition groups will be very welcome, but, will need to make a reservation, as we expect a 'flood' of hams wanting to use the club facilities in the first year that we have DXCC country status. 'Self contained' groups are welcome anytime. For information about the Hutt River Province Principality; an insight into our 35-year history of independence and photos of the Principality, please visit http://www.hutt-river-province.com
An application for membership, citizenship, more information, or reply on other matters, can be had by contacting me at
mailto:dg-comms@hutt-river-province.com
Yours in amateur radio,
Eddie DeYoung H50A~VK4AN~VK6CC
Director-General - Ministry of Communications
& temporary RARS "Secretary of Everything"
VK QTH: 17~19 Ross St, Maryborough, QLD 4650 Australia
H5 QTH: Government Offices, Nain, Hutt River Province, via Northampton, WA 6535 Australia"

IOTA NEWS.....
AF-004. Peter, PC2A, will be active as EA8/PC2A from Lanzarote Island (DIE S-007) until July 14th. Activity may be limited because

this is a holiday trip with a K2-100 and dipole antennas. QSL
via PC2A, direct or by the bureau. Visit the following Web page
for more information at: http://www.pi4cc.nl/personal/pc2a/ea8/

AS-079. Tack, JE1RXJ, will sign homecall/6 from Miyako Island (JIIA
AS-079-055), Okinawa Pref, August 3-7th. Activity will be on
40-6 meters CW/SSB. QSL via his home callsign, direct or by
the Bureau.

AS-147. Sasi/JA1KJW, Yama/JJ1JGI, Akira/JK1EBA, Mitsu/7N4AGB will be
active as homecall/8 from Rebun Island (JIIA AS-147-006),
Hokkaido Coastal Island, July 15-18th. QSL via their home
callsign, direct or by the bureau.

EU-037. Kent, SM0ELV, will be active as SM0ELV/7 from Ido Island in
the RSGB IOTA Contest (July 30-31st). Activity will be on both
CW and SSB. QSL via his home callsign, direct or by the bureau.

EU-038. JanJaap/PG7V and Jack/PD2JVE will be active from Texel Island
with the special callsign PC6IOTA from July 27th to August 3rd.
Their main activity will be participation in the RSGB IOTA
Contest (July 30-31st). Activity before and after the contest
will be on all HF bands on CW, SSB, RTTY and PSK, and 6 meters,
2 meters and 70 centimeters. QSL via PG7V. More info about the
operation can be found on: http://www.pg7v.net/pc6iota

EU-055. Members of the QLF DX Team (LA6Q), will be active from Utsira
Lighthouse NOR-262 on the Island of Utsira, July 20-24th.
This IOTA group is #6 on the Most Wanted list for EU. Operators
mentioned are: LA5UKA/Bjorn, LA8AJA/Andy and LA9VDA/Tony.
Activity will be on 80-17 meters, CW, SSB some RTTY. QSL via
LA9VDA.

EU-130. Bodo, DL3OCH, will be active as IV3/DL3OCH from Grado Island
(IIA GO-001 and MIA MI-039), July 28th to August 1st. Activity
will be on 160-10 meters CW only. Bodo will also participate
in the RSGB IOTA Contest (July 30-31st). QSL via his home
callsign, direct or by the bureau.

EU-132. Operators Zick/SP3BJK and Przemek/SQ3RX will be active from
Wolin Island (SPIA SZ-002 for the Polish Islands Award) between
July 22nd and August 2nd. They will sign homecall/1. Activity
will be on all HF bands, CW and SSB, and an entry in the IOTA
Contest. QSL via SQ3RX, direct or by the bureau.

SA-055. Roberto, LU4BR, President of Radio Club Argentino, informs
OPDX that his members will activate Martin Garcia Island
using the callsign LR4D from July 28-31st. Their schedule
will be as follows:
July 28-29th: HF bands, mainly CW/RTTY
July 30-31st: Entry in the 2005 IOTA Contest as a
Multi-Op.
QSL via LU4AA, both direct or by the bureau.

JT3, MONGOLIA. From the HQ station of the MRSF, look for JT3T to partipicate in the IARU World Championships from the border town of Zamyn-Uud. QSL direct to JT1CH: P.O. Box 421, Ulaanbaatar-38, MONGOLIA.

LIGHTHOUSE ACTIVITY.....
Look for Dov, 4Z4DX, to be active as 4Z4DX/LH from the Jaffa Lighthouse (ARLHS ISR-005), August 20-21st. Activity will be on all bands and modes. QSL via his home callsign (QRZ.com), or eQSL. Logs will be uploaded to LoTW.

Gordon, VE3RGG, will be operating from Cabot Head Lighthouse (CAN-067) the first week of August. He will be living there for the week and be an entry in the Lighthouse/Lightship Contest (August 6-7th). Cabot Head Lighthouse is located on the Bruce Peninsula, South of Tobermory, on Georgian Bay. QSL via his home callsign, direct, IRC or Canadian postage.

LR2, ARGENTINA. Look for LR2F to be active during the IARU Contest this weekend as a Multi-Single CW/SSB entry. Before the competition the operators will activate the station on different bands putting an emphasis on 160m. The operators mentioned are: LU2FA, LW7DX, LW9DA, LU5CW, LU1FZR, LU4FPZ and LU5FF. To request sked for QSOs before the competition, send an E-mail to: lr2f@hotmail.com QSL via LU2FA.

OL200, SLOVAKIA (Special Event). Look for OL200BA and other special event stations to be active now through December 31st celebrate the "Battle of the Three Emperors" in Austerlitz 200 years ago. More information can be found on the following Web page at: http://www.qrz.cz/Pages/diplom_en.html

PA2000, THE NETHERLANDS (Special Event). Look for special event station PA2000N to be active on the air between July 8-23rd. Activity is to celebrate the 2000th anniversary of the City of Nijmegen (also known as Noviomagum).

QSL INFO AND NEWS.....
Claude, N1QAE (ex-6Y5CC), reports that the 6 meter logs for 6Y5RV have finally arrived. He states, "This is all possible due to the deligence and help from my good friend Wenty, 6Y5IC, in Jamaica. He and I are in the process of inputing the information in the computer. The first batch of QSLs will be going out the the second week of July 2005. I do understand that these 6 meters logs are very important and needed. AS soon as we are finished inputing the information, I will try to get them up on the Web (time permitting). Please be patient. Thank you all for you kind understanding."

OPDX was informed that the A35YL and YJ0YL QSL cards should be mailed out in approximately one month's time. The IOTAs covered during the trip are: YJ0YL - OC-035 (May 2-19th)
A35YL - OC-049 (May 23-29th)
- OC-064 (May 30th to June 7th - a fairly rare IOTA).
An Australian postage stamp covering the return, at "Card Only" rate, will be a special issue stamp picturing the 2 YLs, VE7YL and VK3DYL on it. It is planned to have only one run of these special stamps, so they

will no doubt become collector's items! Note: This stamp can not be used
with 2 cards in the one envelope.

Goran, YZ1SG/YT2A, has announced that the logs for TA0/YZ1SG (AS-098)
and TA4/YZ1SG (Bodrum) are now on: http://dx.qsl.net/logs/index.html
QSLs will be printed very soon. QSL via YZ1SG, by the bureau or direct:
Goran Savic, Zlatiborska 59, 31310 Cajetina, Serbia & Montenegro.

TZ, MALI. The VooDoo Contest Group will be active in the CQWW DX CW Contest
(November 26-27th) this year signing TZ5A. As usual, they will be a Multi-
Multi entry with seven 1 KW stations and mono-band antennas. QSL TZ5A via
G3SXW. Individual licences have been issued to the team members as follows:
AA7A - TZ6NS K7WP - TZ6CW
G3SXW - TZ5A KC7V - TZ6MF
G4BWP - TZ6WP KY7M - TZ6LF
G4IRN - TZ6RN N7NG TZ6NG

G3PJT and K5VT will also join the operators of the TZ5A contest group.
QSL personal TZ callsigns will be used outside the contest. More details
are forthcoming.

W1AW/5 AND NU1AW/3 HQ MULTIPLIERS FOR IARU. Tim Duffy, K3LR, sent out the
following press release: "The two USA Headquarters (HQ) multipliers for
the 2005 IARU HF World Championship contest will be very active on all
HF bands and modes this coming weekend. The ARRL HQ station, W1AW, will
be portable five in Arkansas with multi multi contest station, K5GO as
the flagship host station. The IARU HQ station, NU1AW, will be portable
three with multi multi contest station K3LR as the flagship host station.
QSL to the W1AW and NU1AW addresses as listed on QRZ.COM
Experienced contestmen from several states will man the radios for the
24 hours contest period.
W1AW/5 will be staffed with 12 CW and 15 SSB operators.
NU1AW/3 will be staffed with 6 CW and 6 SSB operators."

WP3, PUERTO RICO. Alfredo, WP3C, will be active in this year's CQWW DX
CW Contest (November 26-27th) as a Single-Op/Single-Band (40m)/Low-Power
entry. QSL via W3HNK. Visit his Web site at: http://www.wp3c.qth.com

YI, IRAQ. Ilian, YI9LZ, in Ad Diwaniyah, will participate in the IARU
HF World Championship 2005 (1200z, July 9th to 1200z, July 10th) as his
work duties dictate. QSL via LZ1ZF.

YR0, ROMANIA. The Romanian headquarter station will be active in the
2005 IARU HF World Championship as YR0HQ. A free award (YR0HQ 2005 AWARD)
is issued for those who work this callsign during this contest. Details
are available at: http://www.hamradio.ro

If you aren't afraid of heights and have
a high speed ISP connection to the Internet,
click on: <http://www.af4k.com/video.htm>.

Then, click on:

"REMARKABLE HAM RADIO VIDEO PROMO."

If you are using a dial-up connection, it
may take 15 minutes, or more, to download.

Enjoy es 73.

I watched it in Windows Media Player. It will work in Real Audio. The 33 bytes is a link. The video is interesting. I went to their site and bought the CD, downloaded it and there's 14 tracks on it. All excellent.

How's about a NG QSO party, where we all get together?

I suggest 7M025Hz A1A Sunday 10:00 GMT AM, 12 WPM minimum.

(Or even 145M8Hz on AM (Sorry, don't know the Z9Z
code, some pedant will no doubt pick me up on it))

I'm not sure what you mean here by "10:00 GMT AM" - is it something to
do with the length of the day on your planet being 23H20? Or are you
referring to MCW?

Oh here we go!

How long have we been encouraged to use THAT notation for frequency?
I haven't come across it before.

I still put the decimal point where it belongs in resistor values, the M,K
or R goes at the end.
And I still draw a resistor as zig-zag.

If a notation for numerical representation is pleasing, then
use it. That it was defined originally for small components
is neither here nor there. The telephone was designed as
a machine to aid the deaf. Does that prevent you from using
it in other spheres?

Resistors as oblongs were conceived by professors of engineering
who were no doubt quite good as professors, but hopeless at
software and so couldn't work out how to draw a zig-zag using
a computer.

I think you mean "k" rather than "K"?

But why do you use "R"; you seem to be in contradiction with yourself
here.

No, it means that I am still learning to function, in spite of my physical disabilities. I spent two years that I couldn't walk without help, and didn't have the strength in my hands to hold on to tools or lift anything over about a half pound. I have made a lot of progress WRT my recovery, but it appears that you will always be a useless pain in the ass. Just pray that you don't reach a point in your life where you would welcome your own death.

Have you set the Sysop setup/RX Ctrl /Carrier Detect to VOX?

3348. Help with AM receiver circuit

Newsgroup: rec.radio.amateur.misc
Date: 2005-07-10 04:29:24 UTC
From: "dave.harper" <dave.harper@gmail.com>
Message-ID: <1120969763.958150.214480@g14g2000cwa.googlegroups.com>

I'm trying to build the simple AM receiver shown here:

http://www.electronics-lab.com/projects/rf/006/

The only modifications I've made are changing the 200uH inductor to a 100uH (ferrite rod) inductor. I'm using a 10-120pF variable capacitor (http://murata.com/catalog/t13/t13_09e.pdf), so I believe I should be able to pick up the higher AM frequencies (correct?). I haven't been able to get it to work yet (usually silence or static, sometimes a high-pitched buzz), and have a few questions:

1. One of the caps is labeled 100n. This would be the same as the other caps (.1uF). Is this a typo, or is the diagram just not consistant?

2. The first three voltage checks I'm getting withing a couple hundreths of a volt. The Q3(b) voltage (supposed to be 0.62V) is reading 7.06V. And the Q3(c) (supposed to be 3.87V) I'm getting 1.07V. Can anyone spot a connection error I might have made that would cause this?

Thanks in advance for any help on either question!
Dave

Something very fishy there with respect to the voltages at Q3. Notice that Q3-b is fed from Q3-c, so the potential there should be lower than Q3-c in any event. And if Q3 is OK and wired in correctly, since Q3-e is grounded, you can't reasonably have Q3-b much more than 0.7V above ground. It's just a forward-biased junction. So as a start, look for problems around Q3! Remove Q3 from the circuit, and check the voltage at the bottom of the 10k resistor...should be nearly the same as the battery voltage. And at the junction of the 560k and the 100nF, should be just slightly lower. Then if you ground the bottom of the 10k, the junction of the 560k and the 100nF should be zero volts. If it's not, perhaps the 100nF is bad (leaky or shorted). I'd say the 100nF (which is indeed 0.1uF) is way larger than needed in this circuit--100pF would likely be large enough.

The description says it's a "regenerative" circuit, but I'm not seeing any significant regeneration! Looks like a simple RF amplifier followed by detection in Q3's base-emitter junction, and Q3 amplifying the audio.

100uH and 10pF would tune about 5MHz, though stray capacitance and parasitic capacitance in the coil will make the net capacitance somewhat higher. 100uH and 120pF would tune about 1.45MHz, just the upper end of the medium wave broadcast band. I'd suggest you try for more inductance and/or more capacitance in the tuning system. For a quick trial, just parallel in 100pF or so; the tuning range will be limited but at least you'll be in the MW broadcast band more solidly.

Cheers,
Tom

3350. Who needs the ARRL, anyway?

The ARRL is not a necessary institution these days. It is self-propagating, demands hefty dues and represents less than half of the licensed Amateurs in the United States.
Besides, what does one get for the $40.00 per annum (or is it more?) fee? A glossy magazine rife with advertisements? Admission to 'private' sections of the ARRL web site? A monthly 'bulletin' sent to your email address? (more spam)
Oh, wait. ARRL members get to vote on proposed rule changes, too. As if the FCC has ever given that much credence.

I guess there are still some old warhorses out and about who feel that it is a mark of distinction to have the ARRL logo on their QSL cards...especially those who boast of being part of the elite few, the proud, the Life Members.

One could likewise spend their Amateur Radio $$ on bigger and better things, such as paying good money after bad to join the Ten Ten Club, yet another wasteful expenditure of hard-earned money. Why not start a Twenty-Twenty Club? One could double the dues paid to the Ten Ten Club and claim twice the elitism.
The Twenty-Twenty Club could do as the Ten-Tenners do...refuse to speak with those not a member of their snooty group. Double the frequency, double the elitism.

CQ Contest, anyone?

Tom,
Fantastic, thanks for the help. I realized that one of the transistors was in backward, so that was one problem. The voltages are closer to those reported, although off by a couple tenths of a volt. I also put another 120pF variable cap in parallel with the first, so I have a range of 20 to 240pF. After some tinkering, I've managed to pick up a station. However, it's pretty poor quality (I can make out the words despite a constant, high pitched whine). I also used a 12k resistor in place of the 10k (as I'm out of 10k). So I'm led to a couple more questions:

1. The current circuit doesn't have an antenna. How could I attach one to this circuit? And what would be the best way to do so? (single

wire, x" long wire, etc?)
2. How much would attaching the circuit ground to a fence (or
something) help?
3. What might be the cause of the nearly constant background whine?
Is there anything I can try to fix it?

Thanks again for the help!
Dave

Dave,

Assuming the 100uH is a standard ferrite rod type antenna, you can likely give it a boost by winding just a couple turns (experiment: try from one to five turns, for example) of wire around it, grounding one end of that wire and extending the other end into a wire antenna several feet long, up in the air as best you can. I'd suggest ten feet minimum length, on up to maybe a hundred feet, but just do what you can. You can connect the circuit common to a "ground" made up of a ground rod driven into the earth, or just a wire on or close to the earth. Experiment! You're not likely to hurt anything, so long as you keep it away from power lines.

Dunno for sure about the background whine. Is it independent of tuning, or is it only there when listening to the station? Does the pitch change with changes in the tuning? Can you describe it better? It could be an oscillation in your circuit. Substituting the 12k for 10k should not be a problem. But I'd add a bypass capacitor across the battery voltage (and keep all the leads reasonably short) I'd use maybe 10uF at 16V or more, be sure the polarity matches the battery, and put it physically near Q3.

In troubleshooting things like the whine when you have limited test equipment, you can just try things like opening connections in the circuit to see which part of the circuit it's in. For example, disconnecting the 100n capacitor should tell you if it's a problem in the input section or output.

Good luck, and don't be afraid to experiment.

Cheers,
Tom

Well, if you were listening to something that boring to you, you
probably have enough sense to change to another repeater or turn the
radio off. James evidently can't do that. (I'm posting from my chair).

I, personally, would be bored silly-probably a main reason why I never
felt motivated to become a ham. (I'm posting from rec.radio.shortwave.)

Brad thanks for your reply.

I have put my sysop setup setting on a webserver. I have listed below the weblink to the pictures directly.

http://www.enidhamfest.com/echolink/echolink-rxctrl.jpg

http://www.enidhamfest.com/echolink/echolink-txctrl.jpg

If you have a chance take a look at them. again I appreciate your reply..

Imperfect though it is, the ARRL is the only voice the ham hobby has these days. It would be a very poor idea to do away with the ARRL without having something better to replace it.

The ARRL does need to refocus it's efforts toward attracting newer younger members to the hobby if it is to survive long term. The hobby won't survive if its quasi-regulator continues to do treat amateur radio as though it operates in the heyday that was the 1950's.

AWARD "THE FATHERS OF THE RADIO"

RULES

The section ARI of Sala Consilina (SA) ITALY, has founded the permanent award "The fathers of the radio". The purpose of the diploma is to let know the names and the work of those than before, during and after the Our Guglielmo Marconi contributed to the invention and the development of the Radio.

General requirements - Awards are available to all amateurs and SWLs for worked or heard all the 11 countries of the following list where they were born the scientists / inventors who have contributed to to the invention or the development of the radio.

Bands e Modes - All the bands assigned to the Radio Amateur Service and all the modes are allowed, satellites and WARC included.

There are 4 versions of the award:

1) HF (you must have contacted all the 11 countries)
2) 50MHZ/VHF/UHF (are enough only 6 countries to claim the award)
3) SATELLITE (are enough only 6 countries to claim the award)

Countries list:

Canada VE (Reginald Fessenden)
Croazia 9A (Nikola Tesla)
Denmark OZ (Hans Christian Orsted)
France F (Edouard Branly)
Germany DF-DK-DL-DM (Heinrich Rudolf Hertz - Karl Ferdinand Braun - Adolf Slaby)
India VU (Jagdish Chandra Bose)
England G-M (Michael Faraday - Oliver Lodge)

Italy I (Guglielmo Marconi - Augusto Righi - Temistocle Calzecchi Onesti - Luigi Galvani)
Russia RA-RZ UA-UZ (Aleksandr Popov)
Scotland GM (James Clerk Maxwell)
USA A-K-N-W (Samuel Morse - David E. Hughes - Lee De Forest - Nathan Stubblefield)

To claim the Award the QSL cards are not required but they must be in possession of the applicant and could be requested anytime for checks.

The fee is 10 Euro or 12 Dollars. To receive the Award as registered mail please add 3 Euro or 4 Dollars.

Application forms must be sent to this address:

ARI SEZIONE SALA CONSILINA
CASELLA POSTALE N.11
CAP 84036 SALA CONSILINA (SA)
ITALY

For more informations you can contact the award manager IZ8AJQ Erminio
via email: iz8ajq@amsat.org

Damn, and here I thought that the 20M band was at about half the frequency of the 10M band. Did those rascals at ARRL go and change that too? Where on the dial can I now find my 20M buddies, up in the old 5M band? I thought we'd lost that band way back in the 40's.

3384. Simple questions on receivers

Newsgroup: rec.radio.amateur.misc
Date: 2005-07-12 20:12:46 UTC
From: "dave.harper" <dave.harper@gmail.com>
Message-ID: <1121199166.494373.59190@g49g2000cwa.googlegroups.com>
Source record: 50856
Cross-posted to: rec.radio.amateur.homebrew,rec.radio.amateur.misc

I had a couple of questions regarding recievers that I haven't been able to figure out. I'd appreciate it if anyone could give me some insight...

How well-defined is the gain for a cap-coil loop, like in an AM radio? (i.e., how fast does the gain droppoff as you move up or down from the 'tuned' frequency?) Is it a function of L and C? Or just frequency? (different combinations of L and C will tune to the same frequency, but is the gain the same?)

How come the coils on many of the CR schematics I've seen have multiple tap locations? It seems that with a variable cap, you should be able to tune to whatever frequency that's in your range. Is it to increase the range of your radio's coverage? Or because the gain at certain frequencies is better with different C/L combinations?

Thanks in advance for any insight!
Dave

Tom,
Thanks again for the advice. I originally attached a 10ft wire
directly to the L-C loop, and that helped a lot. But I've read
somewhere that it's best to magnetically couple it instead of directly
attach. Why is that?

I figured out the background noise... I had a TV, 3 lights, and a fan
motor going within about 15 ft of me. The background noise dropped off
a lot once I cut them off.

Dave

> (i.e., how fast does the gain droppoff as you move up or down from the
> 'tuned' frequency?) Is it a function of L and C? Or just frequency?

For the L-C resonator itself, the falloff will be 6dB per octave (doubling of frequency) once you're well outside of the center (tuned) frequency. The 3dB bandwidth will be determined by the Q of the circuit, and this is often not particularly well defined during the design stage -- often a well-defined bandpass filter somewhere "down the line" (e.g., at an IF stage) will ultimately define what the radio receives.

The 6dB/octave drop comes from just looking at the impedance or transfer function of an LC(R) resonator -- you'll end up with an s^2 (frequency squared) term in the denominator of the equation.

> (different combinations of L and C will tune to the same frequency, but
> is the gain the same?)

No, although for low Q resonators, it's often pretty close.

> How come the coils on many of the CR schematics I've seen have multiple
> tap locations? It seems that with a variable cap, you should be able
> to tune to whatever frequency that's in your range. Is it to increase
> the range of your radio's coverage? Or because the gain at certain
> frequencies is better with different C/L combinations?

They're usually trying to match the impedance of the LC circuit to the input impedance of "the next stage" (i.e., a transistor amplifier) to maximize power transfer. So, while it's not really "gain" (we haven't amplified anything yet -- this is more like a resistive divider), the output will be higher with different C/L combinations.

Generally speaking, most relatively simple AM receivers are really only intended to pick up relatively strong, nearby transmitters. As such, you can get away with an awful lot of "cut and try" when it comes to designing the circuit (largely ignore matching impedances, Q's, etc.) and still obtain acceptable results.

Hi Dave,

Well, you can couple the signal from the antenna into the radio in different ways, and though multiple ways may work, one may be more practical than another, and may be more efficient with available parts. The feedpoint of an antenna--the place you couple signals in or out--may look like a low impedance or a high impedance; it may have quite a bit of reactance in it (what look like capacitance or inductance). Getting the most signal out depends on matching to that impedance. Fortunately, for most medium-wave signals (standard broadcast), you can have inefficient coupling and still have a very useable signal, because the signals have to be pretty strong to be useable. They have to be larger than the atmospheric noise, which is rather high at those frequencies.

A disadvantage of simply connecting an antenna wire to the "hot" side of the LC at the receiver input is that a random wire will likely have quite a bit of effective capacitance, causing the LC to be detuned from what you expect. And if the wire is fairly long, it may represent a relatively low resistance, which will make the tuning much less sharp--it will lower the LC (tank circuit) Q--and you'll be listening to more than one signal at a time with your simple receiver design.

It can be an advantage to make the coupling variable. You can do that by changing the number of turns, or by moving the ferrite rod into or out of those turns, with the inductive coupling. Or you can connect the wire to the "hot" side of the LC tuning tank through a small "trimmer" capacitor.

There's a lot more to the story, which you'll learn by studying, experimenting, and keeping an open mind and high level of curiosity about things. Joel in your other thread told you some about bandwidth of LC tanks...you can determine the Q by measuring the 3dB bandwidth of the tank. Then the Q is center frequency divided by bandwidth. If you have a good coil and capacitor, and no circuit loading the LC, the Q might be, say, 200, limited by losses in the coil and capacitor themselves. If you add a resistor--either a part designed to be a resistor or a circuit that has an effective resistance--it will lower the Q and broaden the bandwidth. If the power lost in the resistor is equal to the power lost in the coil and capacitor, you will have a Q that's half as large--100 in this case. A receiver designer will pick a Q that doesn't limit the bandwidth too much, but gets rid of interfering signals. And if the receiver relies on two or more LC tanks to track together, the Q will be picked a bit lower to allow

errors in tracking without hurting the performance.

Again...this is only scratching the surface. You should probably look for some books like "Radio Amateur's Handbook" for a lot more discussion of things like tuned circuits.

Cheers,
Tom

Well, other than reading their website or using their books to pass an exam, I
know little about them. But it seems they run the show, and are very powerful.
Sometimes, they are better off having 2 of these type organizations. But one is
better than none.

I doubt that the ARRL will piss off the folks that it reaches out to.
Sadly it will probably continue to bore those potential new members.
The ARRL may (and should) piss off the complacent members who cling to
the idea that out of date license tests should continue to be required
because the old-timers had to take them.

I have a FAR BETTER idea for both of you.

Why don't you guys start a pissing-contest on 14.313 mHz ?

I mean, remember when KV4FZ and his group would occupy
that frequency in years gone past?

BOY WAS THAT FUN LISTENING! It was almost better than the
Comedy Channel listening to these senile old fartknockers
beat each other up with their walkers and canes and false
teeth on the air.

Just think of it! If you two and all your friends started to
camp out on 313 and trade barbs over the air LIVE you would
have 80% of the ham population listening to "The Show" in
no time, and you two guys would become so famous that
you'd be asked to give out AUTOGRAPHED QSL CARDS
at all the hamfests, give speeches, write for QST etc..etc..

Whatcha waiting for? It's a WIN-WIN fer sure!

Thanks for the response Joel. So if I understand correctly, Q is
basically an indicator of how well the LC circuit resonates? Could you
think of Q as the inverse of a dampening coefficient?

If so, I guess ideally you'd get the best Q with an iron-core inductor,
thick windings, and as few windings as possible?

Dave

If I may jump in....
The case of crystal receivers is somewhat different than a "powered"
radio in that you want to keep things at as high a Q as possible to
match the high impedance of the circuit. High Q is desirable in any
case but moreso in a crystal set.

After having established a good high Q with the LC configuration you can
count on the circuit/antenna loading it down somewhat so then it becomes
a matter of selecting appropriate diodes, decoupling the ant, etc. so it
always helps to start out with as much as possible.

Textbook Q of more C/less L is dictated simply by resistance. In
practice, at least for BCB xtal radios, the dielectric of the coil, skin
effects of the wire, interwinding capacitance are the key players.
Thats why certain coil dimensions, use of litz wire and certain winding
techniques can generally be counted on for the highest Q.

The Q of a coil, and/or complete circuit, will have a curve of its own.
With BCB, what is good at 600kc may be better at 800kc and
(relatively) terrible at 1600kc.

I've had good success with ferrite toroids approaching Q=400, although ferrites are by nature very unpredictable Q-wise. This is as good as one can expect with something like a 3-4" diameter coil of #18 wire on a good coil form. OTOH, the toroid stops there. That same 4" coil wound with 660-strand litz can get up into the Q=800 stratosphere with a basket-wind technique.

There's always a downside. A big, hi-Q coil needs to be kept well away from ANYTHING or else the Q will take a nosedive and then lead capacitance starts biting you from the backside.

I find xtal sets fascinating. I've been radioing for 35-40 years and never gained a full appreciation for L, C and Q until I got into DXing with xtal sets. Logged 105 BCB stations in the competition earlier this year including two in Brazil!

-Bill

>Thanks for the response Joel. So if I understand correctly, Q is
>basically an indicator of how well the LC circuit resonates? Could you
>think of Q as the inverse of a dampening coefficient?

In a way, you might think that. For going to more advanced things
besides "simple AM receivers," I'd suggest thinking of Q as a
built-in LOSS element.

For parallel-tuned circuits, the loss can be modeled as a resistor
in parallel with the L and C. This equivalent resistor value is
the reactance of either L or C (they are equal at resonance)
multiplied by Q. A high Q indicates least loss in a parallel
circuit, a high value of equivalent parallel resistance.

But, for series-tuned circuits, the loss is equal to a resistor
in series with L and C. That resistor value is equal to the
reactance of either L or C divided by Q. A high Q in a series-
tuned resonance would have the lesser value of series resistance.

>If so, I guess ideally you'd get the best Q with an iron-core inductor,
>thick windings, and as few windings as possible?

Yes and NO. Q will vary by MANY things. Generally, physically
big coils will have higher Q, physically big windings will have
higher Q. Shape factor, like length versus diameter of a
solenoidal winding has an optimum value. Nearby shielding will
tend to reduce Q; one reason why toroidal forms have higher Q
than solenoidal or cylindrical windings.

CORE MATERIAL IS FREQUENCY SENSITIVE! "Iron core" has to be
defined. Power transformer laminations are okay at up to
about 10 KHz and then become more lossy with increasing
frequency. Special iron (tape shape, usually) is used for

higher frequencies in the supersonic range. At LF and higher, various kinds of iron POWDER are used to enhance Q (within their specified frequency range).

Q applies to capacitors also...and is affected by things like plate area, plate material, dielectric if other than air, and (to some degree) physical shape factors. Generally, though, the Q of most resonating capacitors is 10 to 100 times larger than inductors and can usually be neglected in most calculations of tuned circuits. Inductor Q rules! :-)

For self-education, I'd suggest spending some time with a good Q Meter and trying out measurements on various kinds of inductors. That will probably give you the best Q picture in your mind.

>How well-defined is the gain for a cap-coil loop, like in an AM radio?
>(i.e., how fast does the gain droppoff as you move up or down from the
>'tuned' frequency?) Is it a function of L and C? Or just frequency?
>(different combinations of L and C will tune to the same frequency, but
>is the gain the same?)

"Gain" of a crystal radio depends on the bigness of the antenna.

If you are talking about a loop antenna on an AM [BC band]
radio, then it's a different story. The loop antenna on an
AM receiver is small/tiny/micro-stuff relative to the 200+
meters of AM BC wavelengths. The received signal VOLTAGE
is directly dependent on the number of turns in that loop and
the physical size of the loop.

A loop antenna is into what some folks call a "magetic antenna";
i.e., very small relative to wavelength, therefore it intercepts
only the magnetic part of the electro-magnetic wavefront radiated
by a transmitter. The more turns in that loop, the greater the
voltage induced in the loop.

A humungous-long wire is going to supply the greatest amount of
POWER to a crystal receiver. POWER drives the headphones. But,
the amount of power coupled in involves IMPEDANCE and that, right
away, gets into a complicated mess of more electrical rules.

Simple crystal receivers want to keep impedances very high at
both input, middle, and output. ["crystal" or piezo-electric
headphones are the best for that, next best is the highest
impedance magnetic headphones (2000 Ohms or higher) you can get]

For the typical parallel-tuned L-C input to a crystal set, the
inductor Q will make a difference. It must be as high as is
practical; Qs of 200 to 300 have been done. But, the Q of the
coil is dependent on a LOT of different factors which I noted
in the other message.

>How come the coils on many of the CR schematics I've seen have multiple
>tap locations? It seems that with a variable cap, you should be able
>to tune to whatever frequency that's in your range.

Mostly, that is just old-time tradition! :-) [I kid you not]

The formula for resonance is: F^2 = 1 / (39.478 * L * C)

With F being frequency in Hz, L in Hy, C in Fd.

To check this out, a 2.5 mHy inductor and 1000 pFd capacitor will be resonant very close to 100 KHz.

The maximum to minimum variable capacitance ratio is equal to the square of the maximum to minimum frequency tuning ratio desired. That's about IT.

"Taps" on a coil can be to select different inductance values for resonance with limited-range variable tuning capacitors. Note: Back in the prehistory of radio, like around the 1920s, variable capacitors were expensive and not so easy to get. A few old-time crystal sets "tuned" via lots of coil taps using a fixed parallel capacitor. I had a Philmore crystal radio kit back in 1946 that did that. Very cheap kit. It worked, so-so.

Presupposing a loop antenna that is resonated by a variable capacitor, its "gain" is going to be greatly influenced by its Q or Quality factor. The higher the Q, the greater the voltage into the headphones. However, the Q may NOT be the same over the approximate 3:1 frequency span of the AM BC band. [again, too many variables as noted in other message]

The Q of that L-C circuit is going to be "spoiled" by the impedance/resistance of the headphones. Those headphones are in parallel with the parallel-tuned L-C circuit. The higher the impedance/resistance of the headphones, the least effect it will have on the Q of the L-C resonant circuit.

Somehow my browser failed to pick up your initial message so this is a reverse-order answer. Sorry about that.

> think of Q as the inverse of a dampening coefficient?

Just about exactly. You'll find the term "damping factor" (sometimes "damping ratio" or "damping coefficient") often used in many situations involving network analysis and control systems, usually represented by the lowercase Greek letter zeta. And it's numerically equal to 1/(2Q), so Q is exactly 1/2 the inverse of the damping factor.

When the damping factor is 1 (Q = 0.5), a second order circuit is said to be critically damped.

Loop antennas do suck on a xtal set for that reason but "bigness" can suck equally if not done right.

You know how you read all those old texts about using nice glass insulators and keeping the wire away from anything? In everyday practice you can do pretty well what you please with wire antennas and powered radios and notice very little difference. Once you get into the realm of truly hi-z installations those tree leaves brushing against the wire become noticeable.

Acutally the best is a good matching xfmr and sound powered phones. Those old 1920's 2k headsets are relatively deaf. But you did specify "simple crystal receivers" and it that case it doesn't really matter.

Q in excess of 1000 is readily achievable. 200-300 is a starting point
on a decent dx set.

Most of these old ckts relied on a 17 or 21 plate cap which was in the
400-500 pf range. They would tune the entire band at full tapping. The
tapping allowed a guy to really nitpick his tuning for two
reasons...ease of fine tuning and higher Q at the best combination.
>
> "Taps" on a coil can be to select different inductance values

I think you described the Philmore kit well. That was a toy.

My 4 cents worth.

From: "Odd Erling N. Eriksen" <odderi@pvv.org>
Message-ID: <db90kd$500$1@orkan.itea.ntnu.no>
Source record: 50909

Hi,

A few years ago, I stumbled across some audio recordings posted on the internet - someone apparently had taped an operator from the caribbean somewhere (I think he was a V4, but googling didn't help me on this one).

Several recordings, (most of them rather short) showed how he handled qrp ops, partial callers and other nuisances. ;)

Sharp, witty, sarcastic - I got a good laugh from the recordings, that's for sure.

But, alas - I have been unable to relocate them.

Does the above description ring any bells with anyone? Thankful for any replies.

--

This coming Sunday....

+++ Now even more Buyers Parking !!!
Thanks to TKT we have use of their new parking lot
across Albany St from the SWAPFEST !!!

!! ** More Buyers PARKING is available ** for details see
http://web.mit.edu/w1gsl/Public/flyer

*** !!!! In our Traditional GARAGE and the adjacent lot !!!! ****
so come rain or shine or super heat the Flea is on !!!

********* $1 buyers discount with hardcopy of this notice ********

COMPUTERS - ELECTRONICS - HAM RADIO - COMPUTERS - ELECTRONICS - HAM RADIO

FLEA all SUMMER at MIT
Sunday July 17th 2005
9AM-2PM

Come to the city for a great flea - plenty of free parking.

MIT's electronics and ham radio flea will take
place on the third Sunday of each month this summer,
April thru October.

There is tailgate space for over 600 sellers and
free, off-street parking for >2000 cars!

Buyers admission is $5 (you get $1 off if
you're lucky enough to have a copy of our ad)
and sellers spaces are $20 for the first and
$15 for each additional at the gate.

The flea will be held at the corner of Albany and
Main streets in Cambridge; right in the Kendall
Square area from 9AM to 2PM, with sellers set-up
time starting at 7AM.

SEASON PASS + Advance Seller Discount

A sellers discount season pass is available which
offers a 30% discount. By prepaying you get a
discount and earlier admission. See the registration form.

*** Attention Sellers ***
Prepaid vendors.. Season Pass or monthly,

will be admitted FIRST.
Separate lines will form prior to gate opening
for prepaid and nonprepaid vendors

!! RAIN or SHINE !! Have no fear of rain, a covered
well illuminated tailgate area is available for all
sellers (6'8" clearance).

Talk-in: 145.23- (PL 88.5) W1BOS/R and
W1XM/R-449.725/444.725 (PL 114.8/2A).

And behold, the Lord of Time cast a fearsome spell on Wiseman such that all of his NIM Busters posts would be colored green. He then banished Roger and all of his works to Roger's Realm at http://the-forum.us/nimbusters/forum/forum.php?board=10.

The daleks saw it and rejoiced, for they knew the depths of depravity into which the Insane One had sunk, and they knew that the Insane One needed to be isolated, marked, and banished from the company of mankind.

The Lord of Time had prevailed at last, and the daleks celebrated by drinking Bud Lite and eating Papa John's Spinach Alfredo pizza with extra anchovies, jalapeno peppers, and portabella mushrooms.

The world was good again, and God was in His heaven.

But the Pale Dalek was down with indigestion.

We were about ready to atrribute this post to Mr. Davies.

The wit, the grammar, the topic .. it had to be him.

Then there was a mention of drinking "Bud Lite".

Everyone knows Mr. Davies is a devout Baptist tee-totaler.

What would profit Stair say to the idea of Mr. Davies bending an elbow to get a snoot full of Bud Lite .. ??

We reckon it was one of Mr. Davies' daleks who did the post.

But if this is a good report, we're glad for Mr. Davies and all his daleks and the entire staff and management of Papa John's.

That pizza - we're sure gonna hafta try one of those from the local PJ's.

But we'll chase it with Diet Coke instead of Bud Lite.

3451. E-Z Hang Antenna Tool

Newsgroup: rec.radio.amateur.misc
Date: 2005-07-17 01:19:05 UTC
From: VOA SWLer <Reply_Here@nowhere.com>
Message-ID: <n8adnZL3ArKcL0TfRVn-vA@comcast.com>
Source record: 50923

Here's a neat gadget to help you get your wire antenna high in the trees.

According to the testimonials:

Mike, K2CSJ, said, "... Worked like a charm. ..."

Gary, W9VJ, said, "I received my EZ Hang at noon today and had my B&W folded dipole up where it should be that very afternoon. ... Thank you very much for a product that really works."

Tony Davis, KN4VL, wrote,"Great idea and great product, I'm a happy customer and will recommend others to your website."

Howard, W5OM, says, "... I put the wire over the topmost branch, exactly where I imagined it should go [85 feet high]. ... I know of no other way I could have managed this, and am perfectly delighted. Thanks for building these gadgets!"

It's an "EZ HANG" slingshot tool. The URL is
<http://www.ezhang.com> or
<http://www.ezhang.net/store/products_all.php>.

Yes, I know it costs a hundred bucks, and anyone can build it. So, there is no need for anyone to post 'flames.'

The bottom line is: 1) It's expensive. 2) Anyone can make it, but 3) It works and 4) if you're honest with yourself, it's a lot easier to buy it than to try and make one yourself.

Finally, I own one and it works. And, I am *not* a salesman for EZ HANG. I just think it's a great product.

73,
BA

Click on: <http://www.ezhang.com> or
<http://www.ezhang.net/store/products_all.php>.

I've had recent tech support for two HP computers I own. Both
the US and the Indian support men and women were of very high caliber.

DXCC COUNTRY/ENTITY REPORT: According to the AR-Cluster Network for the week of Sunday, 10th/July, through Sunday, 17th/July there were 199 countries active. Countries available: 3A, 3B8, 3B9, 3D2, 3DA, 3V, 3W, 4J, 4L, 4S, 4X, 5A, 5B, 5H, 5N, 5R, 5T, 5V, 5Z, 6W, 6Y, 7Q, 7X, 8P, 8R, 9A, 9G, 9H, 9J, 9K, 9M2, 9M6, 9N, 9V, 9Y, A2, A3, A4, A6, A7, A9, AP, BV, BY, C3, CE, CE9, CM, CN, CP, CT, CT3, CU, CX, D4, D6, DL, DU, EA, EA6, EA8, EA9, EI, EK, EL, EP, ER, ES, ET, EU, EX, EY, F, FG, FK, FM, FO, FR, FW, G, GI, GJ, GM, GU, GW, HA, HB, HB0, HC, HI, HK, HL, HP, HR, HS, HZ, I, IS, J6, J8, JA, JD/m, JD/o, JT, JW, JY, K, KH0, KH2, KH6, KL, KP2, KP4, LA, LU, LX, LY, LZ, OD, OE, OH, OH0, OK, OM, ON, OY, OZ, P2, P4, PA, PJ2, PJ7, PY, PZ, S2, S5, S9, SM, SP, ST, SU, SV, SV/a, SV9, T32, T7, T9, TA, TF, TG, TI, TK, TR, TT, TU, TY, TZ, UA, UA2, UA9, UK, UN, UR, V3, V5, V7, V8, VE, VK, VP5, VP8/h, VP8/o, VR, VU, XE, XT, XU, XX9, XZ, YA, YB, YI, YK, YL, YN, YO, YU, YV,Z2, Z3, ZA, ZB, ZC4, ZD7, ZF, ZK1/s, ZL, ZP, ZS

* PLEASE NOTE: The report "could" contain "Pirate/SLIM" operations or more likely a "BUSTED CALLSIGN". As always, you never know - "Work First Worry Later" (WFWL).

3D2 & 3D2/R, FIJI AND ROTUMA ISLAND. Hiro, JA0SC, informs OPDX that he will operate from Rotuma Island from July 27th to August 2nd, and after that from Fiji, August 3-5th. Activity will be mostly digital modes (SSTV - 14230, 21340 and 28680 kHz; RTTY and PSK31). He has requested his old callsign 3D2HY. QSL to his home callsign, JA0SC, address is OK

at the QRZ.com.

5X, UGANDA. Hisato, JA1DOT, informs OPDX that he plans to take his summer vacation in Uganda. During his stay he plans to be active on 160-10 meters on CW, SSB and RTTY. He recently received his 5X1W license from the Uganda Communications Commission. Hisato will be using an IC-706MKIIG into a SG-235 plus 4 meter mast and 10 meter fishing rod. Look for activity from him between August 3-12th. QSL via JA1DOT, either direct to QRZ.com or via the JARL QSL bureau. This operation is supported by NDXA (Nanchatte DX Aikoukai). Visit their Web page at: http://www.ndxa.jp/pedi/5x1w-2005/

6W, SENEGAL. Look for F6BEE to be active as 6W1RW in the CQ WW DX CW Contest (November 26-27th) as a Single-Op/All-Band/High-Power entry. QSL via F6BEE.

A9, BAHRAIN. Operators A92FF, A92GR, A92GQ(9K2AI), A92GN and possibly others will be active as A92C in the RGSB IOTA Contest (July 30-31st). Operation class and QSL route will be anounnced later.

C9, MOZAMBIQUE (Reminder/Update/New IOTA). Remember to look next weekend for a group of operators from the Ukraine (Chiloane Island Team) to be active from Maputo during the period between July 23rd and August 10th (See OPDX.716). The operators will be using their own personal callsigns (C91UY, C91LL, etc.) on 160-10 meters CW, SSB and digital modes. QSL for all individual's C9 callsigns are via the operator's home callsign, direct or via the bureau. This team of operators will also activate a new IOTA. Look for them to use the callsign C93DY (not C93DX as first reported) on Chiloane Island (IOTA AF-NEW), Sofala Province, Mozambique. Activity will take place from July 28th to August 1st, and will include an entry in the IOTA Contest. The QSL route for C93DY is via UT5UGR, by the bureau or direct to: Dimitry Stashuk, P.O. Box 115, Kiev-147, 02147 Ukraine. For more information, please visit the DXpedition's Web page at: http://www.c9.dxer.com.ua
ADDED NOTE: This group will also be active from Swaziland (3DA0) in August. More info next week.

FRENCH SPECIAL EVENT STATIONS.....
TM0BZM - The Finistere Hams will be active from now through July 24th for the Corwall Interceltic Festival in Quimper Finistere (Pen Ar Bed - The End of the World). Activity by TM0BZH (For Breizh: Brittany, in Britton Language), will be on the air on HF, VHF, and UHF from the Grid Square IN77WX. QSL per the operator's instructions.
TM5VIN - The Cher area Hams will be active as TM5VIN (VIN for Wine) on August 6-7th, from the Charvet Cellar, a big cellar of the Sancerre vineyard. QSL via F9KH.

HI3, DOMINICAN REPUBLIC. Mark, KB2MS, will be active as HI3/KB2MS from Puerto Plata between July 23rd and August 21st. Activity will be on 80-10 meters. QSL only direct via his home callsign.

IOTA NEWS.....................................
AS-NEW
AS-038. Operators Roman/RV3MA, Alex/RW3DTP, Sergey/RW6HJV, Eugene/
RZ3EC, Valery/RZ6AU and Leonid/UA6CW will activate a new IOTA
in the Chukchi Sea Coast West Group between August 10-17th.
Operations will take place from either Shalaurova Island or
from some of the surrounding islands (because of high radiation
on the main island!). There is also a lighthouse located on
the island. Later on, the team plans to operate from Ayon
Island (AS-038) group (from Bolshoy and Malyj Routan Islands,
where there are lighthouses located on the islands valid for
the WLOTA, ARLHS and RLHA awards programs. More details will
be available soon on: http://www.r0k.ru
QSL via RZ3EC (QSLs will be automatically sent via the bureau).

AS-090. Members of the Hanam Ham Club (South Korea) will activate
Taeijak Island (Kyonggi-do Province, Tokchok Islands group)
starting 1900z, July 29th ending 2400z, July 31st. They will
use the callsign D70IS. Activity will be on 40/20/15 meters
CW/SSB. Operators mentioned are: HL2DDZ, DS1AXW, DS2PSI,
DS2QDY, 6K2BPT and 6K2BUV. Rigs are: FT-1000MP and JST-135D.
Antennas are: 40m DP, 20m 2ELE HB9CV and 15m 2ELE YAGI. QSL
Manager is: HL1OYF or KARL Bureau. DXpedition Home page is:
http://d70is.karl.or.kr

EU-008. Mark, MM0MMK, will be active from the Island of Tiree now
through July 31st. Activity will be on 80-10 meters SSB,
but sporadically during his stay and specifically during the
RSGB IOTA Contest. The station will consist of FT-817 QRP rig,
Tokyo High Power amplifier giving 100W to a wideband folded
dipole via an SGC 230 antenna coupler. QSL via his instructions.

EU-016. Operators 9A4W, 9A5K, 9A6C, OE1EMS and SM7VZX will be active
in the IOTA Contest this year in the Multi-Operator category
from the Island of Brac. Activity will be on all HF bands.
The callsign to be used is 9A7B. QSL is 100% sure via the
bureau. Direct requests are via 9A4W (direct or bureau is
fine). Activity is also valid for Island of Croatia Award
(IOCA). For this award, island reference is CI-010.

EU-016. Zeky, 9A5ST, will be active as 9A5ST/p from Veli Drvenik
Island (IOCA CI017) now through September 1st. Activity will
be on HF, 6m and 2m, especialy the IOTA Contest. QSL is OK
via the Bureau or direct (QRZ.com).

EU-064. A French team of operators led by Franck, F4AJQ, will
activate Noirmoutier for the next IOTA Contest. Callsign
will be TM7C. Operators mentioned are: Franck/F4AJQ, Thierry/
F4TTR, Pascal/F5JSD, John/F5VHQ, Serge/F6AML and Bernard/F9IE.
QSL via F4AJQ, either direct or by the bureau.

EU-065. Jean Claude/F6HDH and Francis/F6HKS plan to activate several
lighthouses on Ouessant, the main island and possibly some of

the other smaller surrounding islands this on same group (EU-065, AT-001). Watch the clusters for QSNs; the small islands and lighthouses will be choosen as weather and transportation is permitting. They will be active each morning on August 9th and 10th from 0500-1200z. Their callsigns will be F6HKS/P (CW on 40/30/20m) and F6HDH/P (SSB on 40/20/17/15m). QSL via their home callsign, direct or via the French REF Bureau.

EU-074. Jean Claude, F6HDH, plans to be active as F6HDH/p from the Heaux de Brehat lighthouse on Brehat Archipelago (MA-012, WLOTA 031 and ARLHS FRA 021) between August 1-5th, as the boat permits. Activity will be 40/20 meters and possibly 17/15 meters. QSL to home callsign, direct or via the French REF Bureau.

EU-080. Operators Tono/EA9CP and Fernando/EA1BT will activate the Punta del Caballo lighthouse ARLHS SPA 196 located in the Pontevedra Province Group (DIE:O-007 D-1826) during the upcoming IOTA Contest.

EU-123. Iain, MM0TFU will be active as MM0TFU/p from Blackwaterfoot, Isle of Arran, July 29th to August 5th. Activity will be on 80-10 meters SSB; the RSGB IOTA Contest included. QSL via his home callsign, by the Bureau or direct to: Iain MacAlister, 33 King Street, Crosshill, Maybole, KA19 7RE, Scotland.

EU-123. Members of the Sheffield Amateur Radio Club will activate the Isle of Arran on July 29-31st. They will also participate in the IOTA Contest as MM3M. Activity will be on all bands, CW and SSB. QSL via the bureau or direct to their QSL Manager and SARC Club Secretary G4FAL: Nick Totterdell, 35 Meadow Bank av. , Sheffield, South Yorkshire S7 1PB, UK. ADDED NOTE: SARC members will also activate some WAB squares (Worked All Britain) during their stay. They will use their home callsign signing /p or /m. QSL via operator's instructions.

EU-159. Laurent/F8BBL (CW) and Jean Marc/F4ECL (SSB) will be active as QRP on Cordouan Island, July 22-23rd. Their 48 hour nonstop activity will be on 80-10 meters CW/SSB. Equipment will be a FT817ND, Buddistick (W3FF) and dipoles. Other reference numbers are: DIFM AT-032, LH 271, ARLHS FRA007 and PB 018. More info is forthcoming. QSL via F8BBL, 100% by the bureau or direct.

EU-165. Massimo, IZ0EJQ, will be active as IM0/IZ0EJQ from San Pietro Island during the next IOTA Contest on July 30-31st. Activity will be on 40-10 meters SSB.

EU-182. A group of operators are planning a small DXpedition to Ankudinov Island in the Black Sea between July 28th and August 1st. They plan to enter the IOTA Contest using the callsign EM5F. QSL via UX0FF. Also, look for the following operators to be active before and after the Contest using

their home callsigns: UX0FF/P, UR5FAV/P, UR5FGW/P and F6IRF/P.
QSL via their home callsigns, direct or by the bureau.

NA-028. Hillar/N6HR and Elsie/N7YX will participate in the IOTA Contest from Alaska's Pribilof Islands. The callsign will be KL7/N7YX, and activity will be on both SSB and CW on whatever band is open! QSL via the home callsign.

NA-085. Members of the Tennessee Valley DX Association (TVDXA) will activate St. George Island using the callsign W4I. This island is part of the Florida State group (FL007s). W4I plans on being active about 1900z on Sunday, October 2nd, and will go QRT sometime Sunday morning, October 9th. The group will use 100 watt transceivers and plan to be active on 80-10 meters HF (SSB, CW with some PSK and RTTY), and 6 meter SSB and CW. Currently operators include Barbarra/WA4RMC, Kathy/ W4KRY, Lynn/K0MAI, Kay/KI4GYS, Tom/K4VCM, Greg/WA4NFO, Tommie/ K4KWK, Kenny/AB4GG, Tony/W4FOA, Charlie/AD4F and Paul/WA4AA. Non licensed team members include Nancy (XYL of Paul/WA4AA) and Nancy (XYL of Tony/W4FOA). QSL via WA4AA direct (SASE) or via bureau. Additional information and updates will be added to their Web site during and following the activation at: http://www.tvdxa.com

SA-046. Mac, PR7SM, will be active as PY7/PR7SM, or possibly a special callsign that he requested for the RSGB IOTA Contest (July 30-31st), from Itamaraca Island. QSL via PR7SM (QRZ.com).

LIGHTHOUSE ACTIVITIES.....
Tono, EA9CP, will be in Portugal on July 29th and will activate the Montedor lighthouse (ARLHS POR-031) for the Lighthouses of Portugal Award FMI02.

Berkin/TA3J/4 and Nilay/TA3YJ/4 (XYL) will be active only on SSB on 80/40/20/17/15/12/10 meters from Antalya Bababurnu Lighthouse (ARLHS TUR065)(KM56JU) on July 23rd. Activity is in memory of Bahri Kacan, TA2BK (SK). See Web page at:
http://www.arrl.org/news/stories/2001/07/24/1/?nc=1Special
http://www.qsl.net/ta1kb/bahrikacan.htm
A lighthouse QSL card will be available. QSL via the bureau or direct (SASE+New IRC only, no greenstamp please). SWL QSL cards are OK. Further information is available at: http://www.qsl.net/ta3j
http://www.qsl.net/ta3yj
ADDED NOTE: Atila, TA1DX, will also be active but only on RTTY on 80/40/20/15/10 meters (KN41JC) on July 23rd. His activity is also in memory of Bahri Kacan, TA2BK (SK). A special QSL card will be available. QSL via the bureau or direct. SWL QSL cards are OK. Further information is available at: http://www.qsl.net/ta1dx

Operators Peter/MM5PSL, Roger/MM1FJM, Lars/MM0LON and Georg/MM0ECG will participate in the RSGB IOTA Contest as MM0ECG from Eshaness Lighthouse (ARLHS: SCO-075) on Shetland Mainland (EU-012). There will be some

activity before and after the contest. QSL via DL1ECG, by the Bureau or direct to: George Muehlenbruch, Abteiweg 9, D-41468, Neuss, Germany.

Durring the INTERNATIONAL LIGHTHOUSE/LIGHTSHIP WEEKEND (0001z, August 19th to 2359z, August 21st) look for LABRE/RN members to operate from Calcanhar Lighthouse (BRA 035) on digital, phone and CW modes and on 160-10 meters. Callsign will be ZW7LH: QSL via PS7AA, by the bureau or direct to: P.O. Box 251, NATAL RN 59010-970, Brazil.

LU, ARGENTINA (Rare Provinces). Operators Sylvester/DH4PB, Al/LU1DZ, Hector/LU6UO and Fernando/LW2DX are going to operate from two "rare" LU Provinces in August. Their schedule is:
La Rioja - August 4-10th, signing LU/DH4PB/S, LU1DZ/S, LU6UO/S and LW2DX/S.
Catamarca - August 10-15th, signing LU/DH4PB/R, LU1DZ/R, LU6UO/R and LW2DX/R.
Activity will be all bands when propagation is available, including the WARC bands, with an emphasis on CW, but also some SSB and possibly others modes.

OJ0, MARKET REEF. Operators KU7B, SM3WMV, OH8K and OZ1AA will be active as OJ0YC from July 23-31st. Their activity will emphasize 50 MHz. QSL via OH6GDX.

OOOOPPPPSSS DEPARTMENT. Last week's OPDX.717 mistakenly listed "OL200, SLOVAKIA (Special Event)" and it should have been listed as "OL200, CZECH REPUBLIC (Special Event)." The editor states he is sorry for the error to our Czech friends and repeats again, look for OL200BA and other special event stations to be active now through December 31st, to celebrate the "Battle of the Three Emperors" in Austerlitz 200 years ago. More information can be found on the following Web page at:
http://www.qrz.cz/Pages/diplom_en.html
OL200BA was heard this past week on 80/17 meters SSB and 80/20 meters CW. QSL via OK2SW.

QSL INFO AND NEWS.....
The CY9SS logs are now online at: http://www.cy9ss.com

G6XN CALLSIGN REALLOCATED. The callsign of CQ Amateur Hall of Famer, antenna designer and author, Les Moxon, G6XN (SK) has just been allocated to Wey Valley Amateur Radio Group, based in Guildford, Surrey England. For more details, visit their Web page at:
http://www.weyvalleyarg.org.uk

QSL EM0ITU via UT3UZ: Alex Arbuzov, P.O. Box 7, Kiev-232, 02232, Ukraine. Activity was by the club station the of Ukrainian State Centre in connection with holding the ITU workshop <Automation of the Spectrum Management> by the 6th ITU Centre of Excellence in Kiev.

LOTW USERS. Mike, VE3VHB, informs OPDX that if anyone is looking for a list of LoTW users, HB9BZA publishes a partial list of some 2700 users at: http://rchalmas.users.ch/lotw.txt

The VE6/ VA6 Incoming Bureau for Alberta, Canada, is being moved to Calgary where it will be operated by a small group of active local amateurs led by Rich, VE6AX. The new mailing address for this incoming bureau effective immediately is: Rich Roadhouse, 372 Cedarpark Dr. SW, Calgary, Alberta, CANADA T2W 2J4. They have also established a new Web site which you can link to via: http://www.qsl.net/ve6lb

QSL STATUS (for ZK1APX, ZL7/AI5P, A35PX and 5W0HR - 2005). Rick, AI5P, informs OPDX that he just returned home on July 6th. He states, "Will begin answering the ZK1 cards as I have them from my previous trip in 2004. The other three cards have to be designed, printed in Europe and shipped to me. This normally takes about 2-3 months. So the cards will be answered in due course. Patience please."

Ken, ZL4HU, advises that the New Zealand Post will no longer accept the old style IRC's. They will now only accept the larger type with the bar code on the reverse side. This is a policy decision made by the New Zealand Post effective Decemebr 31, 2004. To all those who still require QSL cards from any New Zealand based station or New Zealand QSL Manager, please send the NEW IRCs which have the expiry date of December 31, 2006, on them. Please note that for the ZL8RI DXpedition in 1996, the ZL9CI DXpedition in 1999 and the ZL7C DXpedition to the Chatham Islands in 2002, the above information becomes effective immediately. All cards receieved which have been postmarked after July 13th WILL be replied via the Bureau if the OLD style IRCs are sent with direct QSL card requests. The same applies for cards sent to ZL2HU, ZL4HU and ZK1KH.

S7, SEYCHELLES. Just a reminder that DDr. Karl, OE3JAG, is expected to be active as S79JAG from Mahe between July 22nd and August 7th. This will be a DX holiday style operation, and Karl will be using a FT-817, running QRP, with random wire and dipole antennas. Look for activity on the following suggested frequencies:
CW - 14020, 18070, 21020, 24890 and 28020 kHz
SSB - 14190, 18140, 21190, 24940 and 28190 kHz
RTTY - 14080, 18100, 21080, 24920 and 28080 kHz
PSK - 14070, 18100, 21070, 24920 and 28070 kHz.
QSL via OE3JAG: DDr. Karl Jungwirth, Adalbert Stifter Strasse 25, 2232 Deutsch Wagram, AUSTRIA - EUROPE. Further information can be found on Karl's Web site at: http://www.oe3jag.com/

SILENT KEY. Rick, NE8Z/HC1MD/HC5EE, informs OPDX that Alfonso "Alfo" Villavicensio, HC5AI, became a Silent Key (SK) July 13th. Alfo was 78 years old and was quite ill for the last 2 years. Alfo was an active CW operator for 65 years!! OPDX and its reader would like to send out our deepest sympathy to Alfo's family and friends.

SV/A, MOUNT ATHOS. It seems Monk Apollo, SV2ASP/A, has been active lately on CW. Word has it that he is using a computer to send and receive CW. His activity over the past weekend has been on 160/40/30/15 meters.

SV5, DODECANESE. Stefano, IV3IPS, will be active as SV5/IV3IPS/p from Rhodes Island (EU-001), August 13-20th. Activity will be on 80/40/20/15/10 meters SSB/RTTY. QSL via the Bureau to his home callsign.

SV9, CRETE. Claude, HB9CRX, will be active as SV9/F8UFT/p from Kissamos until July 31st. Activity will be on 40-10 meters CW only, the WARC bands are included. QSL via F6ICG, direct or via the French Bureau.

TORINO 2006 AWARD. The Associazione Radioamatori Italiani (ARI) Regional Council of Piemonte and Valle d'Aosta is pleased to introduce the "Torino 2006 Award" celebrating the "XX Olympic Winter Games" that will take place in Torino, Italy, in February 2006. Full details can be found at: http://www.ari-r1.it/torino2006

UA1, RUSSIA (Mountain Activity). Look for Andrei, UA3SGV, to be active as UA3SGV/1 on a Khibin Mountains Polar DXpeditions (RM-01-002, RM-01-003, RM-01-004, RM-01-005 to "Russian Mountains Award"; MU-06 to "RDA") from July 26th through August 9th. Activity will be on all HF and VHF bands. The Khibiny is the largest mountain range of the Kolski Peninsula in Russia. It is located between the Imandra Lake and the Umbozero Lake 150 km to the north from the Polar Circle.

V25, ANTIGUA. Members of the Florida DXpedition Group, Inc., Larry/W1LR (V25LR) and Bill/W4WX (V25WX), will be active from here August 15-24th. Look for them primarily on PSK-31 and RTTY on 10-12-15-17-20 meters. QSL direct only to their home callsigns. They will be traveling via "Space A" on a military aircraft. Let's hope they get a seat!

V4, ST. KITTS AND NEVIS. Larry, KJ4UY/V47UY, informs OPDX that he and his wife Mel, will once again head back to their second home on St. Kitts and Nevis. They will be leaving Orlando on August 19th and arriving back in Orlando on August 26th. Larry states that he has sent a tribander (for 10-15-20m) and a dualbander beam (for 12-17m) to Karl, V44NK, to install on St. Kitts. Larry informs, "I hope to operate from both St. Kitts and Nevis. Hopefully propagation will be better than last year. I have 6 meter on Nevis, but not on St. Kitts. Would like to operate more 40/80 meters and maybe 160 meters from Nevis. Anyway, I will operate as propagation allows 160-6 meters. When on Nevis, 6 meters will be on all the time and would really like to make a lot of 6 meter contacts. Please, no special requests/schedules as I have a lot of friends there and my time is not always my time." QSL via KJ4UY with SASE for U.S. stations or SAE & return postage for DX stations. Larry mentions that he is looking forward to being back in the West Indies with his friends. Karl and Larry are also working on something different in December.

VB3, CANADA (CISA/Lighthouses). Igor, VA3YDX, will be active as VB3M from the several Canadian Islands and lighthouses starting at 2300z on July 22nd, from Little La Clotche Island (a CISA new activation). His plans are as follows:

July 23rd	July 24th
Great La Clotche Isl. CISA: ON016	Manitoulin Island CISA: ON001
Birch Island CISA: ON017	Skinny Island CISA: NEW

Goat Island CISA: ON072 Activation
Manitoulin Island CISA: ON001 Barrie Island CISA: ON015
Little Current Lighthouse: NEW Providence Bay Lighthouse: CAN 416
Activation
Kagawong Lighthouse: CAN 259
Janet Head Lighthouse: CAN 203

His suggested frequencies are: 3795/3815, 7060/7260, 14260 and 21260 kHz.
QSL via VA3YDX, by the bureau or direct to: Mr. Igor Slakva, 105 La Rose
Avenue, #803, Etobicoke, ON M9P 1A9, Canada.

VQ9, CHAGOS ISLANDS. Larry, N0QM/DU3, states that VQ9 did not make the
OPDX's "DXCC COUNTRY/ENTITY REPORT" last week and says that will soon
change. Larry, currently in DU3 land until July 25th, will be back on VQ9
July 25th. He hopes to see you all in the pileups.

YL, LATVIA. Kresimir, 9A7K, will operate as YL/9A7K from the cities of
Riga and Talsi until July 19th. He plans to be operating on all HF bands.
QSL via his home callsign. For more info on his operation, visit his
Web page at: http://www.9a7k.com

YI, IRAQ. Ilian, LZ1CNN, now active as YI9LZ will take part in the WAEDX
Contest (August 13-14th) as a Single-Op/All-Band/Low-Power entry. QSL to
LZ1ZF via the Bureau or direct to: P.O. Box 8, 6000 Stara Zagora, BULGARIA.
ADDED NOTE: The QSL Manager Gosho, LZ1ZF, has request to inform him by
E-mail for each sent direct QSL card at: lz1zf@abv.bg

There are back issues of QST on CD ROM, might have to get QST View
CD-ROM 1975-79 #5773 set, but well worth the price of $39.95 (USD)
plus shipping. They are in PDF format and you can print from any page
or the whole magazine if you want.

I have a quick question I hope someone can answer. I am running an Echolink Link to the input/output of my local remote repeater. is there anyway to get echolink to ignore the repeater ID? I have it ignoring the courtesy tone fine. I just don't want other repeater ops getting irritated at me for my cw ID going over there links. Thanks.

So what's a good inductance to DC resistance ratio for an inductor on
an xtal set? The one I wound is about 500uH, and I get a resistance of
3.2 Ohms.

Using the formula Q=2*pi*f*L/R, I get a Q for my coil of 981 (@1MHz).
But based on its performance, I KNOW it's not that good. I'm picking
up a couple stations at night, but just barely.

Dave

For BCB work the 'standard' is in the 220-240uh range for tuning with a ~365-400 pf cap. There's an (almost) infinite number of combinations you can use if you want to split the band into segments which sometimes has an advantage. But switches and tapped coils can also be Q-killers once you get into the Q stratosphere.

In practice the coil Q is determined primarily by the form dielectric, wire size, wire spacing, diameter/length ratio/neary coupling effects, etc. R is far enough down the list that its generally not even considered. When you do a DC measurement of coil R thats not representative of the skin effects and true RF resistance, thats why the textbook formula doesn't pan out.

If you want to make a fairly nice coil without getting into the expense of litz, check out spider-web coils and rook coils. When done with say 16-18 ga wire, and diameters in the 4" range you can get a pretty nice coil. With 166-strand litz (30-35c/ft) you'll note an improvement but by that time its time to start thinking about a good hi-q ceramic capacitor and circuit loading concerns.

The Rap-n-Tap forum is where to get some good info.
http://www.midnightscience.com/rapntap/ "Best coil" is a common topic!

The "R" in the Q formula is an equivalent resistance at frequency,
not just the DC resistance. That equivalent resistance is made
up of many things: winding form factor, wire size, and the DC
resistance to name the major factors.

Q alone won't determine sensitivity. Sensitivity, without some
accurate numbers such as transmitter power output, distance to
transmitter, antenna gain/loss, is going to be a very subjective
item. Even with them available the numbers can turn out to be
rather off when listened to.

A couple of years ago now, I wound a loop for 60 KHz (WWVB
reception) using #14 electrical wire. It was rather cheap
at Home Depot compared to enameled "magnet" wire for a 500
foot length. Inductance came out roughly according to formula
but the low DC resistance didn't do much for the Q. At 60 KHz
the Q was only about 68. :-) Dimensions were about 2 1/2 feet
diameter, circular, with an aluminum foil electrostatic shield
over the top of 57 turns. In retrospect I should have used many
more turns of smaller wire, such as #26 AWG, since signal
strength is proportional to the number of turns for the same
size loop.

It could have been the insulation on the electrical wire that
reduced the Q. Unknown. Would have to wind a similar one in
"magnet" wire to find out. It was measured for Q and inductance
without and with the foil electrostatic shield with no discernable
changes in Q, only slight in inductance. As it is, it works well
enough, is presently in the attic above the interior workshop.
[size dictated by trap door access to that part of attic]

Years and years ago I fooled around trying to make an AM BC loop according to "expert instructions" from some magazine. Spent a lot of time cutting the "blades" of the former to allow zig-zag winding of some Litz wire someone gave me. Former was 3/32" phenolic laminate, cutting via a jig-saw. About 14 inches wide by 6 inches high. Q measured out to only about 120 at mid-band (using an old Booton Q Meter). Low enough distributed capacity but not near the Q claimed in the article, supposedly about 300. <shrug> Maybe ordinary cardboard would have worked better as the former? :-)

If you have some RF source of known frequency at the AM BC band, you can get a fair handle on the Q by using a high series resistor between RF source and the L-C parallel-tuned circuit. Observe the voltage across the L-C tank and de-tune the RF source frequency to the 71% amplitude, note the two frequencies on each side of resonance and take their difference. That's the delta-F "Q bandwidth" that, when divided into peak resonance frequency, will get you the approximate Q. The high resistance source-to-tank should be around 100 KOhms or so (higher the better) at 1 MHz to avoid introducing too much error. That resistor forms a "quasi-constant-current" stimulus...not ideal but good enough for an approximation when observing the RF voltage across the L-C tank.

"Ours is not to reason why, ours is but to cut and try..." :-)

the short verision is that it costs whatever the FCC says this week,
may change tomorrow . It is supposed to just recover the amount of
money it costs the FCC to run the program, but that costs varies
somewhat with how much the FCC is doing at the time, including How many
avnity calls but also inclduing how much other busness is before the
comission so it is recaluated often. at least this what I understand
they are supposed to do

it does seem like they setafter doing regular Torrot card readings or
reading chicken entrails

In article <2387017833.2458F8789@tarrnews.net>
"Pale Dalek" aka Lardass Lloyd Davies <l...@no.spam> whined:
>
> And behold,

And it came to pass like the gas the ghastly inferior mutant Porky, the queen of Knob Jobs in Alabama passes when he opens his mouth, spent yet another wasted week whining about others. Friday night will be no exception, as the mentally ill retard who thinks trashcan robots are real will spend said Friday night alone, drunk and stupid, whining about others on the internet instead of actually dancing with a woman. No woman wanted the ghastly pale Porker, because of his ugly face and flaky bald head and gobs of flab that hung over his fucking belt,along with the terminal body odor and bad breath was a real turn off. The ghastly pale porker dreamt that he actually went out and interacted with people, though, when in reality people shun him like a leper and all Porky got was drunk and pissed himself and his filthy bed. Porky thinks he got promoted when he recently got fired from his high school kid's pizza delivery job/career. There are no Daleks under your command, 'tard boy. They are fictional robots used in a television show! You need to get mental help again failure boy.

You have been a failure in everything you have ever done, PERIOD!

You are indeed "pale" you never venture forth outside except for your minimum wage "job," and to buy more of that pussy Bud Lite beer. A real man's beer would probably kill a big fat pussy like yourself.

You need to seriously take a long hard look at yourself in a properly lit mirror in that roach infested hovel you call home and then take action. Lose weight, get mental help, stay off the computer for hours on end and face reality. You are 31 years of age, you deliver pizzas, you play with dolls, you get drunk and spew your filth and delusions on here and usenet. Nobody, I repeat, nobody except for a couple of geeks like yourself can stand you. The best thing you could do is to slit your wrists while in that shitty vehicle of yours this summer, then if the police didn't find you right away, the Alabama summer heat would do it without you having to be cremated. You are a blathering asshole that is a boil in the crack of America's ass. You irritate us, end it now Porky, do it!

And if Porky would ever succeed at committing suicide, it would be a first that he succeeded at something and the world would be better off. God works in mysterious ways keeping the fake xtain Porky Pale Dicklick a virgin where he can't pollute the human gene pool.
And it was good.

And the world laughed at the 31 year old virgin and it was good.

> Q alone won't determine sensitivity.

Very true. In fact the opposite is usually the case when it comes to function. In a good hi-q xtal set one often has to sacrifice sensitivity for selectivity...and vice-versa. Tighter coupling=more sensitivity but less selectivity because of loading effects. If you want sensitivity, go outdoors and hang wire or add sound-powered headphones. If you want selectivity, tweak the ckt.

But still, by aiming for highest Q you at least have something to work with when trading off.

Crystal radios are somewhat like a house of mirrors. Changes at one end reflect at the other end of the ckt. The old razor-blade radio is an example of everything being done the worst way but it still works. As you improve on the scheme each component becomes more and more critical.

You better re-think that statement, "Everyone knows Mr. Davies is a devout Baptist tee-totaler."

Lloyd, who pretended to be the Chief of Communications for B.A.R.F. when he didn't have a license to talk on the hf frequencies, lied, swore, and drank that woman's beer, Bud Light and rambled on in a drunken stupor on the Nim Board for quite some time until he saw the light.

The light was a "real threat" of a severe ass whipping, and he took heed.

He is a disgusting individual, he tried to have sex with my prize mare mule a few years ago in my mule barn in Colliersville, Tennessee. I caught him with a stool behind her and he was flailing away at her. He needs to be put away again in another mental institution. But, this time he should be kept for more than 7 months.

1. Air core coils will be cheaper, lighter in weight, easier to make.

> Easy of calculations?

2. Definitely.

> I assume you can get higher performance from ferrite coils than
> air-core coils, right?

You don't need as much ampere-turns to get a given amount of inductance
and thus, ohmic resistance will be less, therefore higher Q (in theory).

caveat: the magnetizable material you use for the core (i.e. iron,
ferrite, and other stuff that I think other guys here surely know better
than I) will have a big effect on useable frequency on up to some cut-off
threshold that may be sharp or spread out. Pure solid sheet iron, for
example, might be good at audio frequencies and maybe up to x00,000 Hertz,
but you need powdered iron to go into the megacycle range. There are other
core substances that get you up higher. Anyone else care to add to this?

Don't forget that winding a torroidal coil is not so easy. Some cores are
available in halves so you can make "pies", otherwise the "bobbin"
carrying the wire has to pass through the hole of the doughnut many times.

Most crystal radio builders go with air core coils...partly because
thats the way it has been always done and such plans are available and
thats the way its supposed to 'look' :)
And you CAN make a better Q air coil than what is attainable with
ferrite.

When I say unpredictable about the toroids, the calculated
turns/inductance comes out the same but not the Q. I've wound the same
coil on half-dozen 'exact same' ferrite cores and gotten Q ranging from
below 200 to nearly 400. Those numbers (in my set) cover the range of
not-so-good to pretty-darn-good. I'm not sure why that is other than
its not something intended to be. You won't readily find Q charts for
ferrites like you do for iron powder cores. As a consequence of this
you don't have any guarantee that the cores you get are going to make it
to the p-d-g range.

There's some advantages and disadvantages with using ferrite cores. The
size is the most obvious advantage. Among other advantages - they are
not affected by nearby components and do not pickup signals from the air
(self-shielding). Thats why I got started with them...I have a 5kw BCB
tower about 1600 feet from my QTH! With air core coils the band is
totally swamped.

On the negative side...the ultimate Q-limitation seems to be about 400,
inability to have variable loose-coupling to traps and other stages are
most notable. They also don't have the "looks cool" factor like a big
coil :)

Now back down to earth. A random ferrite core inductor is going have a MUCH higher Q than the average coil wrapped around a toilet tissue tube. You're lucky to get 80-100 with that type of coil. It may not play out as being important in a very simple circuit that has other shortcomings but as mentioned before it also helps to have a high starting point on as many of the components as possible.

Anyhow...its something else to tinker with!

-Bill

A typical medium-sized ferrite toroid coil for BCB use, FT-82-61 for instance, costs about US$1 and can't weigh more than an ounce and uses up about 4-5 feet of wire.

Different calculation but one is as easy as the other. Just look for an online calculator :)

> else care to add to this?

True. There are two main substances used in ferrite toroids - and I can't quote either name - and they have vastly different permeability characteristics. I think the CWS-Bytemark website goes into some of these details.

> Don't forget that winding a torroidal coil is not so easy. Some cores

I've been referring to the simple doughnut cores. A BCB coil takes around 50 turns on -61 material. Even with my fat fingers it only takes about 10 minutes.

Lawyer my ass!!!

I wouldn't know about the impersonating part, but the libel won't
stick, as it was the truth. Davies lied, got drunk, posted all kinds of
filth on the nim board. He didn't, and still doesn't have hf
priveleges. So, where is the libel "counselor?" <snicker>

Have you figured who/what you are yet?

As we have it, Mr. Davies was given an honorary appointment as BARF Chief of Communications by none other than Mr. Schoenbaum (sp?) himself. While Mr. Davies had no HF license, we are advised that several BARF members did, indeed, communicate with him via e-mail, including the perpetrator of the famous "rrrroooooooollllll ccccaaaallll".

As far as the drunken rantings on the NIM board, we feel confident that this was the work of an impersonator. We stand by our statement that Mr. Davies is a devout Baptist, a tee-totaler, and perhaps even secretary-treasurer of his Sunday School class.

Collierville, you say? Stop by KRBC some Sunday. You'll see what Mr. Davies missed out on. Be some mity-fine sistahs in that palce, dude. And that Popeye's near the corner of Kirby and Winchester - best fried chicken in town. At least it was last time I was by there. I wonder what ever became of the guy who scored my 'fridge box as I was leaving town. He said something about moving it over to a spot on LaMar near the state fair grounds. Makes me wonder what his plans are. If you get my drift.

Aww come on, Bro. Les. Be careful - the Davies family is rife with attorneys at law. If you say the wrong thing on here, I fear you'll get double teamed by Christy and Jim both. Who needs that.

Now as far as Mr. Davies being drunk and posting filth on the NIM board - man that's a far stretch from the Sunday School boy we used to know. Maybe we better get him re-baptized or something.

As for the impersonations, etc. - I suggest you enlist the expertise of the Athens, AL office of the Lewis-Louis Detective Agency. Please pass my regards on to Messrs. Lewis and Louis. Their security and coordination services were exquisite, as usual, for the yearly event at Dayton. Yep, S-F 05 was the best yet. It's one venue that is increasing in spite of declining attendance at Hamvention. Maybe I should send you pictures.

Danny boy, there's a BIG difference between me and K1MAN, but you and your little buddies on here are so stupid that you can't understand. The main difference is I pick a unused frequency and ask if the frequency is in use, and if no one answer I use the frequency. There's the BIG difference, between me and K1MAN, but hey, I'm talking to bunch of dumb narrow-minded licensed CB operators, who can't look outside the box. Secondly I don't have any Pecuniary Interest, But stupid people like forget that although there is a "banned" on Pecuniary Interest, Some Pecuniary Interest is allowed. For example, A person can order a pizza on a repeater, or if and a man and wife are both amateur operators she can call him on the radio and pick something up at the store. plus if your a club station and run a Information bulletin or morse code practice 40 hours a week (that's 8 hours a day) can compensate the control operator, so pecuniary interest is NOT complete banned from ham radio, but what would you know. Finally, Content, the FCC is prohibited for controlling the content of any station (47 USC 326) This has been upheld by the court of appeal and the US Supreme Court. but hey I bunch of cry-baby licensed CB operators who think they amateur's know. The rule dealing with the content of a Information bulletin can be found and is codified in 47 CFR 97.3(a)(25) Nowhere in 97.3(a)(25) or 47 CFR 97.111(b)(6) does it state an Information bulletin have to newscast, it only states that a information bulletin has to be directed to amateur radio operators, consisting solely of subject matter of direct interest to the amateur service. But, hey what would a bunch of half-wit licensed CB operators know.

The Personal Radio Association is now accepting applications for membership. Membership is currently free, with no dues collection, until such time the group is incorporated and a dues schedule is approved.

The PRA will become the primary voice of the GMRS community. Already, PRA members have reported many FCC violations to the FCC, who is initiating enforcement action.

GMRS users, and users of any of the services the PRA supports (FRS/MURS) are urged to check it out.

The PRA Mission Statement

The Personal Radio Services are limited radio spectrum resources set aside by the United States government for use by the general public as licensed and unlicensed radio services. The PRA is a mutual-interest organization of Federal Communications Commission licensees of the licensed General Mobile Radio Service and interested persons using the radio services delicensed by rule, the Multi-Use Radio Service, and the Citizens Radio Service. The PRA's mission is to fairly and accurately represent its member's interests in these radio services before government agencies, the various representatives of the radio industry, private or public organizations, and the public-at-large in order to protect and preserve the growth, regulation, and continued usability and effectiveness of each radio service.

The PRA Ethics Statement

The PRA supports the lawful use of the Personal Radio services as defined in the the Federal Communications Commission's Rules and Regulations and the various Communications Acts as amended.

The PRA supports the Basis and Purpose, as well as the Definition of each radio service as written in the Federal Communications Commission Rules and Regulations and remains loyal in this regard during any deliberations before federal or private organizations.

The Personal Radio Association proactively supports and openly defends the core interests of personal radio users before government and private decision makers.

PRA and its members subscribe to an Operating Code of Ethics that is consistent with the FCC's Basis and Purpose for each radio service, all applicable FCC Rules and Regulations, and with an emphasis toward expected

growth, continued usability and the cooperative use of each radio service.

PRA promotes cooperation among members and non-members sharing the same radio spectrum in the same geographical areas.

The PRA promotes a Radio Industry Code of Ethics that encourages industry to act responsibly toward the Personal Radio Services.

PRA Focus in Brief

FCC rule making and enforcement issues with an impact on the radio service (s)

Commercial actions toward the radio services that effect members continued enjoyment of their investment in a negative or a positive way.

PRA Initiatives

Reporting retailers using false, misleading, or deceptive advertising to market two-way radio, or that advertise illegal radio hardware to the Federal Trade Commission and Federal Communications Commission respectively.

Public education regarding use of the Personal Radio Services.

GMRS Intruder reporting via PRA form through the PRA Intruder and FCC Enforcement Committees.

Encouraging FCC enforcement of GMRS FCC Rules in problem areas of the United States.

PRA's Reliable Retailer Program. We focus attention on retailers doing the right thing applying the Radio Industry Code as a standard.

Keydown Focus Group. This group gathers information on illegal CB radio keydown events and reports findings to the FCC.

The PRA is headquartered at Huntingtown, MD.

3498. ARRL Admits Mistakes in Regulation By Bandwidth Proposal

Newsgroup: rec.radio.amateur.misc
Date: 2005-07-19 17:20:57 UTC
From: policy-ham <hamop_62@hotmail.com>
Message-ID: <1121793657.529367.261800@g14g2000cwa.googlegroups.com>
Source record: 50970
Cross-posted to: rec.radio.amateur.policy,rec.radio.amateur.misc,rec.radio.amateur.dx

NEWINGTON, CT, Jul 19, 2005--Following considerable discussion and debate, the ARRL Board of Directors has approved a modified set of recommendations to regulate the use of amateur spectrum by emission bandwidth rather than by emission mode. Last April, the ARRL Executive Committee reached consensus on a set of regulation-by-bandwidth proposals to serve as the basis of an FCC Petition for Rule Making. Following additional fine tuning based on hundreds of comments from the amateur community, the Board formally adopted a further-modified plan at its July 15-16 meeting. The revised plan includes a stipulation that the League "will promptly undertake a procedure to establish a band plan to be utilized with the proposed subband allocation petition, and, until such time as that band plan is in place, the existing band plan will be in force." ARRL CEO David Sumner, K1ZZ, remarked after Board's 12-3 vote that improved band planning is critical to the success of the League's regulation-by-bandwidth proposals and will require the support of the amateur community at large.

"I think it's fair to say that the Board recognizes that regulation by bandwidth is not going to work without a spirit of cooperation among amateurs pursuing different interests," he said, "any more than current regulations would be adequate without a spirit of cooperation." As one example, Sumner pointed out that under the current rules, RTTY and data enthusiasts may, by rule, operate in the low end of the CW subbands. "They don't, because to do so would disrupt amateur CW," he said.

Sumner has discussed various facets of regulation-by-bandwidth and detailed the evolution of the ARRL Executive Committee's recommendations in his "It Seems to Us . . ." editorials in the September 2004, April 2005 and June 2005 issues of QST. He said that if the FCC ultimately implements the modified ARRL recommendations, there's no reason to believe that amateurs will operate right up to the absolute limit of what the FCC says they may, any more than they do now.

The regulation-by-bandwidth issue dominated the Board's second meeting of the year in Windsor, Connecticut. After a great deal of give and take among its members, the Board ultimately okayed raising the maximum bandwidth proposed for frequencies below 29 MHz from 3.0 kHz to 3.5 kHz. A provision permitting the continued use of double-sideband AM with bandwidth of up to 9 kHz was retained.

Significantly, the Board also agreed that maximum permitted bandwidth should be defined in terms of necessary rather than occupied bandwidth. In addition, the modified proposal removes the exception for

independent sideband (ISB) emissions--which by all reports are not used in the Amateur Service--and drops certain mode restrictions on Novice and Technician class operators.

The ARRL proposal would leave two important FCC rules unchanged. §97.307(a) says: "No amateur station transmission shall occupy more bandwidth than necessary for the information rate and emission type being transmitted, in accordance with good amateur practice." §97.101(a) reads: "In all respects not specifically covered by FCC Rules each amateur station must be operated in accordance with good engineering and good amateur practice."

Per the Board's motion, the ARRL Executive Committee will review the final rule making petition, which will be filed with the FCC at the Committee's discretion.

The Board began work on the bandwidth concept in 2002, and the League sought members' comments on specific concepts at several steps along the way. Many amateurs have expressed concern about interference between incompatible modes in the most popular HF bands. The EC's proposals take into account the ARRL's prior "Novice refarming" petition that includes expansion of some HF 'phone bands, incorporated in the FCC Notice of Proposed Rule Making in WT Docket 04-140.

In other action, the ARRL Board adopted a resolution to establish an ARRL VHF/UHF Advisory Committee (VUAC) to address contesting issues over a period of no more than three years. The new panel, to be comprised of "exceptionally qualified and recognized members of the VHF/UHF community," will seek input from VHF/UHF contesting "public," identify important issues and "seek the sense of the 'public'" on those issues.

The Board also adopted five strategies to include in the League's 2006 Operational Plan. These address improvements in the ARRL advocacy program and members-only features of the Web site, and review and analysis of ARRL programs.

ARRL President Jim Haynie, W5JBP, chaired this month's Board meeting. Radio Amateurs of Canada President Earle Smith, VE6NM, was a guest of the Board.

Ah, so the voltage drop across the coil (due to the small internal resistance) and the close proximity of the wires give it some capacitance? Does this affect performance or just screw add unwanted capacitance?

Wouldn't adding space between wires cause some eddy currents and lower the L of the coil?

Does wire coating make a difference regarding the dielectric? Or is it another capacitance-altering effect?

Thanks again!
Dave

There is nothing much in your statements below that any reasonable
person would disagree with.

However, it is my understanding that this group was originally being
formed to pursue anti-digital and/or more restrictive overall FCC
regulations of the Personal Radio Services... in the statements below,
I don't see ANYTHING about anti-digital or more restrictive rules
positions.. has the Mission really changed, or is it now just a hidden
agenda?

Below, you talk about taking measures to go after radio manufacturers
and marketers that use deceptive advertising techniques - I hope you
aren't being hypocritical in this regard yourself.

Big question - Why did you crosspost this to rec.radio.amateur
newsgroups? Is it because there is a large pool of radio cops data
bigots on those newsgroups? Again, I think you are being disengenious
if your membership is mostly made up of individuals that don't even use
the services in question. You will be misrepresenting your
organization to the FCC... kind of like Corwin Moore's Personal Radio
Steering Group (PRSG - which is basically just Corwin Moore himself,
making it look like he is representing users of these services, but who
appears to mainly represent the interests of commercial radio
manufacturers).

One final thought - since you are mostly GMRS users, I can understand
your concerns regarding FRS, since the services are closely related.
But, I don't really understand your concern with unrelated services you
don't use (such as MURS or CB radio). If you REALLY have specific
beefs with specific key-clowns or other violators on CB radio, then
work up the documentation and report them to the FCC... but I think it
is being disingenious to use this issue as a meaningless rallying cry
to generate members who think they are supporting a good cause - but
which you can't and won't do anything about. There already are rules
against these illegal activities - if you know of specific
circumstances of violations, document them, and report them to the FCC.

- Stewart

> capacitance?

The internal capacitance of the turns isn't enough to radically change
the basic LC resonance. Instead it tends to result more like dielectric
leakage
>
> Wouldn't adding space between wires cause some eddy currents and lower
> the L of the coil?

Again, not significantly in the BCB example. Take for instance, a 4"
diameter coil wound with #18 wire, however many turns it takes. Lets
say 60. Winding the coil close-spaced as opposed to about
one-wire-diameter spacing will require a few less turns (maybe 10%) to
get the same L. But the close spacing WILL result in lower Q once you
re-establish the same inductance. There can be more than one reason for
this...is it the winding spacing or the length/diameter ratio or more
dielectric loss that causes this? (Its certainly not the R). Its
impossible to say because you can't have one without the other!

Smaller coils, say toilet-paper tube size, don't exhibit this effect -
or at least not to the same degree. But there's a whole different
geometry there and its not optimum.

Nobody really knows exactly what goes on here other than trial-and-error
experiments to see how they behave.

>
> Does wire coating make a difference regarding the dielectric? Or is it
> another capacitance-altering effect?

Yes it does. One of the tests on a good high Q coil is to set it up on a Q-meter then touch a piece of your coil-form material (or wire-insulation) to the coil and see how it behaves on the Q-meter. It shouldn't move. Lossy core material/insulation will cause a visible effect with this test. I'll reiterate in case someone jumps in and reads this without reading the earlier parts of the thread...you won't see this happen with a low-q coil but as you get higher in Q it becomes more and more evident. In fact, with a big solenoid coil and Q>500 you pretty much have to tie the sample material onto the end of a stick to do this test because of hand effects. Not to be confused with resonance detuning effects.

There's no good rule of thumb for insulated wire other than a test like this. There's quite a bit of insulation material in 660-strand litz and thats darn good wire. No way to make a comparison because BARE litz can't exist! I don't think I've ever heard a comparison made between say bare 16-18 wire vs enamelled. I tend to think any difference would approach the 'too difficult to evaluate' range.

47 CFR 97.3(a)(25) or 47 CFR 97.111(b)(6) states that a information
bulletin
has to be directed to amateur radio operators, consisting solely of
subject matter of DIRECT INTEREST to the amateur service.

First let me quote Dan/W4NTI

"Tell me Toad, what has CB got to do with this discussion? Other than the
obvious fact that it is where you learned all you "know" about Amateur
Radio."

Thanks Dan, I couldn't have said it better.

Todd I seriously doubt that you have anything to say that would be of DIRECT
INTEREST to the amateur service. You MIGHT have something to say that would
interest
a bunch of dumb, narrow-minded, cry-baby, half-wit, CB operators. But I
doubt it.

One last thing,
since an_old_friend doesn't have a call sign his/her opinion is of NO
relevance in an amateur radio news group.
Just my 2 cents.

First off Doc, how would you know, have you heard my bulletin??
Secondly and this is the important part, the FCC has stated it is up to
the control operator of the station transmitting the Information
bulletin to determine if it's of interest to the amateur radio service,
NOT the people listening.

I read it through twice and no where did I read the words "ARRL Admits Mistakes..." or any other such language.

They DID say they were continuing to "tune" the proposal and were working with Amateur groups to refine their proposal after their previous requests for comments.

Isn't that what an essentially democratic organization is supposed to do?

No where in there did I see "The ARRL 'says-so', therefore that is that", either.

Q. What is an "information bulletin"?

A. The term is defined in Section 97.3. It is a message directed only
to amateur operators and consists solely of subject matter of direct
interest to the amateur service. The control operator of the station
transmitting an information bulletin is responsible for determining
that the subject matter is of direct interest to the amateur service.

That's the cite that you were too lazy to paste. There's a subtle but
very important difference between what it says and what you purport it
to say.

It says that you, the control operator, are responsible for
determining that the subject matter is of direct interest to the
amateur service.

It doesn't say you get to decide that it is. You must ensure that it
is.

You can be sure that if the FCC interprets your content as not of
direct interest to the amateur service (most likely based on
complaints of listeners) you will find yourself spending lots of time
and money explaining why it wasn't.

A bunch of radio cops with nothing better to do. Interference in GMRS/FRS
bands by the majority of people is very space confined. And, since they
are shared by all GMRS folks, 'turning the channel' is already something
practiced, why not just do this to the 'offenders' too?
Blah.. I can see them now, orange lights/vests.. DF equipment, coffee
breaks..
And why would such a law abiding group <coff> be so concerned about Rino's
broadcasting data, when...it's been specifically approved by the FCC?
Not worth the ink...

No, I was responding to the specific cite you provided.

As to the following, you armchair lawyers love to find passages in the regs and apply them out of context. For example, reading the following makes me think that the FCC has erred every time they've fined Howard Stern and when they fined all the stations after the Janet Jackson brouhaha.

Either they're wrong...or you are. Guess where my money is.

>Stern and when they fined all the stations after the Janet Jackson
>brouhaha.

The ONLY content they are allowed to regulated under the law, even that one is obscene and indecent material, and that's it. As long as it not obscene or indecent the FCC can't regulate it.

3520. Re: N9OGL's future ???

That's not what the passage you cited says.

But you see, they can pretty much do what they want. Of course
armchair lawyers think they can win these cases in court. Go ahead. If
you think you can say anything you want on the air, have a ball. When
you have your ass handed to you by the FCC, give me a jingle, I'll be
glad to hand you a towel.

Thanks again for the reply.

>From what I've read here and elsewhere, I'm debating either making a spider coil or a tight wound 4" cylinder (about 1" length). Is there any significant advantage to either?

I can see with a powered ferrite core how the spacing would make less of a difference... but if tight winding results in a lower Q/other effects, why space the windings for air-core, crystal radio coils, period?

Thanks!
Dave

Obscene and Indecent material falls under a different catagory, which is the federal courts has ruled in the past that obscene and indecent material is not protected by the first amendment, while other content is. As I've stated before show me a final order or a rule that states an Information bulletin can not be opinionated. The FCC IMHO isn't going to go after some moron who gets on the radio spectrum and has a show, and he spews his opinion that a 4 bay antenna is a lot better in his opinion over a J-Pole. The REAL main difference between Broadcasting and an Information bulletin is a Broadcast is directed to the general public as a whole, while an Information bulletin is directed to a certain group. The FCC BELIEVES they can do what ever they want however the federal courts has REPEATIVELY said other wise when it comes to regular content, instead of Un-first amendment content.

Huh? You wrote, "if tight winding results in a lower Q/other
effects, why space the windings for air-core, crystal radio coils,
period?" Do you not want a higher Q? Generally, people try for the
highest unloaded Q they can get, under some set of constraints.

Close spacing lowers the Q mainly because the current in the wire is no
longer radially symmetrical, if you look at a cross-section of the
(round) wire. That raises the RF resistance of the wire. For decent
(low-loss) form material, it's mainly the RF resistance of the wire
that determines the loss and therefore the Q. Generally, highest Q for
a given diameter and length is obtained by spacing the wire about two
wire diameters, center to center, at least for high frequency work. If
you want to use Litz wire, there's an optimum stranding...more, finer
strands are not necessarily better as you get to either lower or higher
frequencies. You should be able to find info on that, if you do some
searching.

There is such a thing as TOO HIGH a loaded Q. Let's say you start off
with a coil with unloaded Q of 500, and couple lightly to it with your
circuit (antenna and detector), so the loaded Q is 250. That means the
bandwidth at 3dB points, if you tune a station at 1MHz, is 4000Hz. If
you've tuned to the center of the station, your demodulated bandwidth
will be only 2kHz. Since the rolloff is gradual with a single-tuned
circuit, voice should be OK, but you'll be missing out on a lot of the
highs. (Mind you, it's not easy at all to get an unloaded Q of 500 at
1MHz!)

Using a very hack crystal radio--coil of about 3" diameter, antenna
just ten feet or so of wire, and an HP zero-bias schottky detector
diode--but into a low-noise audio amplifier--I've been able to listen
to standard broadcast stations a thousand miles away in the evening.
Biggest problem is getting rid of local stations...I'd use probably a
carefully designed three-resonator filter and a much better wire
antenna if I was serious about it.

Cheers,
Tom

Thanks for the information! Is there an advantage to wrapping cylinder
coils as opposed to spider or torroid, other than ease of construction?
I'm debating which one I'd likely get the best result with... I'll
probably make both to try it out, but I'd like to know which one would
'probably' work best.

Thanks again,
Dave

They're going to be very similar in performance. If you do the solenoid (cylinder), go with one wire spacing between turns instead of tight wound. Thats been pretty well proven to give a bit better Q. And 16-18 ga wire is also in the 'best' range for both the spider-web and solenoid. Next step up would be some serious litz wire.

>
> I can see with a powered ferrite core how the spacing would make less

I'm not 100% sure I understand the question....On a rook/basketweave/spider coil there's inherent spacing already. And a solenoid coil will also do better that way...on larger coils. The way I understand it is that there are several factors at work - primarily interwinding capacitance and overall l/d ratio. In practice, as you change one you also change the other. You can compensate one for the other somewhat with a different diameter coil, different gauge wire, etc but the general concensus is that 4"/16-18 wire/~1 wire diameter spacing is pretty close to the best you can squeeze out of that class of coil.

HTH.

I s'pose Reg, the local expert on proximity effect, etc., should pop in here and 'splain it all. Seems, though, like it's wrapped up in practicalities. For low-frequency work you typically want a lot of inductance, so you use fine wire so you can get a lot of turns in a relatively small volume. The wire diameter is small enough that, at low frequencies, the skin depth is large compared with the wire size. I believe you will then find that the proximity effect won't have as much influence on the Q as in the case where the skin depth is a small fraction of the wire diameter. So for a 50Hz/60Hz power transformer, you won't find the turns spaced apart any more than needed for insulation.

You can do a Google search for <conductor proximity effect> and find a bunch of references. The stuff at http://www.national.com/nationaledge/nov04/adc_article.html has some nice pix to show the effect in a bit different environment than we're talking about here.

The Q you actually obtain may depend on so many other things than just the shape of the windings that it's not possible to tell you the "best" geometry. But I can tell you that if you make a large coil of good design, you should be able to get to a high enough unloaded Q that doing better with a different geometry about the same size will give you only small returns on the performance in the circuit. That is, if you do manage to make a solenoid coil say 5 inches long and 5 inches diameter, maybe getting the Q up near 500 if you're careful, then operating it at a loaded Q of 100 (for a 10kHz bandwidth at 1MHz), the loss in the coil compared with an INFINITE unloaded Q is so small as to be nearly unnoticable. If my mental arithmetic is right, it would be about a 1dB difference, just barely audible. And of course, you won't get anything like that much improvement in Q with a different shape. Plus--the standard solenoid shape is easy to construct! (There ARE reasons for wanting higher unloaded Q, if you want to operate at a higher loaded Q and if you want to build a multiple-resonator tuner, but my impression is you are not there yet!)

Cheers,
Tom

Me again...I should have read the later threads before my earlier reply.

Tom is correct about the Q using litz. Some guys have tried 48 ga litz and said it nosedived in performance from the more-common 46 ga litz. I've seen that explained with a critique of skin depth in that the rf resistance of 48 is considerably higher at those freqs. Strand count seems to still be in the 'more-is-better' range at BCB. 660-strand is commonly used in DX sets...although I haven't graduated to that level of expenditure myself :)

As to which to try....in a single-tuned set you won't notice the difference. If you have a strong local BCB station the toroid will do a very effective job of decreasing direct pickup by the coil. You might still want a trap inline, though. Guess which type of coil makes the best trap in this scenario!

My own tests gave a slight nod to the spider web coil. Not enough to be noticeable in reception but enough for "spec-talk". The spider-web is also less prone to proximity effects and even direct pickup because it is 'directional'.

My own dx set which is admittedly tailored for my particular environment uses a toroid on the first tuned stage, a toroid inline trap, then a spiderweb on the detector stage with a loose coupled trap made with a loopstick ferrite. A little of each, huh? I can receive stations within 80-100 kc of the 5kw local that is 1/4 mile away on 1370.

My best recommendation would be to seriously consider a double-tuned set. Its a whole different world than a single-tuned one.

Seems like Ain't-Got-A-Clue Toiddie's buddies are up to the old tricks
again.

I got this e-mail "confriming" taht I had opened an account on
Toiddies' "BBS"...Which I haven't done.

don't be too surprised, but hamlib http://sourceforge.net/projects/hamlib
supports the kachina, so any control program that uses it should work.
Ifnot, there is always the commandline...

Yeah, I'm aware of the support in hamlib. I'm not aware of control programs
that use hamlib - and one would have to be pretty elaborate to handle the
Kachina. As for the command line - well I'm actually a big fan of command
line software (I know how to type) but that is really too clunky to use
with the Kachina. Command line stuff to tell the computer what to do is
one thing, but taking the place of knobs and pushbuttons is a bit much.

I am a new Ham with Technician license and would like to buy/obtain a used 2m or dual band handheld. I would like to get something to get my feet wet in amateur radio, but not spend a small fortune.
Need some advice on what brand, model would be good. Is dual band a good idea?
Where should I look for used equipment, what advice can you give in regards to getting something used that works and not getting ripped off.

If I go for new, is there a good, better, best among brands
with corresponding jumps in prices? What should I look for in the way of features, which are really needed vs. nice to have in a 6M/2M/70CM ?
Thanks
Pak

Peronaly I tend towards the ends of the spectrum either realy basic or
high end

I like the alinco radio single bands fair good prices but with
intrustions manual that well amount a lie calling it instructions

Stay with 2m at first unless you are in Large city where 2m/70cm is a
good idea

recently aquired the Yeasu quad (the ones you mentioned plusweak
222mhz) band mostly becuase I like having lots of bands but i realy the
6m AM ability helped me be sure some thing wereworking on 6m SSB during
feild day

welcome aboard do look at the multi mode rigs like the Icom 706 (and
the other like it) SSB has better range when avalble, and with the new
changes an HF VHF UHF rig is well worth looking at if you can swing it

good greif "this is me"

and claiming you have used a remailer

this is a claim you intend to prove how?

>
> Dan/W4NTI

Do some searching. Dan is NOT the culprit. Stoopid Todd is intellectually
challenged and has not any idea that perhaps another is "dummying" the
posts.
Toddie...it is a good bet that your butt buddie, Roger Wiseman, is behind
the bogus signups. And if Wiseman is not the responsible party, that leaves
one other suspect. W4*** is not above making trouble, either.
Rogie likes you, Todd. Rogie likes anybody who takes it up the back door.

Hi Pak, congratulations in getting your ham ticket!!!
You don't have to spend a lot of money here.
You can pick up an older Alinco DJ-580T.
This is a dual band 2 meter / 440 Handi-Talkie.
You can find them at swap meets (hamfests), QTH.COM,
QRZ.COM and others. Even Ebay is a good source for radios.
If you go with ebay MAKE SURE the seller has good feedback!!!
Anyway. The DJ-580T is a great radio and you should be able to pick up
one in GOOD condition for around $75- $150 on the high side. Another
good HT is
a Yaesu FT-530. Both of these are good choices. The Alinco has louder
speaker audio
because it has a larger speaker, but both are fine. I have both here.
The main thing the Yaesu FT-530
has over the alinco is it can receive to frequencies on the SAME band (
VHF VHF/ UHF UHF/ VHF UHF)
while the Alinco is is strictly UHF and VHF at the same time.
If a "true" dual band is not required (and I mean by "true" is both at
the same time).
There are many radio's to choose from.
Check out the Yaesu FT-50 AND the new FT-60, other GREAT HT's. Speaker
audio
is loud as hell!!!! Blows the other two away in speaker loudness.
They are dual band, 2 meters / 440 but only one at a time. Both are
heavy duty
and are mil spec. You can get the new FT-60 for under $200 dollars.
Anyway, good luck in what ever you get!!
73

Dan may be or plenty of other but anybody standing up and claiming his
is me and that I never use remailers is prime choice

Todd knows there is plenty of fakery around so I do

Tell us why *you* sent it via the reamailer.

While you obviously need no help on that score.

Poor thing.
Roger owns you so badly.

> Rogie likes you, Todd. Rogie likes anybody who takes it up the back door.

But you take it up the back door more often, and since your daddy first
initiated it into the "family tradition."

Good work, another complete ISP...

Hey, keep it up, someone will come along and create a database of
'em...

If ever you get tired, that info is already on the web though...

John

oh yeah, and the business, ever heard of a proxy? A NNTP/SMTP proxy?

ROFLOL!!!!

Gawd, the boy is a regular sherlock holmes!!! But, bit of a slow
one... :(

uhhh, you can proxy though anyone setting up a home mailserver too...

John

Hi I have Yeasu Vx5 that does all as 6M/2M/70CM these are a great little
radio,and you can pick them up cheap

Before you buy anything, take advantage of the ham radio tradition
called "emlmering". In modern English outside of ham radio it's called
"mentoring", a word that did not exist when I got interested in radio.

I used to tell people to walk around their neighborhood and look for
antennas. If you see one, knock on the door and ask if a ham radio
operator lives there. Another tip off is a car license plate that
says "amateur radio" on it.

Since you have a computer, you don't even have to do that. Go to
a callsign lookup website, such as www.qrz.com and do a search on
your zip code. If you see hams near you, you can go knock on their
door, or just look them up in a phone directory and call them.

Since you met some hams at the testing session where you passed
your test (congats on that), you could ask them.

73,

Geoff.

:
: Indeed. Like an msn proxy.

Except that only MSN customers can connect to that proxy. It is a
caching proxy, intended to speed web access. It is not there to
provide anonymity.

AOL runs caching proxies too, and both services log the IP addresses
of the users which go through their proxies. That way, the abuse
department can track down renegade users.

So, Woger, all any of your many enemies have to do is to complain by
the usual means, and you can be twacked down and dumped by your ISP.
You should be familiar with the routine by now after so many other
ISPs have dumped you.

Aw, gee, John. Fess up. You really didn't "forget", did you?
Stagger simply pointed out a fact you were not aware of.

Nice attempt at back pedaling, however.
You almost pulled it off.

Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, AB5K & the AR TelNet Clusters Network, K1XN & GoList, KA1CSL, N2OO, NG3K, W3UR & The Daily DX, N4AA & QRZ DX, WB4UBD, N6HR, K8YSE, KB9LIE, CE6TBN, CN8NK, CO8TW, DL1EK & The DX News Letter, DL1ELY, EI6FR, F5CWU & La Gazette du DX, F5NQL & UFT, F8BBL, G3NKC, G3XTT, I1HYW, I1JQJ/IK1ADH & 425 DX News, IN3QBR, IZ8CCW, JI6KVR & JA-IOTA Islands News, M0ZAK, OE3EPW, OH9MM, PA7FM, SP5XSD, UA2FM, UA4WHX and VA3RJ & ICPO for the following DX information.

DXCC COUNTRY/ENTITY REPORT:
According to the AR-Cluster Network for the week of Sunday, 17th/July, through Sunday, 24th/July there were 199 countries active. Countries available: 3B8, 3B9, 3D2, 3D2/r, 3DA, 3V, 3W, 4J, 4L, 4S, 4X, 5B, 5H, 5N, 5R, 5T, 5V, 5X, 5Z, 6W, 6Y, 7Q, 7X, 8P, 8R, 9A, 9G, 9H, 9J, 9K, 9M2, 9M6, 9Q, 9V, 9Y, A2, A4, A6, A7, A9, AP, BV, BY, C3, CE, CE9, CM, CN, CP, CT, CT3, CU, CX, D4, DL, DU, EA, EA6, EA8, EA9, EI, EK, EL, EP, ER, ES, EU, EX, F, FG, FK, FM, FO, FR, FW, FY, G, GI, GJ, GM, GU, GW, HA, HB, HB0, HC, HH, HI, HK, HL, HP, HR, HS, HZ, I, IS, J3, J6, J7, J8, JA, JD/m, JD/o, JT, JW, JY, K, KG4, KH2, KH6, KL, KP2, KP4, LA, LU, LX, LY, LZ, OA, OD, OE, OH, OH0, OK, OM, ON, OX, OY, OZ, P2, PA, PJ2, PJ7, PY, PZ, R1FJ, S5, S7, S9, SM, SP, ST, SU, SV, SV/a, SV5, SV9, T7, T9, TA, TF, TG, TI, TK, TR, TT, TU, TY, TZ, UA, UA2, UA9, UK, UN, UR, V4, V5, V7, V8, VE, VK, VK9N, VP5, VP8, VP8/h, VR, VU, XE, XU, YA, YB, YI, YJ, YK, YL, YN, YO, YS, YU, YV, Z2, Z3, ZA, ZB, ZC4, ZD7, ZK1/s, ZL, ZP, ZS

* PLEASE NOTE: The report "could" contain "Pirate/SLIM" operations or more likely a "BUSTED CALLSIGN". As always, you never know - "Work First Worry Later" (WFWL).

5D, MORROCCO. Mhamed, CN8NK, reports that a special callsign, 5D6MC, will be used from Morrocco on all bands and modes July 30-31st (probably for the IOTA Contest). The QSL Manager is EA7FTR.

7O, YEMEN. Early last week, Vladimir, UA4WHX, informed OPDX that he is currently in Sana'a, Yemen. He stated that he has "met a number of people responsible for issuing licenses and the Spectrum Management of the Yemen Telecom, as well as two deputy ministers of the Ministry of Telcommunications and Information Technology. Vladimir also states the following:
1. Not a single amateur radio license has ever been issued in Yemen in the past 20 years. He mentions, "For those interested in the authenticy of the fact I can probably provide a written statement of the ministry confirming the fact."

2. Amamteur radio has never been legalized in Yemen. "PERIOD" No legal base, no exceptions so far, but the ministry is sincerely interested in promoting the hobby. They know about it and do plan to pass laws for it as soon as possible.

3. When King Hussein of Jordan was in Yemen, he requested a license which he did not get....

4. The ministry has tried to authorize amateur radio activity in Yemen a few times, but the attempts have always got stuck at the Ministry of Interior offices being higher or lower.

How can you help get Yemen on the air? Vladimir suggests to write letters to both ministries and explain the following:
A. Why amateur radio is good (Explain the benefits).
B. Why there is no danger to their country's security.
C. He recommands sending some printed materials about amateur radio.
The above information is just a small portion of what Vladimir wanted to relay to the ham community. He wrote another (longer) E-mail to OPDX over the past weekend which has more details and suggestions to get Yemen on the air. OPDX InterNet Subscribers will receive this E-mail (complete and unedited; with addresses and phone numbers) as an additional bulletin.

C6, BAHAMAS. Pete/W2GJ and Steve/AA4V are planning two trips to Crooked Island (IOTA NA-113). Look for them this weekend in the IOTA Contest and in the CQ WW SSB Contest in late October. Their callsigns will be C6ARV (AA4V) and C6APR (W2GJ). The operations in the contests will be Multi/ Single effort. Look for each operator before and after the contests on the WARC bands. QSL via their home callsigns (QRZ.com).

CO8, CUBA. Juan, CO8TW, will be in the next IOTA Contest on CW or mixed mode. QSL via IZ8CCW. The log will be on the following Web site after the contest at : http://www.qsl.net/co8tw/

CY0, SABLE ISLAND. Remember to look for operators Joe/W8GEX, Wayne/K8LEE and Phil/W9IXX to be active as CY0AA from Sable Island (IOTA NA-063, CISA NS-004) between July 27th and August 6th. They are expected to be in the IOTA Contest (July 30-31st). Activity will be on 160-6 meters CW, SSB, PSK and RTTY. QSL via K8LEE. The team is still looking for donations to help offset the cost.

EA8, CANARY ISLANDS. Wojtek, SP5MXZ, will be active as EA8/SP5MXZ during the RGSB IOTA Contest (July 30-31st). His operation class was not mentioned. He will be on holiday from from Playa de Las Americas, Tenerife Island (AF-004), now through August 2nd. His activity outside of the contest will be on 20 meters mainly CW, and possibly 17/15 meters CW/SSB. The station consists of IC-706MK2G and Inverted Vee dipole on a DK9SQ portable mast. Suggested times and frequencies: 0630-0730z (EU), 1600-1800z (EU), 2200-2330z (NA); 14040 kHz CW and 14170 kHz SSB (+/- QRM). QSL via his home callsign, either direct (QrRZ,com) or by the bureau. More information and an online log is available at: http://sp5xsd.za.pl/sp5mxz/ea8/

FP, ST. PIERRE AND MIQUELON (Update). Paul, FP/K9OT, and Peg, FP/KB9LIE (YL), should be on the air from Miquelon (NA-032) shortly after 0000Z on July 30th. This is their fifth annual trip to Miquelon and Peg's 10th anniversary as a ham. Preferred band-modes are 30-40-80 CW for Paul and 17-20-40 SSB for Peg, other bands depending on propagation and conditions, 100 watts to single-band wire verticals on the Atlantic Ocean. They plan to be active in the RSGB IOTA Contest as Single-Ops, and Paul will be in the North American CW QSO Party. Visit their Web site at: http://www.mhtc.net/~k9ot
QSL via their home callsigns (same address), direct or by the bureau. Cards received with insufficient return postage will be answered via the bureau. No eQSLs.

GERMANY NEWS (New Prefixes on the air!). Stefan, DL1ELY, explains why you have been hearing all these new prefixes: "Germany has started to assign DQ and DR-prefixes. Beside that, club stations can now apply for 2x1-callsigns like DK2A. All numbers 0-9 mean "club station", there are no 2x1 callsigns for individuals. One more important change: While all DP-prefixes were extraterritorial area before (like DP0GVN, DP0POL in the Antarctica, DP0EPO Munich European Patent Office), now _only_ DP0-DP2 are extraterritorial. 2x1-Callsigns DP3A-DP9Z are "regular short callsigns" for Club stations. Please note there are still no 'DI' hamradio callsigns in DL."

IOTA CONTEST. Don, G3XTT, IOTA Contest Manager, wants to remind everyone that the IOTA Contest takes place over the weekend of July 30-31st (1200-1200z). All are invited to participate. Everyone works everyone, but island contacts are worth significantly more points, and islands are also multipliers. The contest is always popular, with many expeditions to semi-rare and rare islands, allowing participants to increase their score towards the wide range of IOTA awards. To facilitate this, they are working towards allowing contacts made in the contest (provided both logs have been received by the adjudicators) to count towards IOTA awards without the need for QSL cards. The rules are essentially unchanged from last year except that the SWL section has been dropped as a result of significantly lower participation in recent years. The rules do, however, spell out more clearly than before the format for Cabrillo logs which, while not mandatory, are preferred. Nevertheless, they are retaining the two-stage submission process introduced last year, whereby you receive a confirmation E-mail for your log asking you to go to a Web page to validate your category,

etc. This is simply because, if you use a logging program which doesn't overtly support the IOTA contest, your header information may not be sufficient to give them all the data they need. The process should not take more than a minute or so. The full rules can be found at: http://www.contesting.co.uk/hfcc/iota.shtml or via www.rsgbhfcc.org They look forward to your participation in the contest and receiving your log in due course. Photos and write-ups are also appreciated for the Web site - to either of the E-mail addresses below, please. Any questions can be addressed to < iotacontest@rsgbhfcc.org > or directly to Don, G3XTT, at: don@g3xtt.com

IOTA NEWS.....
AS-066. Operators RA0LSO, RU0LAX, RW0MM, UA0LHT, UA0LSK and YLs SWL will be active as RK0LWW/p from Russkiy Island (Sea of Japan Coast Group) during the RGSB IOTA Contest (July 30-31th) as Multi-Op/High-Power/DXpedition. QSL via info on QRZ.com.

AS-117. Kenji, JA4GXS, will be active in the IOTA Contest, July 30th, as JA4GXS/4 from Yashiro Island, Honsyu Coastal Island, Yamaguchi Pref (JIIA AS-117-118).QSL via his home callsign, by the bureau or direct to: Kenji Sasaki, 2-15 Ishikannon-cyo, Yamaguchi-City, 753-0038 JAPAN.

AS-118. A group of operators, with the support of the Kuwait Amateur Radio Society (KARS), are planning to operate as 9K2F from Faylakah Island from July 27th to August 3rd. They will also participate in the RSGB IOTA Contest (July 30-31st). QSL via 9K2RA, by the Bureau (preferred) or direct to: KARS, P.O. Box 5240, 13053, Safat, Kuwait.

EU-003. Joao (John), CU3AA, will be active from Sao Miguel Island (WLOTA 2016), July 26-29th. He will also activate four lighthouses (ARLHS references: AZO-004, AZO-008, AZO-012 and AZO-017). Each one will be activated for one day between 1000-1700z.

EU-011. Operators Nobby/G0VJG, Chris/G0FDZ, Dave/G4BUO, Richard/G7GLW, Ralph/2E0ATY and Simon/M3CVN will be active as homecall/p and G3RCV/p, from the Isles of Scilly now through July 31st. Their activity will be on all bands. QSL via their home callsigns. They will also participate in the RSGB IOTA Contest (July 30-31st) as M8C. QSL via G4DFI.

EU-042. Hans-Peter, DC1HPS, will be active as DC1HPS/p from Pellworm Island (GIA N-23 for the German Islands Award) now through August 7th. Activity will be on 80/40/20/15/10 meters, and include and entry in the IOTA Contest (July 30-31st). QSL via his home callsign by the bureau.

EU-045. Amedeo, IZ0FXW, will be active as IB0MDC from Ponza Island (IIA LT-001 and MIA MI-076), August 14-25th. QSL via his home callsign, direct or by the bureau. Further information can be

found at: http://www.mdxc.org/ib0mdc

EU-052. Feco, HA8KW, will be active as SV8/HA8KW/P from Zakynthos Island, now through August 1st. Activity will be mainly CW, with some SSB. He will also participate in the IOTA Contest using the special callsign J48KW as a 12-hour/Low-Power/CW entry. QSL via his home callsign, either by the bureau or direct to: Provics Ferenc, P.O. Box 620, Szeged-1, H-6701, Hungary.

EU-101. Operators OH6HJE, OH6UV and OH6NJ were expected to be active as OH6AW from Berg<unk> Island over the past weekend. QSL via OH6AD.

EU-128. Gerold, DH6GD, will be active as DH6GD/p from Fehmarn Island (GIA O-01), now through August 10th. Activity will be on 80-10 meters CW, SSB and PSK-31. He also plans to participate in the IOTA Contest. QSL via his home callsign, direct or by the bureau.

EU-130. Members of ARI Gorizia will be active as IU3G from Sant' Andrea (IIA UD-003 and MIA MI-101) during the IOTA Contest (July 30-31st). QSL via IV3WMS, direct or by the bureau.

EU-131. Operators Daniele/IK2SND, Oreste/IK3VIA, Beppe/IN3IKF and Mauro/IN3QBR will be active as IL3U from Venice Lagoon Island Group (Nuovo Lazzaretto Island), July 30-31st. Activity will be during the IOTA Contest as Multi-Op entry. QL via direct to IK2SND.

EU-132. Operators Zick/SP3BJK and Przemek/SQ3RX will be active as homecall/1 from Wolin Island (SPIA SZ-002 for the Polish Islands Award), now through August 2nd. Activity will be on all HF bands, CW and SSB, and the IOTA Contest. QSL via SQ3RX, direct or by the bureau.

EU-170. Operators Sanyi/HA7JJS, Zsolt/HA6PS and Laci/HA6NL will be active from Pasman Island (CI-085) as 9A/HA7JJS, 9A/HA6PS and 9A6NL, respectively, from July 26th to August 1st. Their activity will be on all HF bands and the IOTA Contest. QSL via their home callsign by the HA QSL Bureau or direct (QRZ.com).

EU-176. Operators Staffan/SM3JGG, Tord/SM3EVR, Classe/SM3GSK, Anders/SM3XGV, Hans/SM3TLG and Jorgen/SM3CXS will participate in the IOTA Contest as SA3W from Grimskar Island. QSL via SM3EVR. QSL cards for activity outside of contest should be routed via the operator's home callsign. The team will be on Grimskar between July 28th to 1500z July 31st. ADDED NOTE: The SG3ZZR (EU-176) cards will be mailed during the first week of August.

NA-014. Operators Reg/VE2AYU, Alain/VE2DAV, Fred/VE1FA (ex-VE2SEI) and Helen VA1YL (ex-VE2YAK), along with Bill/VE1MR, Lynn/VE1ENT,

Gary/VE1RGB, Rich/VE1CHP, and Howard/VE1DHD will activate
Whitehead Island from July 28th to August 2nd, during the
annual Islands On The Air (IOTA) Contest. Whitehead Island
(Canadian Islands NB-010, Grid FN-64) is close to Grand Manan
Island, NB. Activity will be on CW and SSB on 80-10 meters.
The special event callsign, VC9W, will be used to commemorate
the 200th anniversary of the first settlers on Whitehead
Island. QSLs will be via _VE1RGB@RAC.ca_ (mailto:VE1RGB@RAC.ca)

NA-082. Tom, K4ZGB, plans to be active from Petit Bois Island (USI
MS-004, Jackson County, Mississippi), as K5Z between now
and August 2nd. His activity will include the IOTA contest.
Activity outside of the contest will be on 40-10 meters.
QSL via K4ZGB (QRZ.com).

OC-NEW. Kardi, YB1TC, the QSL Manager for last year's Peucang Island
DXpedition (OC-237), announced that there are plans to go to
Karimata Island (a new IOTA) for early September 2005. The
group going is looking for support.

SA-069. (UPDATE) Members of the "Atacama Desert DX Group" will be
on the air as 3G1M from Santa Maria Island, August 12-15th.
Operators mentioned are: Nicolas/XQ1IDM, SERGIO/CE1RQB,
Mauricio/CE2WUI, Mauricio/CA2UDO, Luis/CE2UWJ, Danilo/XQ4ZW
and Marco/CE6TBN. Activity will be on 40-10 meters including
the WARC bands and 6 meters. Modes will be CW, SSB, RTTY and
BPSK. QSL via XQ1IDM, by the bureau or direct. Visit their
Web page at: http://www.mdxc.org/3g1m

JW, SVALBARD. Operators Tony/EI2GX, Anthony/EI3HA, Dermot/EI5IQ, Declan/
EI6FR, Emmet/EI7HF and liam/EI7DSB will be active from here July 27th
through August 3rd. QSL to the home callsigns of the station worked.
The callsign JW/EI7HF will also be used in the IOTA contest.

KL7, ALASKA. Hillar/N6HR and Elsie/N7YX will participate in the IOTA
Contest (July 30-31st) from St. Paul Island, Pribilof Islands, Alaska
(NA-028). The callsign will be KL7/N7YX, and activity will be on both
SSB and CW on whatever band is open! QSL via the home callsign.

LIGHTHOUSE/LIGHTSHIP ACTIVITIES.....
Jeff, VA3QSL, will activate the Queens Wharf Range Lighthouse (ARLHS
reference CAN-542) on August 6th (only) as VA3QSL/L, in Toronto for
the National Lighthouse/Lightship Weekend. Activity will be on 40 and
20 meters. QSL to his home callsign, by the bureau or direct (w/SASE)
to: Jeff Richardson, 36 Crawley Drive, Bramalea, ON L6T 2S1, Canada.

The Old Barney Amateur Radio Club will be operating as N2OB from "Old
Barney", the Barnegat Lighthouse (Lighthouse #USA-039) on Long Beach
Island, NJ, (IOTA NA-111, USI NJ001S) on August 6th from about 1300z
until 2100z (rain date August 7th). Most of the operation is planned
for 20 and 40 meters SSB and local 2 meters. QSL via N2OB.

The Old Barney Amateur Radio Club will be operating as W2T from the Tucker's Island Lighthouse (USA-911) in the Tuckerton Seaport in Tuckerton, NJ, during the International Lighthouse Activity weekend August 20-21st, from about 1300-2100z each day. Activity is planned for 40 and 20 meters SSB and local 2 meters. QSL via N2OO.

MD4, ISLE OF MAN. Operators David/G3NKC, Martin/G4XUM, Roger/G4BVY, Royce/M0RHI and Tim/M0BEW (aka "The Manx Kippers") will be active as MD4K during the IOTA Contest as a Multi-Op entry. There may be limited operations before the contest. The team states, "We welcome any requests for band QSYs (SSB or CW) during the contest; from IOTA mults; and will try to arrange skeds if requested by non-mults." QSL as usual via G3NKC, direct, bureau or via the Web page at: http://www.md4k.com

MW0, WALES. Jim, M0ZAK, will be heading off into the depths of Wales, Lleyn Peninsula to be exact, from August 2-5th for a midweek break prior to a weekend's vintage motorcycle race on the Island of Anglesey. Modes will be digital, mainly PSK31 with some RTTY, on 40-10 meters as band conditions allow. He will be signing MW0ZAK/p from a caravan site in Grid Square IO72pt. QSL via M0ZAK.

OH0, ALAND ISLAND. Juha, OH9MM, will be active as OH0Z in the RSGB IOTA Contest (July 30-31st), from Aland Islands (EU-002). QSL via OH5DX.

QSL INFO AND NEW.....
QSL 7L3ATQ via the home callsign, direct or by the bureau. The activity was from Okushiri Island (IOTA AS-147 and JIIA AS-147-005).

Abdallah, 9K2GS, states that W6YJ is no longer his QSL Manager, and effective 7-15-2005, both callsigns 9K2GS and 9K2K go to EA5KB. Please do not QSL DIRECT to Abdallah.

QSL JA6JCL/6 via the home callsign, direct or by the bureau. The activity was from Shimaura Island (IOTA AS-012, JA6 Kyushu Coastal Island and JIIA AS-012-045).

Effective immediately, Mike, KH0AS, has resumed handling his own QSL chores. Send direct to: Mike Adams, 9528 Shoreland Dr SE, Bellevue, WA 98004.

R1MV, MALYJ VYSOTSKIJ ISLAND. Victor Loginov, UA2FM, informs OPDX that a Russian-Finnish team will sign R1MVC and R1MVW from Malyj Vysotskij Island (EU-117) from July 28th to August 1st. Activity will be on all bands including the WARC bands. The group will participate in the IOTA Contest. Operators mentioned are: OH5NE, OH5WR, OH5WS, OH0RJ, RV1AC, RU1AS, RA2FW, RN2FA, RV2FW and UA2FM. Send direct QSLs to DK4VW, and the bureau QSLs to: UA2 QSL Bureau, ROSTO Technical School, ul.Ozernaya 31, Kaliningrad, 236029 Russia. Please note, DK4VW is a maildrop only. All cards are forwarded to Russia and will be answered from Russia.

SPECIAL EVENT. The SKY Contest Club from SUSAM (State Union of Serbia And Montenegro) will celebrate their 10th anniversary on the air using three special callsigns until December 31st. Look for the following

stations to be active on the follow modes: YT310SKY (CW), YZ610SKY (SSB) and 4O310SKY (RTTY). These stations are expected to be active on all HF bands and major contests. They were heard on 30m CW, 20m SSB and 20m RTTY this past weekend. QSL via YT6A.

TK, CORSICA. Stefano, IK5XCT, will be active as TK/IK5XCT now through August 6th. Activity will be on all HF bands. QSL via his home callsign. For a bureau QSL card, visit the following Web page and file out the QSL request form at: http://www.qsl.net/ik5xct

TT8, CHAD (News from PA7FM). QSL Manager Dennis, PA7FM, informs OPDX: "TT8AMO went QRT on the 19th on June after 3 months operation. TT8M will go QRT on the 1st of August after almost 5 months activity. TT8AMO made 10607 QSOs on 160 to 10m, and so far TT8M made close to 7000 QSOs on 80 to 6m. During the last week of his operation there's not much activity expected anymore due to a very busy week. On the 31st the antennas will have to be taken down, so the real last possible day of any operation is likely to be the 30th of July. During office hours the 6m beacon is still running on 50.097 MHz. DXcluster anouncement or the ON4KST chat are the possible ways to get him on the radio when you hear the beacon. QSLs for both operation are available. The backlog for QSLs has been cleared 2 weeks ago, and direct request are being answered within a week after reception. Direct request with 1 GS/1 IRC for EU or 2 GS/1 IRC outside EU will be answered direct. Others with insufficient return postage or no return envelope will be answered by the bureau. A new job for Michael, PA5M, is already waiting (QTH unknown yet) while Pierre, HB9AMO, already starting a new assignment in Niger (5U). Most likely he will not apply for a license there as there won't be much operation time left beside the busy work. As soon as Michael knows more about the new assignment, it will be announced on: http://www.pa7fm.nl
There (on the Web page) to be found also online logs for both operations, some photos and audio files for the TT8M 6m operation."

VY2, CANADA. Scott, W4PA, will be active as VY2PA in the CQ WW DX SSB Contest (October 29-30th) as a Single-Op/All-Band/High-Power entry. QSL via W4PA. Activity will be from VY2ZM's superstation on Prince Edward's Island.

WAP MEETING. Gianni, I1HYW, announced that the WAP (Worldwide Antarctic Program) will hold its 2nd annual meeting along with the 4th DCI Meeting (Italian Castle Award) in the City of Mondovi' (CN), North Italy, next September 17-18th. Forum activities will include QSL Managers, WAP Special Editions, WAP Awards and more... More info about the program, as well as articles and information about Antarctica, are available at:
http://www.dcia.it/
http://www.ddxc.net/wap

ZK1, SOUTH COOK ISLANDS. Gordon, ZL2ARN, will be active as ZK1ARN from Aitutaki (OC-083), South Cook Islands, between July 27th and August 3rd. Activity will be on all bands and modes, but casual style. QSL via his home callsign.

It is true that almost everyone outsources. Intuit also does. I have had very good support people from India with impeccable English and good skills and I have also had horrid ones who could not understand or speak English and did not know what they were doing.

I was told by one TS guy from India... one for Intuit that they are really trained and it is a lengthly process etc. etc. He was excellent. So I think each company decides how much to invest in this outsourced TS. Even if they don't outsource... if they don't train then it is garbage... It is the company's ethics rather than merely outsourcing per se.

There is a new group on google's called Amateur Radio Exprimentation.
It for the discussion of experimenting on the amateur radio bands and
under Part 15.

enjoy

More likely he's got them tied up in the basement and uses their house and savings for whatever ungodly purposes he can dream up...

Maybe to finance that Liquid Oxygen-cooled storage capacitor idea of his...

I wonder if mumsie and popsie knows he got booted from the only local ISP in Taylorville for acting like an idiot on the Internet?

I wonder if they know he had their pictures on his webpage which was linked to other webpages of his that were rife with profanities, insults and assinine behaviour...?!?!

I wonder if he's still flying that illegal ultralight? He'll probably "park" it in some neighbor's tree someday, becoming the laughing stock of South Central Illinois and getting his name brought to the attention of the local FSDO.

Where do you come up with this stuff, Markie?

Ten days ago you were insisting that I was "on the public dole" for disability, and now you come up with this "you are poor" silliness?

I asked you several times where you came up with that "public dole" thing and you never answered...THAT was "libel".

not likely

we have never met not am I a friend of his he has his fualts such as
his use of language when accused of being homosexual (not that anyone
should be making that claim but he doesn't take it well)

other than both being from the Middle west and ham not sure we have
much in common

Isn't pink noise the sound a Gay Pride parade makes?

"Dave" <noone@nowhere.com> wrote in message
news:o-idnW9pIcGOHFTfRVn-pg@crocker.com...
it's already out there. google for 'black noise' and not only do you find
some rap group but also a six-sigma site that uses the term for a non-random
cause of variation. there is also well known 'pink noise' that is often
used in audio testing. and of course there is the generic 'colored noise'.
this site lists not only white and pink but also brown and blue:
http://www.ee.columbia.edu/~dpwe/noise/

There are different possible explanations, just like for many
other words of "Ham Speak". AC6V has compiled a collection of
explanations on his website: http://www.ac6v.com/73.htm

73, <- another mystical one!

It is against Usenet convention to post binary files to non-binary groups. That is why binary groups were invented. Binary files are usually very large should not be posted to regular news groups as these groups are archived forever. The binary groups are purged ever so often, so it isn't prudent to archive large binary files in regular newsgroups.

convention not some sort of rule if there is a reason I see no reason
not to post a binary here on occasion just not a whole seris of them
after all it can hardly be more wasted bandwidth than we see here daily

Ok, I'm back with a couple more questions, since y'all are so
informative... I know it's not a true xtal set if I add an amp, but
wouldn't the best way to minimize the drop between the unloaded and
loaded Q be to add an amp? With a transistor/op amp, it seems that you
could tailor the load imposed on the tank circuit so that it's minimal,
while it seems a headphone load would be pretty significant (depending
on the headphone)...?

Also, I've seen some schematics with transistor-based and Op amp-base
amplifiers. Generally speaking, are there advantages/disadvantages to
either transistors or op-amps as the first-stage RF amplifier?

Thanks again for all the information!
Dave

In my set I simply use an audio matching xfmr. I'm using sound-powered phones which are in the 200 ohm impedance range, and around 50 ohms DC. A little xfmr like the Calrad 45-700 is a good choice. Some of the guys use a switchable matchbox using a tapped xfmr like the Bogen. You can see some of these at http://www.crystalradio.net/

As for an amp...mine plays great into my computer's sound card! I tried a little one chip amp but it only had about 20db of gain which isn't really enough to do a lot of good.

Similar to informal band plans, by gentlemen's agreements
no binary file posting on non binary file newsgroups.
"Binary" newsgroups are usually marked "alt.binaries.whatever"

Yes, by using an amplifier, you can lower the loading caused by the detector. There is an optimum load impedance for the detector output in terms of best output power for a given input signal, and for small signals it's a pretty high impedance (resistance), because the diode's dynamic impedance is quite high for very small signals. You can find info on this at the Agilent web site (at least till Agilent sells off their semiconductor business...). Look for ap notes and data sheets covering zero-bias detector diodes. It gets a bit technical. But the optimum load is, as a rule, rather high resistance. An FET-input amplifier chosen for low input voltage noise is probably ideal. HOWEVER, the crystal radio purists would probably complain that it's not a crystal radio then. As Bill says, a matching transformer can help you out a lot. I've done some work using zero-bias Schottky detector diodes driving DC amplifiers to look for small signals, and can detect signals down in the few tens of microvolts---but the output is in the vicinity of a microvolt at picoamp currents.

The other thing that lowers the loaded Q of the coil is coupling to the antenna. Remember, the antenna looks like some impedance. A resonant antenna looks like a resistance, and an antenna coupler or tuner will make a non-resonant antenna look resistive also. And that resistance, coupled to the tank coil in your crystal radio, will lower the Q. If you couple too lightly, you won't get all the signal you can, and if you couple too heavily, you will lower the Q so much that you won't get the desired selectivity. It's a balancing act. In fact, in a multiple-resonator tuner, the bandpass shape is adjusted by changing the coupling from one resonator to the next, which changes the loaded Q of each resonator. When you have but one resonator, you just change the bandwidth (and signal level) as you change the coupling and loaded Q. Coupling that's too light mostly just changes the signal level, with minimal change in bandwidth. Coupling that's too tight mostly changes the bandwidth, with minimal change in signal level.

Hope these thoughts help some...

Cheers,
Tom

In theory, one could also use a synthetic inductance, aka 'gyrator". I took a gyrator based audio oscillator that used 741's and on LTSpice rebuilt it using 1000 Mhz GBW op-amps. Using an FFT of a transient analysis I had a nice narrow adjustable center frequency peak of about 10 Mhz, But I never did have a chance to wire it up, as I have a baby to take care of.

The Eternal Squire

Not likely....since the term LID was found way back during the landline rail road Morse era, which pre-dates any sort of radio licensing.

Try any of the following:

http://groups-beta.google.com/group/news.admin.net-abuse.policy/msg/fe1d33dcfe1ff321

http://www.faqs.org/faqs/finding-groups/general/

http://en.wikipedia.org/wiki/Newsgroups

http://www.uwasa.fi/~ts/http/nobin.html

Even if you don't want to accept any of these articles as authoritative,
consider the validity of their basic arguments, which I've summarized
below:

- Many sites choose to carry only the discussion newsgroups, as the
binary newsgroups represent the overwhelming majority of Usenet
traffic volume (by an astonishing ratio of 300:1 as of 2002, according
to the first article referenced above).

- Sites can easily limit their news traffic to the much smaller
discussion newsgroups volume if binaries are restricted by convention
to newsgroups that have "binaries" in their names.

- Even if one poster posts "just one little binary" in a discussion
newsgroup, it can add up if others join in, especially multiplied over
many newsgroups (see "Tragedy of the Commons" at:
http://en.wikipedia.org/wiki/Tragedy_of_the_commons).

- If this results in very little meaningful distinction in traffic
volume between discussion and binary newsgroups, such that sites that
carry news can no longer easily filter out the binary material, and
keep their bandwidth and storage requirements to a manageable amount,
many sites may choose to drop many discussion newsgroups, or even drop
news altogether. The latter has already happened at many sites,
including AOL, MSN, and Comcast.

- Sites with more sophisticated filtering than that provided by standard
news server software may choose to filter out all posts that have
binary content, anyway. Already, Google Groups strips out any binary

contents from their newsgroups archive, mostly to avoid becoming a de-facto free porno/pirated-warez server. Even a site like Google, with nearly unlimited communications bandwidth and storage space, is concerned about becoming a transmission vector for copyright violations, viruses, and obscene material.

- It may even be a violation of your ISP's Terms of Service (TOS) or Acceptable Usage Policy (AUP) to post binaries to a discussion newsgroup.

Paul:

google groups are simply not acceptable, wikipedia is not acceptable...

... the other two simply recommend using common sense ... DUH!!!

Sometime around the mid-late 90's myths began to float about, we live in a "echo chamber" and simply because these myths come echoing back in force is only proof that some where successful in generating belief in the myths, are in a remarkable number of people...

Attempting to limit the internet is insane... this has been and will remain a more powerful medium of exchange than many can accept, big deal...

Some dreamed of passing binaries back and forth here, worked and developed methods--for some strange reason--others came later attempting to halt it. I admit this insanity is hard to understand--I simply note it exists... I don't even care what the reason are, or the arguments of the "control freaks" consist of...

Google groups? NO ONE SHOULD EVEN BE USING GOOGLE GROUPS!!!!

3668. UHF receiver with IF monitor point

Newsgroup: rec.radio.amateur.misc
Date: 2005-07-29 00:04:08 UTC
From: Thomas Magma <somewhere@overtherainbow.com>
Message-ID: <YneGe.61831$%K2.46434@pd7tw1no>
Source record: 50640

Does anyone know of a sensitive UHF receiver that has an external IF monitor connector? Something that can be plugged into a spectrum analyzer to look at the in-band spectrum. I guess I'm looking for access to the IF (10.7 MHz or 455 kHz) without having to take a radio apart.

Thanks,
Thomas

The rules to Newsgroups vary from newsgroup to newsgroup, the problem
with this group (rec.radio.amateur.policy) is that it'snot monerated,
or it is and the monerator isn't doing there job.
unless it is a discussion group rule, again the rules vary from
discussion group to discussion group then it alright.

Spoken from a dumbass who hides behind tarrnews.com. And, learn to post
in English.

The rules and protocols for posting vary from newsgroup to
newsgroup.

> > (UNSNIP)...the problem
> > with this group (rec.radio.amateur.policy) is that it'snot monerated,
> > or it is and the monerator isn't doing there job.

Rec.radio.amateur.policy is not a moderated newsgroup. There is
no moderator to ensure compliance with discussion group parameters or
maintain civility amongst participants.

> > unless it is a discussion group rule, again the rules vary from
> > discussion group to discussion group then it alright.

He's got me there. I am sure there was a "point" there, but most
likely just the top of his head.

> > Todd N9OGL
>
> Toad, what's a "Monerator", STUPID!?!

We need to get him and Markie to start submitting their made-up
words to Webster's for deciphering.

I still think Toiddie has a good case against the Taylorville
Public Schools for letting him graduate High School with those horrific
English skills. And Markie's always looking to sue SOMEone...He ought
to go after the school district that let HIM loose.

N9OGL:

Well, there ya go, trouble is, when you give control to an incompetent he is going to focus on control and being a disciplinarian, any real merit is lost. Any successful group must be flexible to the majority's rule, as only if the group is responsive and meets the needs of those is it valid--problems with a "control freak" moderator are the same--most newsgroups with such do not survive--about as many posting as QSO's on HF, they begin dying--moderated newsgroups.

Only reason I don't send binaries, pics etc in moderation here, no one intelligent to uudecode them (also, there has just not been a need), that is obvious and really what the center of most problems we are speaking of--control freaks managing to having halted progress...

then why do you seek to ursurb that role?

Why do you sepnd so much time trying to force other to folow YOUR ideas
of how this group should function

now libeling an entire school system Stevie

and making up more stuff about me

Never looking to sue anyone, not even you, althoughyou do insist on straining that one

but then Your HS let you out without even teaching you to read, properly

(BTW reading is about working what is there not about how you can twist it to mean what you want it to)

"John":

I'm amazed that you are seemingly unaware that almost every e-mail
program on the market decodes UUE automatically. The fact is, you
shouldn't be doing so in a text newsgroup.

Dave K8MN

Dave:

Nothing wrong with moderate use of uuencoding in newsgroup, end of story!

Go control freak on 160-80-75-etc... your false information is NOT welcome here... that is what ham radio has become, it has no place here on the internet...

Ohio/Penn DX Bulletin No. 720

The Ohio/Penn DX PacketCluster
DX Bulletin No. 720
BID: $OPDX.720
August 1, 2005
Editor Tedd Mirgliotta, KB8NW
Provided by BARF80.ORG (Cleveland, Ohio)

Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, AB5K & the AR TelNet Clusters Network, K1XN & GoList, NG3K, W3UR & The Daily DX, K4VUD, N4AA & QRZ DX, AI5P, K8YSE, CT1AXS, CT1EEB, CT1END, DL1EK & The DX News Letter, F5CWU & La Gazette du DX, F5NQL & UFT, F6EXV, GW0ANA, HA5X, I1JQJ/IK1ADH & 425 DX News, IK7JWX, IN3VZE, IZ8CCW, JA1ELY, JI6KVR & JA-IOTA Islands News, OH5DX, SP2BIK, VA3RJ & ICPO and Scottish HAM Portal for the following DX information.

** EDITOR'S SPECIAL NOTICE: This week's bulletin was sent out earlier than normal to accommodate the late RSGB IOTA Contest announcements.

DXCC COUNTRY/ENTITY REPORT: According to the AR-Cluster Network for the week of Friday, 22nd/July, through Friday, 29th/July there were 201 countries active. Countries available: 3A, 3B8, 3B9, 3D2, 3V, 4J, 4L, 4S, 4X, 5B, 5H, 5N, 5R, 5T, 5V, 5X, 5Z, 6W, 6Y, 7Q, 7X, 8P, 8R, 9A, 9G, 9H, 9J, 9K, 9L, 9M2, 9M6, 9V, 9Y, A2, A4, A6, A7, A9, AP, BV, BY, C3, C9, CE, CE9, CM, CN, CP, CT, CT3, CU, CX, D2, DL, DU, EA, EA6, EA8, EA9, EI, EK, EP, ER, ES, EU, EX, EY, F, FG, FK, FM, FO, FR, FW, FY, G, GD, GI, GM, GU, GW, HA, HB, HC, HH, HI, HK, HL, HP, HR, HS, HZ, I, IS, J3, J6, J7, J8, JA, JD/m, JD/o, JT, JW, JX, JY, K, KG4, KH0, KH6, KL, KP2, KP4, LA, LU, LX, LY, LZ, OA, OD, OE, OH, OH0, OK, OM, ON, OX, OY, OZ, P2, PA, PJ2, PJ7, PY, PZ, R1FJ, R1MV, S5, S7, S9, SM, SP, ST, SU, SV, SV/a, SV5, SV9, T7, T9, TA, TF, TG, TI, TK, TR, TT, TU, TZ, UA, UA2, UA9, UK, UN, UR, V4, V5, V7, V8, VE, VK, VK9N, VP5, VP8/h, VP9, VQ9, VR, VU, XE, XU, YA, YB, YI, YJ, YK, YL, YN, YO, YS, YU, YV, Z2, Z3, ZA, ZB, ZC4, ZD7, ZK1/s, ZL, ZL7, ZP, ZS

* PLEASE NOTE: The report "could" contain "Pirate/SLIM" operations or more likely a "BUSTED CALLSIGN". As always, you never know - "Work First Worry Later" (WFWL).

3C0, ANNOBON ISLAND. Elmo/EA5BYP and Vicente/EA5YN announced that they are planning an operation to Pagalu as soon as possible. Complete details have not been released yet, but they are forthcoming. Activity will be CW,

SSB, RTTY and PSK31 on 160-10 meters. Organizer of the DXpedition is once again "DX Club Tabarca Island". There will also be a new QSL Manager for this operation. Their Web page is currently under construction but can be viewed at: http://www.tabarca.es.mn

5W, WESTERN SAMOA. Eugene/W2LU and Stephen/WA2WVI will be active from here. Their tentative dates are December 1-5th. Their callsigns are not known yet. They plan to focus on 160 and 75 meters SSB; check 1850 and 3795 kHz, listening down 5, between 1600-0600z.

60 HA STATIONS TO APPEAR ON 6 METERS. Chris, HA5X, informs OPDX readers: "6m is not allocated for the amateur radio service in Hungary. Haros Radioclub (HA5HRK) has requested a 30 day experimental 6m licence at the National Communications Authority in Hungary for 25 stations. Aim of the experiment is to test whether interference with television broadcast is managable, and if the band can be opened for amateur radio use before terrestrial TV broadcasting comes to an end. The authority has shown a very positive attitude and invited two other amateur radio organizations to take part in the experiment with their sets of stations. This means that a maximum of 60 licenced HA stations may appear on 50MHz in the period 1-30 August. There will be no major mode restrictions (digi modes also allowed), but a limit of 5W ERP (0dB antennas). As the aim of the experiment is to finally get a permanent okay for 6m activities, and the authorities are watching the activity with their equipment, we hope that all stations will keep to the rules, ie. power restriction. No single QSO is worth the whole future of 6m in Hungary."

7Q, MALAWI. Ely, IN3VZE, will be active as 7Q7CE from the southwest shore of Lake Malawi, "Club Makokola", between August 28th and September 16th. Activity will be limited because this is a DX holiday style operation .
QSL via IN3VZE, by the bureau or direct to:
Ely Camin, Corso 3 Novembre 136/2, 38100 Trento, Italy.

EX, KYRGYZSTAN. Mikhail "Mike", UN8GC, will be active as EX7MW from July 30th to August 5th. Activity will be on 80-6 meters. He states that he will be operating from "the shore of the beautiful Issyk-Kul Lake in Eastern Kyrgyzstan." Suggested frequencies are:
CW - 3510, 7015, 10105, 14025, 18070, 21025, 28010, 50110 KHz
SSB - 3700, 7070, 14180, 21200, 28500, 50110 KHz
It is also possible for activity on 144200 KHz on CW, SSB and FM. The station equipment includes computer interfaces for digital modes like BPSK, RTTY, JT6M and others. The transceivers included are: IC-756 and IC-706. Mike states, "If you feel like running a SKED, please send SMS at +996-502-654680. It's worth mentioning that Issyk-Kul is one of the 'white spots' on the map of Kyrgyzstan in terms of HAM activity. So don't loose your chance!" QSL should be directed to the address of UN8GC which you may look up on QRZ.com.

FK, NEW CALEDONIA. Kaz/JA2BDR, Jun/JA2EWE and Ken/JA2KRE will be active from Noumea, between August 19-24th. Their callsigns will be FK/homecall. They hope to operate on 80-10 meters, SSB and CW; no RTTY operation. They

will use only one transceiver with a 500w linear amplifier. Antennas are:
2 element beam for 17/15/12/10m and wire verticals for 80/40/30/20m. QSL
to their home callsigns, direct or the JARL Bureau (good for one year).
JA2BDR - Kazuo Yoshikawa: 4249-4 Shimoebi, Yokkaich, 510-1203 JAPAN
JA2EWE - Junich Matsunaga: 9 Shinmachi, Niiya, Jimokuji, 490-1105 JAPAN
JA2KRE - Kenji Ito: 1457 Yui, Tado, 511-0101 JAPAN

GD6, ISLE OF MAN. Operator Heinrich, DL2OBF, will be active as GD6IA in
the CQ WW DX CW Contest (November 26-27th) as a Single-Op/All-Band entry.
QSL route: POB 1, Peel, Isle of Man, Britisch Isles.

IOTA NEWS (RGSB IOTA Contest This WEEKEND - July 30-31st).....
AF-018. Members of the ARI Cinisello Contest Team will activate
Pantelleria Island as IH9/IQ2CJ during the IOTA Contest
as a Multi-Single entry. QSL via IQ2CJ.

AS-107. Operators E20HHK, E21IZC, HS0GBI, HS1CKC and HS6NDK will
be active as E20HHK/p from Si Chang Island, from July 30th
to August 1st. Activity will include an entry in the IOTA
Contest. QSL via E21EIC.

AS-117. Akifumi, JA4FHE, will be active as JA4FHE/4 in the IOTA
Contest from Yashiro Island (JIIA AS-117-118), Honsyu Coastal
Island, Yamaguchi Pref, July 29th. QSL via his home callsign,
direct or by the bureau.

AS-117. Yu, JR4QUV, will be active as JR4QUV/4 in the IOTA Contest
from Ominase Island,(JIIA AS-117-NEW), Honsyu Coastal Island,
Yamaguchi Pref, July 30-31st. QSL via his home callsign,
direct or by the bureau

AS-169. Activity to Elephanta Island for the IOTA Contest by Basappa,
VU2NXM, and a group of newly licenced amateurs has been cancelled
due to extremely heavy rains in India.

EU-008. Members of the Scottish-Russian ARS (MM0DGR) and West of
Scotland ARS (GM4AGG) will be active from Isle of Mull during
the RSGB IOTA Contest. Isle of Mull awards reference numbers
are: IOSA NH15 and SCOTIA CN10. The team will operate from 2
positions - CW and SSB. CW position will use GM2Z contest
callsign, SSB position will use GM4AGG/p callsign. QSL-cards
for contacts should be sent via RSGB QSL-Bureau or direct
(QRZ.com). This year's team consists of: Jurij/MM0DFV, John/
GM0WRR, Alan/GM4TOQ, Victor/GM0SDV, Ross/GM7WED and David/
MM3IEB. The camp location will be on the Ross of Mull. The
"Ross of Mull" is the name given to the "leg" of land which
extends to the south and west of Mull. It stretches from the
southern foot of Benmore to Fionnphort in the west and is
approximately 20 miles long. The team looks forward to working
you from the Island.

EU-041. Look for station IM0X to be active from La Maddalena Island
(IIA SS-01) in the IOTA Contest. QSL via IK5EKB, direct or

by the bureau.

EU-091. Members of the M.DX.C. and the Salento DX Team A.R.I.(LECCE) will be active as IR7T/p during the IOTA Contest from Isola Grande di Porto Cesareo (LE), (reference numbers: IIA LE-002, and MIA MI-040). Operators mentioned are: Alfredo/IK7JWX, Carlo/IK6CAC (CW), Andrea/IK7YTT, Gilberto/IK7LMX, GianCarlo/ IK7QMJ, Michele/IK7FPX and Enzo/I7PXV (CW) and Marco/IZ7CDE. QSL via IK7JWX, by the bureau or direct.

EU-123. Members of the Crockodile Rock Amateur Group [CRAG] (MM0ROB) will be active from the Isle of Great Cumbrae during the IOTA Contest as GM5C. Operators mentioned are: Bob/GM0DEQ, Robbie/GM0SEI and Jennifer/MM0JJV. QSL via GM0SEI.

EU-124. Glyn, GW0ANA, will be active from Flat Holm Island during the IOTA Contest using the callsign GW8K. After the contest his callsign will be GB5FI. QSL via GW0ANA.

EU-145. Operators CT1AHU/Mor, CT1DRB/David, CT1EEN/Sam, CT1EEQ/Luis, CT1END/Carlos and CT2HCQ/Tiago will use the special callsign CT6C from Culatra Island (DIP AL-001) during the IOTA Contest. Before the contest look for the operators to use their own individual callsigns /p. Activity will be on 80-10 meters on CW, SSB and RTTY, also 2 and 6 meters. QSL CT6C via CT1EEN (QRZ.com) or via the REP Bureau; all others callsigns via their home callsign, direct or by the REP bureau. After the operation, logs and photos will be on the following Web page at: http://ahrap.no.sapo.pt

EU-150. A Portuguese-Spanish Team (CT1APE, CT1CJJ, CT1EEB, CT1FFU, CT1ILT, CT2GLO, EA1CA, EA1DKV and EA4ST) will be active from Ilha da Insua, July 29-31st, including an entry in the IOTA Contest as CQ2I. Outside the contest, the operators will use their homecalls/p. Activity will be on 3.7 MHz to 1.2 GGz on all modes, but expect CW to be the prefered mode. QSL Managers: CQ2I via CT1ILT. All others to their home callsigns. Logs will also be on LoTW. A Web page is available at: http://cfiem.hopto.org/ct1eeb

EU-182. A French-Ukrainian team will be active for the IOTA Contest from the Ankudinov Island in the Delta of the Danube not far from the Romano-Ukrainian border. The callsign will be EM5F. Team consists of: Nicolay/UX0FF, Alexandr/UR5FAV, Vitali/ UR5FGW and Patrick/F6IRF. QSL via UX0FF: NIKOLAY LAVREKA, P.O. BOX 320, IZMAIL , 68609, UKRAINE.

OC-237. Adhi, YC3MM, will be active as YB3ZMI from Madura Island and Sembilangan Lighthouse (ARLHS IDO-079) starting 1700z, July 29th. He will participate in the IOTA Contest.

SA-032. Julio, CA8VJG, will be active from Isla Wellington (DICE ICE-802), July 30th to August 3rd, the IOTA Contest included.

He does not have much experience handling DX and pile-ups,
so please be patient. Look for Julio on 40-10 meters SSB.
QSL via CA8VJG (QRZ.com).

SA-046. Ben/PY7VI and Renner/PY7RP will be participating in the
RSGB IOTA Contest (July 30-31st) as PY7VI/7 from Itamarac&#65533;
Island. QSL via PY7VI (QRZ.com).

KL7, ALASKA. Bill, K4XS, will be active as K4XS/KL7 until August 7th from
Attu Island (IOTA NA-064, USI AK-009S, 3rd S. Central District), Alaska.
He will be working on Attu, so look for Bill in his spare time, CW only.
QSL via his home callsign, direct ONLY (w/SASE). NO bureau QSLs.

LIGHTHOUSE/LIGHTSHIP ACTIVITIES. Look for radio station SN2NP to be active
from the Lighthouse Gdansk - Nowy Port (POL-033), August 18-22nd. QSL
direct or by the via SP2BIK.

PY0, FERNANDO DE NORONHA. Operators Marq/CT1BWW and Juanca/EA2RC will be
active as PY0/homecall from August 1-14th. Their bands/modes of activity
were not provided.

QSL INFO AND NEWS.....
Paul, F6EXV, reports that he is almost up-to-date with replies to
direct requests for QSL cards for WH8/F6EXV and WH6/F6EXV. He will
now confirm the rest of the log via bureau. Unless you want the card
quickly and are not a member of your QSL Bureau, Paul would appreciate
if no further direct requests would be sent to him as all contacts
will be confirmed. The log can be checked on his Web page at:
http://www.f5kbw.org/pagesperso/f6exv

Rick, AI5P, reports that all direct QSL cards received for ZK1APX
have been answered. Those with multiple cards for the other callsigns
from his trip will be answered when he gets the other QSLs. He mentions
that the QSLs for the other three callsigns (ZL7/AI5P, A35PX and 5W0HR)
have been designed, and the order was placed for printing the week of
July 18th. The cards are coming from Europe and normally take 6-8 weeks
for him to get them.

Charles, K4VUD, reports that over the past three months, his dear wife
and he, have hand written QSL cards and replied to over 5,000 cards
that had been back-logged (mostly K4VUD). He states (as July 26th),
every single QSL card that has come in to him has been answered via
the bureau or direct mail. Callsigns involved are: K4VUD, HS0ZCW,
XW1UD, A52UD, 9N1UD, 9N7UD, V26V, AC4TT, KG4FPK and VU3CHE. He thanks
everyone for their patience if they were waiting.

S92RI QSLS. All the received direct cards are now answered and in
the mail. The team is now working on the bureau cards. QSL via CT1APE.

QSL MANAGER WANTED. The Aland Islands contest station, OH0Z, is looking
for a QSL Manager. If interested, please contact Ari, OH5DX, at:
oh5dx@sral.fi

TO0, REUNION ISLAND. Members of the Association R&#65533;unionaise des Radio-amateurs (ARRA) will be active as TO0R from Reunion (AF-016) during the RGSB IOTA Contest (July 30-31st) as a Multi-Op entry. QSL via FR1GZ.

ZK2, NIUE. Eugene/W2LU and Stephen/WA2WVI will be active as ZK2LU. Their tentative dates are November 14-30th. They plan to focus on 160 and 75 meters SSB; check 1850 and 3795 kHz, listening down 5, between 1600-0600z.

>google groups are simply not acceptable, wikipedia is not acceptable...

You asked for links, I gave you links.

I realize that it is a common practice on Usenet to criticize the source, and not the merits, of the ideas presented. That's why I summarized the arguments and invited you to consider their validity independent of sources and personalities. The invitation is still open...

>... the other two simply recommend using common sense ... DUH!!!

Sometimes it is necessary to repeat good common sense, even package it in easily understood summaries, especially in a community where even basic common sense is lost on some participants. Common sense can also serve as a useful gateway to more subtle and complicated concepts. I liked Professor Timo Salmi's concise article, especially the graphics in front of the bullet points. I even think he would be flattered that you find his words to be common sense. I only wish that his command of idiomatic and colloquial English was sharper (he's Finnish), so that his writing would be more approachable and familiar to the average Usenetter.

>Sometime around the mid-late 90's myths began to float about, we live in a

>only proof that some where successful in generating belief in the myths, are in
>a remarkable number of people...

>Attempting to limit the internet is insane... this has been and will remain a
>more powerful medium of exchange than many can accept, big deal...

Ah yes, Power To The People, and all that. Just don't forget that without the cooperation of many large ISP's, communications backbone providers, and hub server sites, what we recognize as Usenet would quickly collapse. Such entities are already enforcing de-facto policies by dropping binaries and cancelling SPAM. If the hub sites don't carry it, that means that their downstream sites won't get it either. Posting binaries in this newsgroup may subject it to powerful, and potentially undesirable, forces beyond your (and my) control.

>Some dreamed of passing binaries back and forth here, worked and developed
>methods--for some strange reason--others came later attempting to halt it. I

>admit this insanity is hard to understand--I simply note it exists... I don't
>even care what the reason are, or the arguments of the "control freaks" consist
>of...

So you don't even want to listen to any arguments other than your own?
Well, that does explain your reaction.

>Google groups? NO ONE SHOULD EVEN BE USING GOOGLE GROUPS!!!!

Why not? Oh, I realize that the current Beta is in many ways inferior
to the former Google Groups. I also dislike having to crunch on its
various bugs during the Beta rollout. But for many on the net,
precisely because of the 300+ GB of binaries per day that are being
thrown back and forth, their ISP's simply don't want to deal with
Usenet, and thus Google Groups is one of their only access points to it.
It's even free. My postgraduate alma mater, unomaha.edu, recommends
that its students who want to read Usenet go to Google Groups, as
news.unomaha.edu went away several years back. My employer also wasn't
interested in running the necessary multi-Terabyte disk farm and
dedicated T-1 or T-3 links either, and gave up newsgroups at about the
same time.

Also, where else are you going to find 23+ years of archived articles?
I still have Usenet news, and a good newsreader (nn), through my ISP
from home. Still, I often find myself going to Google Groups for
archival material, advice on specific questions (avoiding the flamage
that usually contains words other than the specific key words for which
I am searching), as well as a cross-check on the propagation of articles
I post locally. For this newsgroup, I find its long-term memory
invaluable to separate the wheat from the chaff, and the experts from
the kooks.

Paul:

I realize YOU wish to see binary banned, I realize YOU are NOT alone...

I think you can probably come up with a lot of reasons YOU think they should be banned--and are good enough, but, freedom of exchange over-rides anything you can come up with! end of story...

But, they are not good enough reasons to block the exchange of ideas, there is no "gentleman's agreement", there is a bunch of cheap-shot idiots like you attempting to push your control on the mindless.

You think if you argue long enough and hard enough you may pull the wool over the simple minded masses eyes.

This is the internet, it was founded on the idea of free, un-hindered exchange of information and data--you are best suited for the amateur bands where the common mode is to suppress freedoms through regulations--GO HOME, DO NOT DARKEN OUR DOORSTEPS!!!

You are nothing but a simple idiot we have seen before, and dealt with...

John,
Since you don't use a callsign, I believe you are not a licensed amateur radio operator.
I wonder why so many unlicensed people (mostly CB'ers) post their opinions in Amateur Radio groups?

I believe that most licensed amateur radio operators, don't care what the opinions of unlicensed people are about amateur radio. I know I don't care.

And as for the trolls who say "I don't use my callsign on the internet because of privacy concerns", that's just another way of saying that they are unlicensed CB'ers without a callsign.

The internet is big enough for all people to post their opinions. I am sure there are many news groups dedicated to CB'ers. They should use them instead of Amateur Radio groups.

Dr. Ace:

Why would you go though that whole spiel, then turn around and give me your opinion. I question whether you even bother to pay attention to yourself. Or, whether you have the mental horsepower to command attention at all?

Obviously you are correct and your opinion is worthless, and insane exuberance and energy drove you to the effort of posting it--most likely, however, we are in agreement.

Now, back to your tea leaves and psychic predictions...

Wogie had some minor surgery last week. Of course he won't tell you, but he did. The outpatient surgery was a success from what we have been told.

The doctor said that Roger's first question, after coming out of the anesthesia, was to ask if his sex life will be normal.

The doctor was a bit confused at first. He told Wogie that this was the first time a patient has asked him this after a simple tonsillectomy.

Congratulations on obtaining your Tech license. I have had mine about 3

months. Before I made my purchase I went to http://www.eham.net/reviews

and read reviews on radios I was interested in purchasing. These
reviews are posted by HAMS who own the equipment you are interested in.

I found the information invaluable. After much research I ended up
buying a Yaesu (Vertex Standard) VX-150 2M HT from Ham Radio Outlet for

$119 and free shipping. Best of luck to you and enjoy your new hobby!

Actually they didn't drop the code, but simply waive the Morse exam for those who score over 80% on the Basic exam.

If you pass the Basic exam at 70% or greater (but less than 80%) you can still gain HF access by passing the 5WPM Morse exam.

Dr. Pepper:

Ham license? Well, that makes one a glorified CB'er now doesn't it?

I realize you think a ham ticket is some great accomplishment, something with signifies that individual has some mental acuity or powers above mere mortals.

All that is, is a damn hobby license, get a clue.

If you expect a ham license to demand some type of respect for its' possessor--you are sorely mistaken. Some complete ignorant jerks possess these things. Get a MS or doctorate in a science of math field, that is what you really need...

That is all I was pointing out, and the fact you don't seem to have a clue to those facts...

From the Radio Amateurs of Canada News Bulletin 013-05E

>Date: Fri, 29 Jul 2005 14:51:44 -0400
From: RAC-Bulletins from HQ
To: RAC-Bulletins
Subject: RAC Bulletin 013-05 Industry Canada Introduces
Alternatives to Morse Requirements for HF.

Industry Canada Introduces Alternatives to Morse Requirement
for HF.

Per Canada Gazette notice DGRB-003-05 22 July 2005, Industry
Canada has adopted elements of the RAC "Proposal on Morse Code
and Related Matters" and has removed the mandatory requirement
for the Morse Qualification for access to the HF bands below
30 MHz.

Effective immediately, amateurs certified with BASIC
Qualification prior to 2 April 2002, and amateurs certified
with both BASIC and ADVANCED Qualifications, may operate on
HF. Amateurs with BASIC only Qualification certified after 1
April 2002, and who achieved a pass mark of 80% or greater,
will also be allowed to operate on HF.

Amateurs certified BASIC only Qualification after 1 April
2002 having achieved less than 80% pass mark, will either have
to qualify in Morse, write the Advanced or re-write the Basic
examination to obtain HF privileges. This latter requirement
is related to a decision to increase the BASIC examination
pass mark to ensure that candidates have been tested in all
areas of the syllabus.

For details, see the Canada Gazette notice at:
http://strategis.ic.gc.ca/epic/internet/insmt-gst.nsf/en/sf08435e.html

and the "Latest News" page on the RAC web site at
http://www.rac.ca/news/index.htm.

In light of the likelyhood that all US Amateur Radio testing may soon become code-free, this 16-year-old article from WA6ITF has new applicability.

GEARVAKf Research Basis of No-Code Tape

Turlock, California-- April 32, 1989 - In a surprise announcement that has completely rocked the foundation of the educational community, the Wet-Link C.B. Radio Network has prematurely introduced a new "No-Code CW Training Tape Cassette' which was developed using lack of research material supplied by the world famous Gorbinsky Learning and Forgetting Center of Ohio.

This GEARVAKf-sponsored facility is the hub of the GEARVAKf-funded research into "things."

In a 1955 report authored two decades before the center was opened, it'sformer Director of Research Into Things, Dr. R. U. Kidding, PhD. (phud), posed the question: "Why is the sky blue and what does this have to do with learning morse code?"

Using grant monies provided by the GEARVAKf Grant Monies Institute to Research Things, Dr. Kidding attempted to contact the late Samuel F.B. Morse to ascertain the answer. By 1966, Dr. Kidding had discovered that Morse had been dead for several decades and therefore was not a plausable source for garnering his information.

While Dr. Kidding never did learn why the sky is blue, his 1979 paper titled "To Code or Not to Code--Is That a Question?" went unnoticed by the communications community for almost two decades, mainly because it as written in a VIC-20 computer, printed in 23-letter columns, and looked like a grocery list. The paper was resurrected about four days ago by the production staff at Wet-Link C.B. Radio as an excuse to put out a useless tape cassette to teach people No-Code at 0 WPM. Hosted by Niles East, the cassette is designed to instruct the listener and impart enough knowledge so that he or she can pass the Morse Code portion of the FCC No-Code ham radio exam.

Since nobody in their right or left mind would buy such trash, the only way to get one is at the WESTLINK REPORT/220 NOTES booth at the 1989 Amateur RadioVention in Dayton, Ohio. The tapes are almost for free, but not quite. GEARVAKf members are advised to show their lack of ID cards while non-members need not.

m 49 yrs old I want to get rid of masturbation. -I love a girl sheloves me since 4 yrs.But now I m thinking that I shouldn't marry her because may be I will be unable to provide her with a child.

I have 2 problems 1.I m 49 yrs old guy actually Ireally want to get rid of masturbation, I have prayed a lot to get rid of that malady. I m doing masturbation for 34yrs. Kindly tell me a way so that I can get rid of this forever. I m actually fighting SATAN for a long time so that he couldn't come over me. I also offer prayer. 2 .I actually love a girl she also loves me since 4 years. We will easily get married after my graduation at Devry our Parents are also happy. But now I m thinking that I shouldn't marry her because may be I will be unable to provide her with a child because I m involved in masturbation for a very long time. I m not physically weak. I don't want to ruin any one's life. Plz help me she is demanding me to marry her I also can't tell her that I m involved in this malady for a long time. Plz answer in detail.

Previous posters have commented that the HF bands are populated by Seventy-Somethings who oft compare their surgeries with their fellows. Well, this is not endemic to the HF bands.

Case in point. This afternoon three of the youth challenged Old Timers tied up a local repeater as they compared notes and even argued over whose heart surgery was the worst. They droned on and on about the incisions made in their legs, their chests, and even went into graphic detail about the drainage tube that had been implanted in one of their abdomens.

And it this was not depressing enough, one of the Codgers went on to regale the listeners with details of his wife's cancer and chemo treatments and detailed the prescription drugs his wife uses.

Come on, guys. My heart goes out to you, but MUST you discuss it for hours on end? On a repeater? Or anywhere? These oldsters are understandably caught up in their dilemma but someone, some day, is going to have to ask them to please, please, stop.

These Oldsters, all Extra licensees, have no idea how depressing it is to listen to them.

And, guys. When someone asks you how you are doing, don't go into an hour long history of your medical trials and health tribulations. Spare us the details and the resultant depression. Please?

Hans, perhaps now amateurs can learn Morse Code without having
unnecessary distraction/hurdles to jump through like the 5WPM, 13WPM,
or 20WPM barriers.

How long will it take the code teachers and code advocates to catch on
to the concept, or will they coninue on with the stepped hoops?

"Stepped hoops"? In my experience, people tend to learn Morse not in steps, but by gradual increases. Granted that there are some "plateaus" (approximately 10WPM and 25WPM) but these are found to be related to the "mental mechanics" of learning.

Up to about 10WPM trainees can still "count the dits", so moving beyond that speed requires them to learn to recognize the "sound of the character" without deliberate "counting the dits". This is what makes the Farnsworth training method effective, in that the trainee is early acquainted to the "sound of the character" at the higher speeds.

The 25WPM plateau seems related to sublimating copying to a "middle conscious" level, where the characters flow at an almost sub-conscious level from the ear to the fingertip without active thought about the actual characters heard.

Like I said...

Maybe Morse can go back to being an encoding scheme, and Farnsworth can
go back to being a teaching method. And maybe without artificial
testing steps, Morse can develop more along the lines human learning
and consciousness.

b.b.:

The internet is wonderful. I just completed an exhaustive search and located that CW training tape in question, I downloaded it in .mp3 format and listened to it.

Don't bother with getting it yourself, when I played it, all it said was, "Grab a BEEG RADIO (cb & leen-e-air) and go to it, if you want to have fun.

Then it asked for a "donation" to be sent to the arrl for the tape!

There was also a disgusting ad on the tape (the background sounded like it had been recorded at a flea market), some old ham trying to sell bicycle seats which had only been sniffed one time before!

Keep your money!

John

Sigh, I hope to get to this level eventually. I'm at the point where I'm just starting to "hear" words like tnx, abt, the, fer, qsl, qsb, name, op, rst, etc. rather than spelling them in my head.

Agreed ..... I was tuning across 75 the other night just too see if my old receiver worked ....heard some health stuff and a discussion on using a baseball bat for sexual satisfaction ..... oh well I guess this is the bum society ...ya know I never really heard or had a QSO on CW that I remember that dealt with health problems ..... although a fellow on the Isle of Mann would tell me about his hangovers on Saturday morning ......

73 all ..... KI3R Tom Popovic Belle Vernon Pa.

Nice try.

I've been battling the "age" thing for a bit. I had to take a job well below my capabilities, but I took a particular job. I was putting a pallet atop a stack of pallets. I put one end up one the stack, picked the other end and a kid came up and started to grab the side of it. I figured he wanted to help. Nope, he grabbed the pallet and pushed it atop the stack saying "take it easy; you're too old man!".

Well, I grabbed another pallet, picked the thing up and threw it atop the stack. Then I told him that neither he nor I had gloves and I didn't particularly wish to get any splinters in my hands. I should have challenged him to see who could do 25 push-ups in less time. Guaranteed I buryl him. 50 could be dicey if he was in good shape.

The next time someone says "we don't type anymore, we use word processors", I'm going to suggest they bring their best on. Microsoft Office or Star office. Either one. I can type 65 words per minute without error on a bad day with a hangover and can do a bit better if I get upset. I have pushed a teletype to 92 words per minute (on a 100 word per minute machine - dang thing fights you!). I can handle a little more than 65 on a simple keyboard. A fair amount more.

I can also add/subtract a few numbers faster than the kids can punch the numbers into a calculator. Found that out plenty of times.

Direct your whines to the extra-lights that only had to take a 5 word per minute exam. I took 20 (and passed) 3 times - once for my commercial telegraph ticket and twice for my extra (once in 1966 and once in 1993 after I let my tickets expire). BTW, the code doesn't really matter either. I've found that the kids that want to try and find a way to push the oldsters aside really want to find a way to artifically get a job; they often don't want to work. I know. I won't drive folks to work anymore after one guy was drinking a beer on the way *in to* work! No open containers in my car. No drugs, either.

Now, I am going to head off next week to repair a road sign. The pay isn't great, but not bad ($25.00 per hour). Hopefully, the problem won't be too bad (sign struck by lightning - the pc, apparently, works).

Kardiac:

If the "powers which be" in the arrl all had their own hair and teeth, a much different mindset would be found in amateur radio.

Indeed, younger fellows would encourage more new hams to enter the hobby. I am sure arrl membership would go up by leaps and bounds also...

While the ancients run it, a lot stay far from the shadow...

Excellent Bert....CW is like music when sent well. It ebbs and flows like a river. A thing of beauty.

Think of it this way....no many folks can talk with their fingers.
